SUPERVISORY BENCHMARKING PORTFOLIOS

DEFINITION OF THE SUPERVISORY BENCHMARKING PORTFOLIOS 2780

C 101 — DEFINITION OF LOW DEFAULT PORTFOLIO COUNTERPARTIES 2780

C 102 — DEFINITION OF LOW DEFAULT PORTFOLIOS 2782

C 103 — DEFINITION OF HIGH DEFAULT PORTFOLIOS 2786

DEFINITION OF THE SUPERVISORY BENCHMARKING PORTFOLIOS

C 101 — Definition of Low Default Portfolio ('LDP') counterparties

Column	Label	Legal reference	Instructions
010	Counterparty code		The code assigned by EBA to each legal entity included in the LDP sample.
020	Legal entity identifier ('LEI')		20-digit, alpha-numeric code that connects to key reference information that enables clear and unique identification of companies participating in global financial markets.
030	Credit register code		The code used by the national credit register of the place of residence of the counterparty. The code is used as an identifier for the counterparty.
040	Commercial register code		The code assigned to a counterparty by the public commercial register of the country where that counterparty is registered.
050	ISIN code		The 'International Securities Identification Number' used to identify uniquely securities issued by a counterparty.
060	Bloomberg ticker		The string of characters or numbers used to identify a company or entity uniquely in Bloomberg.
070	Name		The name of the legal entity included in the LDP samples.
080	Geographical area		The ISO Code of the country of residence or the macro region of residence of the counterparty. The macro-regions are: (a) EU for European Union countries; (b) Non-EU for third countries; (c) Other countries which represent the aggregate of countries not included explicitly in Annex I; (d) Not applicable [1].
090	Portfolio name		Each group (sample) of LDP counterparties is assigned one of the following unique names: (a) Sovereign sample (b) Institutions sample; (c) Large corporate sample.
100	Sector of counterparty		Each counterparty is assigned to one of the following FINREP-based economic sector classes: (a) General Governments; (b) Credit institutions; (c) Other financial corporations;

Column	Label	Legal reference	Instructions
			(d) Non-financial corporations; (e) Not applicable.
110	Type of exposures	Rows 020 and 030 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The type of exposures is one of the following: (a) On-balance sheet items subject to credit risk; (b) Off-balance sheet items subject to credit risk; (c) Not applicable.
120	Type of facility		The type of facility is one of the following: (a) Full risk (100 %); (b) Note issuance facility and revolving underwriting facility (Medium risk); (c) Issued warranties and indemnities, guarantees, irrevocable stand-by letters of credit, documentary credit and other medium risk off-balance sheet items (Medium risk): This refers to warranties and indemnities (including tender, performance, customs and tax bonds), guarantees, irrevocable standby letters of credit not having the character of credit substitutes and other medium risk off-balance sheet items; (d) Undrawn committed revolving credit facility (Medium- low risk): This refers to revolving lending commitments that are undrawn and that may not be cancelled unconditionally at any time without notice or that do not provide for automatic cancellation due to a deterioration in a borrower's creditworthiness; (e) Undrawn committed term credit facility (Medium-low risk): This refers to term lending commitments that are undrawn and that may not be cancelled unconditionally at any time without notice or that do not provide for automatic cancellation due to a deterioration in a borrower's creditworthiness; (f) Undrawn committed other credit facility (Medium-low risk): This refers to lending commitments, other than revolving and term, that are undrawn and that may not be cancelled unconditionally at any time without notice or that do not provide for automatic cancellation due to a deterioration in a borrower's creditworthiness; (g) Issued short-term letters of credit and other medium-low risk off-balance sheet items (Medium-low risk); (h) Undrawn uncommitted credit lines (Low risk): This refers to uncommitted lending facilities (advised and unadvised) that are undrawn and that may be cancelled unconditionally at any time without notice or that do provide for automatic cancellation due to a deterioration in borrower's creditworthiness; (i) Undrawn purchase commitments for revolving purchased receivables and other low-risk off-balance sheet items (Low risk): Commitments that are able to be unconditionally cancelled or that effectively provide for automatic cancellation at any time by the institution without prior notice; (j) Drawn credit facility; (k) Not applicable.

Column	Label	Legal reference	Instructions
130	Type of risk		The type of risk is one of the following: (a) Counterparty credit risk; (b) Credit risk and free deliveries; (c) Credit risk, Counterparty credit risk and free deliveries.
140	Regulatory approach		The regulatory approach under which the reported exposure value is calculated.

([1]) 'Not applicable' is used when no specific breakdown is requested for the variable (e.g. for column 080, it means that all countries are considered).

C 102 — Definition of Low Default Portfolios

Column	Label	Legal reference	Instructions
010	Portfolio ID		The unique ID assigned to the portfolio by EBA.
020	Portfolio name		Each portfolio is assigned one of the following unique names: (a) Sovereign; (b) Institutions; (c) Large corporate; (d) Large corporate sample.
030	Type of risk		The type of risk is one of the following: (a) Counterparty credit risk; (b) Credit risk and free deliveries; (c) Credit risk, counterparty credit risk and free deliveries.
040	Regulatory approach		The regulatory approach under which the reported exposure value is calculated.
050	Geographical area		The ISO Code of the country of residence or the macro region of residence of the counterparty. The macro regions are: (a) EU for European Union countries; (b) Non-EU for third countries; (c) Other countries which represent the aggregate of countries not included explicitly in Annex I; (d) Not applicable.
060	Rating		The rank of the internal rating applied by the institution from lowest risk to highest risk, excluding defaults with PD corresponding to 100 %. It takes values from Rating 1, Rating 2 etc. Where the rating is not used to define a portfolio in Annex I, 'Not applicable' is used instead.

