The following spoke: Mr Dalyell, on behalf of the Committee on Budgets and the Socialist Group, Mr Liogier, on behalf of the Group of European

IN THE CHAIR: Mr L. MARTENS

On the proposal for a decision, Mr Dalyell, Mr Lange, Mr Shaw and Lord Bruce had tabled Amendment No 1 proposing the deletion of Article 2. Mr Dalyell now moved this amendment.

Mr Cointat and Mr Springorum spoke.

Amendment No 1 was adopted.

Parliament adopted the following resolution:

RESOLUTION

embodying the opinion of the European Parliament on the proposal from the Commission of the European Communities to the Council for a multiannual research programme of the Joint Research Centre (1977 to 1980)

The European Parliament,

- having regard to the proposal from the Commission of the European Communities to the Council (1),
- having been consulted by the Council (doc. 145/76),
- having regard to its previous resolutions on Community research in the context of the JRC and in particular the resolution on the conditions for a fresh start in Community research at the JRC (2),
- having regard to the report of the Committee on Energy and Research and the opinions of the Committee on Budgets and the Committee on the Environment, Public Health and Consumer Protection (Doc. 283/76),
- 1. Notes that the proposals for the future multiannual research programme form part of an overall concept for a multiannual Community research and development policy as recently drawn up by the Commission;
- 2. Believes that the research activities proposed by the Commission correspond to the guidelines on the role of the JRC recently drawn up by Parliament (2);
- 3. Welcomes the fact that the research activities were selected according to the criterion of being in the interest of the Community and therefore correspond to clearly defined objectives;
- 4. Approves the fact that the direct research programme concentrates on a limited number of research topics, a policy Parliament had often recommended in the past;
- 5. Expresses its agreement with the priority accorded by the Commission to research projects in the energy field;
- 6. Points out that the direct research projects in the new energy sectors (especially solar energy) and the environment sector must play a support role with regard to indirect action in these sectors;
- 7. Takes note of the Commission's statement that the JRC possesses competent and qualified staff for the implementation of these two kinds of action;

⁽¹⁾ OJ No C 147, 29. 6. 1976, p. 3.

⁽²⁾ OJ No C 125, 8. 6. 1976, pp. 16 to 18.

- 8. Calls on the Council, in accordance with its responsibilities, to obtain in future full information on the Joint Research Centre particularly on the scientific and technical qualifications of the staff (1) and to take note of the information provided by the Commission;
- 9. Expects the Council, in its decision on nuclear fusion, not to confine itself to indirect action but also to approve the JRC projects proposed in this field and to state its position in regard to the location of JET;
- 10. Points out that the proposed amendments of the Staff Regulations of the Communities in respect of the future regime for JRC staff will probably constitute only an initial step towards achieving a maximum degree of mobility of research staff;
- 11. Emphasizes again that the lack of a common industrial policy hampers the realization and full implementation of a common research and development policy;
- 12. Calls on the Commission to strengthen, especially in the key research sectors, the policy of cooperation with third countries working on similar projects, and on the Council to simplify the necessary decision-making procedures;
- 13. Believes that the structure of the budget for the future programme shows a more even balance between administrative and investment appropriations on the one hand and appropriations for staff expenditure on the other, and consequently represents a marked improvement; therefore considers it essential that this structure should be safeguarded by providing for the annual adjustment of the total volume of the budget to meet changes in costs and incomes;
- 14. Requests the Commission to submit a precise and readily comprehensible report to Parliament, on completion of the programme, on the progress achieved in implementing the research projects and an evaluation of their cost effectiveness;
- 15. Hopes that the machinery recommended by the Commission for the implementation and reorientation of the programme will be supplemented by checks, and possibly also by expert opinions, as to the completion of the individual sections of the programme;
- 16. Stresses that direct Community research should not only have a pilot function resulting from the coordination of the research policy of the Community but must also, through its implementation, contribute to forging closer links with and among national research projects;
- 17. Requests the Commission to incorporate the following amendment in its proposal pursuant to the second paragraph of Article 149 of the EEC Treaty.

Relations between the Community and Canada

Mr Bersani introduced his report, drawn up on behalf of the Committee on External Economic Relations, on the present state of economic and commercial relations between the Community and Canada and the Framework Agreement for commercial and economic cooperation between Canada and the European Communities (Doc. 213/76) — (Doc. 287/76).

