CHAPTER 1

INDUSTRIAL PRODUCTS

Article 7

The provisions of this chapter shall apply to products originating in the Community and Jordan other than those listed in Annex II to the Treaty establishing the European Community.

Article 8

No new customs duties on imports, or any other charge having equivalent effect, shall be introduced on trade between the Community and Jordan.

Article 9

Imports into the Community of products originating in Jordan shall be allowed free of customs duties and of any other charge having equivalent effect and free of quantitative restrictions and of any other measure having equivalent effect.

Article 10

1. (a) The provisions of this chapter shall not preclude the retention by the Community of an agricultural component in respect of goods originating in Jordan and listed in Annex I.

- (c) If Jordan proves that the equivalence of the duties applicable to the agricultural products incorporated in the goods listed in Annex II exceed the maximum rate set out in subparagraph (b) the Association Council may agree on a higher rate.

- (d) Jordan may enlarge the list of goods to which this agricultural component applies, provided the goods are included in Annex I. Before its adoption, this agricultural component shall be notified for examination to the Association Committee which may take any decision needed.
- (e) For the products listed in Annex II originating in the Community, Jordan shall apply from the entry into force of the Agreement customs duties on import and charges having equivalent effect not higher than those in force on 1 January 1996.

3. As regards the industrial element of the products listed in Annex II originating in the Community, Jordan shall progressively abolish the customs duties on imports or charges having equivalent effect according to the provisions of Article 11.

4. Where, in trade between the Community and Jordan, the charge applicable to a basic agricultural product is reduced, or where such reductions are the result of mutual concessions for processed agricultural products, the agricultural components applied in conformity with paragraphs 1 and 2 may be reduced.

5. The reduction provided for in paragraph 4, the list of goods concerned and, where applicable, the tariff quotas to which the reduction refers, shall be established by the Association Council.

Article 11

1. Customs duties and charges having equivalent effect applicable on import into Jordan of products originating in the Community, other than those listed in Annexes II, III and IV, shall be abolished upon the entry into force of this Agreement.

2. Pursuant to Article 10(2)(b) and (3), the total customs duties and charges having equivalent effect applicable on import into Jordan of processed agricultural products originating in the Community listed in Annex II shall be progressively abolished in accordance with the following schedule:

5. As regards the products listed in Annex IV, the arrangements to be applied shall be re-examined by the Association Council four years after the date of entry into force of the Agreement. At the time of that re-examination, the Association Council shall establish a tariff dismantling schedule for the products appearing in Annex IV.

6. In the event of serious difficulties for a given product, the relevant timetables in accordance with paragraphs 2, 3 and 4 may be reviewed by the Association Committee by common accord on the understanding that the timetable for which the review has been requested may not be extended in respect of the product concerned beyond the maximum transitional period of 12 years. If the Association Committee has not taken a decision within 30 days of its application to review the timetable, Jordan may suspend the timetable provisionally for a period which may not exceed one year.

7. For each product the basic duty to which the successive reductions laid down in paragraphs 2, 3 and 4 are to be applied shall be that actually applied vis-à-vis the Community on 1 January 1996.

8. If, after 1 January 1996, any tariff reduction is applied on an *erga omnes* basis, the reduced duties shall replace the basic duties referred to in paragraph 7 as from the date when such reductions are applied.

9. Jordan shall notify the Community of its basic duties.

Article 12

The provisions concerning the abolition of customs duties on imports shall also apply to customs duties of a fiscal nature.

Article 13

1. Exceptional measures of limited duration which derogate from the provisions of Article 11 may be taken by Jordan in the form of an increase or reintroduction of customs duties.

These measures may only concern infant industries, or certain sectors undergoing restructuring or facing serious difficulties, particularly where these difficulties produce major social problems.

Customs duties applicable on import into Jordan of products originating in the Community introduced by these measures may not exceed 25 % ad valorem and shall maintain an element of preference for products originating in the Community. The total yearly average value of imports of the products which are subject to these measures may not exceed 20 % of the total yearly average value of imports of industrial products originating in the Community during the last three years for which statistics are available.

These measures shall be applied for a period not exceeding five years unless a longer duration is authorised by the Association Committee. They shall cease to apply at the latest on the expiry of the maximum transitional period of 12 years.

No such measures may be introduced in respect of a product if more than four years have elapsed since the elimination of all duties and quantitative restrictions or charges or measures having equivalent effect concerning that product.

Jordan shall inform the Association Committee of any exceptional measures it intends to take and, at the request of the Community, consultations shall be held on such measures and the sectors to which they apply before they are implemented. When taking such measures Jordan shall provide the Committee with a timetable for the elimination of the customs duties introduced under this Article. This timetable shall provide for a phasing-out of these duties in equal annual instalments starting at the latest two years after their introduction. The Association Committee may decide on a different timetable.

2. By way of derogation from the fourth subparagraph of paragraph 1, the Association Committee may exceptionally, in order to take account of the difficulties involved in setting up a new industry and when certain sectors are undergoing restructuring or facing serious difficulties, authorise Jordan to maintain the measures already taken pursuant to paragraph 1 for a maximum period of three years beyond the 12-year transitional period.

