COUNCIL DECISION
of 25 April 2002
concerning security in connection with football matches with an international dimension

(2002/348/JHA)

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on European Union, and in particular Article 30(1)(a) and (b) and Article 34(2)(c) thereof,

Having regard to the initiative by the Kingdom of Belgium,

Having regard to the opinion of the European Parliament ⁽¹⁾,

Whereas:

- (1) Under the terms of Article 29 of the Treaty, the European Union's objective shall be to provide citizens with a high level of safety within an area of freedom, security and justice by developing common action among the Member States in the field of police cooperation.
- (2) As a result of various international and European competitions and large numbers of travelling supporters, football is becoming highly international in scale. That international scale makes it necessary to approach security in connection with football matches in a way extending beyond national borders.
- (3) Football should be regarded not just as a potential source of problems regarding breaches of law and order or security but as an event which, in spite of the possible risk, has to be handled efficiently.
- (4) In particular for the purposes of preventing and combating football-related violence, it is important to exchange information, so that the competent police authorities, and the authorities in the Member States, can make proper preparations and provide an appropriate response.
- (5) For exchange of information in relation to a football event and with a view to the necessary international police cooperation in connection with football matches with an international dimension, it is crucially important to establish a national football information point of a police nature in each Member State.
- (6) Having regard to the adoption by the Council of Europe of the following acts: the Convention of 28 January 1981 for the protection of individuals with regard to

automatic processing of personal data, Recommendation No R(87)15 of 17 September 1987 of the Committee of Ministers regulating the use of personal data in the police sector and the European Convention of 19 August 1985 on spectator violence and misbehaviour at sports events and in particular at football matches.

- (7) On 26 May 1997, the Council adopted Joint Action 97/339/JHA with regard to cooperation on law and order and security ⁽²⁾, and on 9 June 1997, a Resolution on preventing and restraining football hooliganism through the exchange of experience, exclusion from stadiums and media policy ⁽³⁾.
- (8) Furthermore, on 6 December 2001, the Council adopted a Resolution concerning a handbook with recommendations for international police cooperation and measures to prevent and control violence and disturbances in connection with football matches with an international dimension, in which at least one Member State is involved ⁽⁴⁾,

HAS DECIDED AS FOLLOWS:

Article 1

Establishment of a national football information point

1. Each Member State shall set up or designate a national football information point of a police nature.
2. Each Member State shall notify the General Secretariat of the Council in writing of the details of its national football information point, and any subsequent amendments, under this Decision. The General Secretariat of the Council shall have them published in the Official Journal.
3. The national football information point shall act as the direct, central contact point for exchanging relevant information and for facilitating international police cooperation in connection with football matches with an international dimension.

⁽¹⁾ Opinion delivered on 9 April 2002 (not yet published in the Official Journal).

⁽²⁾ OJ L 147, 5.6.1997, p. 1.

⁽³⁾ OJ C 193, 24.6.1997, p. 1.

⁽⁴⁾ OJ C 22, 24.1.2002, p. 1.

A Member State can decide to carry out certain contacts on football-related aspects through the services competent for those specific aspects, on condition that the national football information point is supplied, promptly and adequately with a minimum of information.

4. Each Member State shall ensure that its national football information point is capable of fulfilling efficiently and promptly the tasks assigned it.

5. This Decision shall apply without prejudice to existing national provisions, in particular the allocation of powers among the different services and authorities in the Member States concerned.

Article 2

Tasks of national football information points

1. National football information points shall be responsible for coordinating and facilitating police information exchange in connection with football matches with an international dimension. Such information exchange may also involve other law enforcement authorities contributing to security or law and order in accordance with the distribution of powers in the Member State concerned.

2. National football information points shall, in accordance with the domestic and international rules applicable, have access to information involving personal data on high-risk supporters.

3. National football information points shall facilitate, coordinate or organise the implementation of international police cooperation in connection with football matches with an international dimension.

4. In accordance with existing national provisions, in particular the allocation of powers among the different services and authorities in the Member States concerned, national football information points could be responsible for providing assistance to the competent national authorities.

5. For matches with an international dimension, national football information points shall provide, at least at the request of another football information point in a Member State concerned, a risk assessment of their own country's clubs and national team.

Article 3

Police information exchange between national football information points

1. Before, during and after a football event with an international dimension, national football information points shall engage, at the request of a national football information point concerned or on its own initiative, in mutual exchange of general information and, subject to the conditions laid down in paragraph 3, personal data.

2. The general information exchanged in connection with a football match with an international dimension shall comprise strategic, operational and tactical information. Such information shall be defined as follows:

- strategic information: information specifying all aspects of the event, with particular reference to security risks involved in it;
- operational information: information providing an accurate picture of proceedings in the course of the event;
- tactical information: information enabling those in charge of operations to take appropriate action for the purposes of maintaining order and security in connection with the event.

