Remarks

Since expenditure on staff and buildings is included in the appropriations entered in Items XX 01 01 01 and XX 01 03 01, the Commission subsidy, together with the Agency's own revenue, is intended to cover expenditure incurred by the Agency in its activities.

At its 23rd session on 1 and 2 February 1960, the Euratom Council proposed unanimously that the Commission postpone not only the levying of the charge (intended to cover the operating expenditure of the Euratom Supply Agency) but also the actual introduction of the said charge. Since then a subsidy has been included in the budget to balance the revenue side against the Agency expenditure figures shown in the statement of estimates.

Legal basis

Treaty establishing the European Atomic Energy Community, and in particular Articles 52 to 54 thereof.

Reference acts

Statute of the Euratom Supply Agency, and in particular Article VI thereof.

Remarks

This appropriation is intended to cover expenditure on implementation of a programme to promote alternatives to international road haulage, designated 'Marco Polo'. The alternatives considered are short-sea shipping, rail and inland waterway.

The main objective of the programme is to help shift an amount of cargo corresponding to the anticipated growth of international road haulage to other modes.

Three types of action which complement each other are proposed:

- start-up support for new non-road freight transport services, which should be viable in the mid-term (modal shift actions),
- support for launching freight services or facilities of strategic European interest (catalyst actions),
- stimulating cooperative behaviour in the freight logistics market (common learning actions).

The Marco Polo programme will also be able to fund actions involving countries which are candidates for accession to the European Union.

This appropriation also covers dissemination activities and accompanying measures.

The support for commercial action in the market for freight transport services is different from the support given through research and development programmes and the trans-European network programme. Marco Polo will foster modal shift projects in all segments of the freight market, not only in combined transport.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Remarks

This appropriation is intended for the establishment and development of the trans-European transport network (TEN), which is held to be a key policy for the proper functioning of the internal market and for economic and social cohesion (Articles 154 to 156 of the Treaty establishing the European Community). This contribution takes the form of co-financing of projects of common interest identified in the Community guidelines for the development of the trans-European transport network (Decision No 1692/96/EC).

The aim is:

- to help define projects of common interest,
- to speed up the Member States' implementation of trans-European transport network projects of common interest,
- to overcome the financial obstacles which may hamper the start-up phase of a project, particularly by means of feasibility studies,
- to encourage the participation of private capital in project funding, as well as public/private partnerships,
- to ensure better financial arrangements for projects, minimising the use of public funding, thanks to flexible means of intervention.

Since 2001, the bulk of Community funding has been covered by a multiannual indicative programme (MIP) established by the Commission. The purpose of the programme is the sound and rational establishment of the level of expenditure from the trans-European network budget over the period 2001 to 2006. The MIP is giving project promoters an assurance of Community support during the period in question, particularly where projects are undertaken in the form of public/private partnerships.

The programme divides into three specific actions.

First specific action

Annex III to Decision No 1692/96/EC lists the 14 projects approved by the Essen European Council in 1994. Most of these projects are now reaching the construction phase. In a small number of cases, technical studies are to be pursued before a decision is taken on construction.

Second specific action: programme for the Galileo satellite navigation system

The Galileo satellite radio-navigation system has entered its second (development and validation) phase covering the period 2001 to 2005. It comprises the development of the satellites and ground-control stations and the validation of the system 'in orbit'.

COMMISSION

TITLE 06 — ENERGY AND TRANSPORT

CHAPTER 06 03 — TRANS-EUROPEAN NETWORKS (*cont'd*)06 03 01 (*cont'd*)*Third specific action*

Other projects identified in the context of the guidelines for the development of the trans-European transport network, such as the elimination of bottlenecks in the rail network, the maintenance of cross-border rail links and cross-border projects, as well as other traffic management projects, including 'intelligent' transport systems (ITS) in the road and air sectors, receive Community support.

By concentrating on the priority projects and attaching priority to the elimination of bottlenecks in the rail network, the IMP provides particular support to the rail sector (63,5 % of the overall amount included in the programme). Full account is thus being taken of the provision in Regulation (EC) No 1655/1999 that rail projects, including combined transport, should receive at least 55 % of the TEN budget.

Priority should be given to projects involving crossborder connections, contributing to a modal shift, i.e. towards sustainable modes (rail and waterways) and with a guarantee that most of the financing will be provided by the Member States concerned (see the report by the high level group on the trans-European transport network of 27 June 2003, chaired by Mr van Miert). Rail projects contributing to the east-west unification of Europe should be prioritised.

Remarks

This appropriation is intended to cover the costs of economic and technical feasibility studies, preparatory and evaluation studies and interest-rate subsidies, loan guarantees or direct subsidies, in duly justified cases, for projects of common interest identified under the guidelines adopted by the Council.

The objective of this measure is to contribute towards the competitive operation of the internal energy market and the strengthening of the security of energy supply through the establishment of the network infrastructure required, and in particular through the establishment and development of trans-European energy networks, promoting the interconnection and interoperability of the national networks and access to such networks and extending them beyond the Community.

All proposals will be subject to environmental impact assessment and local consultation.

Remarks

This appropriation is intended to finance actions or measures concerning:

- implementation of medium and long-term strategies in the energy field to promote sustainable development, security of supply, competitiveness and environmental protection on the basis of shared analyses, including the development of standards and labelling and certification systems, long-term voluntary commitments to be agreed with industry, as well as forward studies, strategic studies, and regular monitoring of the development of the markets and energy trends,
- creation or enlargement of structures and instruments for sustainable energy development, including local and regional energy planning and management and the development of adequate financial products and market instruments,
- promotion of sustainable energy systems and equipment in order to accelerate their market penetration and stimulate investment to ease the transition from demonstration to marketing of the best technologies,
- development of information, education and training structures; the utilisation of results, the promotion and dissemination of know-how and best practices involving all consumers, and cooperation with the Member States through operational networks at Community and international level,
- monitoring of the implementation and impact of Community policy in the field of sustainable energy,
- evaluation of the impact of actions and projects funded under the programme.

The actions and measures are structured in three specific fields:

- improvement of energy efficiency and demand management, in particular in the construction sector and industry, including the preparation and application of legislative measures (SAVE),
- promotion of new and renewable energy sources for centralised and decentralised production and their integration into the urban environment, including the preparation and application of legislative measures (Altener),
- support for initiatives relating to the energy aspects of transport, the diversification of fuels and the promotion of renewable fuels and energy efficiency in transport, including the preparation and application of legislative measures (STEER).

As a general rule, the funding may not exceed 50 % of the total cost of the action or measure, the rest being covered either by public or private funds or a combination of the two.

COMMISSION
TITLE 06 — ENERGY AND TRANSPORTCHAPTER 06 06 — RESEARCH RELATED TO ENERGY AND TRANSPORT (*cont'd*)*Remarks*

These remarks are applicable to all the budget headings in this chapter.

These appropriations will be used in accordance with Regulation (EC) No 2321/2002 of the European Parliament and of the Council of 16 December 2002 concerning the rules for the participation of undertakings, research centres and universities in, and for the dissemination of research results for, the implementation of the European Community sixth framework programme (2002 to 2006) (OJ L 355, 30.12.2002, p. 23).

Research activities carried out within the sixth framework programme should respect fundamental ethical principles (in accordance with Article 3 of Decision No 1513/2002/EC), including animal welfare requirements. These principles include, in particular, those reflected in Article 6 of the Treaty on European Union and in the Charter of Fundamental Rights of the European Union. The need to stress activities aimed at promoting the role of women in science and research will receive particular attention.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Community to investigate new areas of research suitable for Community action, *inter alia*, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations also cover administrative expenditure, including expenditure on staff, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and measures necessary for preparation and monitoring of the Community's RTD strategy.

The possibility of third countries or organisations from third countries taking part in European cooperation in the field of scientific and technical research is envisaged in the case of some of these projects. Any financial contribution will be entered in Item 6 0 1 3 of the statement of revenue and may lead to additional appropriations being made available in accordance with Article 18 of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1).

Any revenue from the contribution from candidate countries for participation in Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18(1)(d) of the Financial Regulation.

Additional appropriations will be made available under Article 06 06 04.

Remarks

The aim of the actions carried out in this area is twofold:

- to consolidate, by integrating its research efforts, the position of the European aeronautics (implementation of the 'single sky') and space (development of the Galileo satellite navigation system) industry vis-à-vis increasingly strong world competition, and,
- to help exploit the potential of this sector, with a view to improving safety and environmental protection.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Remarks

These research measures should aim to contribute to a modal shift in favour of rail, collective/public transport, non-motorised mobility (cycling/walking) and waterways as well as transport safety. They should be based on an approach involving interoperability, intermodality, safety and integration of sustainable development into transport research (Article 6 of the Treaty establishing the European Community).

This appropriation is intended to cover action aimed at:

- developing means of transport and transport systems for all surface modes (rail, road and inland waterways) which are environmentally friendly and competitive (including Civitas II, launched together with the energy subpriority),
- rebalancing and integrating the different modes of transport,
- making rail, road and maritime transport safer, more efficient and more competitive,
- supporting European transport policy.

To the appropriations entered in this item must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. Remarks

This appropriation is intended to cover financial contributions to technical assistance projects in accordance with Article 5 of Regulation (EC) No 1655/2000 of the European Parliament and of the Council of 17 July 2000 concerning the Financial Instrument for the Environment (LIFE) (OJ L 192, 28.7.2000, p. 1), as last amended by Regulation (EC) No 1682/2004 of 15 September 2004 (OJ L 308, 5.10.2004, p. 1) pertaining to the third thematic component of LIFE III, 'LIFE-third countries'. Actions covered will support the establishment of capacities and administrative structures needed in the environmental sector in third countries. The financial framework for the implementation of the extension in the period 2005 to 2006 is set at EUR 317 200 000. The allocation of available appropriations for accompanying measures is limited to 6 % for the period 1 January 2005 to 31 December 2006. The countries eligible to participate in the LIFE-third countries programme are Albania, Algeria, Bosnia and Herzegovina, Croatia, Egypt, Israel, Jordan, Lebanon, Morocco, Syria, Tunisia, Turkey, the West Bank and Gaza Strip and the Baltic shoreline of Russia (Kaliningrad and St Petersburg regions). The European Union and bordering countries acting together to address environmental problems will be far more effective than individual national actions; many such issues being of a transnational nature. The activities undertaken aim at contributing to the development and strengthening of national environmental policies and action programmes with the objective of increasing environmental protection in countries bordering on the Mediterranean and the Baltic Sea, other than candidate central and east European countries who have signed association agreements with the European Union.

Support to actions promoting cooperation and coordination between several countries (European Union and bordering countries) is particularly targeted by the multiannual programme.

Irrespective of the beneficiary, no administrative expenditure against this article is authorised.

Remarks

The recent natural disasters which affected several Member states and accession countries through forest fires, floods or drought have clearly shown the deficits in cooperation between countries but also between border regions. This pilot project is aimed at raising awareness of the need for cooperation and should provide a framework to develop closer cooperation on civil protection measures with a view to preventing or at least minimising the consequences of such disasters by developing cross-border early warning, coordination and logistical tools (European Parliament resolution of 8 September 2005).

- build the European Reference Centre for Environmental Information,
- develop an integrated monitoring-to-reporting process,
- identify emerging issues of environmental importance,

RESEARCH

Overall objectives

The Commission's policy initiatives to achieve the European Research Area are devised, developed and followed up within this policy area.

European research contributes to attaining the objectives of the other Community policies and, in return, promotes the incorporation of research policy needs in these policies.

Community actions required to achieve the European Research Area are devised and implemented within this policy area, in particular the research and technological development framework programmes.

This domain contributes to implementing the Lisbon strategy for employment, international competitiveness, economic reform and social cohesion in the European Union, in particular in connection with the establishment of an area of education, training, research and innovation.

TITLE 08
RESEARCH*Remarks*

These remarks apply to all the budget headings in this title (with the exception of Chapters 08 13 and 08 14).

These appropriations will be used in accordance with Regulation (EC) No 2321/2002 of the European Parliament and of the Council of 16 December 2002 concerning the rules for the participation of undertakings, research centres and universities in, and for the dissemination of research results for, the implementation of the European Community sixth framework programme (2002 to 2006) (OJ L 355, 30.12.2002, p. 23) and Council Regulation (Euratom) No 2322/2002 of 5 November 2002 concerning the rules for the participation of undertakings, research centres and universities in the implementation of the sixth framework programme of the European Atomic Energy Community (2002 to 2006) (OJ L 355, 30.12.2002, p. 35).

For all appropriations under this title the same definition of small- and medium-sized enterprises (SMEs) as is used for the horizontal SME-specific programmes within the same framework programme will be applicable. That definition reads as follows: 'An eligible SME is a legal entity that complies with the SME definition set out in Commission Recommendation 2003/361/EC and is not a research centre, research institute, contract research organisation or consultancy firm'. All research activities conducted pursuant to the sixth framework programme will be carried out in compliance with fundamental ethical principles (in accordance with Article 3 of Decision No 1513/2002/EC of the European Parliament and of the Council (OJ L 232, 29.8.2002, p. 1)), including animal welfare requirements. This will include, in particular, the principles laid down in Article 6 of the Treaty on European Union and in the Charter of Fundamental Rights of the European Union. Particular account will be taken of the need to step up efforts to enhance the participation and role of women in science and research.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Community to investigate new areas of research suitable for Community action, *inter alia*, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations also cover administrative expenditure, including expenditure on staff, whether covered by the Staff Regulations or not, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and initiatives necessary for preparation and monitoring of the Community's RTD strategy.

The participation of third countries or organisations from third countries in European cooperation in the field of scientific and technical research is possible in the case of some of these projects (particularly COST). Any financial contribution will be entered in Items 6 0 1 3 and 6 0 1 6 of the statement of revenue and may lead to additional appropriations being made available in accordance with Article 18 of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1).

Any revenue from third parties sharing the cost of projects with the Community (firms in European Free Trade Association Member States, industrial consortia, etc.) entered in Article 6 0 1 5 of the statement of revenue may give rise to additional appropriations being made available in accordance with Article 18 of the Financial Regulation.

Any revenue from the contribution from candidate countries for participation in Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may lead to additional appropriations being made available in accordance with Article 18(1)(d) of the Financial Regulation.

Any revenue from the contribution from outside bodies for participation in Community programmes, entered in Item 6 0 3 3 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18(1)(d) of the Financial Regulation.

Additional appropriations will be made available under Article 08 12 03.

Remarks

The actions carried out in this area are intended to help Europe to exploit, by means of an integrated research effort, the results of breakthroughs achieved in decoding the genomes of living organisms for the benefit of public health and citizens and to increase the competitiveness of the European biotechnology industry.

The emphasis will be put on research aimed at bringing basic knowledge through to application, to enable real and consistent progress in medicine and improve quality of life.

More funding must be made available for research into developing alternatives to animal testing.

The research activities will cover the following aspects:

- fundamental knowledge and basic tools for functional genomics in all organisms: the strategic objective of this line of action is to foster the basic understanding of genomic information, by developing the knowledge base, tools and resources needed to decipher the function of genes and gene products relevant to human health and to explore their interactions with each other and with their environment,
- application of knowledge and technologies in the field of genomics and biotechnology for health: the strategic objective of this line of action is to foster the competitiveness of Europe's biotechnology industry by exploiting the wealth of biological data produced by genomics and advances in biotechnology.

In order to be able to meet the goal of 15 % SME participation in the projects financed by this appropriation, more specific action is needed. Projects qualifying under the SME-specific actions for which insufficient funding is available should be made eligible for funding under the thematic programme if those projects fulfill the thematic requirements.