Column	Label	Legal reference	Instructions
070	Exposure class	Paragraph 78 of Annex II to Commission Implementing Regulation (EU) No 680/2014	Each portfolio is assigned to one of the following exposure classes: (a) Central banks and central governments; (b) Institutions; (c) Corporate — Other; (d) Not applicable.
080	Sector of counterparty		Each counterparty is assigned to one of the following FINREP-based economic sector classes: (a) General Governments; (b) Credit institutions; (c) Other financial corporations; (d) Non-financial corporations; (e) Not applicable.
090	Default status		The default status is one of the following: (a) Defaulted: exposures assigned to the rating grade(s) with a PD of 100 %; (b) Non-defaulted: exposures assigned to rating grades with a PD lower than 100 %.
100	Type of facility		The type of facility is one of the following: (a) Full risk (100 %); (b) Note issuance facility and revolving underwriting facility (Medium risk); (c) Issued warranties and indemnities, guarantees, irrevocable stand-by letters of credit, documentary credit and other medium risk off-balance sheet items (Medium risk): This refers to warranties and indemnities (including tender, performance, customs and tax bonds), guarantees, irrevocable standby letters of credit not having the character of credit substitutes and other medium risk off-balance sheet items; (d) Undrawn committed revolving credit facility (Medium- low risk): This refers to revolving lending commitments that are undrawn and that may not be cancelled unconditionally at any time without notice or that do not provide for automatic cancellation due to a deterioration in a borrower's creditworthiness; (e) Undrawn committed term credit facility (Medium-low risk): This refers to term lending commitments that are undrawn and that may not be cancelled unconditionally at any time without notice or that do not provide for automatic cancellation due to a deterioration in a borrower's creditworthiness;

Column	Label	Legal reference	Instructions
			(f) Undrawn committed other credit facility (Medium-low risk): This refers to lending commitments, other than revolving and term, that are undrawn and that may not be cancelled unconditionally at any time without notice or that do not provide for automatic cancellation due to a deterioration in a borrower's creditworthiness; (g) Issued short-term letters of credit and other medium-low risk off-balance sheet items (Medium-low risk); (h) Undrawn uncommitted credit lines (Low risk): This refers to uncommitted lending facilities (advised and unadvised) that are undrawn and that may be cancelled unconditionally at any time without notice or that do provide for automatic cancellation due to a deterioration in a borrower's creditworthiness; (i) Undrawn purchase commitments for revolving purchased receivables and other low-risk off-balance sheet items (Low risk): Commitments that are able to be unconditionally cancelled or that effectively provide for automatic cancellation at any time by the institution without prior notice; (j) Drawn credit facility; (k) Not applicable.
110	Collateralisation status	Columns 150 to 210 of template 8.1 in Annex I to Commission Implementing Regulation (EU) No 680/2014	The collateralisation status is one of the following: (a) Exposures with credit protection; (a.1) Exposures with funded credit protection; (a.2) Exposures with unfunded credit protection; (b) Exposures without credit protection; (c) Not applicable.
120	Collateral type	Columns 150 to 210 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The collateral type is one of the following: (a) Eligible financial collateral; (b) Other eligible collateral: Receivables; (c) Other eligible collateral: Residential real estate; (d) Other eligible collateral: Commercial real estate; (e) Other eligible collateral: Physical collateral; (f) Other funded credit protection; (g) Credit derivatives; (h) Guarantees; (i) Unfunded credit protection; (j) Not applicable.

Column	Label	Legal reference	Instructions
130	Counterparty		The counterparty is one of the following: (a) Public sector entities (according to Article 112(c) of Regulation (EU) No 575/2013; (b) Counterparties other than public sector entities.
140	Size of counterparty		The total annual sales for the consolidated group of which the counterparty is a part. Each counterparty is assigned to one of the following categories: (a) > EUR 200 million; (b) Not applicable. The total annual sales are calculated in accordance with Article 4 of the Annex to Commission Recommendation 2003/361/EC [1].
150	NACE code		This column corresponds to the NACE codes (Statistical Classification of Economic Activities of the EU) used for 'Non-financial corporations' with a one level detail (e.g. 'F — Construction') and for 'Other financial corporations' with a two level detail (e.g. 'K65 — Insurance, reinsurance and pension funding, except compulsory social security').
160	Type of exposure	Rows 020 and 030 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The type of exposure is one of the following: (a) On-balance sheet items subject to credit risk; (b) Off-balance sheet items subject to credit risk; (c) Not applicable.
170	Size of exposure	Column 110 of template CR IRB 1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The size of the exposure expressed in terms of exposure value (i.e. EAD). Each exposure is assigned to one of the following categories: (a) <= EUR 0,5 million; (b) > EUR 0,5 million <= EUR 1 million; (c) > EUR 1 million <= EUR 1,5 million; (d) > EUR 1,5 million <= EUR 5 million; (e) > EUR 5 million <= EUR 10 million; (f) > EUR 10 million <= EUR 50 million; (g) > EUR 50 million; (h) Not applicable.

030	Geographical area		The ISO Code of the country of residence or the macro region of residence of the counterparty. For the 'Retail — secured by real estate SME' and 'Retail — secured by real estate non SME' portfolios, it is the location of the collateral. The macro regions are: (a) EU for European Union countries; (b) Non-EU for third countries; (c) Other countries which represent the aggregate of countries not included explicitly in Annex I; (d) Not applicable.
040	Exposure class	Paragraph 78 of Annex II to Commission Implementing Regulation (EU) No 680/2014	Each portfolio is assigned to one or several of the following exposure classes: (a) Corporate — SME; (b) Corporate — Specialised lending; (c) Corporate — Other; (d) Retail — Secured by real estate SME; (e) Retail — Secured by real estate non-SME; (f) Retail — Qualifying revolving;