The following spoke: Lord Reay, Draftsman of the Opinion of the Political Affairs Committee, Mr Schmidt on behalf of the Socialist Group, Mr Klepsch on behalf of the Christian-Democratic Group, Mr Nyborg on behalf of the Group of European Progressive Democrats, Mr Mitchell, Draftsman of the Opinion of the Committee on Energy and Research, Mr Dalyell, Mr Cifarelli, Mr Osborn and Sir Christopher Soames, Vice-President of the Commission.

Parliament adopted the following resolution:

RESOLUTION

on the present state of economic and commercial relations between the Community and Canada and embodying the opinion of the European Parliament on the Framework Agreement for commercial and economic cooperation between Canada and the European Communities

The European Parliament,

 aware of the political, economic, historical and cultural ties between Canada and the countries of the European Communities,

- having regard to the communication from the Commission of the European Communities to the Council (1),
- having been consulted by the Council pursuant to Article 235 of the EEC Treaty (Doc. 213/76),
- having regard to the Framework Agreement signed on 6 July 1976 between Canada and the European Communities,
- believing that there is great scope for economic cooperation, reciprocal investment and exchange of technology as also for expansion of trade between the two partners,
- having regard to the report of the Committee on External Economic Relations and the opinions of the Political Affairs Committee, the Committee on Economic and Monetary Affairs and the Committee on Energy and Research (Doc. 287/76),
- 1. Recalls that Canada's position as the Communities' second most important trading partner, her high level of industrialisation and her wealth in raw materials, together with her need for know-how and investment, all make her a natural economic partner for the Communities;
- 2. Considers that these favourable conditions are reinforced by the cultural and historical links which exist between Europe and Canada;
- 3. Welcomes, therefore, the signing of the Framework Agreement for commercial and economic cooperation between Canada and the European Communities;
- 4. Stresses that this is the first bilateral non-preferential agreement to be concluded between the Communities and an industrialized country;
- 5. Stresses that Article III (4) provides that the Agreement shall in no way affect the powers of the Member States of the Communities to engage in bilateral activities with Canada in the field of economic cooperation or to conclude new economic agreements with Canada, and urges that this article should not be interpreted in such a way as to restrict the activities of the Communities;
- 6. Regrets that it has not proved possible to overcome the difficulties encountered with respect to the principle of equal access to natural resources;
- 7. Hopes that existing cooperation between Canada and certain Member States in the field of heavy water reactors will be intensified;
- 8. Hopes that the Canadian Foreign Investment Review Act will not be an obstacle to investments by the Communities;
- 9. Calls for the swift and continuing implementation of the agreement, particularly by such practical means as the exchange of contacts which has recently taken place between the forestry, non-ferrous metal and natural uranium industries of both parties;
- 10. Would welcome, in view of the success of existing contacts between the Canadian and European Parliaments, and of the importance of the present Agreement, the setting up of joint institutions between the two parliaments;
- 11. Suggests that subcommittees begin as soon as possible to tackle the problems of energy and research policy;
- 12. Instructs its President to forward this resolution and the report of its committee to the Council and Commission and to the Government and Parliament of Canada.

Development of the social situation in the Community in 1975

Mr Meintz introduced his report, drawn up on behalf of the Committee on Social Affairs, Employment and Education, on the report of the Commission of the European Communities on the development of the social situation in the Community in 1975 (Doc. 44/76) — (Doc. 164/76).

The following spoke: Mr Van Der Gun, Chairman of the Committee on Social Affairs, Employment and Education, Mr Albers, on behalf of the Socialist Group, Mr Vandewiele, on behalf of the Christian-Democratic Group and Mr Laudrin on behalf of the Group of European Progressive Democrats.

IN THE CHAIR: Mr G. BERSANI Vice-President

Mrs Kellett-Bowman spoke in the continuing debate.

IN THE CHAIR: Mr L. MARTENS Vice-President

The following spoke: Mr Albertsen, on behalf of the Socialist Group, Mr Rosati, Sir Brandon Rhys Williams, Mr Cifarelli, Mr Pisoni, Mr Boersma, President-in-Office of the Council, and Mr Hillery, Vice-President of the Commission.