3. Personal data shall be exchanged in accordance with the domestic and international rules applicable, taking account of the principles of Convention No 108 of the Council of Europe of 28 January 1981 for the protection of individuals with regard to automatic processing of personal data and — as appropriate — Recommendation No R (87)15 of the Committee of Ministers of the Council of Europe of 17 September 1987 regulating the use of personal data in the police sector. Such exchanges shall be with a view to preparing and taking the appropriate measures to maintain law and order when a football event takes place. Such exchange may in particular involve details of individuals actually or potentially posing a threat to law and order and security.

Article 4

Procedure for communication between national football information points

1. Handling of information on football matches with an international dimension shall be coordinated by way of national football information points. They shall ensure that all the police services concerned receive the necessary information in time. After processing, information shall either be used by a national football information point itself or be passed on to the relevant authorities and police forces.

2. The national football information point in the Member State hosting a football event shall communicate, before, during and after the competition or match, with the national police force(s) of the Member States concerned, where appropriate via the liaison officer(s) appointed and supplied by such Member States. Liaison officers may be contacted in the subject areas of law and order and security, football-related violence and ordinary crime, where it is connected with a particular football match or tournament.

3. National football information points shall communicate in such a way as to preserve the confidentiality of data. Provided that personal data are not concerned, reports exchanged shall be kept on record. They may be consulted subsequently by other interested national information points, on condition that the national football information point from which the information originates is offered the possibility in advance of taking a position on the delivery.

*Article 5***Use of languages**

National football information points shall each communicate in their own language, with a translation in a working language common to both sides, save as otherwise arranged between the parties concerned.

*Article 6***Evaluation**

The Council shall evaluate the implementation of this Decision within two years of its adoption.

*Article 7***Operative data**

This Decision shall come into effect on the day following that of its publication in the Official Journal.

COMMISSION REGULATION (EC) No 768/2002
of 7 May 2002
establishing the standard import values for determining the entry price of certain fruit and vegetables

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Commission Regulation (EC) No 3223/94 of 21 December 1994 on detailed rules for the application of the import arrangements for fruit and vegetables ⁽¹⁾, as last amended by Regulation (EC) No 1498/98 ⁽²⁾, and in particular Article 4(1) thereof,

Whereas:

- (1) Regulation (EC) No 3223/94 lays down, pursuant to the outcome of the Uruguay Round multilateral trade negotiations, the criteria whereby the Commission fixes the standard values for imports from third countries, in respect of the products and periods stipulated in the Annex thereto.

- (2) In compliance with the above criteria, the standard import values must be fixed at the levels set out in the Annex to this Regulation,

HAS ADOPTED THIS REGULATION:

Article 1

The standard import values referred to in Article 4 of Regulation (EC) No 3223/94 shall be fixed as indicated in the Annex hereto.

Article 2

This Regulation shall enter into force on 8 May 2002.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

COMMISSION

COMMISSION DECISION

of 26 April 2002

laying down the list of products to be examined at border inspection posts under Council Directive 97/78/EC

(notified under document number C(2002) 1527)

(Text with EEA relevance)

(2002/349/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

address it at Community level, in the meantime national rules must remain in force.

Having regard to the Treaty establishing the European Community,

- (4) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

Having regard to Council Directive 97/78/EC of 18 December 1997 laying down the principles governing the organisation of veterinary checks on products entering the Community from third countries ⁽¹⁾, and in particular Article 3(5) thereof,

HAS ADOPTED THIS DECISION:

Whereas:

Article 1

- (1) For reasons of clarity the products of animal origin referred to in Article 2(2)(a) of Directive 97/78/EC should be brought together in one single list alongside the appropriate Animo code, with the appropriate CN heading (combined nomenclature) also listed for indicative purposes and ease of use.

Products of animal origin listed in the Annex shall be subjected to a veterinary check at border inspection posts in accordance with the provisions of Directive 97/78/EC.

Article 2

- (2) However, this listing should not concern nor affect the plant products that are also included within the scope of veterinary checks as referred to in Article 19 of Directive 97/78/EC, nor to the products exempted from veterinary checks and referred to in Article 16 of the same Directive.

The list of products of animal origin included in the Annex is without prejudice to the exemptions referred to in Article 16, or to the list of plant products referred to in Article 19, of Directive 97/78/EC.

Article 3

- (3) It is also important that composite products, in which there is only a limited percentage of products of animal origin, should be included in the scope of the checks procedures with a view to avoid differences in interpretation between border inspection posts and thus distortions in trade; however, given the complexity of this matter, and the need for a risk-based assessment, if necessary by an appropriate scientific committee to

By way of derogation from Article 1, composite food products listed in the Annex, which include only a limited percentage of products of animal origin, shall continue to be subject to national rules.

The first paragraph shall apply only until such time as a risk based assessment of the composite products that should fall within the scope of the veterinary checks regime has been conducted.

Article 4

This Decision is addressed to the Member States.

ANNEX

The products for examination under the veterinary checks procedures, listed under title I below, shall be defined firstly by reference to their Animo code in column 1, supplemented if necessary by additional qualification codes introduced in columns 2 and 3. These codes correspond to the complements of definition by group of animals, species and types of products as provided for in Title II, and/or by destination as provided for in Title III.

The CN heading column provides, for information, the EC combined nomenclature code or codes under customs regulations within which the product of animal origin is normally classified.