CHAPTER 2

AGRICULTURAL PRODUCTS

Article 14

The provisions of this Chapter shall apply to products originating in the Community and Jordan and listed in Annex II to the Treaty establishing the European Community.

Article 15

The Community and Jordan shall gradually implement greater liberalisation of their reciprocal trade in agricultural products.

Article 16

1. Agricultural products originating in Jordan shall benefit on import into the Community from the provisions set out in Protocol 1.

2. Agricultural products originating in the Community shall benefit on import into Jordan from the provisions set out in Protocol 2.

Article 17

1. From 1 January 2002, the Community and Jordan shall assess the situation with a view to determining the liberalisation measures to be applied by the Community and Jordan with effect from 1 January 2003 in accordance with the objective set out in Article 15.

2. Without prejudice to the provisions of the preceding paragraph and taking account of the patterns of trade in agricultural products between the Parties and the particular sensitivity of such products, the Community and Jordan may examine on a regular basis in the Association Council, product by product and on a reciprocal basis, the possibilities of granting each other further concessions.

CHAPTER 3

COMMON PROVISIONS

Article 18

1. No new quantitative restriction on imports and measures having equivalent effect shall be introduced in trade between the Community and Jordan.

2. Quantitative restrictions on imports and measures having equivalent effect on trade between the Community and Jordan shall be abolished upon the entry into force of this Agreement.

3. The Community and Jordan shall not apply to exports between themselves either customs duties or charges having equivalent effect, or quantitative restrictions or measures having equivalent effect.

Article 19

1. In the event of specific rules being introduced as a result of the implementation of its agricultural policy or of any alteration of the current rules or in the event of any alteration or extension of the provisions relating to the implementation of its agricultural policy, the Party concerned may amend the arrangements resulting from the Agreement in respect of the products concerned.

2. In such cases the Party concerned shall inform the Association Committee. At the request of the other Party, the Association Committee shall meet to take due account of the interests of the other Party.

3. If the Community or Jordan, in applying paragraph 1, modifies the arrangements made by this Agreement for agricultural products, they shall accord imports originating in the other Party an advantage comparable to that provided for in this Agreement.

4. The application of this Article may be the subject of consultations in the Association Council.

Article 20

1. Products originating in Jordan shall not on importation into the Community be accorded a treatment more favourable than that which the Member States apply among themselves.

2. Application of the provisions of this Agreement shall be without prejudice to Council Regulation (EEC) No 1911/91 of 26 June 1991 on the application of the provisions of Community law to the Canary Islands.

Article 21

1. The Parties shall refrain from any measure or practice of an internal fiscal nature establishing, whether directly or indirectly, discrimination between the products of one Party and like products originating in the territory of the other Party.

2. Products exported to the territory of one of the Parties may not benefit from repayment of indirect internal taxation in excess of the amount of indirect taxation imposed on them either directly or indirectly.

Article 22

1. The Agreement shall not preclude the maintenance or establishment of customs unions, free trade areas or arrangements for frontier trade, except in so far as they alter the trade arrangements provided for in the Agreement.

2. Consultation between the Community and Jordan shall take place within the Association Council concerning agreements establishing customs unions or free trade areas and, where appropriate, on other major issues related to their respective trade policy with third countries. In particular, in the event of a third country acceding to the Union, such consultation shall take place so as to ensure that account may be taken of the mutual interests of the Community and Jordan.

Article 23

If one of the Parties finds that dumping is taking place in trade with the other Party within the meaning of Article VI of the GATT, it may take appropriate measures against this practice in accordance with the Agreement on implementation of Article VI of the GATT and with its relevant internal legislation, under the conditions and in accordance with the procedures laid down in Article 26.

Article 24

Where any product is being imported in such increased quantities and under such conditions as to cause or threaten to cause:

- serious injury to domestic producers of like or directly competitive products in all or part of the territory of one of the Parties, or
- serious disturbances in any sector of the economy,

the Party concerned may take appropriate measures under the conditions and in accordance with the procedures laid down in Article 26.

Article 25

Where compliance with the provisions of Article 18(3) leads to:

- (i) re-export towards a third country against which the exporting Party maintains, for the product concerned, quantitative export restrictions, export duties or measures having equivalent effect; or
- (ii) a serious shortage, or threat thereof, of a product essential to the exporting Party,

and where the situations above referred to give rise, or are likely to give rise to major difficulties for the exporting Party, that Party may take appropriate measures under the conditions and in accordance with the procedures laid down in Article 26. The measures shall be non-discriminatory and be eliminated when conditions no longer justify their maintenance.

Article 26

1. In the event of the Community or Jordan subjecting imports of products liable to give rise to the difficulties referred to in Article 24 to an administrative procedure, the purpose of which is to provide rapid information on the trend of trade flows, it shall inform the other Party.