TITLE 08 — RESEARCH

CHAPTER 08 02 — GENOMICS AND BIOTECHNOLOGY FOR HEALTH (*cont'd*)

08 02 01 (*cont'd*)

08 02 01 02 (*cont'd*)

The research activities will cover the following aspects:

- application-oriented genomic approaches to medical knowledge and technologies: the strategic objective of this line of action is to develop improved strategies for the prevention and management, using also advanced technologies for health, of human disease (cardiovascular, rare and nervous system diseases, diabetes, resistance to antibiotics, and rheumatism) and for living and ageing healthily. It will concentrate exclusively on integrating a genomic approach through all relevant organisms into more established medical approaches for investigating disease and health determinants. The emphasis will be on transnational research aimed at bringing basic knowledge through to clinical application,
- combating cancer: the objective is to combat cancer by developing improved patient-oriented strategies, from prevention to more effective and earlier diagnosis and better treatment with minimal side effects. The research will therefore concentrate on translating the knowledge being created by genomics and other fields of basic research into applications that improve clinical practice and public health,
- confronting the major communicable diseases linked to poverty: the strategic objective of this line of action is to confront the global emergency caused by the three major communicable diseases, HIV/AIDS, malaria and tuberculosis, through the development of effective disease interventions, particularly for use in developing countries. It is envisaged that developing countries will be significant partners in the implementation of this line of action and, as appropriate, participate directly in specific activities within it, in particular through the clinical trials programme and other international initiatives, in particular those related to HIV/AIDS, malaria and tuberculosis research. In addition, pursuant to Article 169 of the EC Treaty, this item also provides for financial participation by the Community in programmes undertaken by several Member States. This action on Community participation in a research and development programme aimed at developing new clinical interventions to combat the global crisis caused by HIV/AIDS, malaria and tuberculosis through a long-term partnership between Europe and the developing countries, undertaken by Austria, Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom, comes under the heading 'Combating major diseases'.

In order to be able to meet the goal of 15 % SME participation in the projects financed by this appropriation, more specific action is needed. - re-balancing and integrating various transport modes,
- increasing road, rail and waterborne safety and avoiding traffic congestion.

Research to support European transport policy focuses on implementation and utilisation of the results in the short term. Activities will be launched in the field of technologies for clean urban transport (the Civitas II initiative, supported together with the 'sustainable energy systems' subpriority), converting the European rail system and infrastructure charging.

Research, technological development and integration focus on developing new technologies specific to surface transport and on their integration in future transport systems and products in the short, medium and long term.

Expected outcomes include new generations of clean, quiet vehicles and ships, efficient, environment-friendly production systems, technologies promoting the modal balance, as well as technologies to maximise the safety of the various transport modes.

Remarks

The activities carried out in this area are intended to strengthen the scientific and technological capacities Europe needs to be able to implement sustainable development, recognised as a Community objective by the Gothenburg European Council, and integrate its environmental, economic and social dimensions, as discussed at the World Summit in Johannesburg in 2002. These activities should make a significant contribution to the international effort to understand and control global change and preserve the equilibrium of ecosystems.

In order to be able to meet the goal of 15 % SME participation in the projects financed by this appropriation, more specific action is needed. Projects qualifying under the SME-specific actions for which insufficient funding is available should be made eligible for funding under the thematic programme if those projects fulfill the thematic requirements.

To the appropriations entered in this item must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Remarks

The actions carried out in this area are intended to mobilise in a coherent effort, in all their wealth and diversity, research capacities in economic, political, social and human sciences that are necessary to develop an understanding of and to address issues related to the emergence of the knowledge-based society and new forms of relationships between people on the one hand and between people and institutions on the other.

In order to be able to meet the goal of 15 % SME participation in the projects financed by this appropriation, more specific action is needed. Overall objectives

Within this policy area, the main objectives of the communications services policy are to promote the development of an open and competitive internal market by implementing the new rules and to introduce a spectrum policy at Community level.

The eEurope operation fits in with the objectives set by the eEurope 2005 action plan, in particular the reinforcement of network security, promotion of the European dimension of the Internet by introducing the '.eu' domain, promotion of the European digital presence in global networks and the interoperability of telecommunications networks.

As for research and development activities in the information society policy area, information technologies must be stimulated by means of the specific programme in the sixth RTD framework programme 'Integrating and strengthening the European Research Area' and 'Structuring the European Research Area'. The main objectives to be achieved will be: solving security problems in order to improve the reliability of the technologies, infrastructures and applications, strengthening social cohesion by creating intelligent, easy-to-use systems, contributing to favourable conditions for growth and boosting business competitiveness and helping resolve complex problems in the sciences, society, industry and the economy.

Remarks

This appropriation is intended to cover expenditure relating to the Modinis multiannual programme, which provides financial support to the eEurope 2005 action plan adopted by the European Council Seville in 2002. The overall objective of the eEurope 2005 action plan is to provide a favourable environment for private investment and for the creation of new jobs, to boost productivity, to modernise public services, and to give everyone the opportunity to participate in the global information society. eEurope 2005 therefore aims to stimulate secure services, applications and content based on a widely available broadband infrastructure.

The measures carried out under this programme must take the gender dimension into account and must help ensure greater involvement of women in the information society.

The Community intervention is to finance the monitoring and the comparison of the efforts of the Member States on the basis of the open method of performance coordination adopted under the Lisbon strategy.

The general objectives of the action are:

- monitoring of the performances of the countries of the European Union against the most advanced countries by constituting a database of uniform and comparable information between the Member States,
- analysis of best eEurope practices and development of mechanisms for the exchange of experience with a view to converting the best practices into political measures,
- analysis of the impact of the 'information society' on society,
- support and promotion of network security by means of studies, surveys and exchanges of experience.

The measures described above will be the subject of contracts covering the following: analysis, expert reports, evaluation, specific studies, technical operations, coordination, grants, participation in international cooperation projects, participation in expenditure on equipment and on accompanying and support measures (studies, seminars, workshops, publications, creation of Internet sites for the dissemination of information and launching of electronic discussions on the Internet).

Remarks

The overall objective of this programme is to make digital content in Europe more accessible, usable and exploitable in areas of public interest — such as public sector information, education and culture — facilitating the creation and diffusion of information and knowledge at the Union level. The programme will support the development of multilingual content for innovative, online services across the EU. Such content should help to drive demand for broadband access and bring wider benefits for businesses, citizens and the economy. The programme seeks to support the combination of information from different systems — irrespective of format, language or location — and to ensure that content works on different platforms, and is better tailored to the specific needs of the user.

The operational focus will be on:

- facilitating access to, use and exploitation of digital content,
- improving quality and facilitating best practice for digital content,
- reinforcing cooperation and awareness.

The measures described above will be the subject of shared-cost actions covering: projects designed to augment knowledge to improve existing products, processes and/or services and/or to meet the needs of Community policies; best practice actions to spread knowledge and thematic networks bringing together a variety of stakeholders around a given technological and organisational objective. There will also be parts that are fully financed by the Community, such as the accompanying measures that will contribute to the implementation of the programme or the preparation of future activities (studies in support of the programme; exchange of information, conferences, seminars, workshops or other meetings and the management of clustered activities; dissemination, information and communication activities, evaluation and monitoring of the measure and projects).

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. - promoting a safer environment by supporting a self-regulatory approach (design and implementation of European codes of conduct for industry) and ensuring cooperation at Community level,
- increasing awareness about safer use of the Internet, by supporting a European network of awareness activities.

Content providers, Internet service providers and mobile network operators, regulators, standards bodies, industry self-regulatory bodies, national, regional and local authorities responsible for industry, education, consumer protection, families, children's rights and child welfare and non-governmental organisations active in consumer protection, families, children's rights and child welfare will all be called on to contribute to putting this programme into action.

These measures will be implemented by means of the following shared-cost action:

- pilot projects and best practice actions; ad hoc projects in areas relevant to the programme, including projects demonstrating best practice or involving innovative uses of existing technology,
- networks bringing together a variety of stakeholders to ensure action throughout the European Union and to facilitate coordination activities and transfer of knowledge. They may be linked to best-practice actions,
- applied Europe-wide research carried out on a comparable basis into the way people, especially children, use new media.

Accompanying measures will contribute to the implementation of the programme or the preparation of future activities. They will include:

- benchmarking and opinion surveys to produce reliable data on safer use of the Internet and new online technologies for all Member States collected through a comparable methodology,
- technical assessment of technologies such as filtering designed to promote safer use of Internet and new online technologies,
- studies in support of the programme and its actions, including self-regulation and the work of the Safer Internet Forum, and the preparation of future activities,
- prize competitions for best practice; exchange of information, conferences, seminars, workshops or other meetings and the management of clustered activities plus dissemination, information and communication activities.

CHAPTER 09 04 — RESEARCH AND TECHNOLOGICAL DEVELOPMENT ON INFORMATION SOCIETY POLICY (cont'd)

Remarks

This chapter covers, amongst others, the priority thematic research areas for which it is proposed to seek to allocate at least 15 % of the total financial resources to small and medium-sized enterprises (SMEs) to be supplemented by horizontal research activities of interest to SMEs.

These remarks are applicable to all the budget headings in this chapter.

These appropriations will be used in accordance with Regulation (EC) No 2321/2002 of the European Parliament and of the Council of 16 December 2002 concerning the rules for the participation of undertakings, research centres and universities in, and for the dissemination of research results for, the implementation of the European Community sixth framework programme (2002 to 2006) (OJ L 355, 30.12.2002, p. 23).

Research activities carried out within the sixth framework programme should respect fundamental ethical principles, in accordance with Article 3 of Decision No 1513/2002/EC of the European Parliament and of the Council (OJ L 232, 29.8.2002, p. 1) including animal welfare requirements. These principles include, in particular, those reflected in Article 6 of the Treaty on European Union and in the Charter of Fundamental Rights of the European Union. The need to stress activities aimed at promoting the role of women in science and research will receive particular attention.

Also entered in these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, grants, monitoring and evaluation of the specific programmes and of the framework programmes, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Community to investigate new areas of research suitable for Community action, *inter alia*, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations also cover administrative expenditure, including expenditure on staff, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and measures necessary for preparation and monitoring of the Community's RTD strategy.

The possibility of third countries or organisations from third countries taking part in European cooperation in the field of scientific and technical research is envisaged in the case of some of these projects. Any financial contribution will be entered in Item 6 0 1 3 of the statement of revenue and may lead to additional appropriations being made available in accordance with Article 18 of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1).

Any revenue from the contribution from candidate countries for participation in the Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18(1)(d) of the Financial Regulation.

Additional appropriations will be made available under Article 09 04 04.

Remarks

The priority thematic area of information society technologies (IST) will contribute directly to the formulation of policies for the knowledge-based society in line with the revised Lisbon agenda. It will ensure European leadership in the generic and applied technologies at the heart of the knowledge-based economy. It aims to increase innovation and competitiveness in European businesses and industry and to contribute to greater benefits for all European citizens.

The 2005 to 2006 work programme will focus research efforts on a limited number of strategic objectives which are essential to achieve the aims of the IST priority under the sixth research and technological development framework programme. These strategic objectives will also be defined so as to:

- consolidate forces in the fields in which Europe is the industrial and technological leader,
- overcome weaknesses in critical areas to ensure European competitiveness and to rise to the challenges facing society,
- exploit new opportunities and react to emerging needs, and
- ensure the joint development of technologies and applications so that technological advances can be exploited in new products and services.

Finally, this new work programme will start to pave the way for certain solutions and tools under the seventh framework programme, such as technology platforms.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Remarks

The objective of the 'Research Infrastructures' activity under the 'Information Society' policy area is to create a denser network between related initiatives in support of existing research infrastructures. Within its 'Communication Network Development' scheme, this activity promotes further breadth and depth to the collaboration amongst researchers in Europe through the development of eInfrastructures for research capitalising on new computing and communication opportunities. In particular, a high-capacity and high-speed communications network for all researchers in Europe (GÉANT) and specific high-performance grids and test beds (GRIDS) will be developed. The 2006 work programme fosters the deployment of advanced Grids-empowered infrastructures to enhance Europe's position in the area of Grids.

This policy area includes all the activities covered by the common fisheries policy (CFP) which comes under the exclusive competence of the Community. It concerns all fisheries activities as well as the processing and marketing of these products.

It also ensures that the relevant provisions of Community law are rightly applied in the fisheries sector.

The policy area covers five operational activities: specific measures in support of the CFP (including conservation of fisheries resources, control and dialogue with fisheries sector), relations and agreements with third countries and international organisations, common organisation of the fisheries market, fisheries research and structural measures for fisheries through the Financial Instrument for Fisheries Guidance (FIFG).

Sixty percent of appropriations is devoted to the FIFG. However, the FIFG operations are mainly implemented by the Member States as a part of decentralised management.

⁽¹⁾ One reason for the volume of pre-2005 commitments that are still outstanding is that certain contracts were signed late in 2004, with the result that little could be paid against these commitments in 2004. In addition the planned timetable for the creation of the RAC in 2004 was delayed, and this also delayed the payment schedule for these actions.

Remarks

This appropriation is intended to finance the following under the action plan for closer dialogue with the fishing industry and those affected by the common fisheries policy (CFP) and maritime affairs:

- grants to European trade bodies for the organisation of internal coordination meetings in preparation for meetings of the Advisory Committee on Fisheries,
- the implementation of measures to provide documentation about and explain the common fisheries policy aimed at the fishing industry and those affected by the common fisheries policy.

In the framework of the reform of the common fisheries policy, the Commission will set up regional advisory councils and contribute to ensuring their operation with a view to improving the involvement of stakeholders in the CFP.

This appropriation is intended to strengthen the participation of people working in fisheries and other interest groups in the CFP process, providing support for a form of a more decentralised fisheries resource management that takes greater account of specific regional characteristics.

Part of the appropriation is earmarked also for information activities linked to the common fisheries policy and maritime affairs as well as for communication activities addressed to the interested parties. Particular effort will be devoted to explaining the rules of the common fisheries policy to the new Member States and to establishing direct contact with the fisheries industry and the local and regional press.

Any revenue may result in the opening of additional appropriations in accordance with Article 18 of the Financial Regulation.

Remarks

These remarks apply to all the budget headings in this chapter.

These appropriations will be used in accordance with Regulation (EC) No 2321/2002 of the European Parliament and of the Council of 16 December 2002 concerning the rules for the participation of undertakings, research centres and universities in, and for the dissemination of research results for, the implementation of the European Community sixth framework programme (2002 to 2006) (OJ L 355, 30.12.2002, p. 23).

All research activities conducted pursuant to the sixth framework programme will be carried out in compliance with fundamental ethical principles (in accordance with Article 3 of Decision 1513/2002/EC of the European Parliament and of the Council (OJ L 232, 29.8.2002, p. 1)), including animal welfare requirements. This will include, in particular, the principles laid down in Article 6 of the Treaty on European Union and in the Charter of Fundamental Rights of the European Union. Particular account will be taken of the need to step up efforts to enhance the participation and role of women in science and research.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Community to investigate new areas of research suitable for Community action, *inter alia*, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations also cover administrative expenditure, including expenditure on staff, whether covered by the Staff Regulations or not, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and measures necessary for preparation and monitoring of the Community's research and technological development strategy.

The possibility of third countries or organisations from third countries taking part in European cooperation in the field of scientific and technical research is envisaged in the case of some of these projects. Any financial contribution will be entered in Item 6 0 1 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 18 of the Financial Regulation.

Any revenue from the contribution from candidate countries for participation in Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with the Financial Regulation.

The additional appropriations will be provided under Article 11 05 02.

CHAPTER 11 06 — STRUCTURAL INTERVENTIONS FOR FISHERIES (cont'd)

Remarks

Article 39 of Council Regulation (EC) No 1260/1999 provides for financial corrections, any revenue from which is entered in Item 6 5 0 0 of the statement of revenue. That revenue may give rise to the provision of additional appropriations, in accordance with Article 18 of the Financial Regulation, in specific instances where they are necessary to cover risks of cancellation or of reductions in corrections previously decided upon.

Regulation (EC) No 1260/1999 determines the conditions for repayment of an advance without having the effect of reducing the contribution from the Structural Funds towards the assistance concerned. Any revenue from the repayment of advances, which is entered in Item 6 1 5 7 of the statement of revenue, will give rise to the provision of additional appropriations in accordance with Articles 18 and 157 of the Financial Regulation.

The special programme for peace and reconciliation is continued, in accordance with the abovementioned decisions of the Berlin European Council, to provide EUR 500 million for the new period of validity of the programme. Additionality is to be fully observed. The Commission is to submit an annual report to the European Parliament on this measure.

Measures to combat fraud are funded under Article 24 02 01.

Remarks

This appropriation covers:

- the Community contribution to expenditure incurred by the Member States in connection with the Community framework for the collection and management of basic fisheries data,
- studies and pilot projects carried out by the Commission, where appropriate in cooperation with the Member States, to provide methodological support for programmes to collect basic data and the information necessary for the implementation of the common fisheries policy.