Column		Legal reference	Instructions
			(g) Retail — Other SME; (h) Retail — Other non — SME; (i) Not applicable.
050	Type of risk		The type of risk is one of the following: (a) Counterparty credit risk; (b) Credit risk and free deliveries; (c) Credit risk, counterparty credit risk and free deliveries.
060	Default status		The default status is one of the following: (a) Defaulted: Those are the exposures assigned to the last rating grade/s with a PD of 100 %; (b) Non-defaulted: Those are the exposures assigned to rating grades with a PD lower than 100 %.
070	Rating		The rank of the internal rating grade applied by the institution from lowest risk to highest risk, excluding defaults with PD corresponding to 100 %. It takes values from Rating 1 to Rating 30 or Not applicable. Where the rating is not used to define a portfolio in Annex I, 'Not applicable' is used instead.
080	Type of facility		The type of facility is one of the following: (a) Full risk (100 %); (b) Note issuance facility and revolving underwriting facility (Medium risk); (c) Issued warranties and indemnities, guarantees, irrevocable stand-by letters of credit, documentary credit and other medium risk off-balance sheet items (Medium risk): This refers to warranties and indemnities (including tender, performance, customs and tax bonds), guarantees, irrevocable standby letters of credit not having the character of credit substitutes and other medium risk off-balance sheet items; (d) Undrawn committed revolving credit facility (Medium-low risk): This refers to revolving lending commitments that are undrawn and that may not be cancelled unconditionally at any time without notice or that do not provide for automatic cancellation due to a deterioration in a borrower's creditworthiness; (e) Undrawn committed term credit facility (Medium-low risk): This refers to term lending commitments that are undrawn and that may not be cancelled unconditionally at any time without notice or that do not provide for automatic cancellation due to a deterioration in a borrower's creditworthiness; (f) Undrawn committed other credit facility (Medium-low risk): This refers to lending commitments, other than revolving and term, that are undrawn and that may not be cancelled unconditionally at any time without notice or that do not provide for automatic cancellation due to a deterioration in a borrower's creditworthiness;

Column		Legal reference	Instructions
			(g) Issued short-term letters of credit and other medium-low risk off-balance sheet items (Medium-low risk); (h) Undrawn uncommitted credit lines (Low risk): This refers to uncommitted lending facilities (advised and unadvised) that are undrawn and that may be cancelled unconditionally at any time without notice or that do provide for automatic cancellation due to a deterioration in a borrower's creditworthiness; (i) Undrawn purchase commitments for revolving purchased receivables and other low-risk off-balance sheet items (Low risk): Commitments that are able to be unconditionally cancelled or that effectively provide for automatic cancellation at any time by the institution without prior notice; (j) Drawn credit facility; (k) Not applicable.
090	Collateralisation status	Column 150 to 210 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The collateralisation status is one of the following: (a) Exposures with credit protection; (a.1) Exposures with funded credit protection; (a.2) Exposures with unfunded credit protection; (b) Exposures without credit protection; (c) Not applicable.
100	NACE code		This column correspond to the NACE codes (Statistical Classification of Economic Activities of the EU) used for 'Non-financial corporations' with a one level detail (e.g. 'F — Construction') and for 'Other financial corporations' with a two level detail (e.g. 'K65 — Insurance, reinsurance and pension funding, except compulsory social security').
110	Sector of counterparty		Each counterparty is assigned to one of the following FINREP-based economic sector classes: (a) Other financial corporations; (b) Non-financial corporations; (c) Households; (d) Not applicable.
120	Size of counterparty		The total annual sales for the consolidated group of which the counterparty is a part. Each counterparty is assigned to one of the following categories: (a) <= EUR 50 million; (b) > EUR 50 million and <= EUR 200 million; (c) Not applicable. The total annual sales are calculated in accordance with Article 4 of the Annex to Commission Recommendation 2003/361/EC.

Column		Legal reference	Instructions
130	Collateral type		The collateral type is one of the following: (a) Non Real estate funded collateral; (b) Other eligible collateral: Real estate; (c) Real estate collateral and other unfunded CRM; (d) Real estate collateral, other funded CRM and guarantees; (e) Not applicable.
140	Type of exposure	Rows 020 and 030 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	Each exposure is assigned to one of the following types: (a) On-balance sheet items subject to credit risk; (b) Off-balance sheet items subject to credit risk; (c) Not applicable.
150	Size of exposure	Column 110 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The size of the exposure expressed in terms of exposure value (i.e. EAD). Each exposure is assigned to one of the following categories: (a) <= EUR 0,5 million; (b) > EUR 0,5 million <= EUR 1 million; (c) > EUR 1 million <= EUR 1,5 million; (d) > EUR 1,5 million <= EUR 5 million; (e) > EUR 5 million <= EUR 10 million; (f) > EUR 10 million <= EUR 50 million; (g) > EUR 50 million; (h) Not applicable.
160	Indexed loan-to-value range		The indexed loan-to-value ('ILTV') range is the ratio between the current loan amount and the current value of the property. The indexed loan-to-value range shall be calculated in a prudent manner and comply with at least the following features: (a) Total amount of the loan: the outstanding amount of the mortgage loan plus any undrawn committed amount of the mortgage loan (after applying the corresponding credit conversion factor). The loan amount shall be calculated gross of any specific credit risk adjustments and shall include all other loans (including those provided by other financial institutions that are known to the institution) secured with liens of equal or higher ranking on the same residential property with respect to the lien securing the loan. If there is insufficient information for ascertaining the ranking of the other liens, the institution shall assume that these liens rank *pari passu* with the lien securing the loan.

Column		Legal reference	Instructions
			(b) Value of the property: the value of the property is the independent valuation of the property at some point in time (most likely at origination) and converted to a current value using a property price index. The valuation should be performed independently by appraisers that meet specific qualification requirements. Qualifying requirements and minimum appraisal standards shall comply with the following conditions: — there is an individual assessment of the property and the property is valued in a prudent and conservative manner (e.g. excluding expectationsof future price appreciations and taking into account any potential for the current property price to be above a level that is sustainable over the life of the loan, for example due to a property price bubble); — if a market value can be determined, the valuation is not higher than the market value; — the valuation is supported by adequate appraisal documentation. Institutions are requested to document their calculations and provide the documents to their competent authority upon request. The ILTV categories are the following: (a) <= 25 %; (b) > 25 % <= 50 %; (c) > 50 % <= 75 %; (d) > 75 % <= 100 %; (e) > 100 % <= 125 %; (f) > 125 %; (g) Not applicable.’

PART I: GENERAL INSTRUCTIONS

1. Data shall be submitted only for counterparties with an exposure or valid rating.

2. Data shall be submitted only for those exposures for which an internal model has been approved.

3. The following shall apply to Part II:

   (a) for the absolute values, the sum of the values shall be reported;

   (b) for the percentage values, the weighted average, using the exposure at default ('EAD') as weight, shall be reported;

   (c) as an exception to point (b), when calculating the conversion factor ('CCF'), the weight used shall be the 'original exposure', i.e. the amount to which a CCF is applied in order to obtain the EAD, after taking into account credit risk mitigation ('CRM') techniques with substitution effects on the exposure (column 090 in templates 101, 102 and 103).