2. In the cases specified in Articles 23, 24 and 25, before taking the measures provided for therein, or, as soon as possible in cases to which paragraph 3(d) applies, the Party in question shall supply the Association Committee with all relevant information required for a thorough examination of the situation with a view to seeking a solution acceptable to the Parties.

In the selection of appropriate measures, priority must be given to those which least disturb the functioning of the Agreement.

The safeguard measures shall be notified immediately to the Association Committee and shall be the subject of periodic consultations within the Committee, particularly with a view to their abolition as soon as circumstances permit.

3. For the implementation of paragraph 2, the following provisions shall apply:

- (a) as regards Article 23, the exporting Party shall be informed of the dumping case as soon as the authorities of the importing Party have initiated an investigation. Where no end has been put to the dumping within the meaning of Article VI of GATT or no other satisfactory solution has been reached within 30 days of the notification being made, the importing Party may adopt the appropriate measures;
- (b) as regards Article 24, the difficulties arising from the situation referred to in that Article shall be referred for examination to the Association Committee, which may take any decision needed to put an end to such difficulties.

If the Association Committee or the exporting Party has not taken a decision putting an end to the difficulties or no other satisfactory solution has been reached within 30 days of the matter being referred, the importing Party may adopt the appropriate measures to remedy the problem. These measures must not exceed the scope of what is necessary to remedy the difficulties which have arisen;

- (c) as regards Article 25, the difficulties arising from the situations referred to in that Article shall be referred for examination to the Association Committee.

The Association Committee may take any decision needed to put an end to the difficulties. If it has not taken such a decision within 30 days of the matter being referred to it, the exporting Party may apply appropriate measures on the exportation of the product concerned;

- (d) where exceptional circumstances requiring immediate action make prior information or examination, as the case may be, impossible, the Party concerned may, in the situations specified in Articles 23, 24 and 25, apply forthwith such precautionary measures as are strictly necessary to remedy the situation, and shall inform the other Party immediately.

Article 27

Nothing in this Agreement shall preclude prohibitions or restrictions on imports, exports or goods in transit justified on grounds of public morality, public policy or public security; the protection of health and life of humans, animals or plants; the protection of national treasures possessing artistic, historic or archaeological value; or the protection of intellectual, industrial and commercial property or regulations concerning gold and silver. Such prohibitions or restrictions shall not, however, constitute a means of arbitrary discrimination or a disguised restriction on trade between the Parties.

Article 28

The concept of 'originating products' for the application of the provisions of this title and the methods of administrative cooperation relating to them are set out in Protocol 3.

Article 29

The Combined Nomenclature shall be used for the classification of goods in trade between the Parties.

Article 33

1. The Parties shall use their best endeavours to avoid taking any measures or actions which render the conditions for the establishment and operation of each other's companies more restrictive than the situation existing on the day preceding the date of signature of the Agreement.

2. The provisions of this Article are without prejudice to those of Article 44. The situations covered by Article 44 shall be solely governed by its provisions to the exclusion of any other.

Article 34

- (b) abolish, upon entry into force of this Agreement, all unilateral measures, administrative, technical and other obstacles which could constitute a disguised restriction or have discriminatory effects on the free supply of services in international maritime transport.

Each Party shall grant, *inter alia*, a treatment no less favourable than that accorded to its own ships, for the ships used for the transport of goods, passengers or both, and operated by nationals or companies of the other Party, with respect to access to ports, the use of infrastructure and auxiliary maritime services of those ports, as well as related fees and charges, customs facilities and the assignment of berths and facilities for loading and unloading.

Article 5

Sufficiently worked or processed products

1. For the purposes of Article 2, products which are not wholly obtained are considered to be sufficiently worked or processed when the conditions set out in the list in Annex II are fulfilled.

The conditions referred to above indicate, for all products covered by this Agreement, the working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials. Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in the list is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.

2. Notwithstanding paragraph 1, non-originating materials which, according to the conditions set out in the list, should not be used in the manufacture of a product may nevertheless be used, provided that:

- (a) their total value does not exceed 10 % of the ex-works price of the product;

(b) any of the percentages given in the list for the maximum value of non-originating materials are not exceeded through the application of this paragraph.

This paragraph shall not apply to products falling within Chapters 50 to 63 of the Harmonised System.

3. Paragraphs 1 and 2 shall apply except as provided in Article 6.

Article 6

Insufficient working or processing operations

1. Without prejudice to paragraph 2, the following operations shall be considered as insufficient working or processing to confer the status of originating products, whether or not the requirements of Article 5 are satisfied:

- (a) operations to ensure the preservation of products in good condition during transport and storage (ventilation, spreading out, drying, chilling, placing in salt, sulphur dioxide or other aqueous solutions, removal of damaged parts, and like operations);
- (b) simple operations consisting of removal of dust, sifting or screening, sorting, classifying, matching (including the making-up of sets of articles), washing, painting, cutting up;
- (c) (i) changes of packaging and breaking up and assembly of packages;
- (ii) simple placing in bottles, flasks, bags, cases, boxes, fixing on cards or boards, etc., and all other simple packaging operations;
- (d) affixing marks, labels and other like distinguishing signs on products or their packaging;
- (e) simple mixing of products, whether or not of different kinds, where one or more components of the mixtures does not meet the conditions laid down in this Protocol to enable them to be considered as originating in the Community or Jordan;
- (f) simple assembly of parts to constitute a complete product;
- (g) a combination of two or more operations specified in subparagraphs (a) to (f);
- (h) slaughter of animals.

