BUDGETS

Definitive adoption (EU, Euratom) 2018/251 of the European Union's general budget for the financial year 2018 1

EN

Acts whose titles are printed in light type are those relating to day-to-day management of agricultural matters, and are generally valid for a limited period.

The titles of all other acts are printed in bold type and preceded by an asterisk.

All amounts in this budget document are expressed in euro unless otherwise indicated.

Any revenue provided for in Article 21(2) and (3) of the Financial Regulation, entered in Titles 5 and 6 of the statement of revenue, may lead to additional appropriations being entered on the headings which bore the initial expenditure giving rise to the corresponding revenue.

Figures for outturn refer to all authorised appropriations, including budget appropriations, additional appropriations and earmarked revenue.

Budgetary remarks are only executable insofar as they do not modify or extend the scope of an existing legal base, impinge on the administrative autonomy of institutions and can be covered by available resources (as indicated in the annex to the executability letter dated 28 October 2015).

A. INTRODUCTION AND FINANCING OF THE GENERAL BUDGET

INTRODUCTION

The general budget of the Union is the instrument which sets out and authorises the total amount of revenue and expenditure deemed necessary for the European Union and the European Atomic Energy Community for each year.

The budget is established and implemented in compliance with the principles of unity, budgetary accuracy, annuality, equilibrium, unit of account, universality, specification, sound financial management and transparency.

- The *principle of unity* and the *principle of budgetary accuracy* mean that all revenue and expenditure of the Union when it is charged to the budget must be incorporated in a single document.
- The *principle of annuality* means that the budget is adopted for one budgetary year at a time and that both commitment and payment appropriations for the current budgetary year must, in principle, be used in the course of the year.
- The *principle of equilibrium* means that forecasts of revenue for the budgetary year must be equal to payment appropriations for that year; borrowing to cover any budget deficit which may arise is not compatible with the own resources system and will not be authorised.
- In accordance with the *principle of unit of account*, the budget is drawn up and implemented in euros and the accounts shall be presented in euros.
- The *principle of universality* means that total revenue is to cover total payment appropriations with the exception of a limited number of revenue items which are assigned to particular items of expenditure. Revenue and expenditure are entered in full in the budget without any adjustment against each other.
- The *principle of specification* means that each appropriation must have a given purpose and be assigned to a specific objective in order to prevent any confusion between appropriations.
- The *principle of sound financial management* is defined by reference to the principles of economy, efficiency and effectiveness.
- The budget is established in compliance with the *principle of transparency*, ensuring sound information on the implementation of the budget and the accounts.

The budget presents appropriations and resources by purpose (activity-based budgeting), with a view to enhancing transparency in the management of the budget with reference to the objectives of sound financial management and in particular efficiency and effectiveness.

The expenditure authorised by the present budget totals EUR 160 113 520 011 in commitment appropriations and EUR 144 680 980 690 in payment appropriations, representing a variation rate of + 0,18 % and of + 14,13 % respectively by comparison with the 2017 budget.

Budgetary revenue totals EUR 144 680 980 690. The uniform rate of call for the VAT resource is 0,30 % (except for Germany, Netherlands and Sweden for which the rate of call for the period 2014-2020 has been fixed at 0,15 %) whilst that for the GNI resource is 0,6524 %. Traditional own resources account for 15,79 % of the financing of the budget for 2018. The VAT resource accounts for 11,92 % and the GNI resource for 71,01 %. Other revenue for this financial year is estimated at EUR 1 848 645 936.

The own resources needed to finance the 2018 budget account for 0,91 % of the total GNI.

The tables below set out step by step the method used to calculate the financing of the 2018 budget.

FINANCING OF THE GENERAL BUDGET

Appropriations to be covered during the financial year 2018 pursuant to Article 1 of Council Decision 2014/335/EU, Euratom of 26 May 2014 on the system of own resources of the European Union

TABLE 5

Correction of budgetary imbalances for the United Kingdom for the year 2017 pursuant to Article 4 of Decision 2014/335/EU, Euratom (Chapter 1 5)

Description	Coefficient ⁽¹⁾ (%)	Amount
1. United Kingdom's share (in %) of notional uncapped VAT base	17,1 194	
2. United Kingdom's share (in %) of enlargement-adjusted total allocated expenditure	7,4 429	
3. (1) – (2)	9,6 765	
4. Total allocated expenditure		118 550 222 885
5. Enlargement related expenditure ⁽²⁾		25 135 292 635
6. Enlargement-adjusted total allocated expenditure = (4) – (5)		93 414 930 250
7. United Kingdom's correction original amount = (3) × (6) × 0,66		5 965 942 623
8. United Kingdom's advantage ⁽³⁾		1 019 406 910
9. Core United Kingdom's correction = (7) – (8)		4 946 535 713
10. Windfall gains deriving from traditional own resources ⁽⁴⁾		– 45 769 948
11. Correction for the United Kingdom = (9) – (10)		4 992 305 660

⁽¹⁾ Rounded percentages.
⁽²⁾ The amount of enlargement-related expenditure corresponds to total allocated expenditure in 13 Member States (that have acceded to the EU after 30 April 2004), except for agricultural direct payments and market-related expenditure as well as that part of rural development expenditure originating from the EAGGF, Guarantee Section.
⁽³⁾ The 'UK advantage' corresponds to the effects arising for the United Kingdom from the changeover to capped VAT and the introduction of the GNP/GNI-based own resource.
⁽⁴⁾ These windfall gains correspond to the net gains of the United Kingdom resulting from the increase — from 10 to 20 % as of 1 January 2014 — in the percentage of traditional own resources retained by Member States to cover the collection costs of traditional own resources (TOR).

Remarks

The common organisation of the market in the sugar sector provided that sugar, isoglucose and inulin syrup producers had to pay basic and B production levies. These levies were intended to cover market support expenditure. At present amounts entered under this article are a consequence of the revision of past established levies. Levies for the marketing year 2007/2008 till the marketing year 2016/2017 are entered under Article 1 1 7 of this chapter as a 'production charge'.

Figures are net of collection costs.

Legal basis

Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1).

Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources (OJ L 163, 23.6.2007, p. 17), and in particular point (a) of Article 2(1) thereof.

Council Regulation (EU) No 1360/2013 of 2 December 2013 fixing the production levies in the sugar sector for the 2001/2002, 2002/2003, 2003/2004, 2004/2005 and 2005/2006 marketing years, the coefficient required for calculating the additional levy for the 2001/2002 and 2004/2005 marketing years and the amount to be paid by sugar manufacturers to beet sellers in respect of the difference between the maximum levy and the levy to be charged for the 2002/2003, 2003/2004 and 2005/2006 marketing years (OJ L 343, 19.12.2013, p. 2).

1 1 1 Sugar storage levies

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	0,—

Remarks

This article is intended to record revenue from the outstanding sugar storage levies as Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1) abolished the storage levy.

It also covers the outstanding amounts due pursuant to Article 5 of Commission Regulation (EEC) No 65/82 of 13 January 1982 laying down detailed rules for carrying forward sugar to the following marketing year (OJ L 9, 14.1.1982, p. 14) when the obligation to store sugar carried forward is not complied with, and the amounts due in accordance with Council Regulation (EEC) No 1789/81 of 30 June 1981 laying down general rules concerning the system of minimum stocks in the sugar sector (OJ L 177, 1.7.1981, p. 39) when the general rules concerning the system of minimum stocks in the sugar sector are not complied with.

This article is also intended for the recording of income charged by new Member States in the event of non-elimination of sugar stocks considered surplus within the meaning of Commission Regulations laying down transitional measures in the sugar sector by reason of the accession.

Figures are net of collection costs.

Legal basis

Council Decision 2014/335/EU, Euratom of 26 May 2014 on the system of own resources of the European Union (OJ L 168, 7.6.2014, p. 105), and in particular point (a) of Article 2(1) thereof.

p.m.	133 300 000	131 566 944,18

Remarks

This article is intended to record revenue from the production charge levied on undertakings producing sugar, isoglucose or inulin syrup in accordance with Article 128 of Regulation (EU) No 1308/2013.

The production charge was collected and declared by Member States for the last time under the general budget of the Union for 2017 following the end of the sugar quota system in marketing year 2016/2017 on 30 September 2017. Any incoming revenue under this article would only concern possible regularisations of certain files, for which estimates are not possible in advance.

1 1 8

One-off amounts on additional sugar quotas and supplementary isoglucose quotas

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	0,—

Remarks

A one-off amount is levied on additional sugar quotas or supplementary isoglucose quotas which have been allocated to undertakings in accordance with Article 58 of Regulation (EC) No 1234/2007.

Any incoming revenue under this article would only concern possible regularisations of certain files, for which estimates are not possible in advance.

Figures are net of collection costs.

Legal basis

Council Regulation (EC) No 318/2006 of 20 February 2006 on the common organisation of the markets in the sugar sector (OJ L 58, 28.2.2006, p. 1), and in particular Article 8 and Article 9(2) and (3) thereof.

1 1 9 Surplus amount

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	902 874,98

Remarks

This article is intended to record revenue from the surplus amount levied and charged by the Member States to the sugar undertakings concerned located on its territory.

Following the end of the sugar quota system in marketing year 2016/2017 on 30 September 2017, any incoming revenue under this article would only concern possible regularisations of certain files, for which estimates are not possible in advance.

Figures are net of collection costs.

Legal basis

Council Regulation (EC) No 318/2006 of 20 February 2006 on the common organisation of the markets in the sugar sector (OJ L 58, 28.2.2006, p. 1), and in particular Article 15 thereof.

Remarks

The assignment of customs duties as own resources to the financing of common expenditure is the logical consequence of the free movement of goods within the Union. This article may comprise levies, premiums, additional or compensatory amounts, additional amounts or factors, Common Customs Tariff duties and other duties established or to be established by the institutions of the European Union in respect of trade with third countries and customs duties on products under the expired Treaty establishing the European Coal and Steel Community.

Figures are net of collection costs.

Remarks

The GNI-based resource is an 'additional' resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments and other revenue in any particular year. By implication, the GNI-based resource ensures that the general budget of the Union is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (VAT-based payments, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States' gross national income for this financial year is 0,6524 %.

Remarks

The budgetary imbalance correction mechanism in favour of the United Kingdom (UK correction) was introduced by the European Council in Fontainebleau in June 1984 and the resulting own resources decision of 1985. The purpose of the mechanism is to reduce the UK budgetary imbalance through a reduction in its payments to the Union.

Legal basis

Council Decision 2014/335/EU, Euratom of 26 May 2014 on the system of own resources of the European Union (OJ L 168, 7.6.2014, p. 105), and in particular Articles 4 and 5 thereof.

Remarks

In accordance with Article 18 of the Financial Regulation, the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 39 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 1(1) of Regulation (EU, Euratom) No 608/2014.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget that must be presented by the Commission within 15 days following the submission of the provisional accounts.

A deficit is entered in Article 27 02 01 of the statement of expenditure in Section III 'Commission'.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 18 thereof.

Remarks

Under Article 7(1) of Regulation (EEC, Euratom) No 1553/89, Member States are to send the Commission a statement of the total amount of the VAT resources base for the previous calendar year before 31 July.

Each Member State is debited with an amount calculated on the basis of that statement according to Union rules and credited with the 12 payments actually made during the previous financial year.

Any corrections to the abovementioned statements resulting from Commission controls in accordance with Article 9 of Regulation (EEC, Euratom) No 1553/89 or/and any changes to the GNI of previous financial years that have an effect on the capping of the 'VAT' base will lead to adjustments of the 'VAT' balances.

The Commission shall inform the Member States of the amounts resulting from this calculation before 1 February of the year following that in which the data for the adjustments was supplied.

Legal basis

Council Regulation (EEC, Euratom) No 1553/89 of 29 May 1989 on the definitive uniform arrangements for the collection of own resources accruing from value added tax (OJ L 155, 7.6.1989, p. 9).

Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39), and in particular Article 10b thereof.

Remarks

On the basis of figures for aggregate gross national income and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Regulation (EC, Euratom) No 1287/2003, each Member State shall be debited with an amount calculated according to Union rules and credited with the 12 payments made during that previous financial year.

Any changes to the gross national product/gross national income of previous financial years pursuant to Article 2(2) of Regulation (EC, Euratom) No 1287/2003, subject to Articles 4 and 5 thereof, gives rise for each Member State concerned to an adjustment to the balance established pursuant to Article 10b(4) of Regulation (EU, Euratom) No 609/2014.

The Commission shall inform the Member States of the amounts resulting from this calculation before 1 February of the year following that in which the data for the adjustments was supplied.

Legal basis

Remarks

Result of the calculation for the netting of adjustments to the VAT and GNI-based resources of previous financial years.

This calculation is the product of multiplying the total amounts of the adjustments referred to in Article 10b(1) to (4) of Regulation (EU, Euratom) No 609/2014, with the exception of particular adjustments pursuant to points (b) and (c) of Article 10b(2) of that Regulation, by the percentage that the GNI of that Member State represents of the GNI of all Member States, as applicable on 15 January to the budget in force for the year following that in which the data for the adjustments was supplied.

The Commission shall inform the Member States of the amounts resulting from this calculation before 1 February of the year following that in which the data for the adjustments was supplied.

Legal basis

CHAPTER 3 4 — ADJUSTMENT RELATING TO THE NON-PARTICIPATION OF CERTAIN MEMBER STATES IN CERTAIN POLICIES IN THE AREA OF FREEDOM, SECURITY AND JUSTICE

3 4 0 *Adjustment for the impact of the non-participation of certain Member States in certain policies in the area of freedom, security and justice*

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	6 378 878,24

Remarks

Article 3 of the Protocol on the position of Denmark and Article 5 of the Protocol on the position of the United Kingdom and Ireland, annexed to the Treaty on European Union and the Treaty on the Functioning of the European Union, grant full exemption to these Member States from supporting the financial consequences of some specific policies in the area of freedom, security and justice, with the exception of the related administrative costs. They can therefore obtain an adjustment to the own resources paid for each year in which they do not participate.

Each Member State's contribution to the adjustment mechanism is calculated by applying to the budget expenditure resulting from this operation or policy the scale of the aggregate gross national income and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Council Regulation (EC, Euratom) No 1287/2003 of 15 July 2003 on the harmonisation of gross national income at market prices (OJ L 181, 19.7.2003, p. 1).

The Commission works out each Member State's balance and informs it in time for that Member State to enter its balance in the account referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 on the first working day of December, in accordance with Article 11 of that Regulation.

Legal basis

Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39), and in particular Article 11 thereof.

Protocol on the position of Denmark, annexed to the Treaty on European Union and to the Treaty on the Functioning of the European Union, and in particular Article 3 thereof, and Protocol on the position of the United Kingdom and Ireland in respect of the area of freedom, security and justice, annexed to the Treaty on European Union and to the Treaty on the Functioning of the European Union, and in particular Article 5 thereof.

Financial year 2018	Financial year 2017	Financial year 2016
—	25 000 000	37 644 922,58

Remarks

This article is intended to record the revenue accruing from the repayment of interest by the subsidised organisations which have placed advances received from the Commission on interest-bearing accounts. If they remain unused, these advances and the interest on them have to be repaid to the Commission.

5 2 2 Interest yielded by pre-financing

Financial year 2018	Financial year 2017	Financial year 2016
40 000 000	40 000 000	6 514 023,32

Remarks

This article is intended to record revenue from the interest yielded by pre-financing.

In accordance with point (d) of Article 21(3) of the Financial Regulation, this revenue may be used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Interest generated by pre-financing payments made from the budget shall not be due to the Union except as otherwise provided for in the delegation agreements, with the exception of those agreements concluded with third countries or the bodies they have designated. In cases in which it is provided for, such interest shall be reused for the corresponding action, deducted from payment requests in accordance with point (c) of the first subparagraph of Article 23 of the Financial Regulation, or recovered.

Delegated Regulation (EU) No 1268/2012 also lays down provisions regarding the accounting of interest yielded on pre-financing.

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	52 901 263,24

Remarks

This article is intended to record interest and other revenue generated on trust accounts.

The trust accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank/Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) managing Union programmes and the amounts paid in by the Union remain on the account until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in accession countries.

In accordance with Article 21(4) of the Financial Regulation, interest generated by trust accounts used for Union programmes are used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Legal basis

CHAPTER 6 1 — REPAYMENT OF MISCELLANEOUS EXPENDITURE

6 1 1 *Repayment of expenditure incurred on behalf of one or more Member States*

6 1 1 3 Revenue from the investments provided for in Article 4 of Decision 2003/76/EC — Assigned revenue

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	35 732 929,25

Remarks

Decision 2003/76/EC stipulates that the Commission is entrusted with winding up the financial operations of the European Coal and Steel Community which are still in progress upon expiry of the ECSC Treaty.

Pursuant to Article 4 of that Decision, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by the Research Fund for Coal and Steel.

The net revenue available for financing research projects in year $n + 2$ appears in the balance sheet of the ECSC in liquidation for year n , and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2016 will be used for research in 2018. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2018 comes to EUR 27 400 000.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

In accordance with Article 21 and Article 181(2) of the Financial Regulation, revenue will be used to provide additional appropriations under Chapter 08 05 of the statement of expenditure in Section III 'Commission'.

Legal basis

Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

Remarks

This item is intended to accommodate amounts resulting from decisions related to conformity and accounting clearance of accounts in favour of the Union budget concerning expenditure financed by the European Agricultural Guidance and Guarantee Fund (Guarantee Section) under Heading 1 of the 2000-2006 Financial Perspectives and the European Agricultural Guarantee Fund (EAGF) under Heading 2 of the 2007-2013 and the 2014-2020 multiannual financial framework in accordance with Articles 51 and 52 of Regulation (EU) No 1306/2013. It includes corrections related to non-compliance with payment deadlines in accordance with Article 40 of that Regulation.

This item is also intended to accommodate amounts resulting from decisions related to conformity and accounting clearance of accounts in favour of the Union budget concerning expenditure financed by the temporary scheme for the restructuring of the sugar industry (Sugar Restructuring Fund) in the Community established by Regulation (EC) No 320/2006, which ended on 30 September 2012.

In accordance with Article 1(3) of Regulation (EC) No 320/2006 and Article 43 of Regulation (EU) No 1306/2013, such amounts shall be regarded as assigned revenue within the meaning of Articles 21 and 174 of the Financial Regulation. Any revenue under this item will be used to provide additional appropriations to any budgetary item under EAGF of the statement of expenditure in Section III 'Commission'.

Remarks

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 gives rise to the payment of interest by the Member State concerned. However the recovery of amounts of interest below EUR 500 shall be waived.

For the VAT and GNI-based own resources, interest shall be payable only in relation to delays in entering amounts referred in Article 12(2) of Regulation (EU, Euratom) No 609/2014.

In the case of Member States belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate as published in the Official Journal of the European Union, C series, which the European Central Bank applied to its main refinancing operations on the first day of the month in which the due date fell, or 0 per cent, whichever is higher, increased by 2,5 percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay.

In the case of Member States not belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate applied on the first day of the month in question by the central banks for their main refinancing operations, or 0 per cent, whichever is higher, increased by 2,5 percentage points. For the Member States for which the central bank rate is not available, the interest rate shall be equal to the most equivalent rate applied on the first day of the month in question on the Member State's money market, or 0 per cent, whichever is higher, increased by 2,5 percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay.

The total increase shall not exceed 16 percentage points. The increased rate shall be applied to the entire period of delay.

CHAPTER 8 1 — LOANS GRANTED BY THE COMMISSION

8 1 0 *Capital repayments and interest in respect of special loans and risk capital granted in the framework of financial cooperation with Mediterranean third countries*

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	35 170 433,24

Remarks

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapters 22 02 and 22 04 of the statement of expenditure in Section III 'Commission' to Mediterranean third countries.

It also comprises capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans/risk capital were granted at a time those countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

Legal basis

For the legal basis, see remarks for Chapters 22 02 and 22 04 of the statement of expenditure in Section III 'Commission'.

3 2 6 European Science-Media Hub

Appropriations 2018	Appropriations 2017	Outturn 2016
800 000	p.m.	

Remarks

To foster an effective dialogue among Members, the scientific community and journalists — especially in relation to current scientific and technological developments and issues — the European Parliament can benefit from a dedicated and authoritative structure to support for discussion, training and dissemination of knowledge in this field. A 'European Science-Media Hub' has been established for that purpose, and its operation will be overseen by the European Parliament's STOA Panel.

Appropriations under this article, which are intended to enhance activities at the interface between the European Parliament, the scientific community and the media, will cover the costs of the European Science-Media Hub, in order specifically to promote networking, training and knowledge dissemination, by for example:

- setting up and maintaining networks at the interface between the European Parliament, the scientific community and the media;

CHAPTER 3 2 — EXPERTISE AND INFORMATION: ACQUISITION, ARCHIVING, PRODUCTION AND DISSEMINATION (*cont'd*)**3 2 6** (*cont'd*)

- organising seminars, conferences and training courses on current scientific and technological developments and issues and on the nature and effectiveness of science journalism;
- harnessing expert information and analysis from academia, the media and other sources in the field of science and technology for the benefit of policy-makers and citizens;
- making the European Parliament research and other relevant material in the field of science and technology more widely available by written, audiovisual and other means;
- developing techniques and methods for increasing the ability to identify and disseminate trustworthy sources in the field of science and technology;
- supporting the installation, upgrading and/or use of state-of-the-art technical equipment and media facilities in support of such dialogue;
- developing closer cooperation and link more generally between the European Parliament, relevant media outlets and universities and research centres in this field, including through promotion in the media of the role, and work of the European Scienc-Media Hub as well as its accessibility for citizens.