PART II: TEMPLATE RELATED INSTRUCTIONS

C 101 — Details on exposures in Low Default Portfolios by counterparty

Column	Label	Legal reference	Instructions
010	Counterparty Code	Column 010 of template 101 of Annex I to this Implementing Regulation	The counterparty code assigned by EBA to the counterparty included in the LDP samples portfolios shall be reported. The code is a row identifier and shall be unique for each row in the table.
020	Exposure class	Paragraph 78 of Annex II to Commission Implementing Regulation (EU) No 680/2014	Each portfolio shall be assigned to one of the following exposure classes: (a) Central banks and central governments; (b) Institutions; (c) Corporate — SME; (d) Corporate — Specialised lending; (e) Corporate — Other; (f) Retail — Secured by real estate SME; (g) Retail — Secured by real estate non-SME; (h) Retail — Qualifying revolving; (i) Retail — Other SME; (j) Retail — Other non — SME; (k) Not applicable [1].
030	Regulatory approach		The approach used for calculating own funds requirements that shall be reported shall be one of the following: (a) Foundation IRB approach; (b) Advanced IRB approach; (c) Specialised lending slotting criteria; (d) Not applicable. Where more than one approach applies to the exposures of a given portfolio, the exposures shall be split and reported separately for each approach using the appropriate and uniquely defined counterparty code.
040	Rating		The rank of the internal rating grade applied by the institution (from lowest risk to highest risk excluding defaults with PD corresponding to 100 %) shall be reported. It shall follow the numerical order 1, 2, 3 etc.
050	Date of most recent rating of counterparty		The date of the most recent rating of the counterparty shall be reported.

Column	Label	Legal reference	Instructions
060	PD	Column 010 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The PD assigned to the obligor grade or pool that shall be reported shall be based on the provisions laid down in Article 180 of Regulation (EU) No 575/2013. For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. For figures corresponding to an aggregation of obligor grades or pools (e.g. total exposures), the exposure-weighted average of the PDs assigned to the obligor grades or pools included in the aggregation shall be provided. The exposure value (column 120) shall be used for the calculation of the exposure-weighted average PD. The PD shall be expressed as a value between 0 and 1. For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. All reported risk parameters shall be derived from the risk parameters used in the internal rating system approved by the respective competent authority. It is neither intended nor desirable to have a supervisory master scale. If the reporting institution applies a unique rating system or is able to report in accordance with an internal master scale, then the internal master scale shall be used. Otherwise, the different rating systems shall be merged and ordered in accordance with the following criteria: (a) obligor grades of the different rating systems shall be pooled and ordered from the lower PD assigned to each obligor grade to the higher; (b) where the institution uses a large number of grades or pools, it may agree with the competent authorities to report a reduced number of grades or pools. The institution shall contact its competent authority in advance if it wants to report a different number of grades in comparison with the internal number of grades.
070	Default status		The default status to be reported shall be one of the following: (a) Defaulted: exposures assigned to the rating grade(s) with a PD of 100 %; (b) Non-defaulted: exposures assigned to rating grades with a PD lower than 100 %.
080	Original exposure pre-conversion factors	Column 020 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The original exposure value before taking into account any value adjustments, provisions, effects due to credit risk mitigation techniques or conversion factors shall be reported.
090	Exposure after CRM substitution effects pre-conversion factors	Column 090 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The amount to which a CCF is applied in order to obtain the EAD shall be reported. The reported amount shall take into account credit risk mitigation techniques with substitution effects on the exposure.

Column	Label	Legal reference	Instructions
100	CCF	Second subparagraph of Article 166(8) of Regulation (EU) No 575/2013	For the exposures where own estimates of CCFs are applied, the weighted average CCFs shall be reported. The weights that shall be used shall be the amounts to which the CCFs are applied in order to obtain the EAD.
110	EAD	Column 110 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure value shall be left blank where the institution has no IRB exposure for a given counterparty.
120	Collateral value	Columns 150 to 210 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The market value of the collateral shall be reported.
130	Hyp LGD senior unsecured without negative pledge	Article 161 of Regulation (EU) No 575/2013	The hypothetical own estimates of LGD that would be applied by the institution to the counterparty for senior unsecured exposures without a negative pledge clause shall be reported. A negative pledge clause is a clause stating that the borrower or debt issuer will not pledge any of its assets to another party.
140	Hyp LGD senior unsecured with negative pledge	Article 161 of Regulation (EU) No 575/2013	The hypothetical own estimated LGD that would be applied by the institution to the counterparty for senior unsecured exposures with a negative pledge clause shall be reported. A negative pledge clause is a clause stating that the borrower or debt issuer will not pledge any of its assets to another party.
150	LGD	Column 230 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure-weighted own estimates of LGD or the exposure-weighted regulatory LGD applied by the institution to the exposures to each counterparty shall be reported.
160	Maturity	Column 250 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure-weighted maturity for the exposures to each counterparty shall be reported. It shall be expressed in number of days.
170	RWA	Column 260 of template 8.1 of Annex I of Commission Implementing Regulation (EU) No 680/2014	The risk-weighted exposure amount after applying the SME supporting factor shall be reported.

([1]) 'Not applicable' shall be used when none of the answers in the list is correct (e.g. for column 020, it will mean that the counterparty is classified in multiple asset classes, without one being clearly predominant).

C 102 — Details on exposures in Low Default Portfolios

4. For portfolios that are defined with a specific rating grade, information on the PD shall be reported for the entire rating scale, even if the bank has no exposure for each rating grade. In that case, the EAD shall be reported as zero and the other columns shall be left blank.

5. Portfolios that are defined without a specific rating grade shall be left out of a data submission if no IRB exposure exists for the respective portfolio at the reporting reference date.