2. All the operations carried out in either the Community or Jordan on a given product shall be considered together when determining whether the working or processing undergone by that product is to be regarded as insufficient within the meaning of paragraph 1.

*Article 7***Unit of qualification**

1. The unit of qualification for the application of the provisions of this Protocol shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Harmonised System.

Accordingly, it follows that:

- (a) when a product composed of a group or assembly of articles is classified under the terms of the Harmonised System in a single heading, the whole constitutes the unit of qualification;
- (b) when a consignment consists of a number of identical products classified under the same heading of the Harmonised System, each product must be taken individually when applying the provisions of this Protocol.

2. Where, under general rule 5 of the Harmonised System, packaging is included with the product for classification purposes, it shall be included for the purposes of determining origin.

*Article 8***Accessories, spare parts and tools**

Accessories, spare parts and tools dispatched with a piece of equipment, machine, apparatus or vehicle, which are part of the normal equipment and included in the price thereof or which are not separately invoiced, shall be regarded as one with the piece of equipment, machine, apparatus or vehicle in question.

*Article 9***Sets**

Sets, as defined in general rule 3 of the Harmonised System, shall be regarded as originating when all component products are originating. Nevertheless, when a set is composed of originating and non-originating products, the set as a whole shall be regarded as originating, provided that the value of the non-originating products does not exceed 15 % of the ex-works price of the set.

*Article 10***Neutral elements**

In order to determine whether a product originates, it shall not be necessary to determine the origin of the following which might be used in its manufacture:

- (a) energy and fuel;
- (b) plant and equipment;

- (c) machines and tools;
- (d) goods which do not enter and which are not intended to enter into the final composition of the product.

- (b) they have not undergone any operation beyond that necessary to preserve them in good condition while in that country or while being exported.

*Article 12***Direct transport**

Originating products may be transported by pipeline across territory other than that of the Community or Jordan.

2. Evidence that the conditions set out in paragraph 1 have been fulfilled shall be supplied to the customs authorities of the importing country by the production of:

- (a) a single transport document covering the passage from the exporting country through the country of transit; or

(b) a certificate issued by the customs authorities of the country of transit:

- (i) giving an exact description of the products;
- (ii) stating the dates of unloading and reloading of the products and, where applicable, the names of the ships, or the other means of transport used; and
- (iii) certifying the conditions under which the products remained in the transit country; or

(c) failing these, any substantiating documents.

Article 13

- (d) the products have not, since they were consigned for exhibition, been used for any purpose other than demonstration at the exhibition.

2. A proof of origin must be issued or made out in accordance with the provisions of Title V and submitted to the customs authorities of the importing country in the normal manner. The name and address of the exhibition must be indicated thereon. Where necessary, additional documentary evidence of the conditions under which they have been exhibited may be required.

2. The prohibition in paragraph 1 shall apply to any arrangement for refund, remission or non-payment, partial or complete, of customs duties or charges having an equivalent effect, applicable in the Community or Jordan to materials used in the manufacture, where such refund, remission or non-payment applies, expressly or in effect, when products obtained from the said materials are exported and not when they are retained for home use there.

6. The date of issue of the movement certificate EUR.1 shall be indicated in box 11 of the certificate.

7. A movement certificate EUR.1 shall be issued by the customs authorities and made available to the exporter as soon as actual exportation has been effected or ensured.

If the declaration is handwritten, it shall be written in ink in printed characters.

5. Invoice declarations shall bear the original signature of the exporter in manuscript. However, an approved exporter within the meaning of Article 21 shall not be required to sign such declarations provided that he gives the customs authorities of the exporting country a written undertaking that he accepts full responsibility for any invoice declaration which identifies him as if it had been signed in manuscript by him.

An exporter seeking such authorisation must offer to the satisfaction of the customs authorities all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this Protocol.

2. Proofs of origin which are submitted to the customs authorities of the importing country after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit these documents by the final date set is due to exceptional circumstances.

3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin where the products have been submitted before the said final date.

*Article 23***Submission of proof of origin**

Proofs of origin shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of the Agreement.

*Article 24***Importation by instalments**

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country; dismantled or non-assembled products within the meaning of general rule 2(a) of the Harmonised System falling within sections XVI and XVII or heading Nos 7308 and 9406 of the Harmonised System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

In the case of products sent by post, this declaration can be made on the customs declaration C2/CP3 or on a sheet of paper annexed to that document.

2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.

3. Furthermore, the total value of these products shall not exceed ECU 500 in the case of small packages or ECU 1 200 in the case of products forming part of travellers' personal luggage.

