COMMISSION DECISION  
of 25 February 2003

**amending Decision 98/83/EC recognising certain third countries and certain areas of third countries as being free of *Xanthomonas campestris* (all strains pathogenic to Citrus), *Cercospora angolensis* Carv. et Mendes and *Guignardia citricarpa* Kiely (all strains pathogenic to Citrus)**

(notified under document number C(2003) 600)

(2003/129/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 2000/29/EC of 8 May 2000 on protective measures against the introduction into the Community of organisms harmful to plants or plant products and against their spread within the Community (<sup>(1)</sup>), as last amended by Directive 2002/89/EC (<sup>(2)</sup>), and in particular point 16.2 of Part A of Annex IV thereto,

Whereas:

- (1) Point 16.2 of Part A of Annex IV to Directive 2000/29/EC lays down specific provisions as regards the import into the Community of fruits of *Citrus* L., *Fortunella* Swingle, *Poncirus* Raf., and their hybrids, originating in third countries where *Xanthomonas campestris* (all strains pathogenic to Citrus) (hereinafter: *Xanthomonas campestris*), is known to occur.
- (2) Commission Decision 98/83/EC of 8 January 1998 recognising certain third countries and certain areas of third countries as being free of *Xanthomonas campestris* (all strains pathogenic to Citrus), *Cercospora angolensis* Carv. et Mendes and *Guignardia citricarpa* Kiely (all strains pathogenic to Citrus) (<sup>(3)</sup>), as last amended by Decision 2001/440/EC (<sup>(4)</sup>), provides for certain areas of third countries to be recognised as being free of *Xanthomonas campestris*.
- (3) Decision 98/83/EC recognises certain States of Argentina as being free of *Xanthomonas campestris*. However, on the basis of information submitted by Argentina, a number of those States can no longer be recognised as being free of that harmful organism.

- (4) On the basis of information submitted by the United States of America, it appears that new infestations of *Xanthomonas campestris* have been detected in different counties in Florida. Therefore, Florida should no longer be recognised as being free of that harmful organism.
- (5) Specific arrangement should be made for citrus in transit for which the official statement laid down by point 16.2 of Section I of Part A of Annex IV to Directive 2000/29/EC has been issued before the date of notification of this Decision to the competent authorities in Argentina and the United States of America.
- (6) Decision 98/83/EC should therefore be amended accordingly.
- (7) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plant Health,

HAS ADOPTED THIS DECISION:
