11. Correction for the United Kingdom = (9) – (10)		3 079 226 649

⁽¹⁾ Rounded percentages.

⁽²⁾ The amount of enlargement-related expenditure corresponds to: (i) payments made to the 10 new Member States (which joined the Union on 1 May 2004) under 2003 appropriations, as adjusted by applying the EU GDP deflator for years 2004-2009, as well as payments made to Bulgaria and Romania under 2006 appropriations, as adjusted by applying the EU GDP deflator for years 2007-2009; and (ii) total allocated expenditure in those Member States, except for agricultural direct payments and market-related expenditure as well as that part of rural development expenditure originating from the EAGGF, Guarantee Section. This amount is deducted from total allocated expenditure to ensure that expenditure which is unabated before enlargement remains so after enlargement.

⁽³⁾ The 'UK advantage' corresponds to the effects arising for the United Kingdom from the changeover to capped VAT and the introduction of the GNP/GNI-based own resource.

⁽⁴⁾ These windfall gains correspond to the net gains of the United Kingdom resulting from the increase — from 10 to 25 % as of 1 January 2001 — in the percentage of traditional own resources retained by Member States to cover the collection costs of traditional own resources (TOR).

According to Article 4(2) of Decision 2007/436/EC, Euratom, during the period 2007-2013 the additional contribution of the United Kingdom resulting from the reduction of allocated expenditure by the expenditure related to enlargement as referred to in paragraph (1)(g) of that Article shall not exceed EUR 10 500 000 000, measured in 2004 prices. The corresponding figures are set out in the table below.

Remarks

The GNI-based resource is an 'additional' resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments and other revenue in any particular year. By implication, the GNI-based resource ensures that the general budget of the European Union is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (VAT-based payments, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States' gross national income for this financial year is 0,7176 %.

Legal basis

Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources (OJ L 163, 23.6.2007, p. 17), and in particular Article 2(1)(c) thereof.

Remarks

Article 15 of the Financial Regulation states that the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 34 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 15 of Regulation (EC, Euratom) No 1150/2000.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget that must be presented by the Commission within 15 days following the submission of the provisional accounts.

A deficit is entered in Article 27 02 01 of the statement of expenditure of Section III 'Commission'.