Article 26

Article 28

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not *ipso facto* render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

Article 29

Amounts expressed in ECU

1. Amounts in the national currency of the exporting country equivalent to the amounts expressed in ECU shall be fixed by the exporting country and communicated to the importing countries through the Commission of the European Communities.
2. When the amounts exceed the corresponding amounts fixed by the importing country, the latter shall accept them if the products are invoiced in the currency of the exporting country. When the products are invoiced in the currency of another EC Member State, the importing country shall recognise the amount notified by the country concerned.
3. The amounts to be used in any given national currency shall be the equivalent in that national currency of the amounts expressed in ECU as at the first working day in October 1996.
4. The amounts expressed in ECU and their equivalents in the national currencies of the EC Member States and Jordan shall be reviewed by the Association Committee at the request of the Community or Jordan. When carrying out this review, the Association Committee shall ensure that there will be no decrease in the amounts to be used in any national currency and shall furthermore consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in ECU.

TITLE VI

ARRANGEMENTS FOR ADMINISTRATIVE COOPERATION*Article 30***Mutual assistance**

1. The customs authorities of the EC Member States and of Jordan shall provide each other, through the Commission of the European Communities, with specimen impressions of stamps used in their customs offices for the issue of movement certificates EUR.1 and with the addresses of the customs authorities responsible for verifying those certificates and invoice declarations.

2. In order to ensure the proper application of this Protocol, the Community and Jordan shall assist each other, through the competent customs administrations, in checking the authenticity of the movement certificates EUR.1 or the invoice declarations and the correctness of the information given in these documents.

*Article 31***Verification of proofs of origin**

1. Subsequent verifications of proofs of origin shall be carried out at random or whenever the customs authorities of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Protocol.

2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the movement certificate EUR.1 and the invoice, if it has been submitted, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the enquiry. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.

3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.

4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.

5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in the Community or in Jordan and fulfil the other requirements of this Protocol.

6. If in cases of reasonable doubt there is no reply within 10 months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

*Article 32***Dispute settlement**

Where disputes arise in relation to the verification procedures of Article 31 which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Association Committee.

In all cases the settlement of disputes between the importer and the customs authorities of the importing country shall be under the legislation of the said country.

*Article 33***Penalties**

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

*Article 34***Free zones**

1. The Community and Jordan shall take all necessary steps to ensure that products traded under cover of a proof of origin which in the course of transport use a free zone situated in their territory, are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.

2. By means of an exemption to the provisions contained in paragraph 1, when products originating in the Community or Jordan are imported into a free zone under cover of a proof of origin and undergo treatment or processing, the authorities concerned shall issue a new EUR.1 certificate at the exporter's request, if the treatment or processing undergone is in conformity with the provisions of this Protocol.

Article 38

Implementation of the Protocol

The Community and Jordan shall each take the steps necessary to implement this Protocol.

*Article 39***Goods in transit or storage**

The provisions of the Agreement may be applied to goods which comply with the provisions of this Protocol and which on the date of entry into force of the Agreement are either in

transit or are in the Community or in Jordan or, in temporary storage in bonded warehouses or in free zones, subject to the submission to the customs authorities of the importing State, within four months of that date, of a movement certificate EUR.1 issued retrospectively by the competent authorities of the exporting State together with the documents showing that the goods have been transported directly.

ANNEX I

Introductory notes to the list in Annex II

Note 1

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 5 of the Protocol.

Note 2

- 2.1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonised System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in columns 3 or 4. Where, in some cases, the entry in the first column is preceded by an 'ex', this signifies that the rules in columns 3 or 4 apply only to the part of that heading as described in column 2.
- 2.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in columns 3 or 4 apply to all products which, under the Harmonised System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in columns 3 or 4.
- 2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 has to be applied.

Note 3

- 3.1. The provisions of Article 5 of the Protocol concerning products having acquired originating status which are used in the manufacture of other products apply regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the Community or in Jordan.

Example

An engine of heading No 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 % of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of heading No ex 7224.

If this forging has been forged in the Community from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading No ex 7224 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the Community. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.2. The rule in the list represents the minimum amount of working or processing required and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus if a rule provides that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.

- 3.3. Without prejudice to note 3.2 where a rule states that 'materials of any heading' may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression 'manufacture from materials of any heading, including other materials of heading No ...' means that only materials classified in the same heading as the product of a different description than that of the product as given in column 2 of the list may be used.
- 3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

Example

The rule for fabrics of heading Nos 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

- 3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also note 6.2 in relation to textiles).

Example

The rule for prepared foods of heading No 1904 which specifically excludes the use of cereals and their derivatives does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth, even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn, that is the fibre stage.

- 3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded in relation to the particular materials they apply to.