Parliament adopted the following resolution:

RESOLUTION

on the report of the Commission of the European Communities on the development of the social situation in the Community in 1975

The European Parliament,

- having regard to the report of the Commission of the European Communities on the development of the social situation in the Community in 1975 (Doc. 44/76),
- having regard to the report of the Committee on Social Affairs, Employment and Education and the opinion of the Committee on the Environment, Public Health and Consumer Protection (doc. 164/76),
- 1. Thanks the Commission for submitting such an exhaustive and detailed document;
- 2. Regrets that in view of the steady deterioration in the economic situation in 1975 the European Council was unable to decide on joint action, although in each of its meetings since the end of 1972 particularly that in December 1974 it recognized that 'above all, vigorous and coordinated action must be taken to deal with the problem of employment', while reserving its decision as to whether and to what extent it would be necessary to increase the resources of the Social Fund (¹);
- 3. Realizes how little a report on a period now ended, in this case the year 1975, can say about the current situation, and therefore refers to the continuing preparatory discussions for the tripartite conference on 24 June 1976 (2);
- 4. Notes with astonishment that despite steadily increasing unemployment throughout 1975 (an average increase of 50 % compared with the same period in the previous year), a fall in the number of vacancies (approximately 5.5 million unemployed to 500 000 vacancies) and persistent inflation ranging from less than 10 % up to 26 %, the proposals and demands already made have not been firmly acted upon;
- 5. Urges immediate implementation of the proposal on extensive coordination of employment policy in Community Member States submitted to the Council in April 1975;

⁽¹⁾ Marras report on the development of the social situation in 1974 (OJ No C 239, 20. 10. 1975, p. 29).

⁽²⁾ Glinne report on employment and stability (Doc. 160/76).

- 6. Supports the Commission in its efforts to coordinate exchange of information on unemployment problems, prospects and priorities in each country and advocates joint research into the employment problems of particular groups of workers with special emphasis on opportunities offered by existing national employment policy instruments;
- 7. Notes that, apart from the disturbing overall situation, consideration of methods of overcoming the crisis in the short or medium term is made all the more difficult by the fact that the crisis is a structural rather than cyclical one, all the more serious because of its unequal effects on different sectors and social groups;
- 8. Stresses that in addition to older workers the social groups most seriously affected are young persons, women and migrant workers and that youth unemployment in particular will give rise to long-term social problems, bearing in mind that in some countries of the Community half the unemployed persons are under 25 and are seeking their first job after leaving school;
- 9. Therefore urges the Commission and the Council too take immediate steps to provide Social Fund aid for the training and employment of unemployed youth to adjust the resources of the fund accordingly and to investigate possibilities for voluntary early retirement, if necessary on an experimental basis;
- 10. Considers it particularly important that cooperation between national employment authorities be improved with a view to clarifying the situation on the labour market through SEDOC, the European system for circularizing vacancies and jobs wanted under international clearance;
- 11. Hopes for a concerted policy in the field of general education and vocational training and at the same time an improvement in the quality of vocational guidance, to afford a clearer picture of opportunities on the labour market, and lays particular emphasis on the need for employment authorities to cooperate on cross-frontier movement;
- 12. Insists that the Commission and the Council should take steps to put an end to discrimination against women at work through an explicitly formulated policy of equal treatment for men and women, taking into account the relevant judgments of the European Court of Justice;
- 13. Points out that in view of the structural divergences on the national labour markets, the employment of migrant workers on the present scale will continue to be necessary, and urges the Commission and the Council to put a stop to the distinctions and the occasional discrimination found in national regulations regarding migrant workers, and to afford migrant workers the humanly and economically adequate treatment that is their due;
- 14. Urges the Council and the Commission to ensure that in the event of any amendments to national regulations on family allowances, the purchasing power of lower income groups is not affected;
- 15. Fears that the discussions already held in 1974 and 1975 cannot be continued indefinitely in the same way without overtaxing the patience of the people of Europe, given the paucity of tangible political results so far achieved;
- 16. Therefore makes a most urgent appeal to the Council and Commission to pay heed to the generally held view that solutions to the problems of growing structural, regional and sectoral friction can only have relevance at Community level, and to refrain from further repetitive declarations of intent.
- 17. Instructs its President to forward this resolution and the report of its committee to the Council and Commission.