Column	Label	Legal reference	Instructions
010	Portfolio ID	Column 010 of template 102 of Annex I to this Implementing Regulation	The code assigned by EBA to each portfolio shall be reported. That code is a row identifier and shall be unique for each row in the table.
020	Exposure class	Paragraph 78 of Annex II to Commission Implementing Regulation (EU) No 680/2014	Each portfolio shall be assigned to one of the following exposure classes: (a) Central banks and central governments; (b) Institutions; (c) Corporate — SME; (d) Corporate — Specialised lending; (e) Corporate — Other; (f) Retail — Secured by real estate SME; (g) Retail — Secured by real estate non-SME; (h) Retail — Qualifying revolving; (i) Retail — Other SME; (j) Retail — Other non — SME; (k) Not applicable.
030	Regulatory approach		The approach used for calculating own funds requirements that shall be reported shall be one of the following: (a) Foundation IRB approach; (b) Advanced IRB approach; (c) Specialised lending slotting criteria; (e) Not applicable. Where more than one approach applies to the exposures of a given portfolio, the exposures shall be split and reported separately for each approach, using the appropriate and uniquely defined portfolio identifier.
040	Number of obligors	Column 300 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The number of obligors shall be reported.

Column	Label	Legal reference	Instructions
050	Rating		The rank of the internal rating grade applied by the institution (from lowest risk to highest risk, excluding defaults with PD corresponding to 100 %) shall be reported. It shall follow the numerical order 1, 2, 3 etc. The information shall only be reported for portfolios defined in Annex I to this Implementing Regulation that consist of exposures to a single rating grade, otherwise this cell shall be left blank.
060	PD	Column 010 of table 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The PD assigned to the obligor grade or pool to be reported shall be based on the provisions laid down in Article 180 of Regulation (EU) No 575/2013. For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. For figures corresponding to an aggregation of obligor grades or pools (e.g. total exposures) the exposure weighted average of the PDs assigned to the obligor grades or pools included in the aggregation shall be provided. The exposure value (column 110) shall be used for the calculation of the expo-sure-weighted average PD. The PD shall be expressed as a value between 0 and 1. For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. All reported risk parameters shall be derived from the risk parameters used in the internal rating system approved by the respective competent authority. It is neither intended nor desirable to have a supervisory master scale. If the reporting institution applies a unique rating system or is able to report in accordance with an internal master scale, then the internal master scale shall be used. Otherwise, the different rating systems shall be merged and ordered in accordance with the following criteria: (a) obligor grades of the different rating systems shall be pooled and ordered from the lower PD assigned to each obligor grade to the higher; (b) where the institution uses a large number of grades or pools, it may agree with the competent authorities to report a reduced number of grades or pools. The institution shall contact its competent authority in advance if it wants to report a different number of grades in comparison with the internal number of grades.
070	Default status		The default status to be reported shall be one of the following: (a) Defaulted: exposures assigned to the rating grade(s) with a PD of 100 %. (b) Non-defaulted: exposures assigned to rating grades with a PD lower than 100 %.
080	Original exposure pre-conversion factors	Column 020 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The original exposure value before taking into account any value adjustments, provisions, effects due to credit risk mitigation techniques or conversion factors shall be reported.

Column	Label	Legal reference	Instructions
090	Exposure after CRM substitution effects pre-conversion factors	Column 090 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The amount to which a CCF is applied in order to obtain the EAD shall be reported. The reported amount shall take into account credit risk mitigation techniques with substitution effects on the exposure.
100	CCF	Article 166(8) of Regulation (EU) No 575/2013	For the exposures where own estimates of CCFs are applied, the weighted average CCFs shall be reported. The weights that shall be used shall be the amounts to which the CCFs are applied in order to obtain the EAD.
110	EAD	Column 110 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure value shall be reported.
120	Collateral value	Columns 150 to 210 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The market value of the collateral shall be reported.
130	LGD	Column 230 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure-weighted own estimates of LGD or the exposure-weighted regulatory LGD applied by the institution to the exposures held and included in each portfolio shall be reported.
140	Maturity	Column 250 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure-weighted maturity shall be reported. It shall be expressed in number of days.
150	Expected Loss	Column 280 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The expected loss shall be reported.
160	Provisions non-performing exposures	Columns 050, 055 and 060 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The provisions for non-performing exposures shall be reported. These include all the general and specific credit risk adjustments for defaulted assets as defined in Article 110 of Regulation (EU) No 575/2013.
170	RWA	Column 260 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The risk-weighted exposure amount after applying the SME supporting factor shall be reported.

Column	Label	Legal reference	Instructions
180	RWA Standardised	Row 900 of template 4 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The RWA amount calculated by applying the standardised approach for credit risk to the exposures shall be reported.

C 103 — Details on exposures in High Default Portfolio

Column	Label	Legal reference	Instructions
010	Portfolio ID	Column 010 of template 103 of Annex I to this Implementing Regulation	The code assigned by the EBA to each portfolio shall be reported. That code is a row identifier and shall be unique for each row in the table.
020	Exposure class	Paragraph 78 of Annex II to Commission Implementing Regulation (EU) No 680/2014	Each portfolio shall be assigned to one of the following exposure classes: (a) Corporate — SME; (b) Corporate — Specialised lending; (c) Corporate — Other; (d) Retail — Secured by real estate SME; (e) Retail — Secured by real estate non-SME; (f) Retail — Qualifying revolving; (g) Retail — Other SME; (h) Retail — Other non — SME; (i) Not applicable.
030	Regulatory approach		The regulatory approach used for calculating own funds requirements that shall be reported shall be one of the following: (a) Foundation IRB approach; (b) Advanced IRB approach; (c) Specialised lending slotting criteria; (d) Not applicable. Where more than one approach applies to the exposures of a given portfolio, the exposures shall be split and reported separately for each approach, using the appropriate and uniquely defined portfolio identifier.
040	Number of obligors	Column 300 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The number of obligors shall be reported.