Note 4

- 4.1. The term 'natural fibres' is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.
- 4.2. The term 'natural fibres' includes horsehair of heading No 0503, silk of heading Nos 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of heading Nos 5101 to 5105, the cotton fibres of heading Nos 5201 to 5203 and the other vegetable fibres of heading Nos 5301 to 5305.
- 4.3. The terms 'textile pulp', 'chemical materials' and 'paper-making materials' are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

- 4.4. The term 'man-made staple fibres' is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of heading Nos 5501 to 5507.

Note 5

- 5.1. Where for a given product in the list a reference is made to this note, the conditions set out in column 3 shall not be applied to any basic textile materials, used in the manufacture of this product, which, taken together, represent 10 % or less of the total weight of all the basic textile materials used (see also notes 5.3 and 5.4).
- 5.2. However, the tolerance mentioned in note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus *Agave*,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,

- products of heading No 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading No 5605.

Example

A yarn of heading No 5205 made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 % of the yarn.

Example

A woollen fabric of heading No 5112 made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509 is a mixed fabric. Therefore synthetic yarn which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed 10 % of the weight of the fabric.

Example

Tufted textile fabric of heading No 5802 made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.

Example

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

Example

A carpet with tufts made from both artificial yarns and cotton yarns and with a jute backing is a mixed product because three basic textile materials are used. Thus, any non-originating materials that are at a later stage of manufacture than the rule allows may be used, provided their total weight does not exceed 10 % of the weight of the textile materials of the carpet. Thus, both the jute backing and/or the artificial yarns could be imported at that stage of manufacture, provided the weight conditions are met.

- 5.3. In the case of products incorporating 'yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped' this tolerance is 20 % in respect of this yarn.
- 5.4. In the case of products incorporating 'strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film', this tolerance is 30 % in respect of this strip.

Note 6

- 6.1. In the case of those textile products which are marked in the list by a footnote referring to this note, textile materials, with the exception of linings and interlinings, which do not satisfy the rule set out in the list in column 3 for the made-up product concerned may be used provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.
- 6.2. Without prejudice to note 6.3, materials which are not classified within Chapters 50 to 63 may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example

If a rule in the list provides that for a particular textile item, such as trousers, yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide fasteners even though slide fasteners normally contain textiles.

- 6.3. Where a percentage rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7

- 7.1. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the 'specific processes' are the following:
- (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process ⁽¹⁾;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation;
- 7.2. For the purposes of heading Nos ex 2710, 2711 and 2712, the 'specific processes' are the following:
- (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process ⁽¹⁾;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (ij) isomerisation;
 - (k) in respect of heavy oils falling within heading No ex 2710 only, desulphurisation with hydrogen resulting in a reduction of at least 85 % of the sulphur content of the products processed (ASTM D 1266-59 T method);
 - (l) in respect of products falling within heading No 2710 only, deparaffining by a process other than filtering;

⁽¹⁾ See additional explanatory note 4(b) to Chapter 27 of the Combined Nomenclature.

- (m) in respect of heavy oils falling within heading No ex 2710 only, treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250 °C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction.

The further treatment with hydrogen of lubricating oils of heading No ex 2710 (e.g. hydrofinishing or decolourisation) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (n) in respect of fuel oils falling within heading No ex 2710 only, atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C by the ASTM D 86 method;
 - (o) in respect of heavy oils other than gas oils and fuel oils falling within heading No ex 2710 only, treatment by means of a high-frequency electrical brushdischarge.
- 7.3. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin.

PROTOCOL 4

on mutual assistance between administrative authorities in customs matters

Article 1

Definitions

For the purposes of this Protocol:

- (a) 'customs legislation' shall mean any legal or regulatory provisions applicable on the territories of the Parties and governing the import, export, transit of goods and their placing under any customs procedure, including measures of prohibition, restriction and control adopted by the said Parties;
- (b) 'applicant authority' shall mean a competent administrative authority which has been appointed by a Party for this purpose and which makes a request for assistance in customs matters;
- (b) 'requested authority' shall mean a competent administrative authority which has been appointed by a Party for this purpose and which receives a request for assistance in customs matters;
- (d) 'personal data' shall mean all information relating to an identified or identifiable individual.

Article 2

Scope

1. The Parties shall assist each other, in the areas within their jurisdiction, in the manner and under the conditions laid down in this Protocol, in preventing, detecting and investigating operations in breach of customs legislation.

2. Assistance in customs matters, as provided for in this Protocol, shall apply to any administrative authority of the Parties which is competent for the application of this Protocol. It shall not prejudice the rules governing mutual assistance in criminal matters. Nor shall it cover information obtained under powers exercised at the request of the judicial authorities, unless those authorities so agree.

Article 3

Assistance on request

1. At the request of the applicant authority, the requested authority shall furnish it with all relevant information which

may enable it to ensure that customs legislation is correctly applied, including information regarding operations noted or planned which are or could be in breach of such legislation.

2. At the request of the applicant authority, the requested authority shall inform it whether goods exported from the territory of one of the Parties have been properly imported into the territory of another Party, specifying, where appropriate, the customs procedure applied to the goods.

3. At the request of the applicant authority, the requested authority shall, within the framework of its laws, take the necessary steps to ensure that a special watch is kept on:

- (a) natural or legal persons of whom there are reasonable grounds for believing that they are breaching or have breached customs legislation;
- (b) places where goods are stored in a way that gives grounds for suspecting that they are intended to supply operations in breach of customs legislation;
- (c) movements of goods notified as possibly giving rise to breaches of customs legislation;
- (d) means of transport for which there are reasonable grounds for believing that they have been, are or might be used in operations in breach of customs legislation.

Article 4

Spontaneous assistance

The Parties shall provide each other, in accordance with their laws, rules and other legal instruments, with assistance if they consider that to be necessary for the correct application of customs legislation, particularly when they obtain information pertaining to:

- operations which are, or appear to be in breach of such legislation and which may be of interest to the other Party,

- new means or methods employed in carrying out such operations,
 - goods known to be subject to breaches of customs legislation,
 - natural or legal persons of whom there are reasonable grounds for believing that they are breaching or have breached customs legislation,

At the request of the applicant authority, the requested authority shall, in accordance with its legislation, take all necessary measures in order:

- to deliver all documents,
- to notify all decisions,

falling within the scope of this Protocol to an addressee, residing or established in its territory. In such a case Article 6(3) shall apply as far as the request is concerned.

Article 6

Form and substance of requests for assistance

1. Requests pursuant to this Protocol shall be made in writing. They shall be accompanied by the documents necessary to enable compliance with the request. When required because of the urgency of the situation, oral requests may be accepted, but must be confirmed in writing as soon as possible.
2. Requests pursuant to paragraph 1 shall include the following information:
- (a) the applicant authority making the request;
 - (b) the measure requested;
 - (c) the object of and the reason for the request;

4. If a request does not meet the formal requirements, its correction or completion may be requested; precautionary measures may, however, be ordered.

Article 7

Execution of requests

1. In order to comply with a request for assistance, the requested authority shall proceed, within the limits of its competence and available resources, as though it were acting on its own account or at the request of other authorities of that same Party, by supplying information already possessed, by carrying out appropriate enquiries or by arranging for them to be carried out. This provision shall also apply to the administrative department to which the request has been addressed by the requested authority when the latter cannot act on its own.
2. Requests for assistance shall be executed in accordance with the laws, rules and other legal instruments of the requested Party.
3. Duly authorised officials of a Party may, with the agreement of the other Party involved and subject to the conditions laid down by the latter, obtain from the offices of the requested authority or other authority for which the requested authority is responsible, information relating to operations which are or may be in breach of customs legislation which the applicant authority needs for the purposes of this Protocol.

*Article 8***Form in which information is to be communicated**

1. The requested authority shall communicate results of enquiries to the applicant authority in the form of documents, certified copies of documents, reports and the like.
2. The documents provided for in paragraph 1 may be replaced by computerised information produced in any form for the same purpose.

*Article 9***Exceptions to the obligation to provide assistance**

1. The Parties may refuse to give assistance as provided for in this Protocol, where to do so would:
 - (a) be likely to prejudice the sovereignty of Jordan or that of a Member State of the Community which has been asked for assistance under this Protocol; or
 - (b) be likely to prejudice public policy, security or other essential interests, in particular in the cases referred to under Article 10(2); or
 - (c) involve currency or tax regulations other than customs legislation; or
 - (d) violate an industrial, commercial or professional secret.
2. Where the applicant authority requests assistance which it would itself be unable to provide if so asked, it shall draw attention to that fact in its request. It shall then be left to the requested authority to decide how to respond to such a request.
3. If assistance is refused, the decision and the reasons therefor must be notified to the applicant authority without delay.

*Article 10***Information exchange and confidentiality**

1. Any information communicated in whatsoever form pursuant to this Protocol shall be of a confidential or restricted nature. It shall be covered by the obligation of official secrecy and shall enjoy the protection extended to like information under the relevant laws of the Party which received it and the corresponding provisions applying to the Community institutions.

2. Personal data may be exchanged only where the receiving Party undertakes to protect such data in at least an equivalent way to the one applicable to that particular case in the supplying Party.

3. Information obtained shall be used solely for the purposes of this Protocol. Where one of the Parties requests the use of such information for other purposes, it shall ask for the prior written consent of the authority which furnished the information. Moreover, it shall be subject to any restrictions laid down by that authority.

JOINT DECLARATIONS

JOINT DECLARATION ON ARTICLE 28

In order to encourage the progressive establishment of a comprehensive Euro-Mediterranean free trade area, in line with the conclusions of the Cannes European Council and those of the Barcelona Conference, the Parties:

- agree to provide in Protocol 3 on the definition of 'originating products' for the implementation of diagonal cumulation, before the conclusion and entry into force of free trade agreements between Mediterranean countries,
- reaffirm their commitment to the harmonisation of rules of origin across the Euro-Mediterranean free trade area. The Association Council shall take, where necessary, measures to revise the Protocol with a view to respecting this objective.