Unfreezing of appropriations for research activities

Mr Cointat introduced his report, drawn up on behalf of the Committee on Budgets, on the second request for the unfreezing of appropriations entered under certain chapters of the statement of expenditure relating to research and investment activities of the budget of the European Communities for the financial year 1976 (Doc. 273/76) — (Doc. 292/76).

The following spoke: Lord Bessborough on behalf of the European Conservative Group, Mr Dalyell and Mr Brunner, Member of the Commission.

Parliament adopted the following resolution:

RESOLUTION

on the second request for the unfreezing of appropriations entered under certain chapters of the statement of expenditure relating to research and investment activities of the budget of the European Communities for the 1976 financial year

The European Parliament,

- having regard to Amendment No 11 adopted by the European Parliament when considering the draft budget of the European Communities for the 1976 financial year (1),
- having regard to the budget of the European Communities for the 1976 financial year and, in particular, Chapter 33 of Section III, Commission (2),
- having regard to its resolution of 18 June 1976 concerning a first request for the unfreezing of appropriations (3),
- having regard to the Commission's request for the unfreezing of appropriations (Doc. 273/76),
- having regard to the report of the Committee on Budgets (Doc. 292/76),
- 1. Notes with regret that the Council's delay in taking the programme decisions for the JET project and, more generally, in implementing the multiannual research and investment programmes, necessarily results in the piecemeal utilization of the appropriations earmarked for research and thus hampers the continuity of activities in this field;
- 2. Feels that the Council's policy is in conflict with the need for budgetary clarity and transparency;
- 3. Requests the Council to take an overall decision permitting the normal utilization of the appropriations for which provision is made in the budget for 1976;
- 4. Authorizes the unfreezing of four million units of account in commitment appropriations and 1.8 million units of account in payment appropriations (4) for the financing of Community research programmes and regards the unfreezing of these appropriations above all as concrete proof of the Community's intention to go ahead with the JET project;
- 5. Instructs its President to forward this resolution and the report of its committee to the Council and Commission.

on draft supplementary and amending budget No 2 of the European Communities for the financial year 1976

The European Parliament,

- having regard to the preliminary draft supplementary budget,
- having regard to the draft supplementary budget (Doc. 261/76),
- having regard to the report of the Committee on Budgets and the opinion of the Committee on Agriculture (Doc. 293/76),

Parliament adopted the following resolution:

RESOLUTION

embodying the opinion of the European Parliament on the proposal from the Commission of the European Communities to the Council for a Regulation on the common organization of the market in potatoes

The European Parliament,

- having regard to the proposal from the Commission of the European Communities to the Council (1),
- having been consulted by the Council, pursuant to Articles 42 and 43 of the Treaty establishing the EEC (Doc. 512/75),
- having regard to the report of the Committee on Agriculture and the opinion of the Committee on Budgets (Doc. 158/76),
- having regard to the second report of the Committee on Agriculture (Doc. 289/76),
- 1. Welcomes the realization of a simple common organization of the market in the potato sector because of the need to harmonize disparate national regulations so as to be able to ensure unimpeded liberalization of trade in this sector;
- 2. Realizes the special difficulties involved in establishing a common organization of the market in potatoes, particularly in view of the varying production structures in the Member States and the nature of the product itself, which is particularly susceptible to the vagaries of climate and variations in price and yield;
- 3. Approves the principle of making groups of producers responsible for managing supply and stabilizing the market, as well as the measures designed to encourage the formation of such groups; considers, however, that the three-year period for granting initial aid for setting up groups of producers is too short to allow the groups to organize themselves and calls on the Commission to provide for an extension of this period;
- 4. Deplores the inadequacy of the means available for regulating market supply since the producer groups at present control only about 5 % of all potato production and 10 % of ware potato production, a fact which considerably reduces the scope of the Regulation, particularly as regards the effectiveness of the proposed market support measures;
- 5. Considers therefore that regulation of the market in potatoes cannot be achieved until a Community monitoring system is introduced giving continuous information on the quantities of ware potatoes on the market.
- 6. Calls on the Commission to consider other methods consistent with this Regulation of adjusting market supply in such a way that production and marketing are adequately geared to the specific requirements of the consumer;
- 7. Considers that special efforts should be made as regards the processing industry, stressing in this connection the importance of Community action to improve long-term profitability;
- 8. Approves of the market intervention rules which allow account to be taken of the special characteristics of new potatoes;
- 9. Hopes that the Commission will pursue its studies with a view to introducing simpler and less costly alternatives for disposing of surpluses of ware potatoes;
- 10. Insists that the quality standards proposed should be set at a high level so as to discourage the production of inferior quality potatoes and to promote the marketing of good varieties only and that provision should be made at Community level for effective supervision of these standards;

- 11. Considers that the phytosanitary rules in force in the Member States, which are liable to prejudice free trade, should be harmonized, with the provision that precautions against the risk of illness must be maintained;
- 12. Draws the Commission's attention in particular to the importance of guaranteeing regular supplies to the consumer at reasonable prices so as to counter possible fluctuations in volume of production and prices of the kind recently experienced;
- 13. Expresses doubt as to whether the Regulation in the form proposed by the Commission, can lead in the immediate future to a satisfactory balance between supply and demand on the market, but regards the proposal as a point of departure for Community action, which can be backed up by other stabilizing instruments adapted to the special characteristics of the potato market;
- 14. Approves the Commission's proposal, subject to the following amendments;
- 15. Requests the Commission to incorporate the following amendments in its proposal, pursuant to the second paragraph of Article 149 of the EEC Treaty.

on the fifth report of the Commission of the European Communities on competition policy

The European Parliament,

- having regard to the fifth report of the Commission of the European Communities on competition policy,
- having regard to the report of the Committee on Economic and Monetary Affairs (Doc. 243/76),
- 1. Welcomes the Commission's achievement in maintaining progress in the field of competition policy, which has helped to strengthen the common market despite the current severe international economic problems, but deplores the Commission's lack of adequate means and liaison between its departments in counteracting the growing concentration of business companies with their particular contribution to inflation;
- 2. Stresses, however, the need for the Commission to extend the scope and application of its competition policy to ensure that the whole range of Community activity is covered;
- 3. Urges the Commission, therefore, to consider how competition policy might fruitfully be applied to such diverse areas as social policy, the approximation of laws, the relations between the EEC and State-trading countries, the accession of new Member States, the common agricultural policy, fishing policy, and the law of the Sea;
- 4. Regrets the absence from the Fifth Report of any mention of the competition aspects of energy policy, of consumer protection, of credit institutions, of the relationship between Community and national law, or of industrial policy, fields in which competition policy clearly has a role to play and to which the European Parliament has referred in previous resolutions;
- 5. Regrets also that insufficient progress has been made in removing obstacles to competition in the granting of public contracts;
- 6. Notes that there has also been insufficient progress in harmonizing export credits;
- 7. Stresses the importance for the Commission to monitor developments in Member States' national competition policies, with a view to determining whether or not they are in tune with the aims of a Community competition policy, and calls on the Commission to include an analysis of such developments in its future reports;
- 8. Urges the Commission to adopt an unambiguous policy on patent licensing, without which it is difficult for undertakings to align their activities with the requirements of the Community, and reiterates, therefore, its request to the Commission to work out precise guidelines for the content of patent agreements which could both ensure the essential protection for the granter and avoid restraints on marketing contrary to the concept of a single market;
- 9. Wonders why the Commission has not included in its fifth report evidence of its continuing investigations into price discrepancies which might indicate distortions of competition, on which it reported in its fourth report, especially in view of the desirability of competition policy playing a role in combating inflation;
- 10. Supports the Commission's efforts to prevent unfair practices such as price-fixing, as exemplified by its action against United Brands, Hoffmann-La Roche and others;
- 11. Welcomes the new principles for coordinating regional aid throughout the Community which the Commission has worked out, and places the greatest possible importance on the implementation of these principles;

- 12. Calls on the Commission to continue its efforts to ensure that any aids granted by Member States do contribute to the necessary restructuring of the economy, and do not simply preserve obsolete industrial structures or transfer difficulties from one Member State to another;
- 13. Welcomes the Commission's adoption of guidelines for judging selective distribution agreements, but hopes for continued development in this field, with a view to amplifying these basic principles;
- 14. Urges the Commission to investigate and develop the role which competition policy could play in helping small- and medium-sized firms;
- 15. Awaits with interest the results of the Commission's examination of the business conduct of public undertakings, and the Directive which it is preparing in this field;
- 16. Expresses once again its regret that the Council has still not adopted the Regulation on the control of concentrations between undertakings, and urges the Council to adopt this proposal, in the form approved by Parliament, without delay; expects the Commission to continue its investigations into industrial concentration within the Community and to undertake a specific commitment for future action on the proposed merger control Regulation.
- 17. Instructs its President to forward this resolution and the report of its committee to the Council and Commission and to the Governments and Parliaments of the Member States.