Column	Label	Legal reference	Instructions
050	Rating		The internal rating grade applied by the institution (from lowest risk to highest risk, excluding defaults with PD corresponding to 100 %) shall be reported. It shall follow the numerical order 1, 2, 3 etc. The information shall only be reported for portfolios defined in Annex I to this Implementing Regulation that consist of exposures to a single rating grade, otherwise this cell shall be left blank.
060	PD	Column 010 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The PD assigned to the obligor grade or pool to be reported shall be based on the provisions laid down in Article 180 of Regulation (EU) No 575/2013. For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. For figures corresponding to an aggregation of obligor grades or pools (e.g. total exposures), the exposure-weighted average of the PDs assigned to the obligor grades or pools included in the aggregation shall be provided. The exposure value (column 110) shall be used for the calculation of the exposure-weighted average PD. The PD shall be expressed as a value between 0 and 1. For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. All reported risk parameters shall be derived from the risk parameters used in the internal rating system approved by the respective competent authority. It is neither intended nor desirable to have a supervisory master scale. If the reporting institution applies a unique rating system or is able to report in accordance with an internal master scale, that scale shall be used. Otherwise, the different rating systems shall be merged and ordered in accordance with the following criteria: (a) obligor grades of the different rating systems shall be pooled and ordered from the lower PD assigned to each obligor grade to the higher; (b) where the institution uses a large number of grades or pools, a reduced number of grades or pools to be reported may be agreed with the competent authorities. The institution shall contact its competent authority in advance if it wants to report a different number of grades in comparison with the internal number of grades.
070	Default status		The default status shall be one of the following: (a) Defaulted: Those are the exposures assigned to the rating grade(s) with a PD of 100 %; (b) Non-defaulted: Those are the exposures assigned to rating grades with a PD lower than 100 %.
080	Original exposure pre conversion factors	Column 020 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The original exposure value before taking into account any value adjustments, provisions, effects due to credit risk mitigation techniques or conversion factors shall be reported.
090	Exposure after CRM substitution effects pre conversion factors	Column 090 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The amount to which a conversion factor is applied in order to obtain the EAD shall be reported. The information reported shall take into account credit risk mitigation techniques with substitution effects on the exposure.

Column	Label	Legal reference	Instructions
100	CCF	Article 166(8)(e) of Regulation (EU) No 575/2013	For the exposures where own estimates of CCFs are applied, the weighted average CCFs shall be reported. The weights that shall be used shall be the amounts to which the CCFs are applied in order to obtain the EAD.
110	EAD	Column 110 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure value shall be reported.
120	Collateral value	Column 150 to 210 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The market value of the collateral shall be reported.
130	LGD	Column 230 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure-weighted own estimates of LGD or exposure-weighted regulatory LGD applied by the institution to the exposures to each portfolio shall be reported.
140	Maturity	Column 250 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure-weighted maturity shall be reported. It shall be expressed in number of days.
150	Expected Loss	Column 280 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The expected loss shall be reported.
160	Provisions non-performing exposures	Columns 050, 055 and 060 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The provisions for non-performing exposures shall be reported. These include all the general and specific credit risk adjustments for defaulted assets as referred to in Article 110 of Regulation (EU) No 575/2013.
170	RWA	Column 260 of template 8.1 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The risk-weighted exposure amount after applying the SME supporting factor shall be reported.
180	RWA Standardised	Row 900 of template 4 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The RWA amount calculated by applying the standardised approach for credit risk to the exposures shall be reported.

Column	Label	Legal reference	Instructions
190	Default rate latest year	Columns 010, 030 and 040 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The default rate for the latest year shall be reported. The default rate means the observed new defaults for the last year (column 040 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014) divided by the amount of the non-defaulted assets existing one year before the reference date (the difference between column 010 and column 030 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014).
200	Default rate past 5 years	Columns 010, 030 and 040 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure-weighted average of the default rates observed in the last 5 years shall be reported. For the definition of default rate see column 190. Where the institution is not able to calculate a default rate for the past 5 years, it shall develop a proxy using its longest history up to 5 years and provide its competent authority with the documentation detailing the calculation.
210	Loss rate latest year	Columns 040 and 70 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014; Commission Delegated Regulation (EU) No 183/2014	The loss rate observed in the latest year shall be reported. The loss rate means the sum of credit risk adjustments and write-offs for the exposures that were classified as 'defaulted exposures' in the latest year (column 070 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014) divided by the amount of the observed new defaults in the last year (column 040 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014).
220	Loss rate past 5 years	Columns 040 and 070 of template 9.2 of Annex I to Commission Implementing Regulation (EU) No 680/2014	The exposure-weighted average of the loss rates observed in the last 5 years shall be reported. For the definition of loss rate see column 210. If the institution is not able to calculate a loss rate for the past 5 years it shall develop a proxy using its longest history up to 5 years and provide documentation detailing the calculation to its competent authority.
230	RWA*		Institutions shall calculate and report RWA* for the portfolios Corporate, Corporate SME, Retail SME and Retail secured by real estate at a total portfolio and a country level. The portfolios are defined in template 103 of Annex I to this Implementing Regulation and are identified with the following portfolio ID: (a) CORP0007; (b) SMEC0008; (c) SMER0008; (d) MORT0010; (e) CORP0007<Risk type code>; (f) SMEC0008<Risk type code>; (g) SMER0008<Risk type code>; (h) MORT0010<Risk type code>;

Column	Label	Legal reference	Instructions
			(i) <Country Code>CORP0007; (j) <Country Code>SMEC0008; (k) <Country Code>SMER0008; (l) <Country Code>MORT0010; (m) <Country Code>CORP0007<Risk type code>; (n) <Country Code>SMEC0008<Risk type code>; (o) <Country Code>SMER0008<Risk type code>; (p) <Country Code>MORT0010<Risk type code>. The risk-weighted exposure amount, after applying the SME supporting factor, that would result from the application of PD* instead of the original PD on the rating grade level shall be reported. No compensation between rating grades shall be taken into account. PD* is the smallest PD estimator for which the one-sided binomial test (based on normal approximation of binomial distribution with confidence level of 97,5 %) would be passed. PD* = min PD* so that: $PD^* + \Phi^{-1}(q) \cdot \sqrt{\frac{PD^* \cdot (1 - PD^*)}{n}} > DR_{1y}$ With: PD* = the probability of default for the rating grade; φ^{-1} = the inverse function of the standard normal distribution; q = the confidence level; DR_{1y} = the case-weighted default rate of the latest year for the rating grade; n = the number of non-defaulted debtors at the beginning of the period. An institution using continuous PD shall first determine the PD* for the average PD of each rating class and subsequently apply by rating class the same relative deviation between PD and PD* at counterpart level as for the average PD and PD* at rating grade level. If the prohibition from taking into account compensation between rating grades leads to a situation where, for a given rating grade, PD* is less than PD than for that rating grade, the PD shall be used in the calculation of the risk-weighted exposure amount.
240	RWA**		Institutions shall calculate and report RWA** for the portfolios Corporate, Corporate SME, Retail SME and Retail secured by real estate at a total portfolio and a country level. These portfolios are defined in template 103 of Annex I to this Implementing Regulation and are identified with the following portfolio ID: (a) CORP0007;