The amount of assigned revenue in accordance with Article 21(3) of the Financial Regulation is estimated at EUR 100.

COMMISSION

CHAPTER 5 2 — REVENUE FROM INVESTMENTS OR LOANS GRANTED, BANK AND OTHER INTEREST (*cont'd*)5 2 2 (*cont'd*)

In accordance with point (d) of Article 21(3) of the Financial Regulation, this revenue may be used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Interest generated by pre-financing payments made from the budget shall not be due to the Union except as otherwise provided for in the delegation agreements, with the exception of those agreements concluded with third countries or the bodies they have designated. In cases in which it is provided for, such interest shall either be reused for the corresponding action, deducted from payment requests in accordance with point (c) of the first subparagraph of Article 23(1) of the Financial Regulation or recovered.

Delegated Regulation (EU) No 1268/2012 also lays down provisions regarding the accounting of interest yielded on pre-financing.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 8(4) and point (d) of Article 21(3) thereof.

Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	52 901 263,24

Remarks

This article is intended to record interest and other revenue generated on trust accounts.

The trust accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank/Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) managing Union programmes and the amounts paid in by the Union remain on the account until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in accession countries.

In accordance with Article 21(4) of the Financial Regulation, interest generated by trust accounts used for Union programmes is used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Legal basis

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 21(4) thereof.

CHAPTER 6 1 — REPAYMENT OF MISCELLANEOUS EXPENDITURE

6 1 1 *Repayment of expenditure incurred on behalf of one or more Member States*

6 1 1 3 Revenue from the investments provided for in Article 4 of Decision 2003/76/EC — Assigned revenue

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	35 732 929,25

Remarks

Decision 2003/76/EC stipulates that the Commission is entrusted with winding up the financial operations of the European Coal and Steel Community (ECSC) which are still in progress upon expiry of the ECSC Treaty.

Pursuant to Article 4 of that Decision, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by the Research Fund for Coal and Steel.

The net revenue available for financing research projects in year $n + 2$ appears in the balance sheet of the ECSC in liquidation for year n , and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2016 will be used for research in 2018. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2018 comes to EUR 27 400 000.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

In accordance with Article 21 and Article 181(2) of the Financial Regulation, revenue will be used to provide additional appropriations under Chapter 08 05 of the statement of expenditure in this section.

Legal basis

Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

This item is intended to accommodate amounts recovered following irregularities or negligence, including the related interest, in particular amounts recovered in cases of irregularities or fraud, penalties and interest received, as well as securities, deposits or guarantees forfeited concerning expenditure financed by the European Agricultural Guidance and Guarantee Fund (Guarantee Section) under Heading 1 of the 2000-2006 Financial Perspectives and the European Agricultural Guarantee Fund (EAGF), under Heading 2 of the 2007-2013 and the 2014-2020 multiannual financial framework in accordance with Articles 54 and 55 of Regulation (EU) No 1306/2013.

This item is also intended to accommodate amounts recovered following irregularities or oversight, including interest, penalties and securities acquired, resulting from expenditure financed by the temporary scheme for the restructuring of the sugar industry (Sugar Restructuring Fund) in the Community established by Regulation (EC) No 320/2006, which ended on 30 September 2012.

This item is also intended to accommodate the net amounts recovered for which Member States may retain 20 % as provided for in Article 55 of Regulation (EU) No 1306/2013.

In accordance with Article 1(3) of Regulation (EC) No 320/2006 and Articles 43 and 55 of Regulation (EU) No 1306/2013, such amounts shall be regarded as assigned revenue within the meaning of Articles 21 and 174 of the Financial Regulation. Any revenue under this item will be used to provide additional appropriations to any budgetary item under EAGF of the statement of expenditure in this section.

The revenue under this item has been estimated at EUR 132 000 000. When establishing the budget for 2018, this amount was taken into account for financing the needs of measures under Article 05 03 01 (Item 05 03 01 10).

Remarks

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EU, Euratom) No 609/2014 gives rise to the payment of interest by the Member State concerned. However the recovery of amounts of interest below EUR 500 shall be waived.

For the VAT and GNI-based own resources, interest shall be payable only in relation to delays in entering amounts referred in Article 12(2) of Regulation (EU, Euratom) No 609/2014.

In the case of Member States belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate as published in the *Official Journal of the European Union*, C series, which the European Central Bank applied to its main refinancing operations on the first day of the month in which the due date fell, or 0 per cent, whichever is higher, increased by 2,5 percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay.

In the case of Member States not belonging to the Economic and Monetary Union, the interest rate shall be equal to the rate applied on the first day of the month in question by the central banks for their main refinancing operations, or 0 per cent, whichever is higher, increased by 2,5 percentage points. For the Member States for which the central bank rate is not available, the interest rate shall be equal to the most equivalent rate applied on the first day of the month in question on the Member State's money market, or 0 per cent, whichever is higher, increased by 2,5 percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay.

The total increase shall not exceed 16 percentage points. The increased rate shall be applied to the entire period of delay.

BORROWING AND LENDING OPERATIONS

CHAPTER 8 0 — REVENUE RESULTING FROM THE EUROPEAN UNION GUARANTEE FOR BORROWING AND LENDING OPERATIONS IN THE MEMBER STATES

8 0 0 *European Union guarantee for Union borrowings for balance of payments support*

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	0,—

Remarks

The Union guarantee is for borrowings raised on the capital markets or from financial institutions. The amount in principal of loans which may then be granted to the Member States is limited to EUR 50 000 000 000.

This article is intended to record any revenue arising from exercise of rights in connection with a guarantee under Article 01 02 02, provided that this revenue has not been deducted from expenditure.

A summary of borrowing and lending operations, including debt management, in capital and interest, is given in Annex Part II to the statement of expenditure in this section.

Legal basis

For the legal basis, see the remark for Article 01 02 02 of the statement of expenditure in this section.

8 0 1 *European Union guarantee for Euratom borrowings*

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	0,—

Remarks

This article is intended to record any revenue arising from exercise of rights in connection with a guarantee under Article 01 04 03, provided that this revenue has not been deducted from expenditure.

A summary of borrowing and lending operations, including debt management, in capital and interest, is given in Annex Part II to the statement of expenditure in this section.

Legal basis

For the legal basis, see the remark for Article 01 04 03 of the statement of expenditure in this section.

COMMISSION

CHAPTER 8 0 — REVENUE RESULTING FROM THE EUROPEAN UNION GUARANTEE FOR BORROWING AND LENDING OPERATIONS IN THE MEMBER STATES (*cont'd*)**8 0 2** *European Union guarantee for Union borrowings for financial assistance under the European Financial Stabilisation Mechanism*

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	0,—

Remarks

The Union guarantee is for borrowings raised on the capital markets or from financial institutions. The outstanding amount of loans or credit lines to be granted to Member States shall be in the limits set out in the legal basis.

This article is intended to record any revenue arising from exercise of rights in connection with a guarantee under Article 01 02 03, provided that this revenue has not been deducted from expenditure.

A summary of borrowing and lending operations, including debt management, in capital and interest, is given in Annex Part II to the statement of expenditure in this section.

Legal basis

For the legal basis, see the remark for Article 01 02 03 of the statement of expenditure in this section.

CHAPTER 8 1 — LOANS GRANTED BY THE COMMISSION**8 1 0** *Capital repayments and interest in respect of special loans and risk capital granted in the framework of financial cooperation with Mediterranean third countries*

Financial year 2018	Financial year 2017	Financial year 2016
p.m.	p.m.	35 170 433,24

Remarks

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapters 22 02 and 22 04 of the statement of expenditure in this section to Mediterranean third countries.

It also comprises capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans/ risk capital were granted at a time the countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

CHAPTER 8 1 — LOANS GRANTED BY THE COMMISSION (*cont'd*)**8 1 0** (*cont'd*)*Legal basis*

Remarks

This appropriation is intended to cover the following expenditure incurred within the territory of the Union:

- the remuneration of contract staff (within the meaning of the Conditions of Employment of Other Servants of the European Union), employer's contributions to social welfare for contract staff and the impact of weightings applicable to the remuneration of such staff,
- a sum to cover the remuneration of contract staff acting as guides for persons with disabilities,
- the employment of agency staff, particularly clerical staff and shorthand typists,
- expenditure on staff included in service contracts for technical and administrative work and the supply of intellectual services, and expenditure on buildings and equipment and operating costs relating to this type of staff,
- the cost of national civil servants or other experts on secondment or temporary assignment to the Commission or called for short consultations, particularly to draft legislation on harmonisation in various areas; exchanges are also organised to allow uniform application of Union legislation by the Member States,
- the cost of any adjustments to remuneration during the financial year.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Revenue from contributions from the EFTA States to the Union's general costs under Article 82 of the Agreement on the European Economic Area gives rise to the provision of supplementary appropriations to be entered in the budget lines concerned in accordance with the Financial Regulation. The amount of such revenue is estimated at EUR 169 020.

Missions:

- travel expenses, including ancillary costs relating to tickets and reservations, daily subsistence allowances and additional or exceptional expenditure incurred in connection with missions by Commission staff covered by the Staff Regulations and by national or international experts or officials seconded to Commission departments (refunds of mission expenses paid for the account of other Union institutions or bodies and for third parties will constitute assigned expenditure). Where the option is available, the Commission will use airlines covered by collective bargaining agreements and complying with the relevant ILO conventions.

Representation expenses:

- reimbursement of the costs incurred by persons officially representing the Commission (reimbursement is not possible for expenses incurred in the performance of representation duties vis-à-vis staff of the Commission or other Union institutions).

Meetings of experts:

- reimbursement of the costs incurred for the functioning of the expert groups established or convened by the Commission: travel, subsistence and incidental expenses of experts participating in study groups and working parties, and the cost of organising such meetings where they are not covered by the existing infrastructure in the headquarters of the institutions or external offices (experts are reimbursed on the basis of decisions made by the Commission).

Conferences:

- expenditure relating to conferences, congresses and meetings organised by the Commission in support of its various policies, and expenditure for running a network for financial control organisations and bodies, including an annual meeting between such organisations and the members of the European Parliament's Committee on Budgetary Control, as requested in paragraph 88 of European Parliament resolution of 27 April 2006 with comments forming an integral part of the decision on the discharge for implementation of the European Union general budget for the financial year 2004, Section III — Commission (OJ L 340, 6.12.2006, p. 5),
- expenditure relating to conferences, seminars, meetings, training courses and practical in-house training for officials of the Member States who manage or monitor operations financed by the Union funds or operations to collect revenue that constitutes Union own resources or cooperate in the Union statistics system, and expenditure of the same type for officials from the countries of central and eastern Europe managing or monitoring operations financed under Union programmes,
- expenditure on training third-country officials who carry out management or control duties with a direct bearing on protecting the Union's financial interest,
- the cost of the Commission's participation in conferences, congresses and meetings,
- conference enrolment fees, excluding training expenses,

TITLE 01 — ECONOMIC AND FINANCIAL AFFAIRS

CHAPTER 01 02 — ECONOMIC AND MONETARY UNION (*cont'd*)01 02 01 (*cont'd*)*Remarks*

This appropriation is intended to cover the cost of carrying out the Joint Harmonised EU Programme of Business and Consumer Surveys in the Member States and candidate countries. The programme was initiated by a Commission Decision in November 1961 and was modified through subsequent Council and Commission decisions. It was last approved through Commission Decision C(97) 2241 of 15 July 1997 and presented in the Commission communication COM(2006) 379 final on 12 July 2006 (OJ C 245, 12.10.2006, p. 5).

This appropriation is also intended to cover the cost of studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases and software and the part-financing and support of measures relating to:

- fiscal policy including monitoring of fiscal positions,
- assessment of transposition and application by the Member States of the new Union fiscal governance framework supporting the functioning of the economic and monetary union (EMU),
- economic monitoring, macro and micro-based analysis of the combination of measures and coordination of economic policies,
- the external aspects of the EMU,
- macroeconomic developments in the euro area,
- monitoring structural reforms and improving the operation of markets in the EMU and in the Union,
- coordination with financial institutions and analysis and development of financial markets, and borrowing and lending operations involving Member States,
- the facility providing financial assistance for Member States' balance of payments and the European financial stabilisation mechanism,
- cooperation with economic operators and decision-makers in the abovementioned fields,
- deepening and expanding the EMU,
- purchase of equipment, software development, maintenance and related training for the protection of the euro against counterfeiting.

This appropriation is also intended to cover the funding of priority information measures on Union policies on all aspects of the rules and functioning of EMU, as well as on the benefits of closer policy coordination and structural reforms, and to address information needs of key stakeholders and citizens, in relation to the EMU.

CHAPTER 01 02 — ECONOMIC AND MONETARY UNION (*cont'd*)**01 02 01** (*cont'd*)

This measure is designed to be an effective channel of communication and dialogue between the citizens of the Union and the Union institutions, and to take account of specific national and regional characteristics, where appropriate in cooperation with the Member State authorities. Emphasis will also be placed on preparing citizens for the introduction of the euro in Member States planning for its introduction.

It includes:

- the development of communication activities at central level (brochures, leaflets, newsletters, website design, development and maintenance, social media, exhibitions, stands, conferences, seminars, audiovisual products, opinion polls, surveys, studies, promotional material, coin design competitions, twinning programmes, training etc.), and similar activities at the national and regional level implemented in cooperation with the Commission's Representations,
- partnership agreements with Member States that wish to provide information about the euro or the EMU,
- cooperation and networking with Member States in the appropriate forums,
- communication initiatives in third countries, in particular to point out the international role of the euro and the value of financial integration.

The Commission, when implementing this article, should take duly into account the outcomes of the meetings of the Interinstitutional Group on Information (IGI).

The implementation of the Commission's communication strategy takes place in close coordination with the Member States and the European Parliament.

The Commission adopts a strategy and an annual work plan drawing on the orientations set out in its Communication of 11 August 2004 (COM(2004) 552 final) and it reports regularly to the relevant committee of the European Parliament on the implementation of the programme and on planning for the coming year.

This appropriation is also intended to cover or to temporarily pre-finance costs incurred by the Union in concluding and carrying out operations linked with the borrowing and lending operations for macro-financial assistance, Euratom, balance of payment and European financial stabilisation mechanism.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with point (a) of Article 21(3) of the Financial Regulation.

Remarks

The European Union guarantee is for borrowings raised on the capital markets or from financial institutions. The amount in principal of loans which may then be granted to the Member States is limited to EUR 50 000 000 000.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

Remarks

Article 122(2) of the Treaty on the Functioning of the European Union provides for the possibility of granting Union financial assistance to a Member State in difficulties or seriously threatened with severe difficulties caused by exceptional occurrences beyond its control.

The guarantee provided by the Union is for borrowings raised on the capital markets or from financial institutions.

In accordance with Article 2(2) of Regulation (EU) No 407/2010, the outstanding amount of loans and credit lines granted to Member States under this stabilisation mechanism is to be limited to the margin available under the Union's own resources for payment appropriations.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action is intended to finance the provision of support to Member States for the implementation of key reforms in the areas of fiscal responsibility, growth-enhancing public administration and competitiveness.

CHAPTER 01 02 — ECONOMIC AND MONETARY UNION (*cont'd*)**01 02 77** (*cont'd*)01 02 77 01 (*cont'd*)

This support will aim to enhance the capacity of Member States to implement reforms and to strengthen their public institutions. It should be focused in particular on fiscal, structural and institutional reforms that have been identified as priorities in the course of the Union's regular cycle of macroeconomic surveillance, in the course of an economic adjustment programme, during enhanced surveillance, or during post-programme surveillance. It will be delivered by the Commission upon request of the Member State concerned and is open to all Member States.

This appropriation may be used to cover the implementation of technical assistance programmes and projects by national and international public organisations with strong expertise in capacity development and institution building as well as by private sector actors. It may also be used to cover expenditure related to the preparatory phases of such programmes and projects (programming, identification and formulation) as well as monitoring, evaluation, audit and control during and after implementation. It may also cover the costs of short-term technical assistance, twinning-type arrangements between public authorities as well as support expenditure for such activities (training, meetings, seminars, studies).

Legal basis

Preparatory action within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

Macro-financial assistance ('MFA') is a form of financial aid extended by the Union to partner countries experiencing a balance of payments crisis. MFA is designed for countries geographically, economically and politically close to the Union. These include candidate and potential candidate countries, countries covered by the European Neighbourhood Policy and, in certain circumstances, other third countries. In principle, MFA is only available to countries benefiting from an International Monetary Fund programme.

CHAPTER 01 03 — INTERNATIONAL ECONOMIC AND FINANCIAL AFFAIRS (*cont'd*)01 03 02 (*cont'd*)

MFA is exceptional in nature and is mobilised on a case-by-case basis to help countries dealing with serious balance-of-payments difficulties. Its objective is to restore a sustainable external financial situation, while encouraging economic adjustments and structural reforms.

While MFA can take the form of medium/long-term loans or grants, or a combination of these, this article only covers the grant element of MFA operations.

Appropriations under this article will also be used to cover costs incurred in relation to MFA operations, and in particular: (i) costs incurred to conduct operational assessments in the beneficiary countries to obtain reasonable assurances on the functioning of administrative procedures and financial circuits, (ii) costs related to the implementation of the 'Better Regulation' guidelines, in particular for ex-post evaluations of MFA operations, and (iii) costs to cover comitology requirements.

The Commission will inform the budgetary authority regularly of the macro-financial situation of the beneficiary countries and will report extensively on the implementation of MFA on a yearly basis.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with point (a) of Article 21(3) of the Financial Regulation.

Remarks

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission, if necessary, to service the debt (repayment of principal, interest and other costs) should a debtor default on a loan granted under the Decisions referred to below.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 14 of Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39) applies.

A specific annex to this part of the statement of expenditure in this section gives a summary of borrowing-and-lending operations guaranteed by the general budget, including debt management, in respect of capital and interest.

Remarks

Pursuant to Council Decision of 8 March 1977, the Union guarantees loans made by the European Investment Bank (EIB) in the context of the Union's financial commitments in respect of the Mediterranean countries.

That decision was the basis for a contract of guarantee between the European Economic Community and the EIB signed in Brussels on 30 October 1978 and in Luxembourg on 10 November 1978, setting up a comprehensive guarantee, equal to 75 % of all the funds available for loan operations in the following countries: Malta, Tunisia, Algeria, Morocco, Portugal (Financial Protocol, emergency aid), Turkey, Cyprus, Syria, Israel, Jordan, Egypt, former Yugoslavia and Lebanon.

Decision 90/62/EEC was the basis for a contract of guarantee between the European Economic Community and the EIB signed in Brussels on 24 April 1990 and in Luxembourg on 14 May 1990 as regards Hungary and Poland and for the extension of that contract to cover Czechoslovakia, Romania and Bulgaria, signed in Brussels and in Luxembourg on 31 July 1991.

Decision 93/696/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 22 July 1994 and in Luxembourg on 12 August 1994.

Pursuant to Decisions 93/115/EEC and 96/723/EC, the Union guarantees loans which may be made individually by the EIB in countries of Latin America and Asia with which the European Community has concluded cooperation agreements. Decision 93/115/EEC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 4 November 1993 and in Luxembourg on 17 November 1993. Decision 96/723/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 18 March 1997 and in Luxembourg on 26 March 1997.

TITLE 01 — ECONOMIC AND FINANCIAL AFFAIRS

CHAPTER 01 03 — INTERNATIONAL ECONOMIC AND FINANCIAL AFFAIRS (*cont'd*)01 03 05 (*cont'd*)

Pursuant to Decision 95/207/EC, the Union guarantees loans which may be made individually by the EIB in South Africa. Decision 95/207/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 4 October 1995 and in Luxembourg on 16 October 1995.

Decision 97/256/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 25 July 1997 and in Luxembourg on 29 July 1997 setting up a guarantee restricted to 70 % of the aggregate amount of the appropriations opened, plus all related sums. The overall ceiling of the appropriations opened is equivalent to EUR 7 105 000 000.

Decision 2000/24/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 24 January 2000 and in Luxembourg on 17 January 2000, last restated in 2005, setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations opened, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 19 460 000 000. The EIB is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

Decision 2001/777/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 6 May 2002 and in Luxembourg on 7 May 2002 setting up a guarantee at 100 % against losses under a special lending action for selected environment projects in the Baltic Sea basin of Russia under the Northern Dimension. The overall ceiling is EUR 100 000 000.

Decision 2005/48/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Luxembourg on 9 December 2005 and in Brussels on 21 December 2005 setting up a guarantee at 100 % against losses under loans for certain types of projects in Russia, Ukraine, Moldova and Belarus. The overall ceiling is EUR 500 000 000. It covers a period ending on 31 January 2007. At the end of this period, the loans granted by the EIB not having attained the overall amounts referred to above, the period was automatically extended by six months.

Decision 2006/1016/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations, less amounts reimbursed, plus all related sums. The overall ceiling of the appropriations made available for all countries under the Decision is equivalent to EUR 27 800 000 000 and covers the period beginning on 1 February 2007 and ending on 31 December 2013 with a possible extension of six months. That Decision has been replaced by Decision No 633/2009/EC.

Decision No 633/2009/EC was the basis for an amendment, signed on 28 October 2009, to the contract of guarantee between the European Community and the EIB which was signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007. The Union guarantee is restricted to 65 % of the aggregate amount of credits disbursed and guarantees. The maximum ceiling of the EIB financing operations, less amounts cancelled, shall not exceed EUR 27 800 000 000, broken down in a basic ceiling of EUR 25 800 000 000 and an optional mandate of EUR 2 000 000 000. It covers a period ending on 31 October 2011.

CHAPTER 01 03 — INTERNATIONAL ECONOMIC AND FINANCIAL AFFAIRS (*cont'd*)01 03 05 (*cont'd*)

Decision No 1080/2011/EU was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg and in Brussels on 22 November 2011. The Union guarantee is restricted to 65 % of the aggregate amount of credits disbursed and guarantees less amounts reimbursed, plus all related amounts. The maximum ceiling of the EIB financing operations, less amounts cancelled, shall not exceed EUR 29 484 000 000, broken down into a general mandate of EUR 27 484 000 000 and a Climate Change mandate of EUR 2 000 000 000. It covers a period beginning on 1 February 2007 and ending on 31 December 2013 with an extension until the entry into force of a new decision.

Decision No 466/2014/EU was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg on 22 July 2014 and in Brussels on 25 July 2014. The Union guarantee is restricted to 65 % of the aggregate amount disbursed and guaranteed under EIB financing operations, less amounts reimbursed, plus all related amounts. The maximum ceiling of the EIB financing operations under the Union guarantee, less amounts cancelled, shall not exceed EUR 30 000 000 000, broken down into a fixed ceiling of EUR 27 000 000 000 and an optional mandate of EUR 3 000 000 000. The European Parliament and the Council shall decide in accordance with the ordinary legislative procedure on the activation in whole or in part of the optional mandate. The Union guarantee covers EIB financing operations signed during the period beginning on 25 July 2014 and ending on 31 December 2020 with an extension of six months if the European Parliament and the Council have not adopted a new decision granting the Union guarantee to the EIB against losses under its financing operations outside the Union before the end of 2020.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 14 of Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (OJ L 168, 7.6.2014, p. 39) applies.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission, if necessary, to service the debt (repayment of principal, interest and other costs) should a debtor default on the loans granted by the EIB.

Remarks

This appropriation is intended to cover the financing of the technical and legal assistance necessary for the evaluation of the safety, environmental, economic and financial aspects of the projects for which financing in the form of a Euratom loan has been requested, including studies undertaken by the European Investment Bank (EIB). The measures are also intended to enable loan contracts to be concluded and carried out.

Appropriation under this article will also be used to cover or temporarily pre-finance costs incurred by the Union in concluding and carrying out operations linked with Euratom borrowing and lending operations.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with point (a) of Article 21(3) of the Financial Regulation.

Remarks

The European Investment Fund (EIF) implements the SME window of the European Fund for Strategic Investments, which supports loan and equity financing of SMEs and mid-caps. The EIF is entitled to receive management fees for the implementation of the SME window. As provided for in Regulation (EU) 2015/1017, fees due to the EIF shall be primarily met by revenues from the resources in the EFSI guarantee fund and the European Fund for Strategic Investments. However, to the extent that those revenues are not sufficient to cover the fees due to the EIF, those fees shall be covered by the general budget of the Union.

Remarks

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

Even though the end of the commitment period has been reached, the facilities have to be operated for several years during which time payments will be needed for investments and in order to honour guarantee obligations. Therefore reporting and monitoring requirements will continue until the end of the facility periods.

CHAPTER 01 04 — FINANCIAL OPERATIONS AND INSTRUMENTS (*cont'd*)01 04 51 (*cont'd*)

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget of the Union.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates, for participating in Union programmes and entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenues and repayments generated on Trust Accounts entered in Article 5 2 3 of the statement of revenue will be returned to the general budget of the Union or transferred to the succeeding financial instruments under the Union equity instruments for research and innovation under Horizon 2020 or the Equity Facility for Growth under COSME, as the case may be, in accordance with the Financial Regulation and Regulations (EU) No 1287/2013 and (EU) No 1290/2013.

Remarks

This appropriation is intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the ‘European Economic Area’ Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this item in accordance with the Financial Regulation.

Remarks

This appropriation is intended to strengthen the competitiveness of enterprises, in particular that of small and medium-sized enterprises (SMEs), and to encourage entrepreneurship and foster the creation and growth of SMEs.

The implemented measures will include:

- networks bringing together a variety of stakeholders,
- market replication projects,
- policy analyses, development and coordination with participating countries,
- policies to foster entrepreneurship,

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) (cont'd)**02 02 01** (cont'd)

- information sharing, dissemination, awareness raising and advisory services to increase SME's competitiveness and help them participate in the single market and beyond,
- support to joint actions of Member States or regions, as well as other measures under the COSME programme.

The Union will provide support to activities such as the Enterprise Europe Network and entrepreneurship promotion. It will also support projects concerned with the first applications or market replication of techniques, practices or products (e.g. new business concepts for consumer goods) of Union relevance that have already been technically demonstrated with success but, owing to residual risk, have not yet significantly penetrated the market. Those projects will be designed to promote wider use within the participating countries and facilitate market uptake.

Projects will also seek to improve the framework conditions including through capacity building in clusters and other business networks notably with regard to support SME internationalisation in order to ensure that Union enterprises are competitive and sustainable, including in the tourism sector, by supporting coherence and consistency in implementation, as well as informed policy-making at Union level. In addition, projects will be put in place to support the implementation of the Single Market Strategy and the Start-up Initiative. Support actions, directly linked to the achievement of these objectives are also considered for funding: meetings (including workshops), studies, information and publications and participation in study groups.

In relation to gender equality, projects to promote the position of female entrepreneurs will receive particular attention in order to help overcome gender-based hurdles women may face and to attain an equal representation of male and female entrepreneurs throughout the Union.

Sustainable tourism activities will receive a special focus with initial priority given to soft mobility, cycling networks, eco-tourism and nature protection. Accessibility for all, particularly for people with reduced mobility and for socially disadvantaged people is also of high importance in this context.

The Union will coordinate, promote and support actions for sustainable tourism, such as:

- preservation of long-term sustainable tourism resources through protection of natural, cultural, historical and industrial heritage,
- coordination and support for access to sustainable tourism information and services for less-advantaged citizens living in poverty, as well as for persons with reduced mobility,
- cross-border coordination of European cycling networks, together with rail and long-distance bus information and services.

The 'Erasmus for Young Entrepreneurs' programme aims to encourage European entrepreneurship, the sharing of knowledge and best practices, and the creation of valuable networks and partnerships.

Due to the currently difficult economic situation it is indispensable to support European enterprises, in particular young innovative start-ups and female entrepreneurs, and to foster entrepreneurship by assigning enough funds to programmes like the programme for the competitiveness of enterprises and small and medium-sized enterprises (COSME). It is particularly important to provide support and incentives for the most modern and innovative sectors, such as the sharing economy and the digital economy. The Union needs to provide support for young entrepreneurs in these sectors and to develop and introduce instruments that will allow innovative start-ups to compete with rivals from third countries on world markets.

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) (cont'd)

02 02 01 (cont'd)

In particular the programme 'Erasmus for Young Entrepreneurs' has been very successful, efficient and effective in contributing successfully to fighting unemployment and supporting robust start-ups across Europe. With regard to under-representation of women among entrepreneurs, special attention should be paid to involving young female entrepreneurs in the programme in order to encourage them to pursue their entrepreneurial career and to gain experience in how to overcome gender-specific hurdles they may face.

The financial means for the 'Erasmus for Young Entrepreneurs' programme must be increased in particular due to the following reasons:

- the programme helps fostering European entrepreneurship, the sharing of knowledge and best-practices as well as the creation of valuable networks and partnerships,
- the programme is very successful and has shown an increasing number of participants over the last years which is expected to increase further,
- the programme effectively tackles the problem of youth unemployment as it helps young people without work to become self-employed and existing SME to create jobs by expanding and/or internationalising their business,
- the number of applications exceeds by far the possibilities the Commission can fulfil with the financial means currently available.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

This appropriation is to be used to improve access to finance SMEs, including companies of female entrepreneurs, in the form of equity and debt, in their start-up, growth and transfer phase.

A loan guarantee facility (LGF) shall provide counter-guarantees, direct guarantees and other risk sharing arrangements for debt financing which shall reduce the particular difficulties that viable SMEs face in accessing finance either due to their perceived higher risk or their lack of sufficient available collateral and for securitisation of SME debt finance portfolios.

An equity facility for growth (EFG) shall allow investments in risk capital funds which invest in SMEs in the expansion and growth stage, whilst taking a gender-sensitive and non-discriminatory approach, and in particular in those operating cross-borders. The possibility shall exist to invest in early stage funds in conjunction with the equity facility for RDI under Horizon 2020. In cases of joint investments in multi-stage funds, investments will be provided on a pro-rata basis from the EFG of COSME and the equity facility for RDI under Horizon 2020. Support from the EFG shall be (a) either directly by the European Investment Fund (EIF) or other entities entrusted with the implementation on behalf of the Commission or (b) by funds-of-funds or investment vehicles investing across borders.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with point (i) of Article 21(3) of the Financial Regulation.

Remarks

Tourism is Europe's third-largest industry. The Union travel and tourism sector employs almost 25 million people (directly and indirectly) and visitors generate EUR 351 billion per year. The tourism industry generates 9,7 % of total EU-28 GDP, a figure which is forecast to rise to 10,4 % by 2025.

Last year more than 455 million tourists came to the Union. Tourism is part of daily life; it is part and parcel of European values. In view of recent crises, and at a time when there is an increasing threat of global terrorism, there is a greater need for tourism, which is an industry that promotes peace.

For the sustainable development and protection of this highly economically important sector, closer co-operation is required between the European Institutions and Member State governments, as well as maximum citizen involvement.

There are already two programmes, namely the European Capital of Culture and the European Capital of Sport. The evaluations made of the European Capital of Culture programme, as well as public consultation on its future after 2019, have revealed that it has become one of the most ambitious cultural initiatives in Europe and one of the most appreciated by European citizens. That programme has generated economic growth in the majority of the cities involved. In 2013 in Marseille (France) there were close to 11 million tourists, while Pécs (Hungary) recorded a 27 % increase in hotel room occupancy. Above all, the programme has created communities and the majority of the cities involved have found a new basis for their development plans. This has also created growth in the regions in which the cities are located.

It is crucial to uphold those values and disseminate them as widely as possible. A 'European Capital of Tourism' could be an excellent vehicle for that. Such a programme would aim to promote the rich tourism offering of European countries; increase a sentiment of shared local tourism-related values; strengthen tourism-generated development in cities, their surroundings and their regions; enhance the image of cities that are awarded this title and ultimately raise the profile of their regions.

It would also be important for cities holding the title to seek to promote social inclusion and equal opportunities and to do their utmost to ensure the broadest possible involvement of all the components of civil society in the preparation and implementation of tourism-related programmes, with special attention being paid to young people and marginalised and disadvantaged groups.

The award of the title should be based on a specially created tourism-related programme, which should have a strong European dimension. That tourism development programme should be part of a long-term strategy having a sustainable impact on local economic, cultural and social development.

Because of the strong regional dimension of tourism, it is crucial, alongside the title 'European Capital of Tourism', for it to be possible to give awards to cities and regions that have reached unique, innovation based results in the tourism sector.

Accordingly, a 'European Tourism Award' could be given by an independent board of experts in different categories (for example: sustainable tourism, digital tourism, health tourism) established by the European Parliament, the Commission and the Committee of Regions. In this process the network of tourism stakeholders which created the Tourism Manifesto for Growth and Jobs, with the support of civil society organisations, could be an excellent partner.

The general aim of the preparatory action is to:

- give local tourism its own profile, and strengthen links between cities and their regions;
- establish the 'European Capital of Tourism' within the existing institutional framework alongside the Cultural and Sport Capital programmes with their effective operating methods; identify common values, harness potential synergies and avoid duplication;
- increase the attractiveness of cities and regions, which can lead to economic growth and job creation.

The operational objectives are:

- to make a maximum of three 'European Capital of Tourism' awards a year;
- to lay down conditions and categories for the 'European Tourism Award';
- to involve Member States on a voluntary basis at the outset and initiate a structural dialogue with the Council;
- to establish the professional body, the preparatory committee to assess the bids, in co-operation with the European Parliament, the Commission and the Committee of Regions;
- as regions are the main beneficiaries of Union funding, to look into the possibility of financial contributions for the sustainability of the programme;
- to create an annual cost-effectiveness plan for the number of titles and awards.

ALECO is a pilot project for a one-way mobility scheme for young Union entrepreneurs with a maximum duration of one to six months in selected third countries. The aim is for ALECO to become an integral part of Erasmus for Young Entrepreneurs (EYE), mainly upgrading the programme in terms of geographical scope and exposure to successful entrepreneurial models. The pilot project will use the existing EYE infrastructure, including support office, intermediary organisations and IT tools.

Up to 200 young entrepreneurs from Member States are expected to participate. The target group will be selected from entrepreneur profiles upon application and assessment. Eligibility criteria: 1. Future entrepreneurs showcasing ready-to-implement business plans and a binding commitment to start up a firm; 2. Entrepreneurs who have started a business in the last three years, alone or in partnership; 3. Entrepreneurs who have taken advantage of EYE exchanges and showcase progress in their business.

Hosting countries may include the USA, Israel, Canada, Singapore, Japan, China and South Korea.

The pilot project is supported by Eurochambres, the European Youth Forum, Junior Achievement, Knowledge 4 Innovation and European Democrat Students.

The activities carried out under this preparatory action could be linked to the theme of 'Culture Europe - Promoting Europe's treasures', with individual countries, regions or macro-regions presenting their distinct heritage and cultural assets to a broad international audience.

The preparatory action builds on and continues the Destination Brand Europe pilot project, but it proposes an enlarged scope and an increased budget. The action will also include promoting less well-known but equally interesting locations and tourism sites, with the ultimate aim of diversifying the range of European destinations, creating new tourism products and supporting less developed regions.

VisitEurope.com, a portal developed with Union support, could be a suitable platform for promotional and marketing activities. Additionally, the '360° European Wonders' app presented by the Commission in 2017 could be integrated into the promotional and marketing strategy.

Ultimately, the action will raise awareness around responsible and sustainable development as regards cultural heritage and the protection of resources for future generations.

The main objectives and actions include:

- preserving Europe's lead position among world tourist destination by promoting European cultural heritage;
- developing and endorsing promotional and marketing channels (online and offline) that will enable destinations to maximise the reach of their tourism offer;
- diversifying the range of European destinations by promoting less visible secondary destinations (so-called 'hidden gems') as new tourism products;
- researching and identifying a number of well-developed and accessible alternative tourist destinations with high potential demand and appeal both internally and in overseas markets;
- engaging with various stakeholders across EU Member States to raise the visibility of cultural heritage sites;
- providing support to industry partners, especially SMEs in the hospitality and transport sectors, to develop tourism products that incorporate these alternative destinations into their travel packages.

Remarks

The World Bridge Tourism pilot project was initiated in the 2015 budget. The main aim of the project was to ensure that Europe should benefit from world bridge tourism by increasing the GDP of the tourism sector. At the same time, it will bring about significant economic growth, including the creation of sustainable employment opportunities.

The preparatory action focuses on China as the fastest-growing tourism source market in the world. As stated in the pilot project, Chinese tourists' propensity to travel abroad is expected to continue rising in the coming decades. Beyond Asia and the Pacific, Europe is the largest destination region for Chinese travellers. As Europe has a prominent place on the Chinese 'wish list', it is necessary to think about how Member States could host Chinese tourists more effectively. This will involve mutual understanding and continuous and sustainable training of employees throughout Europe in the tourism sector.

The preparatory action will increase flows of Chinese visitors by facilitating business between European tourism providers and Chinese buyers.

2018 is EU-China Tourism Year, during the preparatory period for which the World Bridge Tourism project will have a crucial role.

The main objectives and actions include:

- identifying best practices and analysing the results of the pilot project;
- continuing the awareness campaign among tour operators and agencies;
- active involvement in the EU-China Tourism Year 2018;
- enlarging the scope of the project by involving Chinese cultural institutes (e.g. the Confucius Institute) and other public outreach stakeholders;
- increasing involvement of social networks and focusing on digitisation, and providing incentives for bringing tourist products and services into line with the needs of Chinese tourists, including the use of marketing tools (websites and flyers in Chinese) and promoting them on Chinese social networks (e.g. Weibo).

Knowledge and skills are crucial not only for the personal welfare of each citizen, but also for sustainable development and economic growth. It is therefore important to offer a perspective to people coming from countries in economic and social crisis, especially young people, so that they have an opportunity to create added value not only for themselves, but also for the general public.

It is therefore important to empower young migrants and refugees to gain access to knowledge and to develop skills they are able to use and leverage when they are back in their home countries.

This will make it possible for them not only to establish a livelihood, but also potentially to become entrepreneurs, build up their own businesses and create employment.

The core of this initiative will be targeted mentoring programmes from different organisations, such as civil protection and community services, as well as companies (including local suppliers). Elements of a dual-training system would help beneficiaries to identify the specific needs of organisations or companies on the ground.

The legal situation regarding the waiting period for taking up an economic activity differs considerably from Member State to Member State. To make the preparatory action a success, it will therefore also be necessary to conduct a review of current national legal frameworks and to identify best practices which could be promoted in order to speed up procedures, so that young migrants can take advantage of the proposed programmes as soon as possible upon arrival.

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) (cont'd)**02 02 77** (cont'd)**02 02 77 34** (cont'd)*Remarks*

Increasing SMEs' internationalisation capacity is crucial for European competitiveness. 99 % of Union enterprises are SMEs; most of them face many difficulties when they try to establish an internationalisation strategy, especially vis-à-vis third markets where they face strong — and sometimes unfair — competition. In the last three years, only 29 % of micro enterprises, 43 % of small enterprises and 59 % of medium-sized enterprises have exported to another Member State. Many SMEs do not have the required skills to deal with multinational companies, attend international fairs or set up an e-commerce infrastructure.

This challenge could be overcome by encouraging SMEs to combine and work together on specific internationalisation projects. In the past few years, experiences have shown the potential that cooperation among SMEs offers for enhancing their internationalisation. The added value of cooperation has also been acknowledged by the Commission (e.g. in the SBA review). On the basis of national best practices, the Commission has introduced the concept of 'business network', defining it as 'a form of inter-firm cooperation that allows companies, located also in different regions or countries, to collaborate together on a basis of common development objectives expressed in a cooperation agreement/contract. The companies decide to join their strengths, share information and create synergies to become more innovative and competitive on the domestic and international markets, while keeping their autonomy, not creating a separate legal entity. This cooperation model is suitable for any kind of business activity and sector'.

Internationalisation represents a key component for European growth and competitiveness. Taking into account the fact that the difficulties SMEs have in going international, not only in third markets but also in the European internal market, are often due to their limited size, stimulating cooperation and encouraging SMEs to join forces in order to operate on the basis of a better structure while maintaining their entrepreneurial autonomy should be tested and developed. In its Communication 'Small Business, Big World — a new partnership to help SMEs seize global opportunities' (2011), the Commission pointed out the importance of promoting clusters and networks for SME internationalisation. The Enterprise Europe Network plays an essential role in supporting SMEs' internationalisation by matching needs and reducing costs.

In this context, a trial could be launched at Union level to test the impact of SMEs from different Member States joining forces and starting to work together on strengthening internationalisation capacity and enhancing presence on markets in third countries. In particular, the trial could: (1) test the added value for internationalisation of combining SMEs, (2) promote a culture of cooperation and networking activities among SMEs, (3) disseminate this cooperation/networking model as a best practice and as a tangible way for SMEs to enter new markets, by showing that by working together on common internationalisation plans they can greatly improve their international performance.

Networks should be composed of at least three SMEs from three different Member States. Applicants should submit a proposal for an internationalisation strategy, providing a detailed description of the purpose of the collaboration and of the strategic objectives. The trial should cover the costs of the start-up phase for SME network internationalisation activities, such as:

- identifying international markets that SME network members wish to enter to market their products;
- sharing knowledge and information about markets and clients;
- developing coordinated promotion, marketing and sales strategies (including joint digital marketing strategies/e-commerce infrastructure);

Other activities

With a budget of EUR 1 500 000, the pilot project will support 30 SME networks in developing a common internationalisation action plan. Each network will receive financial support of between EUR 30 000 and EUR 50 000. The minimum requirement is three SMEs per network. The action will cover at least 90 European SMEs.

Remarks

Industrial modernisation is critical to improving the Union's competitiveness and is therefore an absolute cornerstone of its policy. In this regard, the ability of industrial companies not only to develop but also to absorb and successfully implement new technologies is crucial. However, this remains a big challenge for many companies.

02 02 77 35 (cont'd)

Different stages can be identified in the process of developing and deploying new technologies. There is mounting evidence that market failure occurs at the demonstration stage (TRL 6-8) of the innovation process: between applied research, prototyping and market entry. Testing and validation of prototypes in an industrial environment and certifying new applications remain both very costly and highly uncertain. In many cases this prevents (or at least substantially delays) market uptake of very promising innovations from research and industry, including those previously financed by the Union. On the one hand, industrial companies very often do not have all the necessary equipment and skills to carry out further prototyping activities, validation tests, certification procedures, cost comparisons and other post-prototyping activities needed before full production and market launch. These activities are usually categorised as so-called 'non-recurrent costs' and contribute to what is commonly known as the 'Valley of Death'. On the other hand, very few regions have all the demonstration capabilities in place to help companies carry out the full spectrum of post-prototyping activities in a specific technology domain.

There is a strong need and rationale to establish an inter-regional innovation structure with pan-European shared demonstration facilities ('industry commons') accessible by industry and able to speed up technology deployment in and by industrial companies. Shared demonstration facilities can be established by connecting and upgrading the complementary facilities which already exist in the regions, or by creating new shared facilities if needed.

In the past, and in ongoing activities under Vanguard Initiative (VI) pilot projects (www.s3vanguardinitiative.eu), various regions have found that setting up 'shared demonstration facilities' usually involves a non-profitable component. This funding gap occurs when setting up shared facilities and meeting initial operating costs. Once this funding gap is closed, industrial demonstration activities can take place. If they are successful, companies can then upscale their production, generate revenues in the marketplace and hence generate growth and jobs. In order to speed up technology deployment and industrial modernisation, stronger public intervention is therefore needed to unlock innovation and growth potential. At the moment, there is no suitable cross-regional, pan-European instrument to support very much needed investments in innovation infrastructure.

In this context, this preparatory action will complement and further expand the ongoing activities under the VI and the Thematic Smart Specialisation Platform for Industrial Modernisation (TSSP IM). While the TSSP IM and its inter-regional partnerships, such as VI, are instrumental in detecting and initiating inter-regional collaboration for technology uptake, this action will support the development of investments, operations and services, and defray coordination costs for shared demonstration facilities serving a customer base of industrial organisations throughout Europe.

This preparatory action will be particularly important in generating input for the (re)designing of various Union policies, including innovation (FP9), investment (EFSI) and cohesion policy. The action will identify the scope and limitations of existing funds and financial instruments for ultimately stimulating the uptake of market-creating technologies and the promotion of follow-up investments by the private sector, including through close or closer cooperation with industry associations, thereby providing useful input for policy makers.

This preparatory action will focus on the specific VI pilot project for shared demonstration facilities for 'High Performance Production through 3D Printing' (3DP). The 3DP pilot project is among the most advanced, but it faces a huge investment challenge for several of its industrial applications. 3D printing has also been identified as a disruptive technology significantly impacting a broad range of industrial sectors.

Specifically, the preparatory action will focus on the following activities:

(1) setting up an operational platform of connected demonstration facilities between regions by, inter alia:

— connecting demonstration facilities to form a virtual support platform;

- monitoring the provision of know-how, equipment and services to industry, ensuring broad sectoral coverage;
- if needed, expanding the network of connected facilities to improve industrial and/or geographical coverage;
- setting up a network of accredited service providers throughout Europe (for support, training, certification, etc. within the networked demonstration facilities);

(2) attracting industrial demonstration projects via the platform by, *inter alia*:

- interacting with key stakeholders;
- promoting the platform and identifying opportunities;
- further developing 3DP demonstration cases and use cases, creating new value chains;
- identifying the specific coordination costs and investment support needs;
- communicating and working with a wider audience, including making use of the TSSP IM;
- working on synergies between the relevant pilot project and related initiatives;
- gaining specific knowledge on funding issues to address specific investment needs;

(3) providing an overview of specific proposals for changes to Union policies, in consultation with the Commission.

For proper implementation and evaluation, a timeframe of three years (2018-2020) is needed, including an annual update of the roadmap by a strategy board that will also include Members of the European Parliament.

Remarks

This preparatory action will create a business-enabling network for SMEs to seize circular economy business opportunities. It will advance a new type of environmentally friendly industry, where the worthless is turned into valuable by making full use of all materials, including side flows and waste.

The major chemical-using industries, businesses and associated supply chains in different parts of Europe (notably in Finland, France, Norway, Sweden and the United Kingdom) attempt to create new business out of side flows and wastes. Side flows can be recovered and used as raw materials in new industries. By refining raw materials in the Union, most added value is created in the single market, thus benefitting European economies. This will create jobs and benefit the environment.

The Cir©Lean target group is export-orientated industrial service SMEs which are willing and able and have an international outlook. Cir©Lean will build a systematic, long-term business-enabling network for Union-based SMEs by utilising cross-border, cross-sector and cross-industry knowledge and by developing innovative circular economy business models. The action will help SMEs find ways to increase the value of (currently unidentified) waste and residues by turning them into valuable products to be sold in both the domestic and international markets. The action will enhance industrial symbiosis by increasing the degree of processing of residual waste and landfill and generate new residual waste business.

New business models will be created in cross-border, cross-sector and cross-industry Open Innovation Business workshops where SMEs, primary industries, business developers, educators, researchers, authorities and financiers pool their skills. The Sustainability Assessment Tool developed in Finland will be applied in this work. The workshops will contribute to the development of new knowledge for all participants, creating new commercial products and services that span national borders.

Approximately 20 SMEs will participate in the Cir©Lean preparatory action. As a milestone for the action, 100 SMEs will participate in professional development activities, and, as part of the action, they will gain new contacts and establish cross-border cooperation. When the action is completed, exports will increase and the number of SMEs with new business models will grow. New long-term and sustainable contacts and partnerships with permanent cooperation structures will be established as a result.

Cir©Lean will set up a circular economy business-enabling network that will continue after the preparatory action ends.

CHAPTER 02 03 — INTERNAL MARKET FOR GOODS AND SERVICES (*cont'd*)**02 03 01** (*cont'd*)*Remarks*

This appropriation is intended to cover expenditure arising in connection with measures contributing to the completion of the internal market and its operation and development:

- measures intended to make the operation of the internal market more effective and to ensure that citizens and businesses have access to the most extensive rights and opportunities resulting from the opening up and deepening of the internal market without borders and are able to exercise those rights and take advantage of those opportunities in full; and monitoring and evaluation measures relating to the practical exercise by citizens and businesses of their rights and opportunities with a view to identifying and facilitating the removal of any obstacles which may be preventing them from exercising those rights in full;
- approximation of standards and maintenance and development of an information system for technical standards and regulations, examination of the rules notified by Member States, EFTA States and Turkey and translation of the draft technical regulations;
- financing of administrative and technical coordination and of cooperation between the notified bodies, grants in support of the European Technical Approval Organisation (EOTA), and of projects of Union interest undertaken by outside bodies;
- application of Union legislation on medical devices, cosmetics, foodstuffs, textile products, chemicals, classification and labelling of substances and mixtures, cars and safety, toys, legal metrology, pre-packaging and the quality of the environment, aerosol dispensers, and information and publicity measures for greater awareness of Union legislation;
- a comprehensive review of regulations with a view to making necessary changes and producing an overall analysis of the effectiveness of the measures taken to further the sound operation of the internal market and an evaluation of the overall impact of the internal market on businesses and the economy, including the purchase of data and access by Commission departments to external databases, as well as targeted actions aimed at improving understanding of the functioning of the internal market and rewarding active participation in fostering its functioning;
- greater sectorial approximation in the fields of application of the 'new approach' directives, especially the extension of the 'new approach' to other sectors;
- measures implementing Regulation (EC) No 765/2008, both for the infrastructures and market surveillance, and Regulation (EC) No 764/2008, for procedures relating to the application of certain national technical rules to products lawfully marketed in another Member State, and implementation of the corresponding part of the Single Market Strategy (Commission Communication of 28 October 2015 (COM(2015) 550 final));
- the development of a unified area for security and defence, with measures implementing Directive 2009/43/EC simplifying terms and conditions of transfers of defence-related products within the Union and actions working towards the coordination of public procurement procedures for these products at Union level, as well as, where appropriate, devising studies and awareness-raising measures regarding the application of the legislation adopted;
- participation in the negotiation of agreements on mutual recognition and, under European agreements, support for the associate countries to allow them to adopt the *acquis* of the Union;

COMMISSION

- implementation measures for Regulation (EC) No 1907/2006, especially those resulting from the 2017 REACH REFIT evaluation as well as the 2013 REACH review (Commission Report of 5 February 2013 (COM(2013) 49 final));
- implementation and monitoring of the provisions in the area of public procurement especially in relation to the transposition of the Directives 2014/23/EU, 2014/24/EU and 2014/25/EU;
- actions related to the implementation of Directive 2014/60/EU;
- implementing and monitoring the provisions governing public contracts with a view to ensuring their optimum operation and that tenders are genuinely open, including the awareness-raising and training of the various parties to these contracts; the introduction and use of new technologies in the various fields of operation of these contracts; the continuous adaptation of the legislative and regulatory framework in the light of developments arising from these contracts, particularly the globalisation of markets and existing or future international agreements;
- strengthening administrative cooperation through, inter alia, the Internal Market Information System (IMI), the deepening of knowledge of internal market legislation in the Member States and its sound application by them, and support for administrative cooperation between the authorities responsible for implementing legislation relating to the internal market with a view to achieving the Lisbon strategic goals as set out in the annual policy strategy;
- part of this appropriation will be used to achieve a similar level of implementation and enforcement of Union legislation by national bodies in order to fight distortions of competition and to contribute to a level playing field;
- reinforcing single market tools that make consumers and business more aware of internal market rules and enable them to enforce their rights, and that allow for better cooperation between the relevant national authorities;
- guaranteeing the completion and management of the internal market, especially in the fields of free movement of services, especially cross-border, recognition of professional qualifications, and intellectual and industrial property, in particular the development of proposals for establishing a Union patent;
- analysis of the effects of removing obstacles to the internal market for services and of the effects of measures in place as part of the follow-up to the progressive liberalisation of postal services, coordination of Union policies on postal services with regard to international systems and in particular with regard to participants in Universal Postal Union (UPU) activities, cooperation with central and eastern European countries, as well as analysis of practical implications of the application of the General Agreement on Trade in Services (GATS) provisions to the postal sector and overlap with UPU regulations;
- actions related to the implementation of EU Action Plan for the Circular Economy.

This appropriation is also intended to cover expenditure on consultations, studies, evaluations, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this article, as maintenance, updating and development of informatics systems related to technical regulations or linked to putting into place and monitoring policies launched within the framework of the internal market, and any other expenditure on technical and administrative assistance not involving public authority tasks.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

In accordance with the general aim of maintaining the proper functioning of the internal market and the competitiveness of European industry, in particular through the mutual recognition of standards and the establishment of European standards in suitable cases, this appropriation is intended to cover:

- financial obligations arising from contracts to be signed with the European standardisation organisations (such as ETSI, CEN and Cenelec), for the development of standards;
- checking and certifying conformity with the standards, and demonstration projects;
- contract expenditure for the execution of the programme and projects indicated above. The contracts in question cover the following: research, association, evaluation, technical operations, coordination, scholarships, grants, training and mobility of scientific staff, participation in international agreements and participation in expenditure on equipment;
- improving the performance of standards bodies;
- promoting quality in standardisation, and the verification thereof;
- supporting the transposition of European standards into national standards, particularly by having them translated;
- measures relating to information, promotion and profile-raising of standardisation and the promotion of European interests in international standardisation;
- secretarial services for the technical committees;
- technical projects in the field of tests for compliance with the standards;

- examination of the compliance of draft standards to the relevant mandates;
- programmes of cooperation with and assistance to third countries;
- carrying out the work needed to apply international information technology standards uniformly throughout the Union;
- specifying methods of certification and laying down technical methods of certification;
- encouraging use of these standards in public procurement contracts;
- coordinating the various operations to prepare the standards and doing more to implement them (user guides, demonstrations, etc.). While preparing the standards, possible gender-related specificities should be considered.

Union finance is to be used to frame and implement the standardisation operation in consultation with the main participants: industry, workers' representatives, consumers, when relevant including women's organisations, small and medium-sized enterprises, the national and European standardisation institutions, the public procurement agencies in the Member States, all users and industrial policymakers at national and Union levels.

In support of interoperability, specific provisions about the use of ICT technical specifications in public procurement are included in Regulation (EU) No 1025/2012.

CHAPTER 02 03 — INTERNAL MARKET FOR GOODS AND SERVICES (*cont'd*)**02 03 02** (*cont'd*)02 03 02 02 (*cont'd*)*Remarks*

This appropriation is intended to cover the costs of the functioning and activities of European non-governmental and non-profit organisations representing the interests of SMEs and consumers, as well as environmental and social interests, in standardisation activities.

Such representation in the standardisation process at European level forms part of the statutory objectives of such organisations, and they have been mandated by national non-profit organisations in at least two thirds of the Member States to represent those interests.

Contributions to such European organisations have previously been covered by the Competitiveness and Innovation Programme, the consumer policy and the Financial Instrument for the environment, LIFE+. In Regulation (EU) No 1025/2012 the actions in the field of standardisation financed by specific programmes have been brought together in a single legal act.

CHAPTER 02 03 — INTERNAL MARKET FOR GOODS AND SERVICES (*cont'd*)02 03 03 (*cont'd*)*Remarks*

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2), and operational expenditure in connection with the work programme (Title 3).

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 20 of the Commission Delegated Regulation (EU) No 1271/2013 constitute assigned revenue in accordance with point (c) of Article 21(3) of the Financial Regulation to be charged to Item 6 6 0 0 of the general statement of revenue.

In 2018, the Agency's revenue from fees and charges and the surplus carried over from previous year will not be sufficient to cover for the expected expenditure, which implies the need of a balancing subsidy from the Commission. The Union contribution for 2018 amounts to a total of EUR 25 722 021.

CHAPTER 02 03 — INTERNAL MARKET FOR GOODS AND SERVICES (*cont'd*)**02 03 77** (*cont'd*)02 03 77 05 (*cont'd*)*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The scope of the pilot project is to collect, publish and communicate through experts the best practices available in the area of cross-border parcel delivery services, based on successful implementation by all market participants, with the aim of helping all Member States to reach a common level of delivery efficiency and tackle disparities, while at the same time potential areas for further actions could also be identified where the customer satisfaction level should be further addressed.

The project could encompass four steps: (1) a comprehensive assessment of the needs of users of e-commerce-related (cross-border) parcel delivery services; (2) an assessment of the extent to which existing delivery industry practices meet these needs; (3) identification of good industry practice in this field; (4) a gap analysis identifying areas where additional innovation and service improvements are needed to satisfy existing and emerging consumer needs.

Legal basis

Pilot project within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

As stated by Vice-President Andrus Ansip, in charge of the Digital Single Market Strategy, regarding parcel delivery the Commission will:

- (1) take action to improve regulatory oversight while supporting innovation and ensuring a level playing field for operators;
- (2) address the issue of price transparency, including prices for small shipments. This action should mainly support consumers and small businesses. A comprehensive assessment of the situation will be carried out after two years to see if further action is needed.

Remarks

Having regard to paragraph 40 of the European Parliament recommendation of 4 April 2017 to the Council and the Commission following the inquiry into emission measurements in the automotive sector (P8_TA(2017) 100), this pilot project will fund measures relating to in-service conformity checks by third-party testing in relation to the transposition of the Regulation (EC) No 715/2007.

In the past, qualified third parties provided authorities at Union and national level with reliable information on the emission behaviour of vehicles. That information was rarely made available by the responsible authorities. Funding should be made available to allow them to provide reliable data from on-road emissions testing of passenger cars which is independent of the data provided by manufacturers and the regulatory authorities in order to promote transparency and improve market surveillance. To guarantee their independence, third parties must not be providing, or have provided in the past, vehicle emissions testing or similar (studies, measurements, etc.) services for industry stakeholders.

The third parties will validate the test procedures by referring to the provisions laid down in Regulation (EC) No 715/2007, Commission Regulation (EC) No 692/2008 and the first three RDE packages (Commission Regulations (EU) 2016/427, (EU) 2016/646 and (EU) 2017/1151) and the guidelines outlined in the Commission notice of 26 January 2017. They will publish the results of their measurements in order to support the development of best practice procedures and the provision of broader information to the responsible authorities and the public. The third parties will not only measure exhaust gases and particle emissions from passenger cars.

Independent third parties will thus contribute to better oversight on how exhaust standards are performing in practice and to what extent the Union's objectives in terms of air quality and climate policy are being achieved. They will contribute to a broader understanding of exhaust reduction strategies with regard to acceleration, high speed, ambient temperature and other criteria. Their specific test procedure will be documented transparently and should take into account current rules on RDE and the latest research.

Remarks

The pilot project consists of a series of market investigations into several categories of consumer products in different Member States.

It will compare the qualitative characteristics of products that are sold in the single market under the same brand and in the same packaging and with the use of other marketing texts.

The pilot project will reveal how the quality of products under the same brands differs between Member States. The research will also include a comparative analysis of the labelling and consumer information for those products.

It will focus on food and non-food products. In the first phase only food products will be examined.

If the pilot project is continued, non-food products will also be examined.

With regard to food, each of the Eurostat-defined product groups examined will contain an adequate number of representative products. For non-food products, different product groups will also be represented. This may include detergents, cosmetics, toiletries and baby-products.

Products chosen will be those that consumers could reasonably believe to be the same, especially with regard to package labelling, brand name and the use of other marketing texts.

The investigation will be undertaken in at least half of the Member States, covering a representative cross-section in terms of population, Harmonised Index of Consumer Prices and geographical area. The scope of the investigation, including the selection of Member States and categories of products, will be decided by a task force on dual quality of products composed of representatives of Member States' competent authorities, consumer organisations, industry, the Commission and members of the European Parliament's Committee on Internal Market and Consumer Protection.

The following assessment will be carried for all products tested:

- physical-chemical testing;
- sensory testing;
- conformity with label declaration;

At the end of the pilot project, the Commission will publish a report informing the European Parliament and consumers in all Member States of the outcome of the investigation. It will be translated into the languages of the Member States where the investigation has been carried out and distributed to stakeholders. In order to raise consumer awareness, the report will also be publicised in the relevant Member States with the active involvement of European Parliament Information Offices, Commission Representations and Members of the European Parliament.

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for the Horizon 2020 — the Framework Programme for Research and Innovation which covers the 2014 to 2020 period, and for the completion of the previous research programmes (Seventh Framework Programme and preceding framework programmes) and the Competitiveness and Innovation Framework Programme (CIP).

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area. Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

CHAPTER 02 04 — HORIZON 2020 — RESEARCH RELATING TO ENTERPRISES (*cont'd*)

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, *inter alia*, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research entered in Item 6 0 1 6 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 02 04 50 01.

Administrative appropriations of this chapter will be provided under Article 02 01 05.

02 04 02 **Industrial leadership***Remarks*

This priority of Horizon 2020 aims at making Europe a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of European companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

Remarks

The aim of this appropriation is to help remedy market deficiencies in accessing risk finance for research and innovation. In particular, the equity facility will target investments in risk capital funds which make early stage investments. It shall enable equity investments in, amongst others, seed capital funds, cross-border seed funds, business angel co-investment vehicles and early-stage venture capital funds. The equity facility, which will be demand-driven, shall use a portfolio approach, where venture capital funds and other comparable intermediaries select the firms in which to invest. Special attention should be paid to encouraging female entrepreneurs to participate in such schemes.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with point (i) of Article 21(3) of the Financial Regulation.

The aim of this appropriation is to:

- provide financing to the Enterprise Europe Network established under the COSME programme for their reinforced services linked to Horizon 2020. The support provided under the budget line is limited to services enhancing the innovation management capacity of SMEs, in particular of beneficiaries of the SME instrument;
- support the implementation and complementing the SME specific measures across Horizon 2020, notably to enhance effectiveness and efficiency of the innovation services provided to SMEs. Activities may include awareness raising, information and dissemination, training and mobility activities, networking and exchange of best practices, developing high quality innovation support mechanisms and services with strong Union added value for SMEs (e.g. intellectual property and innovation management, knowledge transfer), as well as assisting SMEs to connect to research and innovation partners across the Union;
- introduce measures encouraging female entrepreneurs to participate in the digital and innovative economy and the ICT and STEM sectors and support female entrepreneur networks;
- support market-driven innovation in view of enhancing the innovation capacity of firms by improving the framework conditions for innovation as well as tackling the specific barriers preventing the growth of innovative firms.

02 04 03 ***Societal challenges****Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test-beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Former Item 02 04 03 01 (in part)

The aim of this appropriation will be to support secure supply of raw materials in order to meet the needs of Union society within the sustainable limits of the planet's natural resources. Activities will target the improvement of the knowledge base on raw materials and the development of innovative solutions for the cost-effective and environmentally friendly exploration, extraction, processing, recycling and recovery of raw materials and for their substitution by economically attractive alternatives.

Support will also be provided for tackling barriers impeding the deployment of circular-economy such as recovery of raw materials from different waste streams.

Remarks

Europe faces today an increasingly deteriorating security situation with the emergence of new or existing threats; the financial crisis has put constant pressure on national defence budgets and since 2006, the budget spent on defence R&D in Europe decreased by 30 %. In this context, Member States and public opinion look to the Union for greater involvement in security and defence.

The main objective of the preparatory action is to prepare and test mechanisms for conducting Union-funded defence research, including a mechanism of cooperation with the European Defence Agency, with a view to prepare, organise and deliver a variety of defence research, technology and development activities. The final aim of these activities is to improve the competitiveness and innovation in the European defence industry and to stimulate growth and job creation. It needs to produce visible and timely results for the decision making in view of the discussion on a possible defence research programme within the next Multiannual Financial Framework.

The research & technology programme of the preparatory action will be implemented by annual work programmes, mainly through calls for proposals for research projects and procurement. Tasks related to the implementation of the work programmes shall be delegated to the European Defence Agency. The preparatory action will cover all needed expenses to prepare and test mechanisms for conducting Union-funded defence research, including expenditure related to information and publications, dissemination, technical and administrative assistance, consultancy, studies and expert groups.

In 2018, this appropriation would cover funding for additional technology modules of a large scale demonstration project funded under the 2017 appropriation, which should yield timely the most tangible result: a first experimental development of new, innovative defence technology. This demonstration project should be complemented with a number of research projects, inter alia, on critical defence technologies as well as future disruptive technologies, and support activities to improve, for example, on standardisation and interoperability. The precise scope of the topics will include inter alia consultation with the Member States and the defence-related R&D stakeholders, and assistance from experts.

Any revenue from contributions from third countries entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this item in accordance with the Financial Regulation.

Remarks

Former Item 02 03 77 06

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project on space technologies will primarily test partnership arrangements with industry to identify priorities for competitiveness. This will prepare the ground for a public-private partnership (Joint Technology Initiative or similar) in space technologies and an associated roadmap through a structured dialogue with industry.

The pilot project will focus on two themes which are not addressed by current programmes: innovative materials for space equipment and cleaner space through deorbiting.

The specific area of materials for space equipment is critical for a European space sector currently suffering from dependency in some critical materials areas. In order to support a reduction in dependency as regards materials supply and a sustainable REACH-compliant competitive space sector, two major topics could be addressed by developing innovative materials for space equipment: composite supply source for critical space equipment and non-dependency with regard to materials and processes. The market for carbon-based raw materials suffers from under-capacity, and the space sector, because it is a low-volume customer, suffers the most. Supply sources for composite raw materials are still highly concentrated in the US and Japan. The drive for non-dependency with regard to materials and processes should aim at promoting European sources for critical materials and processes affected by dependency issues or Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) and establishing a European Chemicals Agency (OJ L 396, 30.12.2006, p. 1).

Innovative materials for space equipment would also provide a deorbiting solution by allowing the development of appropriate technology to ensure that satellites are removed at the end of their mission life.

The Earth's orbit needs to be in good condition in order to enable manned and unmanned operations in space in the future. The Union should start to take the steps necessary for limiting the growth of orbiting debris.

The three main areas for technological development could be:

- (1) end-of-life deorbiting solutions (propulsion);
- (2) trajectory and controlled re-entry (design and modelling);
- (3) design for demise (controlled break-up on re-entry). Establishing a long-term deorbiting scheme through a pilot project could also make a significant environmental contribution.

Remarks

The aim of this appropriation is to:

- enable operations of Copernicus services, tailored to the needs of users;
- contribute to ensure access to data of the observation infrastructure necessary to operate Copernicus services;
- create opportunities for increased private sector usage of information sources, thereby facilitating innovation by value-adding service providers.

This appropriation will, in particular, fund the set-up, the establishment and operation of the six services mentioned in Regulation (EU) No 377/2014 and the related activities.

This appropriation may also fund cross-cutting activities among the services or their articulation and co-ordination, as well as for the in-situ co-ordination, user uptake and training and communication.

The budget envelope will be managed either directly by the Commission services or indirectly via delegation agreements with Union agencies and international organisations, or any entity eligible under Article 58 of the Financial Regulation.

When the Commission manages the budget directly, it may entrust the Joint Research Centre (JRC) with scientific and technical support tasks. The funding of these tasks may be entered into the JRC's indirect budget under point (c) of Article 183(2) and Article 183(6) of the Financial Regulation.

CHAPTER 02 06 — EUROPEAN EARTH OBSERVATION PROGRAMME (*cont'd*)**02 06 01** (*cont'd*)

In addition, in support of competitiveness and growth, this appropriation may also fund data dissemination and the incubation of new businesses by supporting more robust and innovative IT structures in Europe.

Copernicus services will facilitate access to key data required in policy formulation at Union, national, regional and local level in fields such as agriculture, forest monitoring, water management, transport, urban planning, climate change and many others. This appropriation covers mainly the implementation of delegation agreements for the Copernicus programme, pursuant to Article 58 of the Financial Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, those amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget. Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

Remarks

The aim of this appropriation is to:

- build an autonomous Union's Earth observation capacity by funding the space infrastructure and favouring the European industry in that regard, namely in the construction and launch of satellites;
- contribute to the availability of the observation capacity necessary to enable the Copernicus services, in particular through the operations of the ground segment of the space infrastructure;

- create opportunities for increased private sector usage of information sources, thereby facilitating innovation by value-adding service providers.

The development of a European space infrastructure has a key role in enhancing competitiveness and innovation, and requires consistent public intervention to sustain the industrial effort.

This appropriation will fund the development and construction of satellites, as well as their operation. The data and information obtained through the space infrastructure is subject to the free, full and open data policy, which will increase their availability and thereby boost the downstream market.

To supplement the data needed by users, this appropriation may also fund the acquisition of data from third parties and the access to contributing mission from Member States, as well as the dedicated dissemination platform (core ground segment) which will serve, in priority the operational services funded by Article 02 06 01.

The budget envelope will be managed either directly by the Commission services or indirectly via delegation agreements with Union agencies and international organisations, or any entity eligible under Article 58 of the Financial Regulation.

When the Commission manages the budget directly, it may entrust the Joint Research Centre (JRC) with scientific and technical support tasks. The funding of these tasks may be entered into the JRC's indirect budget under point (c) of Article 183(2) and Article 183(6) of the Financial Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. Remarks

In order to ensure that the rules on competition concerning agreements, decisions by associations of undertakings and concerted practices (Article 101 of the Treaty on the Functioning of the European Union), abuses of a dominant position (Article 102 of the Treaty on the Functioning of the European Union), aids granted by States (Articles 107 and 108 of the Treaty on the Functioning of the European Union) and concentrations between undertakings (Regulation (EC) No 139/2004) are enforced, the Commission is empowered to take decisions, to conduct investigations and to impose penalties or order recovery.

The Commission’s decisions are subject to review by the Court of Justice of the European Union in accordance with the Treaty on the Functioning of the European Union.

As a prudential measure, it is appropriate to take into account the possibility of budgetary implications stemming from rulings of the Court of Justice of the European Union.

This appropriation is intended to cover any expenditure arising from damages awarded by the Court of Justice of the European Union to claimants and resulting from legal proceedings against the Commission’s decisions in the field of competition.

Since a reasonable estimate of the financial impact on the general budget cannot be established beforehand, a token entry (‘p.m.’) appears in this article. If necessary, the Commission will propose to make available the appropriations related to actual needs by means of transfers or through a draft amending budget.

This appropriation is intended to cover expenditure on studies, committees, meetings of experts, including meetings and other expenditure relating to the work of the European Platform to enhance cooperation on tackling undeclared work, conferences, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the ‘European Economic Area’ Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Remarks

This appropriation is intended to cover:

- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,
- expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the Instrument for Pre-Accession Assistance.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under point (b) of Article 21(2) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers administrative expenditure under Chapter 04 05.

Remarks

Article 175 of the Treaty on the Functioning of the European Union provides that the objectives of economic, social and territorial cohesion set out in Article 174 shall be supported by the action the Union takes through the Structural Funds, which includes the ESF. The tasks, priority objectives and the organisation of the Structural Funds are defined in accordance with Article 177 of the Treaty on the Functioning of the European Union.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Article 39 of Regulation (EC) No 1260/1999, Articles 100 and 102 of Regulation (EC) No 1083/2006 and Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the ESF.

Any revenue from the financial corrections carried out on that basis is entered in Article 6 5 1, 6 5 2, 6 5 3 or 6 5 4 of the statement of revenue and constitutes assigned revenue in accordance with point (c) of Article 21(3) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 82 of Regulation (EC) No 1083/2006 provides for specific rules on repayment of pre-financing amounts applicable to the ESF.

COMMISSION

Remarks

This appropriation is intended to cover the funding by the ESF of commitments remaining to be settled from the 2000-2006 programming period for innovative actions and technical assistance as provided for in Articles 22 and 23 of Regulation (EC) No 1260/1999. The innovative actions included studies, pilot projects and exchanges of experience. They were intended in particular to bring about a qualitative improvement in Structural Fund measures. Technical assistance covered preparatory, monitoring, evaluation, supervision and management measures required for implementation of the ESF. This appropriation was, in particular, used to cover:

- support expenditure (representation expenses, training, meetings and missions),
- information and publishing expenditure,
- expenditure on information technology and telecommunications,
- contracts for the provision of services and studies,
- grants.

Remarks

This appropriation is intended to cover commitments remaining to be settled for programmes under the ESF convergence objective in the 2007-2013 programming period. That objective is aimed at speeding up the convergence of the least developed Member States and regions by improving conditions for growth and employment.

This appropriation aims to reduce the economic, social and territorial disparities which have arisen, particularly in countries and regions whose development is lagging behind, in connection with the speeding-up of economic and social restructuring and population ageing.

In accordance with Article 105a(1) of Regulation (EC) No 1083/2006, as modified by point 7 of Annex III to the Treaty concerning the Accession of the Republic of Croatia to the European Union (OJ L 112, 24.4.2012), programmes and major projects which, on the date of accession of Croatia, have been approved under Regulation (EC) No 1085/2006 and the implementation of which has not been completed by that date, shall be considered to have been approved by the Commission under Regulation (EC) No 1083/2006, with the exception of the programmes approved under the components referred to in points (a) and (e) of Article 3(1) of Regulation (EC) No 1085/2006.

Technical assistance covers preparatory, monitoring, evaluation, supervision and management measures required for implementation of the ESF. This appropriation may, in particular, be used to cover:

- support expenditure (representation expenses, training, meetings and missions),
- information and publishing expenditure,
- expenditure on information technology and telecommunications,
- expenditure on support for accessibility for people with disabilities within technical assistance measures,
- expenditure on a high-level group to ensure the implementation of overarching principles such as equality between men and women, accessibility for people with disabilities and sustainable development,
- contracts for the provision of services and studies,
- grants.

This appropriation is also intended to support measures approved by the Commission in the context of the preparation of the 2014-2020 programming period.

Remarks

This appropriation is intended to cover ESF support under the Investment for growth and jobs goal in less developed regions in the 2014-2020 programming period. The catching-up process for these economically and socially lagging regions requires long-term sustained efforts. This category of regions concerns those regions whose GDP per capita is less than 75 % of the average GDP of the EU-27.

Promotion of equality between women and men horizontally and through specific actions should be part of the support provided by the ESF, in order to improve the employability of women and their participation in the labour market. Special attention should be paid to non-discrimination in the labour market, combating the feminisation of poverty, access to education and affordable childcare services.

Remarks

This appropriation is intended to cover ESF support under the Investment for growth and jobs goal in the 2014-2020 programming period in a new category of region ('transition regions') that replaces the 2007-2013 phasing-out and phasing-in system. This category of regions includes all regions with a GDP per capita between 75 and 90 % of the average GDP of the EU-27.

Remarks

This appropriation is intended to cover ESF support under the Investment for growth and jobs goal in more developed regions in the 2014-2020 programming period. While interventions in the less developed regions will remain the priority for cohesion policy, this appropriation is thus intended to cover important challenges that concern all Member States such as global competition in the knowledge-based economy, the shift towards the low carbon economy and social polarisation exacerbated by the current economic climate. This category of regions concerns those regions whose GDP per capita is above 90 % of the average GDP of the EU-27.

Gender mainstreaming and gender equality specific actions should be part of the support provided by the ESF, in order to improve the employability of women and their participation in the labour market. In particular, it may be used to cover the cost of activities with partner organisations and stakeholders in Member States (such as training, meetings or conferences).

This appropriation is also intended to cover administrative learning and cooperation with non-governmental organisations and social partners.

This appropriation is also intended to cover inter alia the elaboration of:

- tools for electronic project application and reporting, unification and standardisation of documents and procedures for the management and implementation of operational programmes,
- a peer review of each of the Member States' financial management and quality performance,
- standard tender documentation on public procurement,
- a common system of result and impact indicators,
- a best practices manual to optimise the absorption process and decrease the error rate.

Remarks

This appropriation is intended to provide additional support to measures against youth unemployment financed by the ESF. It represents the specific allocation to the Youth Employment Initiative under the Investment for growth and jobs goal in regions with a level of youth unemployment exceeding 25 % in 2012 or for Member States where the youth unemployment rate has increased by more than 30 % in 2012, regions that have a youth unemployment rate of more than 20 % in 2012 ('eligible regions'). The additional EUR 3 000 000 000 allocated to this line for the 2014-2020 period is intended to provide match funding to ESF interventions in the eligible regions. This appropriation is intended to finance the creation of decent jobs.

While promoting gender equality, special attention should be paid to the situation of young women who can face gender-specific obstacles to get a good quality offer of employment, continued education, an apprenticeship or a traineeship.

This appropriation is to be used, amongst others, to support the establishment of educational structures combining non-formal education, language courses, democratic awareness and vocational training in the regions most affected by youth unemployment, both by state-actors and non-governmental organisations.

The margins available below the multiannual financial framework (MFF) ceilings for commitment appropriations for 2014-2017 will constitute a global MFF margin for commitments, to be made available over and above the ceilings established in the MFF for 2016-2020 for policy objectives related to growth and employment, in particular youth employment, as established in Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the years 2014-2020 (OJ L 347, 20.12.2013, p. 884).

Remarks

The objective of this activity is to promote geographic and professional mobility (including the coordination of social security schemes) of workers in Europe in order to overcome the obstacles to free movement of workers and to contribute to the establishment of a real labour market at European level.

This appropriation is intended to cover actions supporting the monitoring of Union law through financing of a network of experts on free movement of workers and social security reporting regularly on the implementation of Union legal acts in the Member States and at Union level, and analysing and evaluating the major trends in legislation of the Member States with regard to the free movement of workers and coordination of social security systems. This appropriation is also intended to cover actions supporting governance of Union legal acts through meetings of the committees, actions for awareness raising and implementation and other specific technical support and the development of the Electronic Exchange of Social Security Information (EESSI) system and its implementation.

This appropriation is intended to cover in particular:

- expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts,
- the analysis and evaluation of the major trends in legislation of the Member States with regard to the free movement of workers, and coordination of social security systems, as well as the financing of networks of experts in those fields,
- the analysis and research on new policy developments in the domain of free movement of workers linked for example to the end of transitional periods and modernisation of social security coordination provisions,
- ensuring fair mobility by setting up additional information centres,

- support for the work of the Administrative Commission and its sub-groups and follow-up of the decisions taken, as well as support for the work of the Technical and Advisory Committees on free movement of workers,
- support for actions preparing for the application of the new regulations on social security, including transnational exchanges of experience and information and training initiatives developed at national level,
- the financing of actions aimed at providing a better service and raising public awareness, including measures aimed at identifying migrant workers' social security and employment problems, and measures speeding up and simplifying administrative procedures, gender-sensitive analysis of the barriers to free movement of workers and lack of coordination of social security systems and their impact on people with disabilities, including adaptation of administrative procedures to new information-processing techniques, in order to improve the system for acquiring rights and the calculation and payment of benefits pursuant to Regulations (EEC) No 1408/71, (EEC) No 574/72, Regulation (EC) No 859/2003 as well as Regulation (EC) No 883/2004, its implementing Regulation (EC) No 987/2009, and Regulation (EU) No 1231/2010,
- the development of information and actions to make members of the public aware of their rights on the free movement of workers and the coordination of social security schemes,
- the support of the electronic exchange of social security information among Member States, with a view to facilitating the implementation of Regulation (EC) No 883/2004 and its implementing Regulation (EC) No 987/2009. This includes the maintenance of the central node of the EESSI system, testing system components, helpdesk activities, support for further development of the system and training.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION (*cont'd*)04 03 01 (*cont'd*)04 03 01 04 (*cont'd*)*Remarks*

The objective of this activity is to promote better policy responses in the Member States to demographic and social challenges by producing and disseminating comparative information in the context of the implementation of the Europe 2020 strategy and the identification of future priorities for social policies, including gender-specific measures.

This appropriation is intended to cover actions promoting the development of comparative analysis and the exchange of views and experience at all relevant levels (regional, national, Union, international) regarding the social and demographic situation and the socio-economic trends in the Union, as well as the gender pay gap and discrimination against women in the workplace. This appropriation is also intended to cover actions supporting an Observatory of the Social Situation, the cooperation with relevant activities in the Member States and with international organisations and the management of a technical support group for the European Alliance for Families.

This appropriation is intended to cover in particular expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

This appropriation is intended to cover in particular expenditure on Commission reports (including an annual report on the social situation and a report on demographic change and its implications every 2 years, in accordance with Article 159 of the Treaty on the Functioning of the European Union (TFEU), as well as Commission reports on problems concerning the social situation (which can be requested by the European Parliament pursuant to Article 161 TFEU).

This appropriation is also intended to cover expenditure on analysis for the reporting referred to in TFEU, as well as for the dissemination of knowledge on major social and demographic challenges and ways of tackling them. In particular, the following activities can be pursued with due consideration of the gender aspect:

- analysis of the impact of population ageing in the context of a society for all ages, in terms of trends in care and social protection needs, behaviour and flanking policies, including research on elderly minorities or migrants and the situation of informal carers,
- analysis of the impact of demographic change on Union and Member State policies, measures and programmes, and formulation of recommendations for adjustments to economic and other policies, measures and programmes at Union and national levels in order to prevent the ageing of society from having a negative impact,
- analysis of the links between family units and demographic trends,
- analysis of trends in poverty, income and wealth distribution and their broader societal impact,

- identification of the existing relations between technological development (impact on communication technologies, geographical and occupational mobility) and the consequences for households and society in general,
- analysis of the links between disability and demographic trends, analysis of the social situation of people with disabilities and their families and the needs of children with disabilities within their families and communities,
- analysis of trends in social objectives (in terms of safeguarding acquired rights or extending them) regarding both goods and services, taking account of new social challenges as well as demographic trends and changing the relationships between generations,
- development of appropriate methodological tools (sets of social indicators, simulation techniques, data collection on policy initiatives at all levels, etc.), so as to underpin the reports on the social situation, on social protection and social inclusion with a solid quantitative and scientific foundation,
- raising awareness and organising debates on the major demographic and social challenges with the aim of promoting better policy responses,
- the taking into account of demographic trends, family life and childhood in the implementation of relevant Union policies, such as the free movement of persons and equality between men and women.

Remarks

This appropriation is intended to cover expenditure on information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from Union action in the framework of the implementation of the Union social dimension. Those measures should help workers' organisations to address the overarching challenges facing European employment and social policy as laid down in the Europe 2020 strategy and within the context of Union initiatives to address the consequences of the economic crisis. Special attention will be given to training on gender challenges at work.

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION (*cont'd*)04 03 01 (*cont'd*)04 03 01 05 (*cont'd*)

This appropriation is intended to cover in particular the following activities:

- support for the work programmes of the two specific trade union institutes, European Trade Union Institute and European Centre for Workers' Questions, which have been established to facilitate capacity-building through training and research at European level, as well as to improve the degree of involvement of workers' representatives in European governance,
- information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from the implementation of Union action in the framework of the implementation of the Union social dimension,
- measures involving representatives of the social partners in the candidate countries with the specific purpose of promoting social dialogue at Union level. It is also intended to promote equal participation of women and men in the decision-making bodies of workers' organisations.

Strong and competent social partners are needed in order to improve the process of relaunching and enhancing the functioning of social dialogue, in order to support recovery and enhance competitiveness and fairness in the social market economy.

- measures to set the conditions for social dialogue in companies and proper employee involvement in undertakings as provided under Directive 2009/38/EC on European Works Councils, Directives 2001/86/EC and 2003/72/EC on employees' involvement in the European company and in the European cooperative society, respectively, Directive 2002/14/EC establishing a general framework for informing and consulting employees in the European Community, Directive 98/59/EC on collective redundancies and Article 16 of Directive 2005/56/EC on cross-border mergers of limited liability companies,
- initiatives to strengthen transnational cooperation between workers' and employers' representatives in respect of information, consultation and participation of employees within companies operating in more than one Member State and short training actions for negotiators and representatives in transnational information, consultation and participation bodies may be funded in that context. This may involve social partners from candidate countries,
- measures to enable social partners to exercise their rights and duties as regards employee involvement, especially within the framework of European Works Councils, to familiarise them with transnational company agreements and strengthen their cooperation in respect to Union law on employee involvement,
- operations fostering the development of employee involvement in undertakings as well as assessing the findings of the 'Fitness check' and its impact on Union acts in the area of information and consultation of workers,
- innovative actions relating to employee involvement, with the view of supporting the anticipation of change and the prevention and resolution of disputes in the context of corporate restructuring, mergers, take-overs and relocation in Union-scale undertakings and Union-scale groups of undertakings,
- measures to strengthen cooperation between the social partners for the development of employee involvement in the design of solutions addressing the consequences of the economic crisis, such as mass redundancies, or the need for a shift towards an inclusive, sustainable and low-carbon economy,
- transnational exchange of information and good practice in matters relevant for social dialogue at company level.

Remarks

The general objective of the European Union programme for Employment and Social Innovation (EaSI) is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

To achieve the general objectives of EaSI in terms of promoting a high level of employment, guaranteeing adequate social protection, combating social exclusion and poverty, improving working conditions and protecting workers' safety and health, the specific objectives of the Progress axis are to:

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION (*cont'd*)**04 03 02** (*cont'd*)04 03 02 01 (*cont'd*)

- develop and disseminate high-quality comparative analytical knowledge in order to ensure that Union employment and social policy and working conditions and occupational health and safety legislation are based on sound evidence and are relevant to needs, challenges and conditions in the individual Member States and the other participating countries,
- facilitate effective and inclusive information-sharing, mutual learning and dialogue on Union employment and social policy and working conditions and occupational health and safety legislation at Union, national and international level in order to assist the Member States and the other participating countries in developing their policies and in implementing Union law,
- provide policymakers with financial support to promote social and labour market policy reforms, build up the main actors' capacity to design and implement social experimentation, and make the relevant knowledge and expertise accessible,
- provide Union and national organisations with financial support to develop, promote and support the implementation of Union employment and social policy and working conditions and occupational health and safety legislation,
- raising awareness, exchanging good practice, disseminating information and promoting the debate on the key challenges and policy issues in relation to working conditions, gender equality, occupational health and safety and the reconciliation of work and family life and the ageing society, including among social partners,
- to encourage job creation, promote youth employment and fight poverty by promoting increased social convergence by means of the Social Mark.

In addition support could be provided to actions related to the implementation of the common provisions of EaSI such as monitoring, evaluation, dissemination of results and communication. Article 16 of Regulation (EU) No 1296/2013 describes the types of actions which may be financed.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

The general objective of the EaSI is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

The EaSI is structured around three complementarity axes: Progress, EURES and Microfinance and Social Entrepreneurship.

To achieve the general objectives of EaSI, in particular to promote workers' geographical mobility and boost employment opportunities by developing Union labour markets that are open and accessible to all, the specific objectives of the EURES axis are to:

- ensure that job vacancies and applications, and any related information as well as working conditions and rights are transparent for the potential applicants and the employers; this shall be achieved through their exchange and dissemination at transnational, interregional and cross-border level using standard interoperability forms,
- help ensure that European-level job vacancies and mobility options are advertised in parallel to national job vacancies and applications and not only after local or national options are exhausted,
- develop services for the recruitment and placing of workers in employment through the clearance of job vacancies and applications at European level; this shall cover all phases of placement, ranging from pre-recruitment preparation to post-placement assistance, including language skill development options, with a view to the applicant's successful integration into the labour market; such services shall include targeted mobility schemes to fill job vacancies where labour market shortcomings have been identified and/or help particular groups of workers such as young people,

- provide assistance for national and cross-border support activities organised by EURES partners,
- initial and further training of EURES advisers in the Member States,
- contacts between EURES advisers and cooperation between government employment services, including those of candidate countries,
- promotion of EURES among firms and the general public,
- development of special structures for cooperation and services in border regions pursuant to point (b) of Article 17(1) of Regulation (EEC) No 1612/68,
- measures to help remove mobility obstacles, particularly in the field of work-related social security.

This programme should also facilitate the matching and placement of apprentices and trainees as a critical element in helping the transition of young people from school to work, as already begun under the preparatory action 'Your first EURES job' and complemented by the Youth Employment Initiative. Companies, particularly small and medium-sized enterprises (SMEs), will be encouraged to recruit more young people, including by financial support.

Target groups:

- young people up to 30 years of age, regardless of their qualifications and work experience, as the scheme is not exclusively tailored for labour market entrants,
- all legally established businesses, particularly SMEs, to assist with reducing the costs of international hiring that affect mostly smaller companies.

Eligible jobs under this part of the programme will offer young people apprenticeships, a first work experience or specialised jobs. The scheme will not support situations of job substitution or precarious employment, or in any circumstances be contrary to national labour law.

To be eligible for funding, jobs have also to comply with the following criteria:

- be located in a EURES member country other than the country of origin of the young job-seeker (transnational vacancies),
- ensure a work placement for a minimum contractual period of 6 months.

The general objective of the EaSI is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

The EaSI is structured around three complementarity axes: Progress, EURES and Microfinance and Social Entrepreneurship.

To achieve the general objectives of EaSI in particular to promote employment and social inclusion by increasing the availability and accessibility of microfinance for vulnerable groups and micro-enterprises, and by increasing access to finance for social enterprises, the specific objectives of the Microfinance and Social Entrepreneurship axis are to:

- increase access to, and the availability of, microfinance for persons who have lost or are at risk of losing their jobs, or who have difficulty in entering or re-entering the labour market, persons at risk of social exclusion and vulnerable persons, including women wishing to start entrepreneurial careers, who are in a disadvantaged position with regard to access to the conventional credit market and who wish to start up or develop their own micro-enterprises; and for micro-enterprises, especially those which employ these persons as referred to,
- build up the institutional capacity of microcredit providers,
- support the development of social enterprises.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenues may give rise to the provision of additional appropriations in accordance with point (i) of Article 21(3) of the Financial Regulation.

Remarks

This appropriation is intended to cover the European Foundation for the Improvement of Living and Working Conditions (Eurofound) staff and administrative expenditure (Titles 1 and 2), and operational expenditure for the work programme (Title 3).

Eurofound must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The Union contribution for 2018 amounts to a total of EUR 20 371 000. An amount of EUR 488 coming from the recovery of surplus is added to the amount of EUR 20 370 512 entered in the budget.

Part of this appropriation is intended for studies on working conditions and industrial relations in support of policies ensuring more and better jobs, making work more sustainable and strengthening social dialogue in Europe.

A further part of this appropriation is intended for studies and forward looking research on labour markets, and specifically the monitoring and anticipation of structural change, its impact on employment and management of the consequences.

The appropriation will also cover research and gathering of knowledge on living conditions and quality of life, with a particular focus on social policies and the role of public services in improving quality of life. Research into reconciliation of professional and private life and precarious employment, including breaking down by gender, should be also covered by the appropriation.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Despite public perceptions, labour mobility is low in the Union. High unemployment and low labour mobility within and between countries coexist with skill and labour shortages in some countries and regions. Well-performing labour markets are important for facilitating adjustment to shocks, allocating resources to best effect and dealing with potential ageing-related labour market shortages. Mobility within the Union can, in principle, help to remedy labour market shortages and imbalances. The over-35 age group also faces higher mobility barriers, and it is therefore important to put financial and/or other support specifically designed for this group to the test.

Reactivate is a mobility programme for adult traineeships and work trials lasting between 6 and 12 months in other Member States. It is targeted at unemployed citizens in the 35+ age group, including the long-term unemployed (LTU). This age group generally represents a population segment with strong skills based on work experience, whence the need for this programme.

In the light of the number of LTUs, Reactivate will test support tailor-made for them. In order to encourage employers to make job offers to unemployed persons from other Member States, Reactivate will test ways of engaging with employers and forms of financial and/or other support for employers.

Reactivate is intended as an extension of the successful EURES First Job programme, offering similar advantages for unemployed persons, in particular LTUs, over the age of 35. This project can build on EURES First Job as a sound mobility platform.

Reactivate will give unemployed persons, including LTUs, in this age group an unprecedented opportunity to acquire diversified knowledge and skills, to learn new languages, and to better understand the European internal market. All these advantages greatly militate in favour of a stronger European identity and diversity while increasing labour mobility and the employment rate.

Remarks

This appropriation is intended to cover implementation of the preparatory action.

Inequalities are considered to be a cause of macroeconomic destabilisation and to reduce growth. Therefore European and national action to correct inequalities affecting children can be seen as a long-term policy for macroeconomic stabilisation and growth. Opening up opportunities can spur stronger economic performance and improve living standards.

Fighting poverty and social exclusion is one of the Europe 2020 targets: to reduce by at least 20 million the number of people in or at risk of poverty and social exclusion. However, between 2008 and 2014, the number of people at risk of poverty or social exclusion in the EU-27 increased from 116 million to 121 million; almost every fourth person in the EU-27 is at risk of poverty or social exclusion. Amongst this group, child poverty is alarming. In 2014, more than 26 million children in the Union were at risk of poverty and more than nine million suffered from severe material deprivation. If no measures are taken to correct this situation, they will be at greater risk of failing in the education system (Europe 2020 target for education) and will have the most difficulties in entering the labour market (Europe 2020 target for employment). The child guarantee is an integrated approach to tackling child poverty, aiming at fully implementing the Commission's 'Investing in Children' recommendation, to ensure that every child in Europe at risk of poverty (including refugees) has access to free health care, free education, free childcare, decent housing and adequate nutrition. Covering these five areas of action through European and national action plans would ensure that the living conditions and opportunities of millions of children in Europe improve considerably and with a long-term perspective. The child guarantee is a key horizontal policy and should be regarded as an investment in the stability and prosperity of the Union, which is necessary for preserving the Union's growth potential.

To make the child guarantee a successful instrument in the fight against child poverty, Union financial support should be put in place to ensure a coordinated effort together with Member States towards common goals with binding indicators. The preparatory action will lay down the implementing framework for the child guarantee:

- (1) selecting comparative measurable criteria to assign funds in accordance with the Commission's 'Investing in Children' recommendation;
- (2) assessing existing national and Union interventions tackling multi-dimensional aspects of child poverty and mapping best practices;
- (3) delineating the typology of programmes to be funded;
- (4) establishing funding arrangements; and
- (5) establishing governance mechanisms, including monitoring and evaluation.

In the personal and household services sector (PHS), a sector with high potential for job creation, experience with implementing service voucher schemes, such as in France or Belgium, has been positive. Most workers in the PHS sector are women; however, 60% of them are migrants and many are cross-border workers, and consequently there are important loopholes and limited or fragmented access to information about the rights and obligations of workers in this sector. In Member States such as France and Belgium, a dedicated tax framework has been developed to regularise activities in the sector and address the issue of undeclared work. In order to increase the number of Member States applying a policy on PHS and to support decent work in this sector, the pilot project will have two main objectives: (1) to help Member States develop service voucher schemes (or in an initial phase trial them in certain municipalities; and (2) to introduce an effective social dialogue in this sector.

This pilot project will provide advice, technical assistance and a range of tailored guidance activities and recommendations to Member States interested in developing the PHS sector, and will support the exchange of good practices among key stakeholders, national public administrations (municipalities/local administrations in the case of a trial introduction) and organisations of domestic workers, carers and employers.

Regarding the social dialogue and decent working conditions, the project will facilitate the professionalisation of these jobs, the dissemination of information on the rights and obligations of workers and employers and the creation and development of an effective social dialogue.

This pilot project will need to be supported by the principal European stakeholders in the PHS sector.

Remarks

This appropriation is intended to cover the EGF so as to enable the Union to demonstrate solidarity towards, and to support workers made redundant and self-employed persons whose activity has ceased as a result of major structural changes in world patterns due to globalisation, as a result of the continuation of the global financial and economic crisis addressed in Regulation (EC) No 546/2009 of the European Parliament and of the Council of 18 June 2009 amending Regulation (EC) No 1927/2006 on establishing the European Globalisation Adjustment Fund (OJ L 167, 29.6.2009, p. 26), or as a result of a new global financial and economic crisis and to provide financial support for their rapid reintegration into sustainable employment.

The actions undertaken by the EGF should be complementary to those of the ESF and there must be no double funding from these instruments. EGF-supported actions or measures should aim to ensure that the largest possible number of beneficiaries participating in these actions find sustainable employment as soon as possible before the final report is due.

The rules for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 13 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1).

Remarks

This appropriation is intended to cover the EGF so as to enable the Union to provide time-limited and targeted support for workers made redundant as a result of major structural changes in world trade patterns due to globalisation where these redundancies have a significant adverse impact on the regional or local economy. It is applicable to all applications submitted up to 31 December 2013. For applications submitted between 1 May 2009 and 31 December 2011, it may also be used to provide support to workers made redundant as a direct result of the global financial and economic crisis.

The actions undertaken by the EGF should be complementary to those of the ESF. There must be no double funding from these instruments.

The rules for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 13 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1).

Remarks

Article 174 of the Treaty on the Functioning of the European Union sets out the Union's objective of economic, social and territorial cohesion while Article 175 specifies the role of the Structural Funds in achieving this objective and makes provisions for the adoption of specific actions outside the Structural Funds.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Articles 56 and 57 of Regulation (EU) No 223/2014 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to FEAD.

Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with point (c) of Article 21(3) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 44 of Regulation (EU) No 223/2014 provides for specific rules on repayment of pre-financing applicable to the FEAD.

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Article 19 of Regulation (EU, Euratom) No 1311/2013 lays down the conditions for the revision of the multiannual financial framework in order to transfer to subsequent years, in excess of the corresponding expenditure ceilings, allocations not used in 2014, in the event of the adoption after 1 January 2014 of new rules or programmes.

Legal basis

Remarks

The FEAD replaces the European Union's Food Distribution Programme for the Most Deprived Persons of the Community, which was discontinued at the end of 2013.

To ensure continuity between the two programmes, expenditure shall be eligible for a support from a FEAD operational programme if it is incurred by a beneficiary and paid between 1 December 2013 and 31 December 2023.

The FEAD shall promote social cohesion, enhance social inclusion and therefore ultimately contribute to the objective of eradicating poverty in the Union by contributing to achieving the poverty reduction target of at least 20 million of the number of persons at risk of poverty and social exclusion in accordance with the Europe 2020 strategy, whilst complementing the Structural Funds. Since the proportion of women at risk of poverty or social exclusion is higher than is the case for men, FEAD will take a gender-sensitive approach by adapting measures to the groups actually at risk, including women and the elderly. It shall contribute to achieving the specific objective of alleviating and eradicating the worst forms of poverty, by providing non-financial assistance to the most deprived persons by food and/or basic material assistance, and social inclusion activities aiming at the social integration of the most deprived persons.

CHAPTER 04 06 — FUND FOR EUROPEAN AID TO THE MOST DEPRIVED (FEAD) (cont'd)**04 06 01** (cont'd)

This objective and the results of the implementation of the FEAD shall be qualitatively and quantitatively assessed.

The FEAD shall complement and shall not replace or reduce sustainable national poverty eradication and social inclusion policies, which remain the responsibility of Member States.

The resources for the FEAD available for budgetary commitment for the 2014-2020 period shall be EUR 3 395 684 880 in 2011 prices.

Poverty is a multidimensional problem and tackling it should become a primary goal. Greater emphasis needs to be placed on poverty in all strategies, as poverty is a complex problem with many causes. Most importantly, it also has a great impact not only on the present but also on the future. People who experience poverty, especially children, are at greater risk of not succeeding in later life and of being excluded from society.

Legal basis

Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006 (OJ L 347, 20.12.2013, p. 320).

CHAPTER 05 02 — IMPROVING THE COMPETITIVENESS OF THE AGRICULTURAL SECTOR THROUGH INTERVENTIONS IN AGRICULTURAL MARKETS (*cont'd*)*Remarks*

Any revenue entered in Article 6 7 0 of the general statement of revenue may give rise to the provision of additional appropriations on any line in this chapter in accordance with Articles 21 and 174 of the Financial Regulation.

In the framework of establishing the budgetary appropriations for this chapter, an amount of EUR 400 000 000 originating from Item 6 7 0 1 of the general statement of revenue was taken into account for Article 05 02 08, and in particular for Item 05 02 08 03.

The following legal basis applies to all articles and items of this chapter unless otherwise stated.

Legal basis

Council Regulation (EC) No 1234/2007 of 22 October 2007 establishing a common organisation of agricultural markets and on specific provisions for certain agricultural products (Single CMO Regulation) (OJ L 299, 16.11.2007, p. 1).

Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy and repealing Council Regulations (EEC) No 352/78, (EC) No 165/94, (EC) No 2799/98, (EC) No 814/2000, (EC) No 1290/2005 and (EC) No 485/2008 (OJ L 347, 20.12.2013, p. 549).

Regulation (EU) No 1308/2013 of the European Parliament and of the Council of 17 December 2013 establishing a common organisation of the markets in agricultural products and repealing Council Regulations (EEC) No 922/72, (EEC) No 234/79, (EC) No 1037/2001 and (EC) No 1234/2007 (OJ L 347, 20.12.2013, p. 671).

Council Regulation (EU) No 1370/2013 of 16 December 2013 determining measures on fixing certain aids and refunds related to the common organisation of the markets in agricultural products (OJ L 346, 20.12.2013, p. 12).

Remarks

This appropriation is intended to cover expenditure for measures needed to cope with major crises affecting agricultural production or distribution.

The reserve is to be established by applying at the beginning of each year a reduction to direct payments (Chapter 05 03) with the financial discipline mechanisms in accordance with Articles 25 and 26 of Regulation (EU) No 1306/2013 as well as Article 8 of Regulation (EU) No 1307/2013. When the Commission considers the reserve needs to be called on, in accordance with the relevant legislative act, it shall present to the European Parliament and the Council a proposal for a transfer from the reserve to the corresponding budget lines financing the measure deemed necessary. Any Commission proposal for a transfer to draw on the reserve must be preceded by an examination of the scope for reallocating appropriations. By the end of the financial year, any amount of the reserve not made available for crisis measures shall be reimbursed to the final recipients of direct payments according to the provisions of Article 26 (5) of Regulation (EU) No 1306/2013. Any reimbursement will be done under Article 05 03 09 from appropriations carried over from the previous financial year.

Transfers calling on the reserve and transfer back from the reserve to direct payments shall be made in accordance with the Financial Regulation.

Remarks

This appropriation is intended to cover outstanding payments against commitments under the EAGGF Guidance Section for programming periods prior to 2000 related to the former objectives 1, 6, 5a, 5b and the Community initiatives.

This appropriation is also intended to cover the settlement of commitments entered into, in the course of earlier programming periods, in respect of innovative, preparatory, monitoring or evaluation measures, and any similar technical assistance measures provided for in the regulations concerned.

It also funds amounts outstanding from former multiannual measures, in particular those approved and implemented under the other regulations, mentioned below, which are not covered by the priority objectives of the Funds.

This appropriation will where applicable also be used to cover amounts payable in respect of the EAGGF Guidance Section for measures for which the corresponding commitment appropriations are neither available nor provided for in the programming for 2000 to 2006.

Article 39 of Regulation (EC) No 1260/1999 provides for financial corrections for which any revenue is entered in Item 6500 of the statement of revenue. Under the Instrument for Pre-accession Assistance (IPA II), this appropriation will address the following specific objectives in the Western Balkans:

- support for political reforms,
- strengthening of the ability of the beneficiaries listed in Annex I to Regulation (EU) No 231/2014 at all levels to fulfil the obligations stemming from Union membership in the area of political reforms by supporting progressive alignment with and adoption, implementation and enforcement of the Union *acquis*.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons, to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under point (b) of Article 21(2) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

Remarks

This action will complement the earlier smart villages pilot project (Smart Eco Social Villages, 2016) and act on considerations stemming from that pilot project as well as other lessons learned and knowledge obtained from actions and initiatives under the EU Action for Smart Villages. This preparatory action will provide the necessary tools and budget to set up plans and help create smart villages under real-life conditions.

This preparatory action will implement successful practices and ICT/online methods, such as setting up digital hubs involving up to 10 villages and other good examples operating throughout the Union. This idea is closely bound up with the Digital Single Market, digital platforms, urban-rural links, the sharing and collaborative economy and the bioeconomy (innovation, precision farming, environmental management, renewable energies, supply chains, services, local food), and improving quality of life, education and employment, taking account of the importance of women and young people.

This action will enhance the ability to exchange and share agricultural machinery, including precision farming tools, in order to maximize output from scarce resources. These goals are fully in line with the Cork Declaration 2.0, which recognises the importance of giving farms access to appropriate technologies in order to deliver economic, social and environmental benefits.