MINUTES OF PROCEEDINGS OF THE SITTING OF FRIDAY, 17 SEPTEMBER 1976

IN THE CHAIR: Mr L. MARTENS

Vice-President

The sitting was opened at 9.30 a.m.

Approval of minutes

The minutes of proceedings of the previous day's sitting were approved.

Budgetary procedure for the financial year 1977

The President informed Parliament of a letter in which Mr Lange, rapporteur on the internal provisions for considering the draft general budget of the European Communities, proposed to Parliament that the rules applied for the financial year 1976 be applied again for the financial year 1977.

Parliament approved this proposal.

Directive on the admission of securities to official stock exchange quotation

Mr Bangemann introduced his report, drawn up on behalf of the Legal Affairs Committee, on the proposal from the Commission of the European Communities to the Council (Doc. 556/75) for a Directive coordinating the conditions for the admission of securities to official stock exchange quotation (Doc. 236/76).

The following spoke: Mr Lange, Draftsman of the Opinion of the Committee on Economic and Monetary Affairs, Mr Hillery, Vice-President of the Commission, Mr Shaw, on behalf of the European Conservative Group, Mr Hamilton, Mrs Kellett-Bowman, Mr Molloy, Mr Bangemann, Rapporteur, and Mr Lange.

Parliament considered first the amendments to the proposal for a Directive.

On Article 5, Mr Lange had tabled Amendment No 1 on behalf of the Committee on Economic and Monetary Affairs.

The rapporteur spoke.

As the result of the vote by show of hands on this amendment was doubtful, Parliament voted by sitting and standing, and adopted Amendment No 1.

On Article 6, Mr Lange had tabled Amendment No 2 on behalf of the Committee on Economic and Monetary Affairs.

Amendment No 2 was adopted.

Mr Lange had tabled on behalf of the Committee on Economic and Monetary Affairs Amendment No 3, proposing the insertion of a new Article after Article 19.

Amendment No 3 was adopted.

Parliament adopted the following resolution:

embodying the opinion of the European Parliament on the proposal from the Commission of the European Communities to the Council for a Directive coordinating the conditions for the admission of securities to official stock exchange quotation

The European Parliament,

- having regard to the proposal from the Commission of the European Communities to the Council (1),
- having been consulted by the Council pursuant to Article 54 of the EEC Treaty (Doc. 556/75),
- having regard to the report of the Legal Affairs Committee and the opinion of the Committee on Economic and Monetary Affairs (Doc. 236/76),
- 1. Notes that although the coordination measures in the proposed Directive will allow some progress to be made towards the free movement of capital, they still leave a wide margin of discretion to Member States, thus jeopardizing the very aims of the Directive;
- 2. Calls upon the Commission, therefore, to draw up and submit to the Council, as soon as possible, a further proposal laying down, in a common procedure independent of the national procedures, minimum conditions subject to which an issuer in one Member State may have securities admitted to official quotation on stock exchanges in other Member States without having to fulfil stricter or additional national requirements;
- 3. Notes, moreover, that the Directive does not envisage the coordination of procedural formalities which, in certain cases, may cause substantial delays in dealing with applications for the admission of securities to quotation;
- 4. Asks the Commission, therefore, to take steps to ensure that these formalities are coordinated;
- 5. Believes that public bodies should also be subject to the provisions of the Directive;
- 6. Feels that there should be greater rights of appeal against the decisions of the national authorities responsible for the admission of securities to quotation;
- 7. Asks the Commission to submit to the Council as soon as possible a proposal for a Directive on the freedom of establishment and the freedom to provide services for stockbrokers, as an essential precondition for easier access to the buying and selling of securities at Community level.
- 8. Requests the Commission to incorporate the following amendments in its proposal, pursuant to the second paragraph of Article 149 of the EEC Treaty.