Column	Label	Legal reference	Instructions
			(b) SMEC0008; (c) SMER0008; (d) MORT0010; (e) CORP0007<Risk type code>; (f) SMEC0008<Risk type code>; (g) SMER0008<Risk type code>; (h) MORT0010<Risk type code>; (i) <Country Code>CORP0007; (j) <Country Code>SMEC0008; (k) <Country Code>SMER0008; (l) <Country Code>MORT0010; (m) <Country Code>CORP0007<Risk type code>; (n) <Country Code>SMEC0008<Risk type code>; (o) <Country Code>SMER0008<Risk type code>; (p) <Country Code>MORT0010<Risk type code>. The risk-weighted exposure amount, after applying the SME supporting factor, that would result from the application of PD** instead of the original PD on the rating grade level shall be reported. No compensation between rating grades shall be taken into account. PD** is the smallest PD estimator for which the one-sided binomial test (based on normal approximation of binomial distribution with confidence level of 97,5 %) would be passed. The rating grade shall be the following PD** = min PD** so that: $$PD^{**} + \Phi^{-1}(q) \cdot \sqrt{\frac{PD^{**} \cdot (1 - PD^{**})}{n}} > DR_{5y}$$ With: PD** = the probability of default for the rating grade; φ^{-1} = the inverse function of the standard normal distribution; q = the confidence level; DR_{5y} = the case-weighted default rate of the 5 latest years for the rating grade, calculated as the average of five 1-year default rates; n = the number of non-defaulted debtors at the beginning of the period.

Column	Label	Legal reference	Instructions
			An institution using continuous PD shall determine first the PD** for the average PD of each rating class and subsequently apply by rating class the same relative deviation between PD and PD** at counterpart level as for the average PD and PD** at rating grade level. If the prohibition from taking into account compensation between rating grades leads to a situation where, at rating grade level, PD** is less than PD then for that rating grade the PD shall be used in the calculation of the risk-weighted exposure amount.

C 105.01 — Definition of internal models

Column	Label	Legal reference	Instructions
010	Internal model ID		The internal model ID assigned by the reporting institution shall be reported. The internal model ID is a row identifier that shall be unique for each row in the table.
020	Model name		The model name assigned by the reporting institution shall be reported.
030	IRBA Risk parameter		The IRBA risk parameter shall be one of the following: (a) PD; (b) LGD; (c) CCF.
040	EAD	Column 110 of template 8.1 of Annex I of Commission Implementing Regulation (EU) No 680/2014	The aggregate exposure value of the transactions included in each portfolio (see column 060) treated with the specific model shall be reported.
050	EAD weighted average default rate for calibration		The EAD-weighted average of the annual default rates used in the calibration of the PD models shall be reported.
060	Case weighted average default rate for calibration		The case-weighted average of the annual default rates used in the calibration of the PD models shall be reported.
070	Long-run PD		The central tendency used by the institution in the calibration of the models that incorporates any prudent adjustment to the simple case weighted average of the annual default rates used in the calibration of the PD models shall be reported.

Column	Label	Legal reference	Instructions
080	Cure rate defaulted asset		The cure rate defaulted asset is the percentage of defaulted outstanding that returns in 'non-defaulted' status over a 12 months period. An institution that does not calculate cure rates for a given model shall calculate a proxy taking into account the definition provided. The institution shall report the use of a proxy to the competent authority.
090	Recovery rate of the foreclosed assets for not cured defaults		The case-weighted average recovery rate of the foreclosed assets for not cured defaults included in the time series used by the institution for the calibration of the LGD models on non-defaulted assets shall be reported. An institution that does not have a specific recovery rate of the foreclosed assets for no cured defaults shall calculate a proxy taking into account the definition provided. The institution shall report the use of a proxy to the competent authority.
100	Recovery period of the foreclosed assets for not cured defaults		The case-weighted average length of the recovery period (from the start of the default status to the completion date of the recovery procedures) for the non-cured defaults included in the time series used by the institution for the calibration of the LGD models on non-defaulted assets shall be reported. It shall be expressed in number of days. An institution that does not have a specific recovery period length of the foreclosed assets for no cured defaults shall calculate a proxy taking into account the definition provided. The institution shall report the use of a proxy to the competent authority.
110	Joint decision	Article 20(2)(a) of Regulation (EU) No 575/2013	The institution shall report whether or not a joint decision on prudential requirements does exist between the consolidating and the other (host) competent authority regarding the permission to use the IRB approach for the calculation of the prudential requirements for the exposures held by the subsidiaries of the institutions in the reported benchmarking portfolios.
120	Consolidating supervisor	Article 20 of Regulation (EU) No 575/2013	The country ISO code of the country of origin of the competent authority responsible for the consolidated supervision of the institution using an IRB approach shall be reported.

C 105.02 — Mapping of internal models to portfolios

Column	Label	Legal reference	Instructions
010	Portfolio ID	Column 010 of templates 102 and 103	The code assigned by the EBA to the portfolio for which the institution reports the results of the calculation shall be reported.
020	Internal model ID	Column 010 of template 105.01	The internal model ID assigned by the reporting institution shall be reported.

C 105.03 — Mapping of internal models to countries

Column	Label	Legal reference	Instructions
010	Internal model ID	Column 010 of template 105.01	The internal model ID assigned by the reporting institution shall be reported. Where one internal model ID is associated with several countries, separate rows shall be reported for each combination of 'Internal model ID' and 'Host supervisor'. Columns 010 and 020 are a composite row identifier and together must be unique for each row in the table.
020	Host supervisor	Article 20 of Regulation (EU) No 575/2013	The country ISO code of the country of origin of the competent authority responsible for the supervision of the subsidiary on an individual basis for each institution where the IRB exposures reported for each benchmarking portfolio are booked shall be reported (irrespective of the existence of any permission granted by the host supervisor to apply an IRB approach).'