In the framework of the reform of the common fisheries policy, the Commission will implement adequate measures in order to improve scientific advice on fisheries issues.

Part of the appropriation is intended for:

- improving scientific advice on the management of fishery resources, taking account not only of the impact of fishing industry activities but also of other factors (maritime transport, pollution, etc.) which have an impact on fishery resources,
- developing a sound statistical basis which will enable scientific advice to be improved and increased. This will reinforce the aspects relating to the common fisheries policy, the introduction of multiannual plans and the use of more selective fishing gear, in order to maintain the balance of fishery resources.

Article 39 of Regulation (EC) No 1260/1999 provides for financial corrections for which any revenue is entered in Item 6 5 0 0 of the statement of revenue. This revenue may be used to provide additional appropriations in accordance with Article 18 of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1) in specific cases where they are required to cover the risk of corrections adopted earlier being cancelled or reduced.

Regulation (EC) No 1260/1999 lays down the conditions for the repayment of payments on account which does not have the effect of reducing the contribution from the Structural Funds to the operation concerned. Any revenue arising from the repayment of payments on account entered in Item 6 1 5 7 of the statement of revenue will be used to provide additional appropriations in accordance with Articles 18 and 157 of Regulation (EC, Euratom) No 1605/2002.

Remarks

The special programme for peace and reconciliation was continued, in accordance with the decisions mentioned below, of the Berlin European Council to provide EUR 500 million (1999 prices) for the new period of validity of the programme (2000 to 2004). Following the request in the conclusions of the European Council meeting on 17 and 18 June 2004 in Brussels, an additional EUR 105 million, to be allocated in 2005 and 2006, was added to align interventions under the programme with the other programmes under the Structural Funds that come to an end in 2006. Additionality is to be fully observed. The Commission is to submit an annual report to the European Parliament on this measure.

Remarks

This appropriation is intended to cover expenditure relating to the implementation of the action programme for Community customs, and in particular the financing of measures for monitoring licence management systems, working parties, pilot projects or schemes and seminars with officials from Member States' administrations and from non-member countries associated with customs policy and representatives of outside bodies, as well as the coordinated development of the use of computerised customs procedures, taking account of the current state of computerisation of national administrations and the interests of economic operators in the European Union, and of developments in the international environment in this area.

This support will take the form of the financing of expenditure on studies, the development, implementation and operation of common systems and the definition of common guidelines for training and technical assistance for implementation. The operating expenditure also covers financial contributions to the functioning of systems, in particular decentralised data input; the financing of information and training measures for system users; the acquisition and maintenance of shared equipment; the financing of technical assistance.

This appropriation is also intended to cover expenditure incurred by the implementation of the activities, particularly exchanges of officials and the organisation of joint training courses, provided for in the abovementioned Decisions for Community customs and indirect-taxation officials responsible for applying Community law in connection with the internal market and at the external borders of the Community.

These exchanges may also involve certain non-member countries if it is thought that this will be useful for achieving the objectives of the programme.

This appropriation also covers the financing of customs-related analyses and strategic studies, the development of harmonised working methods and measures to provide Member States with assistance and technical support.

Particular attention needs to be given to programmes for training and exchange of information to improve knowledge and control of the illegal trade in animal and plant species in the context of implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

This appropriation may also cover the involvement of non-member countries where cooperation with these countries, and particularly the adoption of common procedures, will facilitate trade and improve fraud prevention, and consequently make for more efficient administration of the internal market.

Remarks

This appropriation is intended to fund general information work on the European Union, with the aim of providing all Europeans with general information on the work of the Community institutions, on decisions taken and on the different stages of European integration, a task which falls within the public service remit. The information concerned covers all the Community institutions.

The Commission has adopted communications to the Council, the European Parliament, the European Economic and Social Committee and the Committee of the Regions on a framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final, COM(2002) 350 final and COM(2004) 196 final). These communications propose an interinstitutional framework for cooperation between the institutions and with the Member States for the development of an information and communication strategy for the European Union.

The Interinstitutional Group on Information (IGI), co-chaired by the Commission, the European Parliament and the Council, lays down common guidelines on topics for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on these topics. Each year the IGI gives its opinion on the priorities for the following years based on a report produced by the Commission.

With regard to the decentralised measures, the Commission representations and the European Parliament's external offices must jointly devise and carry out information and communication activities relating to European Union policies with the exception of issues concerning each institution's specific institutional role.

The production of information for citizens is provided via actions through the media.

The amount of assigned revenue in accordance with Article 18(1)(e) to (j) of the Financial Regulation is estimated at EUR 10 000.

Remarks

This appropriation is intended to fund general information and public opinion analysis work, with the aim of providing all Europeans with general information on the work of the Community institutions, on decisions taken and on the different stages of European integration, a task which falls within the public service remit. The information concerned covers all the Community institutions. It is supplied to the public through a decentralised network.

The Commission has adopted communications to the Council, the European Parliament, the European Economic and Social Committee and the Committee of the Regions on a framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final, COM(2002) 350 final and COM(2004) 196 final). These communications propose an interinstitutional framework for cooperation between the institutions and with the Member States for the development of an information and communication strategy for the European Union.

The Interinstitutional Group on Information (IGI), co-chaired by the Commission, the European Parliament and the Council, lays down common guidelines on topics for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on these topics. Each year the IGI gives its opinion on the priorities for the following years based on a report produced by the Commission.

With regard to the decentralised measures, the Commission representations and the European Parliament's external offices must jointly devise and carry out information and communication activities relating to European Union policies with the exception of issues concerning each institution's specific institutional role.

Remarks

This appropriation is intended to cover the funding of priority information measures on Community policies.

It covers the 'Debate on the future of the European Union' established in the context of the Intergovernmental Conference. The appropriations are intended first and foremost for informing citizens about, and involving them in, the debate about the future direction of Europe. This measure is designed to be an effective channel of communication and dialogue between the people of the European Union and the Community institutions and take account of specific national and regional characteristics, in close cooperation with the Member State authorities and civil society. In this connection the Commission will adopt a White Paper outlining a new communication and information strategy.

This appropriation is also intended to finance activities by NGOs and independent foundations active on European issues, which provide a forum for debate and foster further dialogue with, and political choice, for citizens.

The Interinstitutional Group on Information (IGI), co-chaired by the Commission, the European Parliament and the Council, lays down common guidelines on topics for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on these topics. Each year the IGI gives its opinion on the priorities for the following years based on a report produced by the Commission.

Remarks

Decision No 20/2004/EC establishes a general framework for financing Community actions in support of consumer policy as defined in the multiannual strategy. The decision and the strategy entail three strategic objectives in the medium term:

- a high, harmonised level of consumer protection throughout the EU,
- effective implementation of consumer protection rules,
- involvement of consumer organisations in Community policies.

These three aims are supported by the legal basis mentioned below, applicable for 2004 to 2007.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Any revenue from the contribution from candidate countries for participation in Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may lead to additional appropriations being made available in accordance with Article 18(1)(d) of the Financial Regulation.

Memoranda of understanding were signed with Romania on 22 October 2004 and with Bulgaria on 29 October 2004. They will enter into force after ratification at national level.

Remarks

The aim of the new programme of Community action in the field of public health (2003 to 2008) is to contribute to attaining a high level of health protection by directing action towards improving public health, preventing human illness and diseases, and obviating sources of danger to health.

Its three main priorities are:

- to improve information and knowledge for the development of public health and the strengthening and maintenance of effective health interventions and efficient health systems, by developing and operating a well-structured and comprehensive system for collecting, analysing, evaluating and imparting health information and knowledge to competent authorities, health professionals and the public, and by undertaking assessments of and reporting on the health situation and health-related policies, systems and measures,
- to enhance the ability to respond rapidly and in a coordinated way to threats to health by developing, strengthening and assisting the operation and interlinking of surveillance, early warning and rapid reaction mechanisms covering health hazards,
- to address health determinants through health promotion and disease-prevention measures, by supporting and developing broad health-promotion activities and disease-prevention actions and specific risk-reduction and elimination instruments.

Non-governmental organisations are key players in the implementation of the programme. Therefore, they should be allocated adequate funds.

Remarks

The Community's financial assistance will make it possible to accelerate eradication or control by providing funds to supplement national financial resources and will contribute to harmonising measures at Community level. A major part of these diseases or infections are zoonoses communicable to man (BSE, brucellosis, salmonellosis, tuberculosis, etc.) and combating them helps to improve the level of public health and to boost food safety in the European Union; the persistence of these diseases hampers smooth operation of the internal market.

Remarks

This appropriation is intended to cover the Community contribution to measures to eliminate obstacles to the free movement of goods in these sectors and to veterinary support and back-up measures.

One important measure is providing financial assistance for the work of the Community reference laboratories designated in Community legislation. The work they do helps improve control over animal diseases and prevent them and reduce the risks as far as possible.

This appropriation also covers expenditure on the monitoring of compliance with animal-protection provisions during the transport of animals for slaughter.

It is also intended to finance the development of marker vaccines or tests which can distinguish between sick and vaccinated animals.

Credits of this line can also be used for the establishment and the maintenance of a rapid alert system for the notification of a direct or indirect risk to human health deriving from food or feed

Technical and scientific measures necessary to develop Community veterinary legislation, for example the surveillance of *Campylobacter* in broilers in Sweden, are also covered by this appropriation.

Legal basis

Remarks

The appearance of certain animal diseases in the Community could possibly have a major impact on operation of the internal market and on the Community's commercial relations with third countries. Against that backdrop, the Community should make a financial contribution towards the eradication, as quickly as possible, of any outbreak of a serious infectious disease when Member States deploy Community means to combat epizootic diseases.

Remarks

This appropriation is intended to finance, for the second year, preparatory measures for:

- the implementation of integrated return actions of illegal residents to their country of origin, or countries of former residence and transit, as well as measures aimed at ensuring sustainability of these returns (both through efficient information at pre-departure stage and the provision of reception and reintegration support of returnees, in cooperation with their country of origin). The plans would include actions aiming at both voluntary and forced return,
- encouraging the development of cooperation between Member States both in the conception of return plans (choice of categories of persons targeted caseloads of persons according, for example, to the nationality or region of origin), and in the implementation of actions within these plans (for cooperation in the gathering and provision to potential returnees of information on the country of origin, organisation of joint voluntary return or removal operations, provision of reception and first reintegration support in cooperation with the third country concerned, monitoring missions on the situation of returnees and sustainability of their situation several months/weeks after their return).

Legal basis

Preparatory action within the meaning of Article 49(2) of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1).

This will involve in particular an assessment of the implementation of each of the rights laid down notably in the Charter of Fundamental Rights of the European Union, taking account of developments in national laws, the case-law of the Court of Justice of the European Communities and the European Court of Human Rights, the conclusions of treaty monitoring committees concerning implementation of UN conventions by Member States, reports by other relevant monitoring bodies, such as the Committee against Torture, and any notable case-law of the Member States' national and constitutional courts.

This appropriation is also intended to fund the development of information tools (databases, helplines, legal aid), in agreement with relevant institutions in the Member States and NGOs operating in the field of fundamental rights, enabling all persons to gain access to the information they require.

EUR 250 000 of this appropriation is also intended to fund initiatives involving the Member States' constitutional courts and European-level courts with a view to establishing a European centre for the monitoring of constitutional courts' case-law on fundamental rights as laid down in the European Charter of Fundamental Rights. It is also intended to cover translation of that case-law into at least English and French.

Remarks

The programme shall support projects in the following areas relating to Title VI of the Treaty on European Union:

- judicial cooperation in general and criminal matters, including training,
- cooperation between law enforcement authorities,
- cooperation between law enforcement authorities or other public or private organisations in the Member States involved in preventing and fighting crime, organised or otherwise,
- cooperation between Member States to achieve effective protection of the interests of victims in criminal proceedings.

Part of the appropriation is to be set aside to promote the rights of the defence and procedural guarantees and assist persons involved in criminal proceedings in the framework of transnational judicial cooperation. It is to be used in particular to fund for each Member State, depending on the law in force, the publication and translation of a 'letter of rights' to be handed to persons to be questioned, either upon arrival at a police station or at the location where questioning is to take place.

Legal basis

Council Decision 2002/630/JHA of 22 July 2002 establishing a framework programme concerning police and judicial cooperation in criminal matters (AGIS) (OJ L 203, 1.8.2002, p. 5).

Remarks

The transposition of the framework decision on the European arrest warrant by Member States by 1 January 2004 is a sign of a very high degree of trust in other Member States' judicial systems. It will also make direct contacts between judges of different Member States necessary. At the same time the framework decision illustrates the fact that enormous challenges still need to be overcome. The pace of decision-making at European level has increased in an unprecedented way. This needs now to be followed up by increased training efforts to ensure proper implementation. Legal practitioners in the EU need to acquire sufficient knowledge not only about the different judicial systems in the Member States, but also, in particular, about relevant EU law. In addition a common understanding within the profession needs to be developed. Most importantly, the overall quality of the judicial system needs to be improved in order to ensure citizens' support for the common European judicial area. Permanent efforts will be needed to ensure that the mutual trust between Member States is maintained. In this context, reference should be made to the Green Paper on procedural safeguards in criminal proceedings.

These are all not only Member State tasks, but also European-level tasks since judges are now considered also to be judges of the EU.

The preparatory action should contribute to the efforts already undertaken to improve the quality of the judicial systems in the EU Member States, notably by means of training for members of the judiciary. These needs are cross-cutting and the pilot project should address them with no distinction between criminal and civil law cooperation, thus overcoming this artificial separation between the first and third pillars.

The preparatory action should comprise two main elements: firstly, improved training for members of the judiciary, mainly through the exchange programme but also through the development of learning and teaching materials, and, secondly, increased cooperation between all the actors involved (academic lawyers, training institutions and the judiciary), to ensure better mutual understanding and exchange of best practices.

As regards the first element, members of the judiciary should have the possibility of participating in a programme comprising several modules:

I. *Exchange programme*: the cornerstone of the pilot project should be the setting-up of an exchange programme for members of the judiciary. It should be a non-bureaucratic and sustainable scheme. In each Member State a contact point should be set up. It would be up to each Member State to determine its contact point, which should be an institution responsible for the training of members of the judiciary.

II. *eLearning*: in order to reach as many persons as possible in the target group, by way of a first step appropriate eLearning material should be developed and disseminated widely (for example learning material or courses provided by institutions or bodies responsible for training of members of the judiciary, including videos of typical court hearings, reports by participants to exchange programmes with hyperlinks to homepages of the Commission and Parliament websites and to relevant contact points (e.g. liaison magistrates, Eurojust and national members) and to cooperation tools set up by the European judicial network (such as a judicial atlas, etc.). Members of the judiciary should be able to consult this material if they need to acquire knowledge about problems concerning EU law or the current situation in a particular Member State.

III. *Regular meeting of officials responsible for training institutions to exchange and discuss*:

- the programme and content of initial and further vocational training,
- conditions for the reciprocal opening-up of permanent training sessions to practitioners from all Member States,
- best practices and assessment criteria.

Remarks

This appropriation is intended to cover the funding of priority information measures on Community policies.

It covers information in the field of justice and home affairs in relation to the establishment of an area of freedom, security and justice. This measure is designed to be an effective channel of communication and dialogue between the people of the European Union and the Community institutions and take account of specific national and regional characteristics, in close cooperation with the Member State authorities.

The Commission has adopted two communications to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions on a new framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final and COM(2002) 350). These communications propose an interinstitutional framework for cooperation between the institutions and with the Member States for the development of a communication and information policy strategy for the European Union.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years on the basis of information provided by the Commission.

This appropriation is intended to cover the funding of an information campaign on the new transparency measures based on Article 255 of the EC Treaty and Regulation (EC) No 1049/2001 and of the creation of an interinstitutional server giving on-line access to the EU law-making process.

It covers information to citizens about their rights of access to European Parliament, Council and Commission documents specifically relating to the interinstitutional law-making process. This measure is designed to inform citizens about the principles and conditions governing access to EU documents and at the same time to give them a single tool to facilitate their access to documents relating to an interinstitutional legislative procedure and to national implementing measures.

Remarks

This appropriation follows on from the preparatory action for 2001 to 2003 and the Commission communication on integrating migration issues in the European Union's relations with third countries (COM(2002) 703), which have paved the way for a legal basis.