The action will focus on developing growth and jobs in rural areas through the following specific measures:

- selecting villages in the Union with common features: infrastructure, various resources, services, access to markets, and
- offering solutions concerning:
 - the Digital Single Market,
 - urban-rural links,
 - the bioeconomy and circular economy (innovation, precision farming, environmental management, local renewable energies, supply chains, services, local food),
 - the sharing and collaborative economy (new rural mobility solutions, such as car sharing, ride sharing; new paradigms in tourism; sharing and exchange of agricultural machinery and services, etc.),

- technology (the Internet of Things, big data collection, drones, electric vehicles, next generation mobile broadband connections, etc.),
- social aspects (home care and outpatient care instead of hospitalisation),
- new full-time and part-time jobs created in the above-mentioned economies.

The action will be documented on film and in other media in order to show how it progresses. It will identify the regulatory and legislative obstacles at local, Member State and Union level to the establishment of new business models and access to various Union funding sources. One important outcome will be to propose regulatory changes enabling these new business models to be adopted and at the same time protecting the rights of all stakeholders.

Legal basis

Preparatory action within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

This appropriation is intended to finance the participation of the Union at the universal Expo ‘Feeding the Planet: Energy for Life’, which was held in Milan in 2015.

It is intended to cover the baseline costs for the Union participation within the Italian Pavilion (rental of space, stand erection and decoration, running costs) as well as for the preparatory and initial stages of a basic scientific programme for the EXPO 2015 involving the compilation of baseline data for policy support purposes. The cost for organising events and exhibitions (e.g. reimbursement of expert costs, exhibition materials, etc.) will be covered by appropriations of the relevant specific programmes according to the policy area concerned.

Legal basis

Task resulting from the Commission’s prerogatives at institutional level, as provided for in point (d) of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for the Horizon 2020 — the framework programme for research and innovation which covers the 2014 to 2020 period.

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the ERA, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

TITLE 05 — AGRICULTURE AND RURAL DEVELOPMENT

CHAPTER 05 09 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO AGRICULTURE (*cont'd*)

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the ERA, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the framework programme for research and innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in European cooperation in the field of scientific and technical research entered in Item 6 0 1 6 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

CHAPTER 05 09 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO AGRICULTURE (*cont'd*)

Additional appropriations will be provided under Item 05 09 50 01.

Administrative appropriations of this chapter will be provided under Article 05 01 05.

05 09 03 Societal challenges*Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

*Remarks**Former Item 05 09 03 01 (in part)*

This activity focuses on developing more sustainable and productive agriculture and forestry systems, while at the same time developing services, concepts and policies for thriving rural livelihoods. In addition, emphasis is placed on healthy and safe foods for all as well as competitive food processing methods that use fewer resources and produce fewer by-products. In parallel, efforts are made on sustainably exploiting aquatic living resources (e.g. sustainable and environmentally friendly fisheries). Low carbon, resource-efficient, sustainable and competitive European bio-based industries are also promoted.

This appropriation will be used for agriculture-related research and innovation in order to secure sufficient supplies of safe and high-quality food and other bio-based products; research projects with direct participation by primary producers will be prioritised in order to maximise the practical applicability of results.

CHAPTER 06 01 — ADMINISTRATIVE EXPENDITURE OF THE 'MOBILITY AND TRANSPORT' POLICY AREA (*cont'd*)06 01 06 (*cont'd*)06 01 06 01 (*cont'd*)

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The establishment plan of the Executive Agency is set out in Annex 'Staff' to this section.

Legal basis

Remarks

The objective of 'Removing bottlenecks and bridging missing links' refers to point (a) of Article 4(2) of Regulation (EU) No 1316/2013. This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting financing decisions within the meaning of Article 84 of the Financial Regulation, of the core network transport projects and Union transport corridors, which are defined in the annexes to CEF and TEN-T guidelines. The implementation of this objective is expected to be measured through new and improved cross-border connections and removed bottlenecks, which have benefitted from CEF.

Part of this appropriation will be used to support the Trans-European EuroVelo Cycling Network.

Re-establishing regional cross-border rail connections that are abandoned or dismantled (missing links if eligible for CEF funding), will get particular support.

Legal basis

Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and in particular point (a) of Article 4(2) thereof.

Remarks

The objective of 'Ensuring sustainable and efficient transport in the long run' refers to point (b) of Article 4(2) of Regulation (EU) No 1316/2013. This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting the financing decisions within the meaning of Article 84 of the Financial Regulation.

In the 2014-2020 period, a follow-up of the Marco Polo programme will be implemented by the Connecting Europe Facility within the framework of the revised TEN-T guidelines. In accordance with Article 32 of Regulation (EU) No 1315/2013 of the European Parliament and of the Council of 11 December 2013 on Union guidelines for the development of the trans-European transport network and repealing Decision No 661/2010/EU (OJ L 348, 20.12.2013, p. 1), it will introduce a new approach in support of freight transport services in the Union. It is important to optimise the use of transport infrastructure by shifting cargo to more sustainable modes, including inland waterways, and increase the efficiency of multimodal services.

Legal basis

Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and in particular point (b) of Article 4(2) thereof.

Remarks

The objective of 'Optimising the integration and interconnection of transport modes and enhancing the interoperability, safety and security of transport' refers to point (c) of Article 4(2) of Regulation (EU) No 1316/2013.

This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting financing decisions within the meaning of Article 84 of the Financial Regulation.

The achievement of this objective will be measured by the number of inland and maritime ports and airports connected to the railway network, by the number of improved multimodal logistics platforms, by the number of improved connections through motorways of the sea and by the number of supply points in alternative sources of energy on the core network.

The implementation of the Single European Sky policy and the deployment of Single European Sky Air Traffic Management Research (SESAR) project are pursued under this objective.

Legal basis

Remarks

This appropriation is intended to cover the support from the Cohesion Fund under the 'Investment for growth and jobs' goal for transport infrastructure under CEF in accordance with Article 84(4) of Regulation (EU) No 1303/2013.

In accordance with point (a) of Article 5(1) of Regulation (EU) No 1316/2013, an amount of EUR 11 305 500 000 in current prices should be transferred from the Cohesion Fund to be spent in line with that Regulation exclusively in Member States eligible for funding from the Cohesion Fund.

In accordance with Article 11, this objective will be implemented through calls for proposals under the annual and multiannual work programmes, which are opened exclusively for the Member States eligible for financing under the Cohesion Fund. These annual and multiannual work programmes constitute financing decisions in the meaning of Article 84 of the Financial Regulation.

In accordance with point (7) of Article 2 and Article 5(2), up to 1 % of the financial envelope will cover expenses pertaining to programme support actions.

Legal basis

Remarks

This objective of 'Creating an environment more conducive to private investment for transport infrastructure projects' aims to implement the projects of common interest through financial instruments, based on an *ex ante* assessment as required by Article 224 of Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1). In accordance with Article 21(4) of Regulation (EU) No 1316/2013, from 10 % to 20 % of the financial envelope for CEF transport will be available for innovative financing instruments such as the Project Bonds Instrument, the Loan Guarantee Instrument and other instruments such as joint ventures and the equity instruments to combine public and private financial resources to accelerate infrastructure investments in Europe. The financial instruments are intended to facilitate access to private financing and thus to accelerate or to make possible financing of the TEN-T projects eligible under the TEN-T guidelines and Regulation (EU) No 1316/2013. The financial instruments are intended to be established as 'debt' or 'equity' frameworks and they should address specific market failures and provide appropriate financing solutions. They are intended to be implemented as direct management by the entrusted entities, within the meaning of the Financial Regulation or jointly with the entrusted entities. The entrusted entities must be accredited to provide guarantees to the Commission on the protection of the Union financial interests in line with the requirements of the Financial Regulation.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with point (i) of Article 21(3) of the Financial Regulation.

Legal basis

Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and in particular Article 14 thereof.

Regulation (EU) 2015/1017 of the European Parliament and of the Council of 25 June 2015 on the European Fund for Strategic Investments, the European Investment Advisory Hub and the European Investment Project Portal and amending Regulations (EU) No 1291/2013 and (EU) No 1316/2013 — the European Fund for Strategic Investments (OJ L 169, 1.7.2015, p. 1).

Remarks

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2) and operational expenditure relating to the work programme (Title 3).

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The establishment plan of the Agency is set out in Annex 'Staff' to this section.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget of the Union.

The amounts repaid in accordance with Article 20 of Commission Delegated Regulation (EU) No 1271/2013 of 30 September 2013 on the framework financial regulation for the bodies referred to in Article 208 of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council (OJ L 328, 7.12.2013, p. 42) constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

The Union contribution for 2018 amounts to a total of EUR 36 915 000.

Legal basis

Regulation (EC) No 216/2008 of the European Parliament and of the Council of 20 February 2008 on common rules in the field of civil aviation and establishing a European Aviation Safety Agency (OJ L 79, 19.3.2008, p. 1).

Regulation (EC) No 1108/2009 of the European Parliament and of the Council of 21 October 2009 amending Regulation (EC) No 216/2008 in the field of aerodromes, air traffic management and air navigation services and repealing Directive 2006/23/EC (OJ L 309, 24.11.2009, p. 51).

Remarks

This appropriation is intended to cover expenditure on studies and meetings of experts directly linked to the achievement of the objective of the programme or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

It is intended to cover expenditure on information and communication, conferences and events promoting activities in the transport sector as well as social media activities, audio-visual products, development of website and other IT tools, consultancy activities, electronic and paper publications directly linked to the achievement of the objective of transport policy, including its social dimension, as well as safety and protection of transport users.

This appropriation is also intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the Union's common transport policy, for all transport modes (road, rail, air, sea and inland waterways) and for all transport sectors (transport safety, internal market of transport with its implementation rules, optimisation of transport network, multimodality, logistics, passengers' rights and protection in all transport modes, the use of alternative fuels in all transport modes, clean vehicles procurement and urban mobility, social and gender aspects including employment data, as well as for all other sectors related to transport). The main endorsed actions and objectives are intended to support the Union's common transport policy, including extension to third countries, technical assistance for all transport modes and sectors, specific training, definition of rules of transport safety, simplification of administrative procedures, the use of ICT technologies, the contribution to the standardisation process, and promotion of the common transport policy including establishment and implementation of trans-European network orientation endorsed by the Treaty on the Functioning of the European Union as well as strengthening passengers' rights and protection in all transport modes and to improve the application and enforcement of existing Regulations on passenger rights, in particular through awareness-raising activities about the content of those Regulations, targeted at both the transport industry as well as the travelling public.

Maritime transport and logistics

This appropriation is intended to cover the development and implementation of the Union's maritime transport strategy, in line with the objectives defined in the White Paper on the future of transport.

COMMISSION

TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 05 (*cont'd*)

This includes analyses of economic and technological developments, support of international negotiations, developing and interpreting cabotage rules, following complaints and infringements procedures, development and implementation of actions to promote and support competitive and efficient short sea shipping, revision of Directive 2010/65/EU of the European Parliament and of the Council of 20 October 2010 on reporting formalities for ships arriving in and/or departing from ports of the Member States and repealing Directive 2002/6/EC (OJ L 283, 29.10.2010, p. 1) and administrative simplification and make use of ICT systems in the waterborne and logistic sector, as well as support of the sustainable development of the shipping sector.

This appropriation is intended to cover the development and implementation of a Union strategy for freight transport logistics, including the digital transport and logistics agenda, providing a framework and actions for interoperable multimodal transport information and management systems and related standardisation issues, administrative (European) single window(s) for multimodal transport, a single transport document and a multimodal liability regime.

This appropriation is also intended to cover the development of a reference framework on carbon footprint measurement, certification and reduction, modal shift policy including the outstanding actions under the former Marco Polo programme, Motorways of the Sea, multimodal and combined transport, digitalisation of the transport and logistics sector and supporting standardisation and harmonisation of equipment.

Maritime safety

This appropriation is intended to cover monitoring, evaluation and revision (impact assessment) of Union legislation on maritime safety, protecting the maritime environment and promoting qualifications and working conditions for seafarers.

Passenger rights

This appropriation is intended to cover expenditure on monitoring, evaluation, revision and raising awareness actions of Union legislation on passenger rights.

In connection with Regulation (EC) No 261/2004, the Commission needs to develop additional measures to make enforcement of that Regulation more efficient. The implementation of Regulation (EC) No 1107/2006 and Council Regulation (EC) No 2027/97 of 9 October 1997 on air carrier liability in the event of accidents (OJ L 285, 17.10.1997, p. 1) needs also to be ensured.

The implementation of Regulation (EC) No 1371/2007 requires specific implementation action to ensure its correct application and enforcement in the Member States due to the complex interaction of regional, national and international (COTIF) administrative structures involved in the implementation.

The implementation of Regulation (EU) No 1177/2010 requires specific implementation actions to ensure its correct application and enforcement in the Member States and the compliance by Member States with their legal reporting obligations towards the Commission.

The implementation of Regulation (EU) No 181/2011 requires specific implementation actions in order to ensure its correct application and enforcement in the Member States and the compliance by Member States with their legal reporting obligations towards the Commission.

As an important implementation support measure the Commission conducts targeted actions covering some or all Member States to raise public awareness on passenger rights. Nearly one third of Union citizens are aware of their rights and obligations when buying a ticket to travel (31 %), although 59 % are said to be unaware of them (Eurobarometer on passenger rights 2014).

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)**06 02 05** (*cont'd*)

These actions and objectives could be supported at different levels (local, regional, national, European and international), for all transport modes and sectors and related to transport, as well as in technical, technological, regulatory, informative, environmental, climatic and political fields and for sustainable development.

Air transport has long been one of the sectors in which the consumer authorities receive most complaints in the Union. The increase in the number of commercial transactions performed electronically (using the internet or a mobile telephone) has merely resulted in more breaches of Union consumer legislation.

One of the main complaints by Union consumers is that there are no effective means of redress at airports themselves, particularly when disputes arise as a result of failure on the part of airlines and other service providers to meet their obligations. Union consumers and air transport authorities therefore need to work together to secure an immediate improvement in passenger support and information facilities at airports and, at the same time, step up co-regulation in the sector.

Road safety

The Commission communication of 20 July 2010 entitled 'Towards a European road safety area: policy orientations on road safety 2011-2020' (COM(2010) 389 final) presents seven objectives: road user education, enforcement of traffic rules, safe infrastructure, safe vehicles, use of modern technology, post-injury emergency responses and a special focus on vulnerable road users. Work continues on the Commission's proposal, on the regular update of the Union law on driving licences, and on the revision of the rules on qualification and training for professional drivers, on the follow-up to the Directives 2014/45/EU, 2014/46/EU and 2014/47/EU, as well as towards a strategy on serious road traffic injuries. The Commission's road safety work also includes the management of the European Road Safety Charter, the management of rules relating to the transport of dangerous goods, the maintenance of a European database on road accidents — Community Road Accident Database (CARE), the follow-up on the infrastructure management and tunnel safety directives and on various aspects of vulnerable road user safety. The implementation of the policy orientations 2011-2020 would also require specific implementation action for the exchange of good practices, road safety campaigns, calls for proposals and development of the road safety observatory; as well as the evaluations of options for making the road safety in the Union work more effectively and efficiently in the future.

This appropriation is also intended to cover expenditure on communication activities and on public events such as the annual European Road Safety Day and similar awareness-raising and citizen interaction initiatives.

It is also intended to establish efficient cross-border cooperation between Member States concerning the enforcement of road safety related traffic offences.

Land transport

The main activities in the land transport area concern the implementation and review of existing policies, enhancing sectoral cooperation and the planning of new initiatives. Among others, this includes activities in areas such as infrastructure charging, market access, social rules (including their enforcement), technical rules, safety rules and international aspects (land transport relations with third countries and international organisations dealing with land transport issues). All these activities require close cooperation with stakeholders.

Rail market

The full implementation of the Directive 2012/34/EU and Regulation (EU) No 913/2010 are key priorities to encourage competitiveness of railways. The legislation aims to open rail markets, improve the interoperability and safety of rail services and thus encourage the development of integrated rail system leading to a Single European Rail Area. In addition, the Commission services are reinforcing international transport cooperation on railway policy.

COMMISSION

TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 05 (*cont'd*)

Encouraging sectoral cooperation is essential for effective implementation of Union rail legislation. Directive 2012/34/EU provides for the creation of the European Network of Rail Regulatory Bodies (ENRRB) and of the European Network of Infrastructure Managers (Platform of Rail Infrastructure Managers in Europe, PRIME). Informal cooperation frameworks have been established for railway undertakings (RUs) to share experience at Union level (RU Dialogue) and Ministries (Rail Directors Meetings). Equally, cooperation with third countries (the Gulf countries, China, Iran, Japan, Brazil, etc.) is important part of promoting Union's rail industry worldwide.

In this context, this appropriation is intended to cover the initiatives and the work of cooperation platforms that contribute to timely implementation of Single European Rail Area and addressing its future developments and international cooperation.

Ports and inland navigation

This appropriation is intended to cover development, monitoring, evaluation and revision (impact assessment) of Union legislation and policy on ports and inland navigation.

Single European Sky

The full implementation of the Single European Sky (four basic Regulations (EC) No 549/2004, (EC) No 550/2004, (EC) No 551/2004 and (EC) No 552/2004, and more than 20 implementing rules) is a key priority to improve the performance of the air navigation services in terms of safety, cost efficiency of the air navigation service provision, reduction of air traffic flow delays and environmental performance, and hence of air transport in Europe.

Implementing the Single European Sky and Single European Sky Air Traffic Management Research (SESAR) project, its technological pillar with the assistance of the SESAR Joint Undertaking, the SESAR Deployment Manager and the European Aviation Safety Agency (EASA) are also priorities in the Union's Aviation Strategy adopted in 2015.

The implementation of the performance scheme of the Single European Sky with the assistance of the Performance Review Body (PRB) is pursued under this article, with the assistance of EASA and Eurocontrol.

In this context, promoting the Single European Sky and the initiatives that contribute to its timely implementation, including through the involvement and consultation of stakeholders (Industry Consultation Body, National Supervisory Authorities Coordinating Platform and European Group on the Human Dimension), as well as addressing its future development are also important activities for the Commission and are pursued under this article.

Aviation safety, environment and cooperation with the International Civil Aviation Organisation (ICAO)

The use of several legislative tools are important to ensure the safety of European Aviation to ensure the achievement of an environmentally sustainable growth and protect Union citizens when travelling outside of the Union.

According to Articles 3 to 5 of Regulation (EC) No 2111/2005, the Commission may impose total bans or partial restrictions on air carriers from third countries coming to the Union. In that context and in accordance with Article 3(4) of Regulation (EC) No 473/2006, the Commission, the European Aviation Safety Agency (EASA) and experts from the Member States may carry out assessment missions to conduct on-the-spot checks and to identify safety deficiencies of the air carriers and the authorities responsible for their oversight. The cost of on-site assessment visits for national experts needs to be reimbursed by the Union.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)**06 02 05** (*cont'd*)

There is a clear need to complement these missions with more positive and preventive actions as well as with *ex post* technical cooperation to assist the countries concerned by the ban or restrictions to correct the deficiencies. In addition, the Commission and EASA have as their objective the promotion of the highest standards of aviation safety across the world.

In this context, the large-scale Union projects in the area of civil aviation cooperation managed by other Directorates-General (NEAR, DEVCO and FPI), which can only be implemented on a long-term basis, do not provide an immediate answer to short-term needs.

The objective of this initiative is therefore to complement the existing instruments by establishing a flexible tool to implement ad hoc preventive and assistance (corrective) actions in favour of the national authorities responsible for the oversight of air carriers affected by the Union ban within the Union. The actions envisaged are small-scale and short-term activities.

Since the framework service contract concluded between EASA and MOVE in 2009 proved to be an effective and efficient tool to carry out technical assistance, the contract with EASA was renewed for the period 2013-2016 and a new framework contract is under preparation for the period 2017-2020.

In addition, Regulation (EU) No 996/2010 provides for the establishment of a European Network of Civil Aviation Safety Investigation Authorities (Encasia). Encasia is required to develop actions in order to further improve the quality of investigations conducted by safety investigation authorities and to enhance accident prevention in the Union. According to that Regulation, the Commission is associated with Encasia's work and needs to provide Encasia with the necessary support.

Finally, the Memorandum of Cooperation between the Union and International Civil Aviation Organisation (ICAO) covers areas of aviation for which both the Commission and the ICAO have responsibilities (i.e. safety, environment, air traffic management and aviation security). This strengthened cooperation will ensure the indispensable participation in and contribution to ICAO initiatives in several key aviation policy areas which are being pursued at the global level. This includes the initiative to strengthen the safety of international aviation on a worldwide basis, or the development and implementation of measures with regard to the environmental impact of aviation which are acceptable worldwide. It aims to ensure that Union interests (including of an industrial nature, for example in the area of the definition of worldwide technical standards) are better taken into consideration by ICAO. Through the agreement, ICAO will also be brought to accept, support and enhance the increasingly important role which regional organisations play in the current and future development of international aviation.