COMMON INSTRUCTIONS

An institution shall apply all of the following:

(a) Unless explicitly specified otherwise in the portfolio description, all positions shall be booked on 13 October 2016. Once positions have been booked, each portfolio shall age for the duration of the benchmarking exercise. Furthermore, calculations shall be made under the assumption that the institution will not take any action to manage the portfolio during the entire period of the benchmarking exercise. Unless explicitly stated otherwise in the specifications for a particular portfolio, strike prices for option positions shall be determined relative to prices for the underlying as observed at market close on 13 October 2016;

(b) for the purpose of the pre-benchmarking exercise validation, the valuation of each portfolio shall be submitted to the institution's competent authority by [date of entry into force]. Initial Market Valuation (IMV) means the sum of the market value at the booking date and of the unrealised balance (i.e. profit or loss that has been made but not yet realised or that would be realised if the position would be closed out (or 'unwound')) between the booking date and the valuation date and time. Therefore, IMV means the mark-to-market value on the valuation date and time. The valuation shall be performed on 27 October 2016, 5.30 pm CET (4.30 pm GMT);

(c) the risks of the positions shall be calculated without taking into account the funding costs;

(d) to the extent possible, counterparty credit risk shall be excluded when valuing the risks of the portfolios;

(e) the 10-day 99 % VaR shall be calculated on a daily basis. Stressed Value-at-Risk ('sVaR') and the Incremental Risk Charge ('IRC') may be calculated on a weekly basis. sVaR and IRC shall be based on end–of-day prices for each Friday in the time window of the benchmarking exercise;

(f) for each portfolio, results in the base currency of the portfolio, as required in the tables below, shall be provided;

(g) for transactions that include long positions in Credit Default Swaps ('CDS'), it shall be assumed that an immediate up-front fee is paid to enter the position as per the market conventions. It shall be assumed that the maturity dates for all CDS positions in the exercise follow conventional quarterly termination dates;

(h) additional specifications needed in order to carry out pricing calculations required for CDS positions shall be done in a way that is consistent with commonly used market standards and conventions;

(i) the maturity date that ensures that the transaction is closest to the term-to-maturity specified shall be used;

(j) for material details of the product specification that are not explicitly stated in this Annex, the assumptions that have been used, including day count convention, and the choice for a tradable and liquid instrument where permitted, shall be provided along with the results;

(k) the abbreviations ATM, OTM and ITM refer to the relative position of the current or future price of a derivative's underlying asset with respect to the strike price of that derivative ('moneyness'). ATM stands for 'at the money', OTM stands for 'out of the money', and ITM stands for 'in the money';

(l) all options shall be treated as if they are traded over-the-counter ('OTC'), unless explicitly specified otherwise in the portfolio;

(m) the standard timing conventions for OTC options shall be followed (i.e. expiry dates are the business day following a non-trading day). The timing convention for options shall be as follows: the time to maturity for a *n*-month option shall be *n* months. Where options expire on a non-trading day, institutions shall adjust the expiration date per business day, in accordance with common market practices;

(n) all OTC options shall be treated as follows:

— as American for single name equities and commodities;

— as European for equity indices, foreign exchange and swaptions;

(o) for all options, the premium from the initial market value calculations shall be excluded, so that options shall be considered as '*naked*';

(p) regarding the Correlation Trading Portfolio (CTP), IM stands for Risk Measures resulting from Internal Model calculations for CTP in accordance with Article 377 of Regulation (EU) No 575/2013. It is indicated as All Price Risk (APR) in Annex VI to this Implementing Regulation;

(q) for the positions denominated in a common base currency but composed of one or more instruments denominated in a different currency, the Initial Market Valuation ('IMV') shall be converted in the common portfolio base currency using the appropriate foreign exchange ('FX') spot rate at the end of the booking date (13 October 2016). The same common portfolio base currency that was used to convert the IMV shall be used for profit-and-loss results ('P&L') and risk and stressed measures (VaR, sVaR, IRC, APR) by using the corresponding and appropriate FX rate;

(r) when booking all positions, institutions shall follow appropriate market conventions unless otherwise specified. In the following sections, 'long' means 'buy' and 'short' means 'sell'. For CDS positions, 'long' means 'buy protection' and 'short' means 'sell protection', following standard market practice;

(s) where an instrument is subject to a corporate action including a call from the issuer, or a default or similar actions, institutions shall exclude that instrument from the portfolio together with any related CDS or option;

(t) 'on-the-run' referring to an Index series means the most liquid and tradable series of that specific index available on the market. Institutions shall communicate their choice of the Index series along with the related results in the appropriate text cell in the templates;

(u) the Euro Interbank Offered Rate ('EURIBOR') is the rate calculated by the European Money Markets Institute at different maturities for Euro interbank term deposits;

(v) the London Interbank Offered Rate ('LIBOR') is the rate calculated by the Intercontinental Exchange at different maturities for interbank term deposits in different currencies;

Section 3: Correlation Trading Portfolios (CTPS)

Portfolio number Risk factor	Portfolios	Currency	Risk Metrics requested
35 CTP	Long position in spread hedged equity tranche of iTraxx Europe index on-the-run Series (attachment point: 0 %, detachment point: 3 %)	EUR	VaR, sVaR and IM for CTP
36 CTP	Long position in spread hedged mezzanine tranche of iTraxx Europe index on-the-run Series (attachment point: 7 %, detachment point: 10 %)	EUR	VaR, sVaR and IM for CTP
37 CTP	Short position in spread hedged super senior tranche of iTraxx Europe index on-the-run Series (attachment point: 30 %, detachment point: 100 %)	EUR	VaR, sVaR and IM for CTP

The correlation trading portfolios contain positions in tranches of the iTraxx Europe index (on-the-run Series) defined in the table above.

— Notional is EUR 10 million for each tranche.

— The contractual maturity is 5 years. Valuation as of 5:00 pm New York time on each date of valuation.

— The running spread that shall be used is 500 bps for the tranches in portfolio 1 and 2, and 100 bps for portfolio 3.

The portfolios are constructed by hedging each index tranche with the iTraxx Europe index (on the run Series) to achieve zero CS01 as of initial valuation date ('spread hedged'). No further re-hedging is required.'