The EU has approved a Community programme for the cooperation with non-EU countries and regions of origin and transit in the field of migration and asylum, which will provide a specific, additional response to the needs encountered by these countries in their efforts to better manage migratory flows, and to help them to improve their capacities to fulfil their international obligations in the field of asylum and migration, including readmission.

This Community cooperation programme will finance appropriate actions which will join in a coherent way national and regional Community cooperation and development strategies regarding the non-EU countries concerned and complete the actions — in particular in the fields of migration, asylum, border control, refugees and displaced people — provided for in the implementation of these strategies and financed from other Community instruments in the field of cooperation and development.

The respect of democratic principles and rule of law, as well as of human and minority rights and of fundamental freedoms, will constitute an essential element for the application of this Instrument. If necessary, and as far as possible, the actions financed will be associated with measures aiming to strengthen democracy and the rule of law and the compliance with international instruments in this field, including the Geneva Convention on Refugees.

Partners eligible for financial support under this appropriation may include regional and international organisations and agencies (in particular, UN agencies), non-governmental organisations (NGOs) or other non-State actors, federal, national, provincial and local governments of third countries, their departments and agencies, institutes, associations and public and private operators. As regards cooperation with the authorities of the States involved, all necessary steps will be taken to ensure that the monies allocated are not used for purposes other than those for which they are intended.

Priority will be given to comprehensive programmes that shall be consistent with the Community efforts which contribute to addressing the root causes of migration.

In the implementation of the cooperation measures related to the improvement of the institutional, administrative and logistical capacities of non-EU countries to help them to fulfil their obligations in the areas of asylum, migration, including readmission, full attention will be given to the way the people (migrants, refugees or readmitted persons) are treated. This will be subject to strict controls.

It is intended to cover a whole range of actions such as mine clearance, stockpile destruction, mine risk education, survey of suspected areas and victim assistance.

This appropriation is intended to cover in particular the financing of actions of civilian nature aimed at counteracting or resolving emerging crisis situations and serious threats or outbreaks of conflict.

Implementing partners may include authorities of the Member States or of beneficiary countries and their agencies, regional and international organisations and their agencies, NGOs, public and private operators and individual organisations or operators (including staff seconded from Member State administrations) with appropriate specialised expertise and experience.

Remarks

This appropriation is intended to cover a preparatory action to set up a voluntary technical assistance programme for countries in need. It will provide the structure to send volunteers from the EU Member States to third countries to help with the implementation of European Union instruments in order to assist to people in third countries. The structure must be able to provide the European volunteers with the necessary training, make other preparatory arrangements for them and cover the cost of the volunteers' operation in a third country plus costs possibly arising after an operation but directly related to it.

It is also intended to finance a feasibility study on the establishment of a European Civil Peace Corps going beyond humanitarian aid *in stricto sensu*.

The preparatory action is intended to fund preparatory work by the Commission to develop the best way to create such a structure, possibly in cooperation with third parties engaged in the humanitarian and development aid sector, to set up all elements of the chosen structure on a small scale, and to recruit and deploy initial volunteers in a pilot scheme.

Legal basis

Remarks

Conflict prevention and crisis management activities, by their nature, require a possibility to react to relatively unforeseeable external developments. A 'crisis situation' means a situation in a country outside the European Union which poses a threat to law and order and the safety of individuals, which threatens to escalate into armed conflict or to destabilise the country or countries and which might seriously jeopardise the common values, fundamental interests, independence and integrity of the Union, its security, the preservation of peace and international security, the promotion of international cooperation or the development and consolidation of democracy and the rule of law, respect for human rights and fundamental freedoms as defined in Article 11 of the Treaty on European Union. Action financed under this heading by the common foreign and security policy (CFSP) budget must be of a civilian nature, have a limited duration and keep within the budget allocated.

In view of the diversity and scale of these activities, a substantial capacity to respond to situations of imminent conflict or crisis is required in the CFSP framework — notably in the area of Petersberg tasks, without military implications, or in the defence field — which justifies keeping the article at a high level.

Remarks

This appropriation is intended to finance measures which contribute to the non-proliferation of weapons of mass destruction (nuclear, chemical and biological). Since the adoption of the EU strategy against the proliferation of WMD in December 2003, joint actions can be identified more quickly. Under item 19 01 04 14, a maximum of two experts are intended to be financed to help the Commission to implement projects under this budget line.

It is also intended to finance operations to combat the destabilising accumulation and trafficking of small arms and light weapons, provided that they are not already covered by the provisions of the Cotonou Agreement concerning similar action in the ACP States. New actions are foreseen in new geographic areas, in particular in eastern Europe.

TITLE 19 — EXTERNAL RELATIONSCHAPTER 19 04 — EUROPEAN INITIATIVE FOR DEMOCRACY AND HUMAN RIGHTS (EIDHR) (*cont'd*)19 04 03 (*cont'd*)

Part of this appropriation may be allocated, with due regard for the provisions of the Financial Regulation, to providing support for the activities of organisations which are working to develop and strengthen democratisation processes and the promotion and defence of human rights, and in particular to promote freedom of assembly and political pluralism in territories in which repression is a particular threat and in places where jail sentences are imposed for such activities, without any judicial guarantees. Special attention should be given to this kind of situation in isolated states and to organisations and projects supported by the European Parliament.

- support for measures facilitating the peaceful conciliation of group interests, including support for confidence-building measures relating to human rights and democratisation, in order to prevent conflict and to restore civil peace,

 - support for international, regional or local organisations, including NGOs, involved in preventing, resolving and dealing with the consequences of conflict, together with support and assistance for victims of human rights violations;

- support for efforts to increase the number of countries belonging to the Community of Democracies,
 - support for the efforts of NGOs working towards those objectives by mobilising civil society to consolidate democracy, the rule of law and human rights.

As regards geographical and thematic coverage, countries, regions and themes will be selected to maximise the added value of financing for the European initiative for democracy and human rights (EIDHR), with in particular certain target countries being chosen and special focus on the Arab region and the Middle Eastern countries.

This appropriation is also intended to cover civil society follow-up to relevant provisions of the final declaration of the Sana'a InterGovernmental Regional Conference on Democracy, Human Rights and the Role of the International Criminal Court held in January 2004 with the support of the European Union.

Part of this appropriation is intended to provide support for rehabilitation centres for torture victims, which must remain an overriding priority, for organisations offering concrete help to victims of human rights abuses and organisations that help to improve the rights of people who are deprived of their liberty, in order to prevent torture or ill-treatment, and for torture-prevention measures.

Part of this appropriation, with due regard to the provisions of the Financial Regulation, is intended to be used to support active involvement of Iraqi women in the process of peace-building and peacekeeping in their country, in particular to involve them in all areas and at all levels of decision-making.

As regards the type of initiative, special attention will be paid to projects which are innovative, have a regional dimension or allow a synergy with other Community instruments and to the bilateral programmes of European Union Member States.

Part of this appropriation is to be used for conflict prevention and crisis management through leadership education for, and reconciliatory network-building by, young local female and male leaders of different cultures, ethnicity or religion whose communities experience conflict, tension and segregation.

This appropriation is also intended to finance:

This appropriation is also intended to cover the promotion of actions of non-governmental organisations to co-finance activities, including the promotion and protection of the fundamental rights of children in keeping with the UN Convention on the Rights of the Child. It is also intended to fund measures to mainstream human rights and democratisation into all development cooperation policies.

In this context, this appropriation is also intended to promote the rights of the child in EU development policy and specifically to promote dialogue and cooperation between the EU and Member States to follow up and implement 'A World Fit for Children', the outcome document agreed at the United Nations Special Session on Children in May 2002.

It is also intended to enable the use of external staff providing support to electoral observation missions, including the financing of the chief observer contract with the Commission as special adviser under Articles 5 and 82 of the Conditions of employment of other servants of the European Communities, in the Staff Regulations.

In connection with the election observation missions financed under this article the Commission, in close dialogue and collaboration with the host government, civil society and other relevant parties, should make serious efforts to ensure that the recommendations by election observation missions are fully implemented and that the necessary resources are made available for that purpose.

Remarks

Japan

The planned activities are intended to improve market access of EU goods and cross-border services to Japan through:

- measures aimed at improving knowledge of the Japanese market; the executive training programme (ETP), designed to build up a pool of European executives able to communicate and operate in Japan's business environment, will be continued,
- measures aimed at improving the commercial presence of EU industry in Japan; the 'Gateway to Japan' campaign,
- other measures facilitating access to the Japanese market.

Greater focus will be given to EU-Japan cooperation activities. Continuing efforts will have to be made in view of converting the EU-Japan action plan adopted at the summit of December 2001 into concrete action (e.g. conferences, seminars, development of Europe centres in Japan, etc.). An enhanced and better structured dialogue with Japan will be developed, along the lines of the objectives set out in the action plan in the four cooperation priority areas.

Any revenue from financial participation by outside parties in promotional activities, notably the ETP programme, may lead to additional appropriations being made available in accordance with Article 18 of the Financial Regulation.

United States of America

The planned activities will contribute to implement the new transatlantic agenda (NTA), which was signed in December 1995 and provides the framework under which the EU conducts its relations with the United States of America. The NTA is complemented by a joint action plan under which the EU and the United States of America jointly committed themselves to the achievement of a wide range of objectives not only concerning bilateral relations, but also cooperative actions towards non-member countries, in multilateral forums and on global challenges. The Commission intends to continue its support to the transatlantic dialogues between non-government actors and to step up its support to EU Centers in the US by adopting a multi-annual programme as recommended in the EU Centers evaluation carried out in 2003 to 2004.

The Commission also plans to develop targeted communication and information activities to pursue the objectives of the NTA.

Canada

The wide agenda of EU-Canada cooperation is reflected in the diversity of the planned activities, which fit into the overall programme for cooperation set up by the joint political declaration on EU-Canada relations and the joint EU-Canada action plan. The Commission will pursue the activities intended to enhance cooperation and to develop economic relations. Efforts to raise awareness of the benefits of EU-Canada relations will be continued, through targeted communication and information initiatives and education projects.

South Korea

The focus will be on enhancing knowledge of Korean language and business culture through the executive training programme for Korea which has been established on a recurrent basis. Other cooperation activities which might usefully accompany the implementation of the Framework Agreement and the study on industrial cooperation and contribute to achieving its objectives will also be considered, provided that funding can be made available.

Australia and New Zealand

The Commission will consider activities in line with the objectives laid down in particular by the Joint Declaration of June 1997, revised in 2003. As regards New Zealand, possible projects envisaged will be intended to reinforce cooperation in areas referred to in the Joint Declaration of May 1999, revised in 2004, in order to meet the common objectives on economic cooperation, political and security cooperation and various other areas of cooperation.

The focus will be on initiatives aimed at (i) reinforcing people-to-people links and education cooperation between the EU and AUS/NZ; (ii) at fostering a better understanding of the EU, its initiatives, its policies in AUS/NZ in particular through curriculum development, research and outreach activities and public diplomacy initiatives; (iii) other activities in pursuit of the objectives set out in the joint political declarations.

Remarks

This appropriation is intended to cover the financing or part-financing of assistance measures at government, institutional, NGO and private sector level designed to support transition to a market economy and strengthen democracy and the rule of law in the partner States.

The above measures cover, *inter alia*, support for institutional, legal and administrative reform, support to the private sector and assistance for economic development, support in addressing the social consequences of transition, the development of infrastructure networks, the promotion of environmental protection and management of natural resources and development of the rural economy.

Part of this appropriation should be used for the promotion of human rights, democracy and the rule of law.

Appropriations intended for Russia should also be used for renewed efforts by all parties involved in the conflict in Chechnya to find a democratic and peaceful solution.

The appropriations under this heading are also intended for the countries of the South Caucasus.

In the provision of funding to partner countries, due account will be taken of their social and financial situation and other relevant factors in comparison with the least-developed Member States in the enlarged EU. With the exception of humanitarian aid, assistance to governments will be provided on condition that the beneficiary country has an improving record as regards the values of democracy, the rule of law and respect for fundamental human rights and freedoms. Programmes supporting these aims will have priority in funding.

In implementing the appropriations, the Commission will seek to stimulate the consultancy market in the partner countries by encouraging the involvement of local consultants.

The Commission shall submit each year a report on the implementation of the EU's external assistance covering this programme.

COMMISSION

TITLE 19 — EXTERNAL RELATIONS

CHAPTER 19 08 — RELATIONS WITH THE MIDDLE EAST AND SOUTHERN MEDITERRANEAN (*cont'd*)*Remarks*

The purpose of development cooperation under this heading is primarily its contribution to achieving the millennium development goals (MDGs), particularly Goal 1: to halve the proportion of people whose income is less than USD 1 per day and to halve the proportion of people who suffer from hunger before 2015. The MDGs give an overall benchmark for this.

For OECD Development Assistance Committee (DAC) list 1 countries, a benchmark of 35 % of annual commitments is allocated to social infrastructure, mainly education and health, but also including macroeconomic assistance with social sector conditionality. In this context the contribution from the EU budget should be seen as part of overall donor support to the social sector in any given country. A degree of flexibility should be the norm. A benchmark of 20 % of total annual commitments will be allocated to activities in the sector of basic health and basic education, including sectoral budget support to health and education ministries where it is to serve basic health and basic education.

Before July each year, the Commission will provide to the European Parliament and the Council an annual report on the Community's development policy and external assistance, meeting all the Commission's regulatory reporting requirements and giving full details of development cooperation, especially the extent to which it has met its objectives. In particular, the report will:

- present the strategic objectives of the Union's development policy and its contribution towards the 35 % target for social infrastructure and in achieving the MDGs;
- assess the efficiency and effectiveness of cooperation, including progress made in coordinating aid, in improving the coherence of the Union's strategy in its external actions, and in integrating the cross-cutting issues such as gender, human rights, conflict prevention and the environment;
- present the main results of evaluation and monitoring reports, as an indication of the extent to which its actions are achieving their objectives;
- summarise the key features and events of cooperation in each geographical region, and
- provide financial information on the support given to each sector, in accordance with OECD reporting criteria.

The report should also contain information on how budget support has contributed to the MDGs. Budget support will depend on prior demonstration of sufficient institutional capacity and compliance with detailed criteria for the custody and use of funds in the recipient country. The criteria must be stated in the annual report, and compliance therewith must be assessed in the report.

After the report has been presented the European Parliament, the Council and the Commission will enter into a dialogue on the results and on how further progress can be made towards achieving the objectives.

The cooperation agreements with the countries of the Middle East and the southern Mediterranean lay down a human rights clause, failure to comply with which means that the agreements will be suspended. The Commission is called on to be scrupulous in making sure that that clause is complied with by beneficiaries when any project is funded.

A significant percentage of this appropriation is to be used for the promotion of human rights, democracy and the rule of law, to include funding participation by members of the parliaments of the Mediterranean non-member countries and territories in the activities of the Euro-Mediterranean Parliamentary Assembly and the costs incurred by these countries when organising such activities on their own territory.

This appropriation is also intended to cover civil society follow-up to relevant provisions of the final declaration of the Sana'a Intergovernmental Regional Conference on Democracy, Human Rights and the Role of the International Criminal Court held in January 2004 with the support of the European Union.

This appropriation covers, in particular, the protection and promotion of children's rights and the integration of children's rights into programming, including in country strategy papers (CSPs), national indicative programmes (NIPs) and mid-term reviews.

It is also intended to cover studies and analyses to improve knowledge of socioeconomic trends, particularly sectoral trends, in the beneficiary countries and in the MEDA region as a whole, preparatory operations and pilot projects on information and training, *inter alia*, in the fields of gender equality, the campaign against child discrimination, protection of the environment, drugs and AIDS control and population issues.

In implementing the appropriations, the Commission shall take account of the situation in each country regarding respect for the principles of democracy and the rule of law, respect for human rights and the rights of minorities, respect for international law and respect for the territorial integrity and external borders of the Member States and Mediterranean non-member countries (resolution of the European Parliament of 19 September 1996).

This appropriation also covers pilot schemes in the social development field, notably to promote the participation of civil society and its actors in the design and implementation of participative socioeconomic development programmes at local level.

A significant part of the support provided by this appropriation to local and regional business development is intended for transferring management skills and creating a positive financial environment that will enable small- and medium-sized enterprises to realise their full employment and growth potential.

This appropriation also covers systematic monitoring and evaluation to assess the environmental impact of the development schemes funded by this article and the publication of an annual assessment report.

