

Restricted procedure

1. Rijksdienst voor de IJsselmeerpolders, Smedinghuis, Zuiderwagenplein 2, Lelystad, Netherlands — Tel. 03200-99111 — on behalf of the Ministry of Transport and Public Works.

mechanics and a knowledge of hydrology. The relevant data concerning soil mechanics and hydrology will be given in the specifications.

The contractor must be able to carry out the work competently and guarantee his technical and financial reliability.

The contractor must state that he has no objection to plans submitted but not used becoming the property of the principal.

The tenderer should supply the following documents: proof of his firm's inscription in the trade register, a banker's statement showing the firm's financial resources, a statement of total turnover and turnover in construction works over the past three financial years, a list of projects comparable in type and importance completed by his firm over the past five years, stating the value of the projects, the time and place of execution and the name of the principal, a list of references.
 2. Invitation to tender following selection pursuant to the Uniform Aanbestedingsreglement.
 3. a) Almere, a port in Zuidelijk Flevoland.
 b) Earthworks and ancillary work for canals, first phase (specification No 8106).
 The work comprises mainly the digging of canals with a theoretical volume of approximately 500 000 m³ sand and earth. Most of the site consists of ground which has been raised by means of sand. To prevent breaches in the canal and flooding as a result of excessive pressure of ground water in lower strata, the soil should be sealed off and ballast lid based on the contractor's plans. The overall extent of the earthworks will depend considerably on the proposed plans for sealing off the soil.
 c)
 d)
 4. 300 working days. If the work is subdivided into lots it must be completed in phases at specified times.
 - 5.
 6. a) 13 December 1974.
 b) As in item 1.
 c) Dutch.
 7. 1 March 1975.
 8. The contractor must be able to draw up plans for sealing off the soil on the basis of calculations involving soil
 9. The proposed method of construction and sealing will also be taken into consideration.
 10. Payment will be made in monthly instalments. The contractor will be required to pay a guarantee of 2½ % of the contract price as an assurance that he will fulfil his obligations.
 11. 19 November 1974.
-

Restricted procedure

1. The Corporation of Glasgow per the Town Clerk, City Chambers, Glasgow, G2 1DU, Scotland, United Kingdom.
2. The restricted tendering procedure applies and the contract will be awarded to the lowest acceptable offer in competition among selected contractors.

3. a) The site of phase 4 is adjacent to phase 1 bounded by McIntyre Street and Argyle Street.

The site of phase 5 is adjacent to phase 3 bounded by St. Vincent Street, Elliot Street, and Holdsworth Street.

- b) The project, consisting of 188 houses in two phases not adjacent to one another, contains 92 flats in four 4-storey blocks with 11 integral lock-up garages and 96 maisonettes in three-deck access blocks of 9 and 11 storeys with 36 integral lock-up garages, two attached stair/lift towers and two bridge links between blocks. The blocks enclose private and public areas of landscaping, access roads and open car parking.

The 188 houses comprise :

Phase 4 :

Four Storey	Two room — Two Persons	20
-------------	------------------------	----

Phase 5 :

Nine/Eleven Storey	Three room — Four Persons	96
--------------------	---------------------------	----

Four Storey	Three room — Four Persons	45
-------------	---------------------------	----

Four Storey	Four room — Six Persons	27
-------------	-------------------------	----

Total :		188
---------	--	-----

The four-storey blocks are to be constructed of traditional hollow brick outer walls roughcast on outer face with brick cross walls, prestressed concrete plate floors and roof with bitumen felt roofing and timber standard partitions.

The nine/eleven-storey blocks are to be constructed with concrete *in situ* and precast concrete floors and concrete *in situ* cross walls with precast cladding panels on face of external walls with thermalite blockwork inner lining. Flat roof is concrete *in situ* with bituminous felt covering and partitions timber standard.

The contract will include all substructures, drainage, paths, service roads and sewers, etc.

The total estimated cost of the project is £ 1 850 000. The principal nominated subcontracts included in the foregoing estimated cost are for piling work and lifts installation, with an estimated cost of £ 60 000 and £ 20 000 respectively.

The contract will be governed by the standard form of building contract (local authorities edition with quantities — July 1973 revision) as amended by the Scottish supplement, July 1973, together with the corporation standing orders and supplementary conditions.

Tenders will be on a fluctuating basis for both labour and materials.

c)

d)

4. To be completed within 104 weeks of commencement of the work.

5. Where a group of contractors submits a tender on the basis of a temporary association, the Corporation will require each firm in the group to become jointly and severally responsible for the contract before acceptance.

6. a) 16 December 1974.

b) The City Architect, Department of Architecture and Civic Design, 20 Trongate, Glasgow, G1 5EY, Scotland, United Kingdom.

c) English.

7. 31 December 1974.