JOINT DECLARATION RELATING TO ARTICLES 51 AND 52

If, during the progressive implementation of the Agreement, Jordan experiences serious balance-of-payments difficulties, Jordan and the Community may hold consultations to work out the best ways and means of helping Jordan cope with these difficulties.

Such consultations will take place in conjunction with the International Monetary Fund.

JOINT DECLARATION ON INTELLECTUAL, INDUSTRIAL AND COMMERCIAL PROPERTY (ARTICLE 56 AND ANNEX VII)

For the purpose of this Agreement, intellectual, industrial and commercial property includes in particular copyright, including the copyright in computer programs, and neighbouring rights, patents, industrial designs, geographical indications, including appellations of origin, trademarks and service marks, topographies of integrated circuits, as well as protection against unfair competition as referred to in Article 10a of the Paris Convention for the Protection of Industrial Property (Stockholm Act, 1967) and protection of undisclosed information on 'know-how'.

JOINT DECLARATION ON ARTICLE 62

The Parties reaffirm their commitment to the Middle East peace process and their belief that peace should be consolidated through regional cooperation. The Community is prepared to support joint development projects submitted by Jordan and other regional parties, subject to relevant Community technical and budgetary procedures.

JOINT DECLARATION ON DECENTRALISED COOPERATION

The Parties reaffirm the importance they attach to decentralised cooperation programs as a means of encouraging exchanges of experience and transfer of knowledge in the Mediterranean region and between the European Community and its Mediterranean partners.

JOINT DECLARATION RELATING TO TITLE VII

The Community and Jordan will take appropriate action to encourage and assist Jordanian business, through technical and financial support, in modernising existing and setting up new facilities.

JOINT DECLARATION RELATING TO ARTICLE 101

1. The Parties agree, for the purposes of the correct interpretation and practical application of the Agreement, that the cases of special urgency referred to in Article 101 of the Agreement mean cases of substantial violation of the Agreement by one of the Parties. A substantial violation of the Agreement consists of:

- the repudiation of the Agreement not authorised by the general rules of international law,
- the violation of the essential elements of the Agreement set out in Article 2.

2. The Parties agree that the appropriate measures referred to in Article 101 are measures taken in accordance with international law. If one Party takes a measure in a case of special urgency in application of Article 101, the other Party may invoke the dispute settlement procedure.

JOINT DECLARATION ON WORKERS

The Parties reaffirm the importance they attach to fair treatment of foreign workers legally resident and employed on their territory. The Member States agree that, if Jordan so requests, they are each prepared to consider negotiating bilateral reciprocal agreements relating to working conditions and social security rights of Jordanian and Member States' workers legally resident and employed in their respective territory.

JOINT DECLARATION ON COOPERATION FOR THE PREVENTION AND CONTROL OF ILLEGAL IMMIGRATION

1. The Parties agree to cooperate in order to prevent and control illegal immigration. To this end either Party agrees to permit the return of its nationals illegally present on the territory of the other Party upon request by the latter and without further formalities. The Parties will also provide their nationals with appropriate identity documents for such purposes.

In respect of the Member States of the European Union, this obligation applies only in respect of those persons who are to be considered their nationals for Community purposes in accordance with Declaration No 2 to the Treaty on European Union.

2. Each Party agrees to conclude, upon request of the other Party, bilateral agreements regulating specific obligations concerning cooperation for the prevention and control of illegal immigration, including an obligation for permitting the return of nationals of other countries and stateless persons who have arrived on the territory of one Party from the other Party.

3. The Association Council shall examine what other joint efforts can be made to prevent and control illegal immigration.

4. Nothing in the implementation of this Joint Declaration shall be construed to contravene or diminish the respective obligations of each Party under applicable standards on human rights.

Sir,

The following was agreed between the Community and Jordan:

The current arrangements provide for the elimination of customs duties on imports into the Community of cut flowers and flower buds, fresh, falling within subheading 060310 of the Common Customs Tariff and originating in Jordan, subject to a limit of 100 tonnes.

Jordan undertakes to abide by the conditions laid down below for imports into the Community of roses and carnations which qualify for the elimination of this tariff:

- the price level of imports into the Community must be at least equal to 85 % of the Community price level for the same products over the same periods,
- the Jordanian price level shall be determined by recording the prices of the imported products on representative Community import markets,
- the Community price level shall be based on the producer prices recorded on representative markets of the main producer Member States,
- price levels will be recorded on a fortnightly basis and weighted by the respective quantities. This provision is valid for Community prices and for Jordanian prices,
- for both Community producer prices and the import prices of Jordanian products, a distinction shall be made between large-flowered and small-flowered roses and between unifloral and multifloral carnations,
- if the Jordanian price level for any one type of product is below 85 % of the Community price level, the tariff preference shall be suspended. The Community shall reinstate the tariff preference when a Jordanian price level equal to 85 % or more of the Community price level is recorded.

I should be obliged if you would confirm that your Government is in agreement with the contents of this letter.

Please accept, Sir, the assurance of my highest consideration.