This appropriation will also be used for a specific programme for cooperation in the field of the environment, notably for actions in favour of sustainable development in the Mediterranean.

This appropriation also covers expenditure on operations and other measures of a horizontal nature designed to enhance the profile or increase awareness of the European Union which are directly linked to the achievement of the objectives of the European Union's action in the Mediterranean non-member countries.

Part of this appropriation may be allocated to cultural associations which promote enhanced cooperation between southern and northern Mediterranean and Middle East countries through the creation of joint bodies in which the cultures of different Mediterranean countries are represented.

Part of the appropriation may be earmarked for cofinancing the initiative that northern Mediterranean regions are implementing, with the introduction of the special development plan that was presented at the Barcelona Summit in November 2005. The plan should be of a special nature and should be additional to the New Neighbourhood Policy measures and based mainly on direct consultation of local players.

In the provision of funding to partner countries due account will be taken of their social and financial situation and other relevant factors in comparison with the least-developed Member States in the enlarged EU. With the exception of humanitarian aid, assistance to governments will be provided on condition that the beneficiary country has an improving record as regards the values of democracy, the rule of law and respect for fundamental human rights and freedoms. Programmes supporting these aims will have priority in funding.

Remarks

This appropriation is intended to cover Community operations in the framework of the Iraqi reconstruction process. It may be supplemented by expenditure committed under other chapters and articles, notably Chapter 23 02 (Humanitarian aid), Chapter 21 02 (Development cooperation policy and sectoral strategies), Chapter 19 04 (European initiative for democracy and human rights (EIDHR)) and Article 19 02 05 (Rapid reaction mechanism).

The Commission will monitor compliance with the conditions for the Community contribution to this process, notably full implementation of the framework agreed at the Madrid Conference, the Communication from the Commission to the Council and the European Parliament 'The European Union and Iraq — A Framework for Engagement' of 6 June 2004 (COM(2004) 417) and Parliament's resolution of 6 July 2005 on that communication (OJ C ...), in particular paragraphs 33 and 34 thereof.

The Commission will ensure that the Community contribution is delivered in the most effective manner while taking due account of the views of the European Parliament. In this regard, 2006 funding will only be channelled through the World Bank arm of the IRFFI where this mechanism has a clear advantage over alternative intermediaries (European or other). The Commission will furthermore provide complete, regular and transparent information on the actual disbursement and implementation of EU assistance.

This appropriation also covers actions by women's rights organisations in Iraq and activities to improve the position of women in the economic, political and social life of the country and to support their active involvement in all fields and at all levels of decision-making.

COMMISSION
TITLE 19 — EXTERNAL RELATIONSCHAPTER 19 09 — RELATIONS WITH LATIN AMERICA (*cont'd*)*Remarks*

The purpose of development cooperation under this heading is primarily its contribution to achieving the millennium development goals (MDGs), particularly Goal 1: to halve the proportion of people whose income is less than USD 1 per day and to halve the proportion of people who suffer from hunger before 2015. The MDGs give an overall benchmark for this.

For OECD Development Assistance Committee (DAC) list 1 countries, a benchmark of 35 % of annual commitments is allocated to social infrastructure, mainly education and health, but also including macroeconomic assistance with social sector conditionality. In this context the contribution from the EU budget should be seen as part of overall donor support to the social sector in any given country. A degree of flexibility should be the norm. A benchmark of 20 % of total annual commitments will be allocated to activities in the sector of basic health and basic education, including sectoral budget support to health and education ministries where it is to serve basic health and basic education.

Before July each year, the Commission will provide to the European Parliament and the Council an annual report on the Community's development policy and external assistance, meeting all the Commission's regulatory reporting requirements and giving full details of development cooperation, especially the extent to which it has met its objectives. In particular, the report will:

- present the strategic objectives of the Union's development policy and its contribution towards the 35 % target for social infrastructure and in achieving the MDGs;
- assess the efficiency and effectiveness of cooperation, including progress made in coordinating aid, in improving the coherence of the Union's strategy in its external actions, and in integrating the cross-cutting issues such as gender, human rights, conflict prevention and the environment;
- present the main results of evaluation and monitoring reports, as an indication of the extent to which its actions are achieving their objectives;
- summarise the key features and events of co-operation in each geographical region; and
- provide financial information on the support given to each sector, in accordance with OECD reporting criteria.

The report should also contain information on how budget support has contributed to the MDGs. Budget support will depend on prior demonstration of sufficient institutional capacity and compliance with detailed criteria for the custody and use of funds in the recipient country. The criteria must be stated in the annual report, and compliance therewith must be assessed in the report.

After the report has been presented the European Parliament, the Council and the Commission will enter into a dialogue on the results and on how further progress can be made towards achieving the objectives.

The cooperation agreements with the Latin American developing countries all incorporate a human rights clause: failure to comply with the provisions of this clause means that the agreements will be suspended.

The appropriations also covers the protection and promotion of human rights, including children's rights, which are fully integrated into programming, including in the country strategy papers (CSPs), national indicative programmes (NIPs) and mid-term reviews.

Remarks

This appropriation is intended to cover development schemes in Latin American developing countries, particularly the poorest of them, aimed mainly at the most disadvantaged sections of the population, in order to:

- assist institutional support and help consolidate democracy, human rights and the rule of law,
- combat poverty and social exclusion, with particular attention being paid to the poverty trap faced by disabled people,
- support integrated approaches (linking economic progress to social development and environmental and consumer protection),
- support regional integration,
- improve the standard of education, health and transport infrastructures,
- promote the increased use of information and communications technologies.

Emphasis is placed on operations influencing the judicial structure and cooperation with the European Union in that connection, economic organisation and institutional development, operations concerning the environment, the education of women and children, addressing the situation of street children, promotion of consumer policy, democratisation, regional cooperation, disaster prevention, reconstruction measures and the promotion of the peace process in Colombia and the democratisation process in Cuba.

This appropriation is also intended to consolidate the important political signals given at EU-Latin America Summits and to provide the necessary regulatory backing for the bi-regional strategic partnership process and association agreements with the countries and regions of Latin America.

Investments on lands traditionally inhabited by indigenous peoples or by other local communities, and other projects significantly affecting their livelihood or social organisation, shall not be carried out without, as far as possible, their prior consultation and informed consent.

COMMISSION
TITLE 19 — EXTERNAL RELATIONSCHAPTER 19 09 — RELATIONS WITH LATIN AMERICA (*cont'd*)19 09 01 (*cont'd*)

This appropriation is also intended to cover:

- operations and other measures of a horizontal nature to enhance the profile or increase awareness of European Union cooperation with Latin American developing countries,
- information and training-related activities in areas such as sexual equality, preventing discrimination against disabled people and protecting the environment and tropical forests,
- support for the activities of non-governmental organisations promoting and defending the rights of vulnerable groups such as women, children, ethnic minorities and disabled people. This covers actions aimed at helping women and women's organisations to reduce gender inequalities in society and to combat discrimination against women in society,
- systematic monitoring and evaluation to assess the environmental impact of the development schemes funded by this article and the publication of an annual assessment report. At least 10 % of these funds is to be used for environmental policies resulting from the Agenda 21 programme agreed at the United Nations Conference on Environment and Development, held in Rio de Janeiro on 3 to 14 June 1992, including renewable energy projects to facilitate the transfer of EU renewable and zero-emissions energy and related technologies,
- the fight against corruption, drug trafficking and money laundering in the context of the related cooperation programmes.

A priority for this article will be to prevent and combat severe violence against women and lack of action against such violence will constitute a reason to suspend EU assistance.

Utilisation of this appropriation is dependent on compliance with the terms of the democracy clause in the cooperation agreements.

Part of this appropriation is intended to be used, with due regard for the provisions of the Financial Regulation, for operations carried out by senior volunteer experts from the European Union who come under the ESSN (European Senior Services Network), including technical assistance, advisory services and training in selected public or private sector enterprises.

In the provision of funding to partner countries due account will be taken of their social and financial situation and other relevant factors in comparison with the least-developed Member States in the enlarged EU. With the exception of humanitarian aid, assistance to governments will be provided on condition that the beneficiary country has an improving record as regards the values of democracy, the rule of law and respect for fundamental human rights and freedoms. Programmes supporting these aims will have priority in funding.

This appropriation is also intended to help strengthen political and institutional relations with the various regional bodies throughout Latin America. The aim is to establish and subsequently consolidate an official and ordered framework for meetings, discussions and decision-making at all institutional and political levels, with a view to analysing the political, economic, social and cultural issues affecting the international community. It also covers measures to make survival, repatriation and resettlement possible. In particular, the aid may be extended to cover the local population in the host countries and countries of origin, where economic conditions so require. It may also be used, if necessary, to support schemes to prevent population displacement.

These measures may be financed jointly with non-governmental organisations and international organisations.

COMMISSION
TITLE 19 — EXTERNAL RELATIONSCHAPTER 19 10 — RELATIONS WITH ASIA (*cont'd*)*Remarks*

The purpose of development cooperation under this heading is primarily its contribution to achieving the millennium development goals (MDGs), particularly Goal 1: to halve the proportion of people whose income is less than USD 1 per day and to halve the proportion of people who suffer from hunger before 2015. The MDGs give an overall benchmark for this.

For OECD Development Assistance Committee (DAC) list 1 countries, a benchmark of 35 % of annual commitments is allocated to social infrastructure, mainly education and health, but also including macroeconomic assistance with social sector conditionality. In this context the contribution from the EU budget should be seen as part of overall donor support to the social sector in any given country. A degree of flexibility should be the norm. A benchmark of 20 % of total annual commitments will be allocated to activities in the sector of basic health and basic education, including sectoral budget support to health and education ministries where it is to serve basic health and basic education.

Before July each year, the Commission will provide to the European Parliament and the Council an annual report on the Community's development policy and external assistance, meeting all the Commission's regulatory reporting requirements and giving full details of development cooperation, especially the extent to which it has met its objectives. In particular, the report will:

- present the strategic objectives of the Union's development policy and its contribution towards the 35 % target for social infrastructure and in achieving the MDGs;
- assess the efficiency and effectiveness of cooperation, including progress made in coordinating aid, in improving the coherence of the Union's strategy in its external actions, and in integrating the cross-cutting issues such as gender, human rights, conflict prevention and the environment;
- present the main results of evaluation and monitoring reports, as an indication of the extent to which its actions are achieving their objectives;
- summarise the key features and events of cooperation in each geographical region, and
- provide financial information on the support given to each sector, in accordance with OECD reporting criteria.

The report should also contain information on how budget support has contributed to the MDGs. Budget support will depend on prior demonstration of sufficient institutional capacity and compliance with detailed criteria for the custody and use of funds in the recipient country. The criteria must be stated in the annual report, and compliance therewith must be assessed in the report.

After the report has been presented the European Parliament, the Council and the Commission will enter into a dialogue on the results and on how further progress can be made towards achieving the objectives.

The cooperation agreements with the Asian developing countries incorporate a human rights clause: failure to comply with the provisions of this clause means that the agreements will be suspended.

The appropriations also covers the protection and promotion of human rights, including children's rights, which are fully integrated into programming, including in the country strategy papers (CSPs), national indicative programmes (NIPs) and mid-term reviews.

Remarks

This appropriation is intended to cover development schemes in Asian developing countries, in particular the poorest of them, aimed at tackling macroeconomic and sectoral problems. Emphasis is placed on operations influencing economic organisation and institutional development, the strengthening of civil society, including operations concerning democratisation, universal access for children of both sexes and women to primary and secondary education, the environment, tropical forests, anti-drugs campaigns, regional cooperation, disaster prevention and reconstruction measures, as well as the promotion of sustainable energy and information and communications technology.

It is also intended to cover information and training-related activities in areas such as fighting discrimination against women and disabled people, and exploitation of children of both sexes, promoting consumer protection policy, campaigns against drugs and AIDS and population issues assisted by greater use of information and communications technology.

The Commission produces an annual report covering all its external aid activities.

Also charged to this article is expenditure on operations and other measures of a horizontal nature to enhance the profile or increase awareness of European Union cooperation with Asian developing countries.

This appropriation also covers (micro, small and medium) loans and credits granted through the banking system that support, in particular, initiatives to promote employment for women and disabled people.

It is also intended to cover support for the development of civil society and, in particular, support for the activities of non-governmental organisations promoting and defending the rights of vulnerable groups, such as women, children, ethnic minorities and disabled people.

Utilisation of this appropriation is dependent on observance of the principles underpinning European Union action.

Lack of action to prevent and combat severe violence against women (stoning, public castigation, genital mutilation, burning or rape) will constitute a reason to suspend EU assistance.

This appropriation also covers expenditure on operations to help the people of East Timor.

Part of this appropriation is to be used to promote human rights, democracy and the rule of law.

Part of this appropriation is intended to be used, with due regard for the provisions of the Financial Regulation, for operations carried out by senior volunteer experts from the European Union who come under the ESSN (European Senior Services Network), including technical assistance, advisory services and training in selected public or private sector enterprises

In the provision of funding to partner countries due account will be taken of their social and financial situation and other relevant factors in comparison with the least-developed Member States in the enlarged EU. With the exception of humanitarian aid, assistance to governments will be provided on condition that the beneficiary country has an improving record as regards the values of democracy, the rule of law and respect for fundamental human rights and freedoms. Programmes supporting these aims will have priority in funding.

Remarks

This appropriation is intended, with a view to the mutual interest of the European Union and its partners, to cover various kinds of operation involving technical assistance, training, technology transfer and institutional back-up in the fields of trade promotion, energy (notably renewable energy), environment, management, etc., in order to:

- improve the economic, social, cultural, legal and regulatory context and facilitate economic relations and trade between the European Union and Asia,
- foster regional integration,
- support capacity-building, in particular in the least developed countries, to help them to better integrate into the multilateral trading system, including their abilities to participate in the WTO,
- encourage the transfer of know-how and promote contact and collaboration between business players on both sides,
- promote a more favourable climate for economic expansion and hence development in the countries concerned,
- promote the increased use of information and communications technologies.

In the provision of funding to partner countries due account will be taken of their social and financial situation and other relevant factors in comparison with the least-developed Member States in the enlarged EU. With the exception of humanitarian aid, assistance to governments will be provided on condition that the beneficiary country has an improving record as regards the values of democracy, the rule of law and respect for fundamental human rights and freedoms. Programmes supporting these aims shall have priority in funding.

This appropriation will also finance schemes to promote environmentally and socially sound business practice, including the transfer of technical knowledge on best practice in clean technologies and economic incentives, and also to facilitate the transfer of EU renewable and zero-emissions energy as well as related technologies.

It is also intended to finance monitoring of the impact of regional integration by non-governmental organisations, recognised political foundations and economic and social groups such as associations representing employers, small and medium-sized enterprises (SMEs), agriculture and consumers, and by environmental organisations, trade unions and organisations similar to trade unions.

Remarks

This appropriation is intended to cover measures to promote the self-sufficiency of groups of refugees, displaced persons and other population groups who have left their country of origin or residence because of fighting, a lack of security or other man-made crises in Asia.

This appropriation is also intended to cater for the needs of Tibetan refugees, and to promote their integration in their host countries, in particular in India, Nepal and Bhutan, to maintain their settlements in a sustainable way, with the aim of improving living conditions, particularly housing and health facilities, preserving their culture, traditions and language and promoting education and vocational training.

It also covers measures to make survival, repatriation and resettlement possible. In particular, the aid may be extended to cover the local population in the host countries and countries of origin, where economic conditions so require. It may also be used, if necessary, to support schemes to prevent population displacement.

It also covers education for children affected by war or natural disasters.

These measures may be financed jointly with non-governmental organisations and international organisations.

Remarks

The information activities to be carried out under this budget line fall into two broad categories: horizontal activities and logistical support from headquarters, and activities carried out in non-member countries by Commission delegations.

Measures carried out from headquarters::

- the European Union visitors programme (EUVP), carried out jointly by the European Parliament and the Commission, provides some 170 participants a year, chosen by the delegations, with the opportunity of experiencing contact with the European Union by visiting the European Parliament and the Commission as part of a made-to-measure individual programme of visits based on a theme,
- the production and distribution of publications on priority themes as part of an annual programme,
- the production and dissemination of audiovisual material,
- the development of information delivered via electronic media (the Internet and electronic message systems),
- the organisation of visits for groups of journalists,
- the bulk purchase of promotional material to be made available to delegations,
- the support for the information activities of opinion leaders that are consistent with the European Union's priorities.

Decentralised measures carried out by delegations in non-member countries

In accordance with the communication goals laid down for each region and each country, the delegations propose an annual communication plan, which, once approved by headquarters, is assigned a budgetary allocation.

These measures fall into six categories:

- newsletters,
- websites,
- relations with the media (press conferences, seminars, radio programmes, etc.),

- The 'European Neighbourhood Policy' (ENP). The (ENP) was launched on the basis of a communication from the Commission to the Council and the European Parliament on 11 March 2003 [COM(2003) 104 final], '*Wider Europe — Neighbourhood: A New Framework for Relations with our Eastern and Southern Neighbours*'. The actions which are part of this activity will continue to provide information on the activities of the European Union in the framework of its 'European Neighbourhood Policy'.
- Information activities, to be carried out in cooperation with the Council, on the aims and development of the common foreign and security policy.

The Commission has adopted two communications to the European Parliament, the Council, the Economic and Social Committee and the Committee of the Regions on a new framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final and COM(2002) 350). They propose an interinstitutional framework for cooperation between the institutions and with the Member States for the development of a communication and information policy strategy for the European Union.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years on the basis of information provided by the Commission.

Irrespective of the beneficiary of the measure, no administrative expenditure against this article is authorised.

TITLE 20**TRADE****Overall objectives**

This domain aims to contribute, in the general interest, to the harmonious development of world trade, the gradual removal of restrictions to international trade and the reduction of customs barriers.

An important pillar of the European Union's economic relations with the rest of the world, it contributes to the Union's broader goals of promoting sustainable development and assuming a larger role in multilateral governance. It covers all the main aspects of trade in goods and services (tariff and non-tariff barriers, trade protection measures, in particular in cases of dumping and subsidies, export credits) and the important issues of intellectual property, investment and competition.

This policy area comprises two operational activities: trade policy and anti-dumping strategy.

20 02 01 (*cont'd*)

Trade-related technical assistance/training and other capacity-building actions

Actions aiming to strengthen the capacity of developing countries to participate in international trade negotiations, to implement international trade agreements and to participate in the world trading system, including:

- projects involving training and capacity-building actions aimed at developing country officials and operators, mainly in the field of Sanitary and Phyto-sanitary (SPS) measures,
- the establishment and running of a help desk to provide to developing countries industry information on access to EU markets, to facilitate efforts by such industry to take advantage of market access opportunities offered by the international trading system,
- trade-related technical assistance programmes arranged in the forum of the WTO and other multilateral organisations, in particular WTO Trust Funds,
- reimbursement of the expenses of participants in forums and conferences designed to build awareness and expertise in trade affairs among developing country nationals,
- expenditure incurred by Member State experts advising developing country officials and operators on compliance with SPS and other trade related measures.

Activities related to the Community's market access strategy

Actions in support of the Community's market access strategy, which aims at removing or lowering barriers to trade, identifying trade restrictions in third countries and, where appropriate, removing obstacles to trade. These actions may include:

- provision of a market access database, available to economic operators via the Internet, listing trade barriers and other basic information affecting EU exports and EU exporters; purchase of the necessary information, data and documentation for this database,
- specific analysis of the various obstacles to trade in key markets, including analysis of the implementation by third countries of their obligations under international trade agreements in connection with the preparation of negotiations,
- conferences, seminars and other information activities (e.g. production and distribution of studies, information packs, publications and leaflets) to inform business about trade barriers and trade policy instruments,
- support to European industry for the organisation of activities specifically geared to market access issues.

Activities with a view to promoting the Community's external trade policy through a process of structured dialogue with key opinion formers

The Community's trade policy will also be supported by the organisation of specific forums and meetings with a view to promoting dialogue with opinion formers on issues of external trade. The Commission support for these actions may involve conference or event-related services, as well as the reimbursement of the travel expenses incurred by individuals taking part in these actions. In this connection, part of the appropriations against this budget heading may be used to support the World Social Forum.

Legal basis

Tasks resulting from the Commission's prerogatives at institutional level, as provided for in Article 49(2)(c) of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1).

These measures are a part of the Community effort to complete the internal market.

This support will take the form of the financing of expenditure on the development, implementation and operation of common systems and the definition of common guidelines for training and technical assistance for implementation. The operating expenditure also covers contributions to the functioning of systems (hardware, software, maintenance), the financing of information and training measures for system users and the financing of technical assistance.

Remarks

This appropriation is intended to help developing countries to participate effectively in the multilateral trading system and regional trading arrangements and to improve their trade performance through the actions set out below.

Assistance for trade policy, participation in negotiations and implementation of trade agreements

Actions to strengthen the capacity of developing countries to formulate their trade policy, to strengthen the institutions involved in trade policy, to participate effectively in international trade negotiations and to implement international trade agreements. This assistance is primarily targeted at the public sector. These actions may include:

- comprehensive and updated trade reviews of developing countries or regions, covering their main trade policy features, institutional environment, trade performance and the positioning of trade within their development strategy;
- assistance in developing trade-related legislation and carrying out regulatory reforms, including in the areas of services, Intellectual Property Rights (IPR), customs and investment;
- support for the creation of effective trade-related domestic institutions with trained staff and an enforcement capacity;
- projects involving training and capacity-building actions aimed at developing country officials and operators, mainly in the field of customs administration and trade facilitation, including Technical Barriers to Trade (TBT) and Sanitary and Phytosanitary (SPS) measures.

Trade development

Actions to reduce supply-side constraints which impact directly on the ability of developing countries to exploit their international trading potential, including, in particular, private-sector development. These actions may include:

- trade promotion strategy design and implementation;
- market analysis and development;
- business support services and institutions;

CHAPTER 20 02 — TRADE POLICY (*cont'd*)**20 02 03** (*cont'd*)

- public-private sector networking;
- e-commerce;
- improved access to trade finance;
- running a help desk to provide developing countries' industry with information on access to EU markets and to facilitate efforts by such industry to take advantage of market-access opportunities offered by the international trading system.

Trade adjustment

Actions to enhance developing countries' ability to mitigate the adjustment costs of trade liberalisation, including trade-related macroeconomic and fiscal adjustment processes. These actions may include:

- compensation mechanisms to address preference erosion;
- reform of the tax system to help compensate governments for loss of tariff revenue.

Trade-related physical infrastructure

Actions to support the building of infrastructure which is directly related to the trade development of a country. These actions may include:

- port and airport development;
- roads linking export industries to harbours and airports.

In order to maintain support for domestic efforts to mainstream trade in national plans for economic development and strategies for poverty reduction, most of the actions covered by this line will be implemented within the framework of the EU Country Strategy Papers (CSPs) and Regional Strategy Papers (RSPs).

A small proportion of the actions covered by this heading will be implemented through multilateral initiatives. These involve a number of contributions to activities with a global scope such as the Integrated Framework on Trade Related Assistance and the WTO Doha Development Agenda Global Trust Fund. As from 2007, a specific thematic programme on trade should be established to meet the need for increased funding of activities that cannot be funded through CSPs and/or RSPs.

Legal basis

Trade-related assistance is currently based on external assistance regulations, in particular:

- Council Regulation (EEC) No 443/92 of 25 February 1992 on financial and technical assistance to, and economic cooperation with, the developing countries in Asia and Latin America (OJ L 52, 27.2.1992, p. 1), as last amended by Regulation (EC) No 2112/2005 (OJ L 344, 27.12.2005, p. 23);
- Council Regulation (EEC) No 1762/92 of 29 June 1992 on the implementation of the Protocols on financial and technical cooperation concluded by the Community with Mediterranean non-member countries (OJ L 181, 1.7.1992, p. 1), as last amended by Regulation (EC) No 2112/2005 (OJ L 344, 27.12.2005, p. 23);
- Council Regulation (EC) No 1488/96 of 23 July 1996 on financial and technical measures to accompany (MEDA) the reform of economic and social structures in the framework of the Euro-Mediterranean partnership (OJ L 189, 30.7.1996, p. 1), as last amended by Regulation (EC) No 2112/2005 (OJ L 344, 27.12.2005, p. 23);
- Council Regulation (EC, Euratom) No 99/2000 of 29 December 1999 concerning the provision of assistance to the partner States in Eastern Europe and Central Asia (OJ L 12, 18.1.2000, p. 1), as amended by Regulation (EC) No 2112/2005 (OJ L 344, 27.12.2005, p. 23).

These regulations are, however, expected to be repealed as of 1 January 2007 by the new external financial instruments. Once adopted, the European Neighbourhood and Partnership Instrument (ENPI) and the Development Cooperation and Economic Cooperation Instrument (DCECI) would be the legal basis for this budget line.

Overall objectives

The policy area covers a wide range of activities from political relations and policy formulation to programming and implementing cooperation programmes. It includes both budgetary appropriations under Heading 4 of the financial perspective and funds under the various European Development Funds (EDF) for the African, Caribbean and Pacific States as well as the overseas countries and territories.

The amount of the EDF varies from year to year due to the five-year implementation cycle, and corresponds to a yearly average of approximately EUR 2 950 million in commitment appropriations. This is equivalent to about 55 % of total appropriations under Heading 4.

This implies that significant human resources, which are employed to implement the EDF and the complex operations under the Cotonou Agreement, are to be taken into account in the overall human resources requirements in this policy area.

Remarks

This appropriation is intended to increase the capacity of civil society players and local authorities to act, mobilise and organise, to promote dialogue between government and non-governmental players. It is intended to cover the financing of social and economic development operations to benefit the poorest sections of the population in developing countries, in particular vulnerable groups. It supports sustainable development initiatives taken by the local public authorities, community-based organisations and associations or groupings in developing countries, possibly in association with their European Union counterparts.

It is intended, in this context, mainly to cover information, educational, capitalisation and communication schemes so as to enable potential agents to better assimilate the decentralised cooperation approach and to take a more active role in consultations regarding Community programmes and in the implementation of decentralised cooperation.

This appropriation will fund information and communication technologies that can assist with the process of decentralised cooperation.

Legal basis

Remarks

This appropriation was intended to enable the Commission to establish in 2002 a mechanism to support capacity-building in developing countries for information and communication technologies (ICT) and sustainable energy. The programme should be well coordinated with other donor initiatives on ICT and sustainable energy.

From 2003 onwards, the sustainable energy component is addressed through Article 06 04 02, whereas the ICT component is addressed through national/regional programmes whenever relevant.

The Commission should also use this appropriation to work with the United Nations Development programme on joint pilot projects and ensure that the full benefits of ICT and sustainable energy technologies are explored and properly highlighted.

TITLE 21 — DEVELOPMENT AND RELATIONS WITH AFRICAN, CARIBBEAN AND PACIFIC (ACP) STATES

CHAPTER 21 03 — RELATIONS WITH SUB-SAHARAN AFRICA, THE CARIBBEAN, PACIFIC AND INDIAN OCEAN AND OVERSEAS COUNTRIES AND TERRITORIES (*cont'd*)*Remarks*

The purpose of development cooperation under this heading is primarily its contribution to achieving the Millennium Development Goals (MDGs), particularly Goal 1: to halve the proportion of people whose income is less than USD 1 per day and to halve the proportion of people who suffer from hunger before 2015. The MDGs give an overall benchmark for this.

For OECD Development Assistance Committee (DAC) list 1 countries, a benchmark of 35 % of annual commitments is allocated to social infrastructure, mainly education and health, but also including macroeconomic assistance with social sector conditionality. In this context the contribution from the EU budget should be seen as part of overall donor support to the social sector in any given country. A degree of flexibility should be the norm. A benchmark of 20 % of total annual commitments will be allocated to activities in the sector of basic health and basic education, including sectoral budget support to health and education ministries where it is to serve basic health and basic education.

Before July each year, the Commission will provide to the European Parliament and the Council an annual report on the Community's development policy and external assistance, meeting all the Commission's regulatory reporting requirements and giving full details of development cooperation, especially the extent to which it has met its objectives. In particular, the report will:

- present the strategic objectives of the Union's development policy and its contribution towards the 35 % target for social infrastructure and in achieving the MDGs,
- assess the efficiency and effectiveness of cooperation, including progress made in coordinating aid, in improving the coherence of the Union's strategy in its external actions, and in integrating the cross-cutting issues such as gender, human rights, conflict prevention and the environment,
- present the main results of evaluation and monitoring reports, as an indication of the extent to which its actions are achieving their objectives,
- summarise the key features and events of cooperation in each geographical region, and
- provide financial information on the support given to each sector, in accordance with OECD reporting criteria.

The report should also contain information on how budget support has contributed to the MDGs. Budget support will depend on prior demonstration of sufficient institutional capacity and compliance with detailed criteria for the custody and use of funds in the recipient country. The criteria must be stated in the annual report, and compliance therewith must be assessed in the report.

After the report has been presented the European Parliament, the Council and the Commission will enter into a dialogue on the results and on how further progress can be made towards achieving the objectives.

The appropriations also cover the protection and promotion of human rights, including children's rights, which are fully integrated into programming, including in the country strategy papers (CSPs), national indicative programmes (NIPs) and mid-term reviews.

In accordance with the Trade, Development and Cooperation Agreement between the European Union and South Africa, and with Regulation (EC) No 1726/2000 of the European Parliament and of the Council, this appropriation is intended primarily to cover the financing of development cooperation projects and programmes with South Africa, which contribute:

- to its continued integration into the world economy,
- to consolidate the foundations laid for a democratic society and a State governed by the rule of law in which human rights and fundamental freedoms are fully respected.

Programmes shall focus on the fight against poverty, take into account the needs of the previously disadvantaged communities and integrate gender and environmental dimensions of development. Special attention shall be paid to the strengthening of institutional capacities.

In this latter context, it may give rise to expenditure outside South Africa,
- the improvement of living conditions and delivery of basic social services,
- the support to democratisation, the protection of human rights, sound public management, the strengthening of local governments and involvement of civil society in the development process.

This appropriation also covers the protection and promotion of children's rights and the integration of children's rights into programming, including in the CSPs, NIPs and mid-term reviews in South Africa.

Remarks

Action A: coordination

Budget financing provides the Commission with the means of support it needs to prepare, formulate and follow up coordination measures under its development policy. Policy coordination is crucial to the consistency, complementarity and effectiveness of aid.

Coordination measures are essential in defining and shaping European development policy at a strategic and programming level. The specific nature of European development policy is directly enshrined in the Treaties (Articles 177 and 180 of the Amsterdam Treaty). Community aid is complementary to the national policies of the Member States in the sphere of development cooperation and complementarity cannot work without coordination. Article 180 of the Treaty requires the Commission to act as coordinator of national policies and coordinator of EU objectives with national objectives in the area of development cooperation and assistance.

Coordination is not only a major factor in the Commission's value added vis-à-vis the policies of the Member States but also a priority in the work schedule at the point where the agendas of the European Union and the international community intersect. It therefore reflects a steadily growing demand from the other European institutions, as recognised by the Member States and by the European Parliament at the European Council in Barcelona in March 2002. It is inherent in the nature of coordination that an enlargement from 15 to 25 Member States should be reflected by a substantial increase in the funding allocated as of 2004.

This appropriation covers various forms of action:

- effectiveness, efficiency, relevance, impact and viability studies in the area of coordination,
- meetings of experts and exchanges between the Commission and Member States,

- monitoring of operations in the course of implementation,
- support measures to improve the quality of the monitoring of ongoing operations and the preparation of future operations,
- measures to support external initiatives in the sphere of coordination,
- the preparation of common positions, statements and initiatives,
- the organisation of events relating to coordination,
- the production of publications and dissemination of information.

Action B: raising awareness

This appropriation covers the financing of activities designed to draw attention to action by the EU and the Member States in the development field and to raise public awareness of development issues. Every activity financed under this article must include the following two components, which are complementary in the Commission's view:

- an 'information' component, designed to promote the various activities which the EU undertakes in the development aid field and the activities which it conducts in partnership with the Member States and other international institutions,
- an 'awareness-raising' component, covering public opinion in the Community and in the ACP States (78 countries). These activities are targeted primarily at the young. An immediate priority of this component is also to raise public awareness to the Member States (EU-25) about the Community's action in the development cooperation field.

These activities consist mainly, though not exclusively, of financial support for schemes in the audiovisual, publications, seminars and events fields as applied to development, the production of information material, the development of information systems, and also the Lorenzo Natali prize for journalism in the development field.

These activities are directed at public and private sector partners, and at the EU's representations and delegations in the Member States, the accession countries and the ACP States.

The appropriation also covers the introduction of a system which gives access to the public to follow via the Internet the progress of EU development aid from the decision on the budget to the implementation of the actual project in the developing country.

Irrespective of the beneficiary of the measure, no administrative expenditure against this article is authorised.

Legal basis

Tasks resulting from the Commission's prerogatives at institutional level, as provided for in Article 49(2) of the Financial Regulation.

Tasks resulting from specific powers directly conferred on the Commission pursuant to Article 180 of the Treaty establishing the European Community.

ENLARGEMENT

Overall objectives

This policy area governs the actions, measures and initiatives necessary to ensure that candidate and potential countries stay on course to achieve the targets set with and for them by the European Council.

This will involve:

- bringing to a successful conclusion Bulgaria's and Romania's accession processes, monitoring their compliance with commitments taken upon closure of negotiations with a view to meeting the accession date of 2007,
- managing the increased financial support granted to Bulgaria and Romania under the Phare programme aimed at helping them meet the structural, institutional, administrative and judicial requirements of EU membership,
- implementing the three-pillar strategy adopted by the Council concerning the next stages of Turkey's accession process, including successfully conducting accession negotiations,
- implementing the increase in pre-accession financial assistance for Turkey agreed by the Copenhagen European Council of December 2002,
- successfully conducting accession negotiations with Croatia with the ultimate goal of membership,
- following up on the Council decision on the former Yugoslav Republic of Macedonia's application for membership,
- anchoring the other Western Balkan countries on the European track, notably supporting their reforms and preparations or future membership and furthering the stabilisation and association process.
- supporting the reunification process of Cyprus, implementing and monitoring trade and financial support to that aim.

As far as the 10 new Member States are concerned, the Commission will still be phasing out major enlargement-related tasks and initiatives, and in particular managing the transition facility for institution-building in the new Member States.

Remarks

After enlargement, the Commission remains responsible for ensuring that all legal and financial requirements are met, in particular with regard to sound and efficient financial management. In line with the Act of Accession, all implementing agencies in the 10 new Member States that joined the EU in 2004 now operate under the extended decentralised implementation system (EDIS).

However a number of inalienable tasks relating to the completion of pre-accession programmes have been repatriated to headquarters from phased out delegations/representations. These concern notably project follow-up in the context of both monitoring of outcomes and financial management, including payment requests, as well as the follow-up to corrective actions taken upon recommendations from EDIS audits and the implementation and follow-up to post-accession transitional financial aid. Modifications to project fiches and/or financial allocations must also be duly assessed and an appropriate decision submitted to the Commission.

This appropriation is intended to cover the administrative costs of this remaining part of the phasing-out of the pre-accession assistance programmes in the new Member States, namely:

- expenditure on temporary support staff (contract staff, auxiliaries, detached national experts, staff from employment agencies) at headquarters intended to take over the tasks previously conferred on delegations; expenditure on temporary support staff at headquarters is limited to EUR 1 600 000 and this estimate is based on a provisional annual unit cost per man-year, of which 97 % is accounted for by remuneration for the staff concerned and 3 % by the additional cost of training, meetings, missions, IT and telecommunications relating to those staff members,

Remarks

The European Union pursues a policy of cooperation with the countries of central and eastern Europe which is part of a European Union pre-accession strategy towards these countries.

During the period 1990 to 1994, this appropriation was intended to assist the countries of central and eastern Europe in their transition to a market economy and democracy.

Following the Essen European Council (9 and 10 December 1994), the role of the Phare programme has gradually evolved into that of an instrument of support to the applicant countries in their bid for accession.

As a result of the stepping-up of the pre-accession strategy as a whole, and in accordance with the guidelines laid down in Agenda 2000, Phare operations are now geared to two main priorities:

- institution-building to develop an effective capacity to implement the *acquis communautaire*, in particular by means of:
 - the approximation of legislation,
 - structural reforms and regional policies,
 - promoting democracy, social dialogue, gender equality and equal opportunities, civil society and active cooperation in the fields of justice and home affairs,
 - opening up Community programmes, including in the field of social inclusion,
- investment-financing, notably in order to help the candidate States comply with Community legislative standards and adopt the *acquis communautaire* in the area of economic and social cohesion.

With the accession of eight Phare countries to the Union in 2004, this appropriation is intended to cover Phare pre-accession assistance to the other countries still in negotiation.

Assistance under the programme focuses mainly on the priorities identified under the accession partnerships and will take account of the progress achieved towards adoption of the *acquis communautaire*.

CHAPTER 22 02 — PRE-ACCESSION ASSISTANCE INSTRUMENTS (*cont'd*)**22 02 01** (*cont'd*)22 02 01 01 (*cont'd*)

Approximately 30 % of the Phare budget is thus earmarked for the first priority, institution-building, and some 70 % for infrastructure-financing. These figures are for indicative purposes only and may vary according to the particular circumstances of the beneficiary State concerned, in particular as regards its requirements and absorption capacity.

Part of this appropriation is intended for the financing of measures for developing and preparing partnerships, i.e. business contact fairs, between companies in the Member States and in the candidate countries.

Agenda 2000 and the conclusions of various European Councils have underlined the importance of a high level of nuclear safety in the candidate countries. The action taken under Phare is intended to support the candidate countries in their efforts to ensure the required high level, notably with regard to the recommendations of the Council's Atomic Questions Group. Measures taken in the area of nuclear security are also intended to cover the financing of technical and legal assistance necessary for the evaluation of the safety, environmental, economic and financial aspects of the projects for which financing in the form of a Euratom loan has been requested (including studies by the European Investment Bank); the measures are also intended to enable loan contracts to be finalised and carried out. The Commission will provide the budgetary authority with itemised information on the costs of this technical and legal assistance.

In accordance with the sole Article of Decision 94/179/Euratom, any proceeds from undertakings in receipt of a loan under that Decision, which are entered against Item 6 1 9 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18 of the Financial Regulation.

This appropriation is also intended to cover the involvement of associated countries in central and eastern Europe in Community programmes.

All the measures shall be subject to gender mainstreaming. Furthermore, an appropriate, yet nonetheless substantial, portion of the Phare budget, to be used exclusively for projects aimed at women, will be earmarked for this purpose.

Remarks

Phare cross-border cooperation (CBC) will continue to be implemented at the Romanian borders with Bulgaria and Hungary (combined with Interreg appropriations on the Hungarian side) and at the Bulgarian borders with Romania and Greece (combined with Interreg appropriations on the Greek side).

However, as a result of the geographical extension of Phare CBC to cover all external borders of Romania and Bulgaria, as of 2004, supplementary Phare CBC funds are allocated to the Romanian borders with Ukraine, Moldova, Serbia and Montenegro and to the Bulgarian borders with Serbia and Montenegro and the former Yugoslav Republic of Macedonia. At those borders, the Neighbourhood Programme approach will be applied, as provided by the Commission's communication, 'Paving the way for a new Neighbourhood instrument' (COM(2003) 393 final, July 2003). In this framework, Phare CBC allocations shall be combined with Tacis and CARDS funds at relevant borders.

Supplementary Phare CBC funds, as of 2004, are also allocated to the Bulgarian border with Turkey where cross-border cooperation will be implemented in combination with Turkey pre-accession funds.

As of 2005, since Croatia has become a candidate country, Phare CBC will also be implemented at Croatian borders with Slovenia, Hungary and Italy (maritime border) and potentially also with other neighbouring countries.

Remarks

This appropriation is intended to cover the financing of various operations under the specific pre-accession strategy decided for Turkey further to the conclusions of the Helsinki European Council of December 1999. Operations under the programme will be geared to two main priorities:

- institution-building to develop an effective capacity to implement the *acquis communautaire*, in particular by means of:
 - the approximation of legislation,
 - structural reforms and regional policies,
 - promoting democracy, social dialogue and civil society and active cooperation in the fields of justice and home affairs,
 - opening up Community programmes, including in the field of social inclusion,
- investment-financing, notably in order to help Turkey comply with Community legislative standards and adopt the 'acquis communautaire' in the area of economic and social cohesion.

Assistance under the programme will focus mainly on the priorities identified under the Accession Partnership for Turkey and will take account of the progress achieved towards adoption of the *acquis communautaire*, and in particular:

- participation in certain targeted projects, in particular to boost administrative and judicial capacity and projects in the field of justice,
- participation in certain Community programmes and agencies,
- cross-border cooperation,
- use of technical assistance provided by TAIEX (Technical Assistance Information Exchange Office),
- training, information and education measures to promote civil society and enhance the human dimension in Turkey.

Remarks

This appropriation is intended to cover preparatory actions to support regions and economic sectors which are particularly affected by the social or economic costs likely to be generated by the enlargement process. Regions and economic sectors will be supported in preparing to cope with the social and economic changes which are to be expected in relation to enlargement. The preparatory actions are set up with a view to minimising the possible adverse effects and putting forward a programme for those economic sectors and geographical areas on which enlargement is likely to have the most impact, in particular, the most affected border regions.

These preparatory actions are intended, *inter alia*, to fund measures for small and medium-sized enterprises (SMEs) of the Community in order to improve their capacity to react to the opportunities and challenges resulting from the enlargement process to include the candidate countries. The appropriations will be directed to SMEs, associations of SMEs or regional and local bodies to support, *inter alia*, measures to improve contacts and prepare cooperation, joint ventures and collaborative links with SMEs of the candidate countries, measures to improve the competitiveness of SMEs in border regions, and measures to improve the trade relations between SMEs in the current Member States and those in the candidate countries and, subsequently, the new Member States, facilitating the flow of goods and services in both directions.

Measures to support will also concern:

- provision of information focusing on the economic and social aspects of enlargement to collaborative link-ups and SMEs,
- collaboration and pooling of experience between regional and local authority administrations.

These actions are intended to complement the measures financed under Council Decision 2000/819/EC of 20 December 2000 on a multiannual programme for enterprise and entrepreneurship, and in particular for small and medium-sized enterprises (SMEs) (2001 to 2005) (OJ L 333, 29.12.2000, p. 84).

This appropriation is also intended to finance actions involving consumer organisations or entities (such as national administrations, judicial authorities, etc.) in the candidate countries with a view to promoting consumer health, safety and protection as generally provided in Decision No 283/1999/EC.

CHAPTER 22 02 — PRE-ACCESSION ASSISTANCE INSTRUMENTS (*cont'd*)22 02 07 (*cont'd*)

It is also intended to finance measures in favour of young people in the regions bordering the candidate countries, such as support for transnational mobility, information and communication technologies in the area of youth, development of cooperation networks, promotion of language skills and understanding of different cultures.

Other projects planned are to be carried out by various kinds of organisations and local and regional bodies, in order to facilitate the free movement of persons after the accession of new Member States. Projects will, *inter alia*, concentrate on:

- analysis of the quantitative aspects of expected migration and on the resulting challenges for local or regional economies and labour markets,
- measures to prepare for the administrative and economic effects of increased migration, which may include contacts between representatives of government departments and the business world in the Member States and candidate countries,
- information for specifically affected organisations and groups on the expected effects of EU enlargement for migration and, in particular, the positive effects of free movement of persons on the economy and culture.

This action is not directed towards the general public.

Preference will be given to funding projects which are situated in the land and sea border regions bordering the candidate countries or which include partners from the candidate countries. In connection with all the projects and measures funded under this article, disabled persons must be afforded unrestricted access. The measures take into account the Commission communication of 25 July 2001 on the impact of enlargement on regions bordering candidate countries — Community action for border regions (COM(2001) 437 final).

Remarks

This appropriation is intended to cover financial support for encouraging the economic development of the Turkish Cypriot Community. The assistance will focus particularly on the economic integration of the island and on improving contacts between the two communities and with the European Union in order to facilitate the reunification of Cyprus. The assistance may be used to support:

- the promotion of social and economic development, in particular concerning rural development, human resources development and regional development,
- the development and restructuring of infrastructure, in particular in the areas of energy and transport, the environment, telecommunications and water supply,
- reconciliation, confidence building measures, and support to civil society,
- bringing the Turkish Cypriot community closer to the Union, through, *inter alia*, information on the European Union's political and legal order, promotion of youth exchanges and scholarships,
- progressive alignment with, and preparation for, implementation of the *acquis communautaire*.

Part of this appropriation is also intended to cover the operational programmes entrusted to the European Agency for Reconstruction (EAR) and its operating expenditure. The latter will be funded by an amount equivalent to not more than 8 % of the overall multiannual budget for the programmes managed.

Remarks

The Commission proposed, in its strategy paper of 9 October 2002 (COM(2002) 700 final), to create a transition facility for certain institution-building actions over the period 2004 to 2006. The purpose of the transition facility is to continue to assist the new Member States in their efforts to strengthen their administrative capacity to implement Community legislation and to foster the exchange of best practice.

The orientation of the transition facility is to continue institution-building activities according to the same principles as funded by Phare during the pre-accession period. Therefore, the structures and methods established under Phare for programming and decision-making will continue to apply for the transition facility with some small adaptations.

Article 34 of Title I, part 4, of the Act of Accession provides the legal basis for the establishment of the transition facility. Paragraph 3 refers to the procedure under the Phare Regulation for seeking Member States' opinions on programmes. Paragraph 4 refers to the Financial Regulation as applicable to internal policies for implementation.

The purpose of the transition facility is to continue to provide assistance to the new Member States in areas where their administrative and institutional capacity is still not able to deliver on a par with present Member States. The transition facility should provide the tools to enable them to react rapidly and precisely to weaknesses identified, primarily where safeguard clauses have been, or risk being, invoked.

The assistance shall address the continued need for strengthening institutional capacity in certain areas through actions which cannot be financed by the Structural Funds, in particular in the following areas:

- justice and home affairs (strengthening of the judicial system, external border controls, anti-corruption strategy, strengthening of law enforcement capacities),
- financial control,
- protection of the Communities' financial interests and the fight against fraud,
- the internal market, including customs union,
- the environment,
- veterinary services and administrative capacity-building related to food safety,

- administrative and control structures for agriculture and rural development, including the integrated administration and control system (IACS),
- nuclear safety (strengthening the effectiveness and competence of nuclear safety authorities and their technical support organisations as well as public radioactive waste management agencies),
- statistics,
- the strengthening public administration according to needs identified in the Commission's comprehensive monitoring report which are not covered by the Structural Funds.

The issues to be addressed by the transition facility will primarily be identified in the comprehensive monitoring report. Priority should be given to areas where safeguard clauses have been, or risk being, invoked to secure rapid remedial action.

Part of each allocation is assigned to multi-beneficiary programmes, audit and evaluation actions being herein included. The remainder is distributed between the new Member States.

Remarks

This appropriation is intended to cover the funding of priority information and communication measures on enlargement, audit and evaluation actions being herein included.

The amount of the proposed appropriations reflects the campaign's priorities under the enlargement timetable. While 2004 was a transition year, with a focus on central communication policies, reflecting the transformation of Delegations to Representations in the 10 new Member States, since 2005 the aim of the policies is to raise public awareness across Europe about the enlargement of the Union, but especially in those target countries where the public opinion is more sensitive to the next steps of enlargement.

The credits allocated will finance information and communication actions on priority EU policies such as: an effective dialogue on enlargement and pre-accession between the European citizens and the Union's institutions, taking into account each country's specificity and information needs; a dialogue between the civil society of the EU and that of candidate and pre-accession countries through calls for proposals and framework contracts; informing journalists on the enlargement process; opinion polls; developing and updating dedicated websites; preparing written and audiovisual material; organising conferences and seminars; evaluating the information programme.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years on the basis of information provided by the Commission.

Legal basis

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 49(2) of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1).

Overall objectives

The aim of this policy area is to provide relief to the victims of humanitarian disasters worldwide, and in doing so:

- grant assistance strictly in accordance with identified humanitarian needs,
- focus more directly on 'forgotten' crises not covered by other donors,
- ensure a more balanced per-beneficiary allocation of funds that takes into account the different levels of complexity of operations, the objective needs that result from the geographic location, and the nature of specific crises,
- give specific attention to unstable post-crisis situations where other (national) donors may be reluctant to become involved,
- strive for maximum complementarity and coherence with other key players' priorities,
- ensure that horizontal issues (gender, human rights and disability) will be systematically mainstreamed into operations.

- documentation and library expenditure to meet the needs of translators, in particular:
 - the purchase of works (studies, dictionaries, glossaries, encyclopaedias, yearbooks and series) and updates on paper and in electronic form,
 - subscriptions in general (periodicals, journals, etc.) on paper and in electronic form,
 - costs of preserving works (purchase of special files, binding costs, etc.).

It covers expenditure incurred within the territory of the Community, excluding Joint Research Centre sites (for which expenditure is entered in Article 01 05 of the titles concerned).

The amount of assigned revenue pursuant to Article 18(1)(e) and (g) of the Financial Regulation is estimated at EUR 350 000.

As regards services performed by the Commission (medium and long-term translation) on behalf of the Publications Office, under the agreement that entered into force on 1 January 1973 the Commission undertook to place at the disposal of the Office the translation staff required to perform all work requested by the Office to meet its own requirements or those of the Community institutions. This work will be carried out by the translators employed in Luxembourg, as shown in the Commission's establishment plan. Where necessary, freelance translators may also be used on a temporary basis. The number of translation staff attached to the Publications Office in 2004 for purposes of performing medium- and long-term translation was 18 category LA staff and nine category C staff. (The corresponding appropriations are entered in Article 01).

As regards the Translation Centre for the bodies of the European Union, its budgetary resources consist of financial contributions from the agencies for which it works and the institutions and bodies with which it cooperates, without prejudice to other revenue.

During the budgetary procedure and even during the financial year, when a letter of amendment or an amending budget is submitted, the Commission shall inform the budgetary authority beforehand of any changes in the agencies' budget, in particular concerning the establishment plans published in the budget. Such a procedure is in accordance with the provisions on transparency set out in the Interinstitutional Declaration of 17 November 1995 and implemented in the form of a code of conduct agreed by the European Parliament, the Commission and the agencies.

The part of this appropriation for the Translation Centre is intended to cover the costs of organising interinstitutional cooperation between the translation departments through the Centre, as stated in Council Regulation (EC) No 1645/2003 (OJ L 245, 29.9.2003, p. 13) amending Regulation (EC) No 2610/95 (OJ L 268, 10.11.1995, p. 1) and organisational duties with no direct connection with the translation services provided to the bodies of the European Union.

The amounts repaid in accordance with Article 16 of the Framework Financial Regulation for the bodies referred to in Article 185 of the Financial Regulation constitute assigned revenue (Article 18(1) (f) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

The establishment plan of the Translation Centre is shown in Part C 'Staff' of the general statement of revenue (volume 1).

CHAPTER 29 02 — PRODUCTION OF STATISTICAL INFORMATION (*cont'd*)**29 02 01** (*cont'd*)

It also intended to cover the provision of the necessary statistical information, at the request of the Commission or of the other Community institutions, for the assessment, monitoring and evaluation of Community expenditure. This will improve the implementation of financial and budgetary policy (drawing-up of the budget and periodic review of the financial perspective) and make it possible to compile medium and long-term data for Community financing.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

The amount of assigned revenue pursuant to Article 18(1)(e) to (j) of the Financial Regulation is estimated at EUR 800 000.

Remarks

In the light of the conclusions of the Edinburgh European Council of 11 and 12 December 1992 and the Berlin European Council of 24 and 25 March 1999, the institutions have decided to enter an emergency aid reserve in the budget.

The aim of this reserve, in accordance with subparagraph 23(c) of the Interinstitutional Agreement of 6 May 1999 is to provide a rapid response to ad hoc aid requirements in the light of events which could not have been foreseen when the budget was drawn up, with priority for humanitarian operations.

When the Commission sees a need to call on this reserve, it will initiate a dialogue procedure, if necessary in a simplified form, as soon as possible with a view to securing the agreement of the two arms of the budgetary authority on the need for recourse to the reserve and on the sum required. The appropriations will be transferred to the budget headings concerned.

This appropriation is intended to cover the cost of information and communication measures undertaken by the Office.

The Office's external information and communication strategy is central to its work. The Office was set up as an independent investigative body and must therefore have its own communications strategy. The Office's work is often too technical to be immediately comprehensible to the general public. The Office has to inform its interlocutors and the public as a whole of its role and tasks. Public perception of the Office's work is of paramount importance.

CHAPTER A3 02 — FINANCING ANTI-FRAUD MEASURES (cont'd)

A3 02 03 (cont'd)

As a Commission service, the Office also needs to take account of the democratic deficit existing between Community institutions and the citizens of Europe. The Commission has recognised this deficit and drawn up an action plan to address it.

The communications strategy that the Office has developed and continues to implement must demonstrate its independence.

EUROPEAN ECONOMIC AREA

COMMISSION
EUROPEAN ECONOMIC AREA

Under the agreement establishing the European Economic Area the EFTA countries (with the exception of Switzerland) take part in a wide range of Community policies covered by headings 3, 4 and 5 of the financial perspective in exchange for a financial contribution to operating appropriations calculated by applying a 'proportionality factor'. This proportionality factor is equal to the sum of the ratios obtained by dividing the gross domestic product at market prices of each EFTA country by the gross domestic product at market prices of all the EC Member States plus that of the EFTA country concerned.

For 2006 the proportionality factor is estimated at 2,06 % (on the basis of 2004 figures).

These financial contributions will not be formally entered into the budget; each budget heading relating to activities in which the EFTA countries take part will refer to the EFTA contribution as a memorandum item. A summary table, listing the budget headings concerned and the amounts of the EFTA contribution for each budget heading, is published as an Annex to the Community budget. The total EFTA contribution for the operational part for 2006 is estimated at about EUR 138 million in commitment appropriations. The EFTA countries will also share in the administrative expenditure directly linked to the implementation of these policies. The figures and budget headings concerning the contributions by the EFTA countries are still to be discussed with them and must therefore be regarded as provisional.

A. INTRODUCTION

This Annex is drawn up in accordance with Article 30(1) of the Financial Regulation of 25 June 2002 applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1).

It provides information about the amounts of the borrowing-and-lending operations guaranteed by the general budget: loans for balance-of-payments support, and borrowing operations to provide macro-financial assistance to non-member countries, European Investment Bank loans to Mediterranean basin countries, in the countries of central and eastern Europe and the western Balkans, for projects in Russia, Ukraine, Belarus, Moldova, European Investment Bank loans for projects of mutual interest in certain non-member countries (Asia and Latin America), European Investment Bank loans to South Africa and Euratom borrowings to contribute to the financing required for improving the degree of efficiency and safety of nuclear power stations in certain non-member countries.

At 30 June 2005, outstanding operations covered by the general budget totalled EUR 16 333 000 000; of that total EUR 3 214 000 000 was inside the European Union and EUR 13 119 000 000 outside.

B. BRIEF PRESENTATION OF THE VARIOUS CATEGORIES OF BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE GENERAL BUDGET

I. SINGLE FACILITY PROVIDING MEDIUM-TERM FINANCIAL ASSISTANCE FOR MEMBER STATES' BALANCES OF PAYMENTS

1. Legal basis

Council Regulation (EC) No 332/2002 of 18 February 2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 53, 23.2.2002, p. 1).

2. Description

In accordance with Regulation (EC) No 332/2002, the European Union may grant loans to Member States which are experiencing, or are seriously threatened with, difficulties in their balance of current payments or capital movements. Only Member States which have not adopted the euro may benefit from this Community facility. The outstanding amount of loans is limited to EUR 12 billion in principal.

3. Effect on the budget

Since both parts of these borrowing-and-lending operations are carried out on identical terms, they affect the budget only if the guarantee is activated should a debtor default.

(b) General budget guarantee

Pursuant to the terms of the abovementioned Council Decision of 8 March 1977, the European Union guarantees loans to be granted by the European Investment Bank as part of the European Union's financial commitments towards the Mediterranean Basin countries.

This decision was the basis for the contract of guarantee signed by the European Economic Community and the European Investment Bank on 30 October 1978 in Brussels and 10 November 1978 in Luxembourg introducing a global guarantee of 75 % of all appropriations made available for loans in the following countries: Malta, Tunisia, Algeria, Morocco, Portugal (Financial Protocol, emergency aid), Turkey, Cyprus, Egypt, Jordan, Syria, Israel, Greece, former Yugoslavia and Lebanon.

The contract of guarantee is extended for each new Financial Protocol.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE GENERAL BUDGET

2. Description

Under the Financial Protocols concluded with Mediterranean Basin non-member countries, global amounts are laid down for loans to be granted by the European Investment Bank from its own funds. The European Investment Bank grants the loans for purposes which may contribute to the economic and social development of the countries in question (transport infrastructures, ports, water supply, production and distribution of energy, agricultural projects and promotion of small and medium-sized businesses).

Acting on a proposal from the Commission and after consulting Parliament, the Council decided on 14 April 1997 to renew the Community guarantee to the European Investment Bank for loans for projects in the following Mediterranean countries: Algeria, Cyprus, Egypt, Israel, Jordan, Lebanon, Malta, Morocco, Syria, Tunisia, Turkey, Gaza and the West Bank. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 7 105 000 000, of which EUR 2 310 000 000 is for the abovementioned Mediterranean countries. It covered a period of three years beginning on 31 January 1997 (with a possible six-month extension).

The European Investment Bank is invited to aim to cover the commercial risk on 25 % of its lending from non-sovereign guarantees.

The Council decided on 29 November 1999 to grant a Community guarantee to the European Investment Bank against losses under loans for projects for the reconstruction of the earthquake-stricken areas of Turkey. The guarantee is restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 600 000 000 and covered a period of three years beginning on 29 November 1999 (with a possible six-month extension)

The European Investment Bank is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

On 22 December 1999, on the basis of a Commission proposal and after consulting Parliament, the Council decided once again to give the European Investment Bank the Community guarantee against losses resulting from loans for projects carried out in the following Mediterranean countries: Algeria, Cyprus, Egypt, Israel, Jordan, Lebanon, Malta, Morocco, Syria, Tunisia, Turkey, Gaza and the West Bank. The guarantee is limited to 65 % of the total value of the appropriations made available plus all the related amounts. It covers a period of seven years from 1 February 2000 to 31 January 2007. If at the end of that period the loans granted by the European Investment Bank have not reached the abovementioned total values, the period is automatically extended by six months.

On 4 December 2000 the Council decided to establish a European Investment Bank special action programme in support of the consolidation and intensification of the EC-Turkey Customs Union. The value of those loans is limited to an overall ceiling of EUR 450 000 000.

That Decision was at the origin of the extension of the contract for the provision of security signed by the European Community and the European Investment Bank on 19 July 2000 in Brussels and 24 July 2000 in Luxembourg, under which the guarantee is limited to 65 % of the total value of the appropriations made available plus all the related sums. The overall ceiling on the appropriations made available is equivalent to EUR 19 460 000 000 and covers a period of seven years from 1 February 2000 to 31 January 2007. If at the end of that period the loans granted by the European Investment Bank have not reached the abovementioned total values the period is extended by six months.

3. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external action (OJ L 293, 12.11.1994, p. 1) as amended by Regulation (EC, Euratom) No 1149/1999 (OJ L 139, 2.6.1999, p. 1) and as last amended by Regulation (EC, Euratom) No 2273/2004 (OJ L 396, 31.12.2004, p. 28), any defaults are covered by this Fund within the limit of the amount available.

The effect on the budget is thus limited to:

- payment to the Fund of 9 % of the capital value of the lending and guarantee operations decided and committed after 1 January 2000,
- activation of the budget guarantee should the debtor default.
- the granting, in a series of cases, of interest-rate subsidies of 2 % in non-repayable aid, subject to the overall amounts laid down by the Financial Protocols.

2. Description

In response to a call made by the Council on 9 October 1989, the Board of Governors of the European Investment Bank decided on 29 November 1989 to authorise the Bank to provide loans from its own resources to finance investment projects in Hungary and Poland for a total amount not exceeding EUR 1 000 000 000. These loans are granted to finance investment projects which satisfy the Bank's usual requirements for loans from its own resources.

On 14 May 1991 and 15 March 1993 the Council, acting on a proposal from the Commission and after consulting Parliament, decided that this guarantee should be extended to any loans that the European Investment Bank might make in the other countries of central and eastern Europe (Czechoslovakia, Bulgaria and Romania) over a period of two years up to a maximum of EUR 700 000 000.

On 13 December 1993 the Council, acting on a proposal from the Commission and after consulting Parliament, decided to renew for three years the European Union guarantee for EUR 3 000 000 000 in European Investment Bank loans for projects in Poland, Hungary, the Czech Republic, the Slovak Republic, Romania, Bulgaria, Estonia, Latvia, Lithuania and Albania.

The budget guarantee covers all aspects of debt-servicing (repayment of capital, interest, related costs) in connection with these loans.

Acting on a proposal from the Commission and after consulting Parliament, the Council decided on 14 April 1997 to renew the Community guarantee to the European Investment Bank for loans for projects in Albania, Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovak Republic and Slovenia. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 7 105 000 000, of which EUR 3 520 000 000 is for the abovementioned countries of central and eastern Europe. It covers a period of three years beginning on 31 January 1997. If, on expiry of this period, the loans granted by the European Investment Bank have not attained the overall amounts referred to above, the period will be automatically extended by six months.

The Council decided on 19 May 1998 to grant a Community guarantee to the European Investment Bank against losses under loans for projects in the former Yugoslav Republic of Macedonia. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 150 000 000 for a period of two years beginning on 1 January 1998. If, on expiry of this period, the loans granted by the European Investment Bank have not attained the overall amounts referred to above, the period will be automatically extended by six months.

The Council decided on 14 December 1998 to amend Decision 97/256/EC in order to extend the Community guarantee to the European Investment Bank to loans for projects in Bosnia and Herzegovina. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is EUR 100 000 000 for a period of two years beginning on 22 December 1998. If, on expiry of this period, the loans granted by the European Investment Bank have not attained the overall amounts referred to above, the period will be automatically extended by six months.

The European Investment Bank is invited to aim to cover the commercial risk on 25 % of its lending from non-sovereign guarantees.

Acting on a proposal from the Commission and after consulting Parliament, the Council decided on 22 December 1999 to renew the Community guarantee to the European Investment Bank for loans for projects in Albania, the former Yugoslav Republic of Macedonia, Bosnia and Herzegovina, Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovak Republic and Slovenia. The guarantee is restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums. It covers a period of seven years beginning on 1 February 2000 and ending on 31 January 2007. If, on expiry of this period, the loans granted by the European Investment Bank have not attained the overall amounts referred to above, the period will be automatically extended by six months.

The European Investment Bank is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

On 7 November 2000 the Council decided to extend the guarantee granted by the Community to the European Investment Bank to loans for projects in Croatia.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE GENERAL BUDGET

Technical notes on Table 1

(a) For balance of payments, 'NCI' and 'Euratom' operations the amounts borrowed should correspond to the amounts lent.

However, the funds borrowed may be exchanged under swap operations for other currencies (at different interest rates) and these currencies are then lent.

Divergent movements in the parities against the euro of the currencies borrowed and lent are the reasons for the differences between the columns 'Repayments' and 'Amount outstanding' for borrowing-and-lending operations.

The differences in interest rates for the currencies used in borrowing-and-lending operations are the reasons for differences in the column 'Interest' for these two types of operations.

(b) Exchange rate: the amounts in column 2 Equivalent at date of signature are converted at the rate applicable on the date of signature. As regards refinancing operations, Table 1 shows both the initial operation (e.g. in 1979) and the replacement operation (e.g. in 1986), the amount for the latter being converted at the rate of the initial operation. The resulting duplication affects the annual figures but is eliminated in the total.

All other amounts are converted at the rate applicable at 31 December 2005.

(c) Column 3 'Initial amount received/paid up to 31 December 2005': with reference to 1986, for example, this column shows the cumulative total of all amounts received up to 31 December 2005 under loans signed in 1986 (table 1), including refinancing (which produces some duplication).

(d) Column 4 'Amount outstanding at 31 December 2005': these are net figures, with no duplication as a result of refinancing operations. They are obtained by subtracting from the column 3 figure the cumulative total of repayments made up to 31 December 2005, including repayments in respect of refinancing operations (total not given in the tables).

(e) Column 7 = column 4 — column 5.