Sustainable and intelligent transport, including in urban areas

This appropriation is intended to support policy and strategy development and implementation, as well as the implementation of Directives and the related delegated and implementing acts.

Social issues

This appropriation is intended to cover horizontal social issues. To reduce the risk of labour shortages, it will support actions aiming at attracting more workers to the transport sector, bearing in mind the effects of automation (a third of transport workers are over 50 years old). It will also support actions bringing more gender balance to the sector (transport remains male dominated with only 22 % of female workers and less than 3%, in technical positions).

COMMISSION

TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 05 (*cont'd*)*Youth mobility*

This appropriation is intended to implement actions related to the mobility of young people in order to reinforce their knowledge and appreciation of other Union cultures by encouraging them to travel in a multi-modal, sustainable way. To this end, the Commission will, among other actions, promote travelling schemes and related campaigning actions and web portals.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)**06 02 06** (*cont'd*)*Remarks*

This appropriation is intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the rules and measures required to improve the security of inland, air and sea transport, including extension to third countries, technical assistance and specific training.

The main objectives are to develop and apply security rules in the field of transport and in particular:

- measures to prevent malicious acts in the transport sector,
- approximation of legislation, technical standards and administrative monitoring practices relating to transport security,
- definition of common indicators, methods and security objectives for the transport sector and collection of the data necessary for such definition,
- monitoring of measures taken on transport security by the Member States, in all modes,
- international coordination on transport security,
- promoting research into transport security.

This appropriation is intended in particular to cover expenditure on the establishment and operation of a corps of inspectors to check compliance with the requirements of Union security legislation of airports, ports and port facilities in the Member States, including extension to third countries, and of ships flying the flag of a Member State. This expenditure includes the subsistence allowances and travel expenses of the Commission inspectors and the expenses of inspectors from the Member States, borne in accordance with the provisions laid down in that legislation. The costs of training inspectors, of preparatory meetings and of the supplies needed for inspections must, in particular, be added to that expenditure.

This appropriation is also intended to cover expenditure on information and communication, as well as electronic and paper publications directly linked to the achievement of the objective of transport policy, as well as safety and protection of transport users.

TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 77 (*cont'd*)06 02 77 10 (*cont'd*)

Port cities are facing huge challenges in reconciling competition and sustainable urban development. Those challenges include relocation of port functions, container transport, redevelopment of port-city interfaces and waterfronts and dialogue with city inhabitants. Tensions between city and port, tourism and industry, natural and built-up areas need to be addressed. Smart city and smart port city ambitions should be complementary. A knowledge- and ICT-based smart port city could work hand in hand with inland interfaces to further increase service efficiency and quality. Having regard to the motorways of the sea concept, this is in line with the Europe 2020 strategy and the revised White Paper of 28 March 2011 entitled 'Roadmap to a Single European Transport Area — Towards a competitive and resource efficient transport system' (COM(2011) 144 final).

Cities and ports are faced with the same problems and have the same opportunities, so there should be innovative solutions for: (a) reducing greenhouse gas emissions from ocean shipping and also from port operations; (b) developing the linkage with hinterland transport (rail, road, inland); (c) enhancing renewable energy use and improving energy efficiency; (d) promoting ICT use and interoperability; (e) strengthening the competitiveness of port cities, bearing in mind the strategic position of the outermost regions and the importance of connectivity between islands; and (f) promoting synergies between city and port.

These innovative actions should also have an impact on maritime and coastal tourism. Actions should also focus on port facilities and dialogue between port and city authorities for urban and port planning. Coastal and maritime tourism also has a role to play in the diversification of ports. This preparatory action will identify the benefits of smart port city development around Europe and take into consideration the full significance of ports. The action will also include initiatives to create a European smart port city network.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action will demonstrate an AGS for RPAS (drones) flying below 150 metres (500 feet) above ground level. It will be set up by connecting the drone-controlling remote pilot station on the ground to a web-based platform. The web-based platform will display the position of the RPAS operation and will validate compliance with different national legislation, depending on the location of the operation. The platform can generate no-fly zones on the basis of aviation standards.

By connecting the web-based platform to the RPAS, users will not be able to operate RPAS in no-fly zones. No-fly zones can be generated, monitored and controlled by the authorities responsible. The information generated by the web-based platform can also be shared with all stakeholders in the European aviation network.

This action can provide a solution for the safe and secure integration of small drones into the existing aviation network, guaranteeing a level of safety equivalent to that in manned aviation and resulting in a win-win situation for all RPAS stakeholders. Privacy can be guaranteed by using no-fly zones for RPAS operations; and, more importantly, SMEs in the RPAS industries will be helped to create promising new job opportunities in Europe. The following RPAS services can be demonstrated by using a web-based platform: an AGS monitored and controlled by the authorities responsible, and a validation service checking the regulations applicable.

This platform could be accessible to various stakeholders, such as RPAS users, air navigation service providers, civil aviation authorities, police and emergency services, RPAS manufacturers and qualified entities. It will use existing aviation standards, be compliant with manned aviation rules and result in safer, more secure and standardised integration into the aviation network. In addition to those standards, the platform must be interoperable with all RPAS so as to open the European market for all RPAS manufacturers and all RPAS users. Finally, this RPAS air traffic management platform should be scalable for all Member States.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Context

Around 55 % of car journeys are less than five kilometres long. The average occupancy rate is low at around 1,3 persons per car. Those figures show that alternatives to the private car use are still underdeveloped and that there is a huge potential for a shift towards more sustainable modes.

Raising awareness is a first step towards developing alternatives to private car use. The aim is to encourage behavioural change, for instance for home-to-work and home-to-shop journeys. There are already a number of initiatives to change individual car use into non-motorised individual mobility, such as walking and cycling, including using electric bicycles (which has the potential to be the most reliable and fastest mode for distances up to 10 kilometres). But these initiatives, which are mostly used to target individual behaviours, could be speeded up by means of a collective approach.

Project

The pilot project is all about developing new tools to raise awareness at a collective level. There is a high potential for experimentation in public and private companies, local authorities and international conferences to use new tools to measure and set objectives for modal shift at a group level. These tools are called 'group-performance-based systems' using crowdsourcing and connected technologies. They allow better flexibility, team spirit and long-term coordination between people, and also provide statistics and mass data on behavioural change. The pilot project will develop and disseminate a new set of tools to limit the use of cars to what is strictly necessary.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

In rural areas in the Union there has been a large increase in projects developing shared mobility interconnected with public transport and non-motorised individual mobility. These are based on different conventional and digital tools (e.g. smartphone apps) and involve, for example, car sharing, car pooling, shared driving, hitchhiking, taxi sharing and flexible call buses. This development is a huge opportunity to give a boost to 'smart rural transport areas' (SMARTAs). The pilot project will improve knowledge and understanding of whether there is a need for a cross-border approach to SMARTAs, such as exchanges of best practice examples, interoperability, sustainable regional development, cohesion, research and development and innovation.

The pilot project has the potential to generate win-win situations, such as reducing CO₂ emissions (COP 21 Agreement), better mobility connections in remote and rural areas for persons who cannot or do not want to own a car (young, elderly and socially disadvantaged people).

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 77 (*cont'd*)06 02 77 16 (*cont'd*)

The eighth of the ten goals for a competitive and resource-efficient transport system set out in the White Paper of 28 March 2011 entitled 'Roadmap to a Single European Transport Area — Towards a competitive and resource efficient transport system' (COM(2011) 144 final) is to establish the framework for a European multimodal transport information, management and payment system by 2020.

Furthermore, initiative 22 in the White Paper (Seamless door-to-door mobility) involves defining 'the measures necessary for further integrating different passenger transport modes to provide seamless multimodal door-to-door travel'. Initiative 27 (Travel information) involves promoting 'awareness of the availability of alternatives to individual conventional transport (drive less, walk and cycle, car sharing, park and ride, intelligent ticketing, etc.)'.

Finally, this pilot project is a useful vehicle for applying Union legislation on intelligent transport systems (ITS) (Directive 2010/40/EU of the European Parliament and of the Council of 7 July 2010 on the framework for the deployment of Intelligent Transport Systems in the field of road transport and for interfaces with other modes of transport (OJ L 207, 6.8.2010, p. 1) and the corresponding work programme of the Commission) as well as for the further development of Horizon 2020 and for implementation of the Digital Agenda.

European air traffic management is handled by 28 Air Navigation Service Providers (ANSP) on the basis of ground national borders. The cost of airspace fragmentation has been put at EUR 4 billion a year. The pilot project will evaluate a new Union airspace architecture based only on traffic flow efficiency, direct routes and the most efficient number of control centres. This will take into account Single European Sky Air Traffic Management Research (SESAR)-related technology in order to establish the most efficient deployment locations.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project will develop a digital platform for urban transport routes suitable for people with reduced mobility.

One in six people in Europe is affected by disability to some degree and with an ageing population the need for information about barrier-free transport options in cities will only grow with time. While municipalities and transport companies are working on making transport more accessible and harmonised across Europe, information regarding barrier-free mobility options is still not clearly communicated, and many of those affected still need to rely on privately organised transport options.

The proposal for a Directive of the European Parliament and of the Council on the approximation of the laws, regulations and administrative provisions of the Member States as regards the accessibility requirements for products and services (COM(2015) 615 final) laid the groundwork for improving the life of people with disabilities. It aims to overcome the divergent, and often contradictory, national accessibility requirements which have created barriers for business and thus have prevented people with disabilities from benefiting from the potential of the internal market.

The pilot project will first support the collection of information about barrier-free mobility in urban areas and then link the information to a common online platform, which should ideally be accessible via a mobile app and similarly accessible information tools. This platform will, for example, take into account a more accurate walking speed and the accessibility of public transport options, of certain streets, and of existing specialised transport services.

One focus of the proposed Directive is to make transport more accessible for people with disabilities by harmonising Member State accessibility requirements. This pilot project will therefore build on this momentum by helping information about accessible transport to be better communicated to the target group. This should encourage transport companies to improve their accessibility standards more quickly and businesses to take advantage of the digital economy market opportunities offered by this still relatively untapped market.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The increased migratory pressure on the Union has seriously affected both traffic security and road haulage industry security in a number of Member States in certain locations, such as Calais, where refugees are trying to get into trucks. It is necessary to react to this crisis and to provide safe parking points for trucks in order to prevent refugee deaths and safeguard truck drivers, as well as to help prevent material damage for hauliers.

The pilot project will cover expenditure on setting up secure and guarded parking areas for trucks along the major road transport routes through Europe to border locations, at points where traffic and truck security is affected by large numbers of refugees trying to climb into trucks to cross a border.

This appropriation will be in addition to the EUR 5 000 000 Commission Vice-President Frans Timmermans promised to the French authorities to deal with the refugee camps in Calais.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 77 (*cont'd*)06 02 77 20 (*cont'd*)*Remarks*

This new pilot project will address the lack of attention given by the Union to behaviour in connection with autonomous driving. Much research has been conducted in recent years into autonomous driving, both by car manufacturers and by the research community. It has mainly focused on the technological aspects of autonomous driving, i.e. interoperability of vehicles, interaction with road infrastructure, data security, data reliability, data protection and liability, etc.

The pilot project will provide a new area for studies and research that puts the emphasis on driver behaviour, which has been somewhat neglected both by policy makers and by the industry. It will provide the Commission and the legislative authority with a complementary view of the interaction of human behaviour with autonomous driving with a view to addressing potential problems arising from the large-scale introduction of autonomous driving in the Union in order to make it a success and improve road safety.

The pilot project will gather information from the research community on road safety in order to address the following areas:

- the human factor in new autonomous driving; opinions and views of professional/frequent/occasional drivers, broken down by age and other relevant criteria (country, gender, etc.);
- identifying and proposing solutions to address 'resistance' by the driver community to the introduction of autonomous vehicles;
- the training needs of drivers in connection with new autonomous forms of driving; need for additional/specific/less certification for self-drivers (compulsory training, additional requirements to obtain a driving licence, voluntary schemes, etc.);
- interaction between autonomous and traditional drivers; attitudes of drivers and other road users towards autonomous drivers and ways of alerting other road users to autonomous driving.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)**06 02 77** (*cont'd*)06 02 77 21 (*cont'd*)*Remarks*

The Union is committed to halving the number of fatal road accidents by 2020. Cross-European enforcement operations supported by information and awareness campaigns could help to achieve this goal. Therefore a coordinated pan-European enforcement event should take place across the TEN-T network and Member States should sign up to it.

The Commission will therefore fund a one-month coordinated operation across the TEN-T network. European police operations in Member States should be coordinated. As more than half of all fatal accidents occur on rural roads, the event could take place in rural areas and be supported by targeted campaigns to raise awareness. It should be focused on the main killer: speed.

Remarks

The pilot project will reduce odometer fraud by facilitating odometer information exchange in the Union.

It will include an assessment, a feasibility study and a technical business analysis to identify and explore solutions and define the scope for a future odometer information exchange system in the Union. It will provide support for roadworthiness certification in connection with Directive 2014/45/EU of the European Parliament and of the Council of 3 April 2014 on periodic roadworthiness tests for motor vehicles and their trailers and repealing Directive 2009/40/EC (OJ L 127, 29.4.2014, p. 51).

Recent studies show that in major European markets for used cars one-third of all vehicles have had their odometers manipulated. The average value of the fraud is roughly EUR 3 000, with central budget revenue losses estimated at between EUR 5 600 000 000 and EUR 9 600 000 000 a year. New vehicles are mainly checked and serviced at official dealerships as a condition of warranty. Dealerships keep records of odometer readings, but this information is not publicly accessible. New vehicles do not undergo roadworthiness testing until they are four years old. During the subsequent annual inspections, odometer readings are transmitted to databases in the Member States but are not exchanged. When a vehicle changes hands or is sold abroad, there is a break in the odometer track record, presenting the opportunity for tampering with odometer readings. It is becoming increasingly easy to do this with a minimum of investment in software, knowledge and time.

Remarks

These remarks are applicable to all the budget lines in this chapter.

These appropriations are intended to be used for Horizon 2020 — the framework programme for research and innovation, which covers the 2014 to 2020 period, and for the completion of the previous research programmes (seventh framework programme and preceding framework programmes).

Horizon 2020 will play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area. Horizon 2020 will contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. The programme will be carried out in order to pursue the general objectives described in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European research area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European research area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations are intended to be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

CHAPTER 06 03 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO TRANSPORT (*cont'd*)

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget of the Union.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Revenue from States taking part in the European cooperation in the field of scientific and technical research will be entered in Item 6 0 1 6 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contribution by outside bodies to Union activities will be entered in Item 6 0 3 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be made available under Item 06 03 50 01.

Administrative appropriations of this chapter will be provided under Article 06 01 05.

06 03 03 ***Societal challenges****Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Funding will be focused on the following challenges:

- smart, green and integrated transport,
- innovation and research, particularly in the areas of behavioural change, modal shift, accessibility for all, integration (interconnectivity, intermodality, interoperability) and sustainability (climate change, gas and noise emission reduction), which are of crucial importance for the transport and tourism sectors.

*Remarks**Former Item 06 03 03 01 (in part)*

This appropriation is intended to cover research and innovation actions that should substantially contribute to shifting transport into a new era of smart mobility. Actions under this item should support the development and take-up of the necessary solutions for all transport modes, drastically reducing transport emissions that are harmful to the environment, lowering the dependence of transport on fossil fuels, and hence reducing transport impact on biodiversity and preserve natural resources. This is expected to be achieved by investing in specific activities, particularly in the form of large public-private partnerships, such as making aircraft, trains, vehicles and vessels cleaner and quieter, developing smart equipment, infrastructure and services and improving transport and mobility in urban areas.

Research and innovation carried under this item is expected to make important contributions to optimise performance and efficiency in the face of growing demands for mobility. Actions under this item will also focus on substantially reducing traffic congestion, substantially improving the mobility of people and freight, developing and applying new concepts of freight transport and logistics and reducing accident rates and fatal casualties and improving security. Actions under this item are indeed intended to contribute to making Europe the safest region for aviation and to move towards the target of zero fatalities in road transport by 2050.

Research and innovation is expected to play a significant role in achieving global leadership for the European transport industry and contributing to the development of small and medium-sized enterprises, staying ahead in new technologies and reducing the costs of existing manufacturing processes, therefore contributing to economic growth and highly skilled jobs in the European transport industry. In this context, actions to develop the next generation of transport means and explore entirely new transport concepts are expected to be developed and covered by this appropriation.

Socioeconomic research and forward-looking activities for policymaking will also be covered by this appropriation: actions to support policy analysis and development including on socioeconomic aspects of transport are necessary to promote innovation and meet the challenges raised by transport.

Remarks

Regulation (EU) No 1293/2013 has four general objectives (Article 3) and three priority areas for the sub-programme for the environment (Article 9), of which the first one is Environment and Resource Efficiency.

Specific objectives of this first priority area are set out in Article 10.

The measures financed by LIFE may be implemented through action grants, operating grants, financial instruments, procurement procedures or any other interventions that are needed (Articles 17, 18, 21 and 22).

At least 81 % of the budgetary resources for the LIFE programme shall be allocated to projects supported by the way of action grants or, where appropriate, financial instruments (Article 17(4)).

Legal basis

Regulation (EU) No 1293/2013 of the European Parliament and of the Council of 11 December 2013 on the establishment of a Programme for the Environment and Climate Action (LIFE) and repealing Regulation (EC) No 614/2007 (OJ L 347, 20.12.2013, p. 185).

Remarks

This appropriation is intended to cover the Agency's staff, administrative and operational expenditure.

The mission of the Agency is to provide the Union and the Member States with objective, reliable and comparable information on the environment at Union level, thus enabling them to take the requisite measures to protect the environment, to assess the results of such measures and to inform the public.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Any revenue from the Swiss Confederation's contribution to participation in Union programmes entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

The amounts repaid in accordance with Article 20 of Commission Delegated Regulation (EU) No 1271/2013 constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue. The establishment plan of the European Environment Agency is set out in Annex 'Staff' to this section.

The Union contribution for 2018 amounts to a total of EUR 37 724 481. An amount of EUR 413 232 coming from the recovery of 2016 surplus is added to the amount of EUR 37 311 249 entered in the budget.

The Coordination of Information on the Environment (Corine) programme was set up by the Commission in 1991 with the principal aims of defining and protecting biotopes, combating environmental pollution, mapping the different types of land cover and preserving the natural environment. The database resulting from the programme was subsequently replaced by the European Union Nature Information System (EUNIS) database, which contains an inventory of European habitats (natural, near-natural, artificial, terrestrial and aquatic) and serves as the basis for Union nature legislation (Natura 2000).

However, that inventory does not include the species and habitats to be found in the French outermost regions (Martinique, Guadeloupe, French Guiana, Réunion and Mayotte), each of which has its own highly specific biological and ecological features and a very large proportion of endemic species.

The purpose of this pilot project is to use the same tools as the Corine Biotope and EUNIS programmes to compile an inventory of species and habitats and environmentally sensitive areas in these regions, which number among the world's biodiversity hotspots. A new common database of this kind is necessary in order to identify any gaps in knowledge and to take the action required in order to preserve the biotope of these regions, along the lines of that taken for the other Union regions.

This approach, which has already demonstrated its feasibility and value in other Union regions, is a first step on the road towards the adoption of legislation to preserve biodiversity in the French outermost regions. Advantage will be taken of any possible synergies with the work carried out under the BEST preparatory action.

Action 5 of the EU Biodiversity Strategy urges Member States to map and assess the state of ecosystems and their services in their national territory. A Working Group on Mapping and Assessment of Ecosystems and their Services (MAES) was established in 2012.

The pilot project will start by assessing the state of the MAES exercise in the participating overseas entities, and by inventorying and substantiating the human and material capacities present in each of them.

It will capitalise on the work of BEST (initially supported by a preparatory action under the 2011, 2012 and 2013 budgets) and NETBIOME (supported via the 7th research Framework Programme) projects and it can also build on the inventory of species and habitats and the MAES experience planned under the pilot project entitled 'Inventory of species and habitats in the French outermost regions' adopted under the 2016 budget (Item 07 02 77 34). It will then choose as case studies a specific region and a particular contribution on which to focus the work of a dedicated team of local experts, policymakers and civil society members pooled from across the outermost regions (ORs) and overseas countries and territories (OCTs).

This project will produce a tangible contribution for the MAES exercise and will demonstrate the feasibility and added value of a bottom-up approach, involving and empowering local actors. If successful, this project will allow testing and implementation of the MAES methodology in different regions of the world, providing methodologies and good practice guidelines and contributing to worldwide Union leadership in this area.

The pilot project will involve policymakers, researchers and civil society in the development of methodologies for mapping and assessing the state of ecosystems and their services in the ORs and OCTs. A coordinated and synergistic approach is advocated so as to turn the geographical, political and knowledge base fragmentation of these entities into assets, pooling resources and building robust participatory tools.

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL (*cont'd*)**07 02 77** (*cont'd*)07 02 77 36 (*cont'd*)

This pilot project will provide financial support for the development of a new 'Network of European Green Cities' (comprising European Green Capital Winners and cities shortlisted for the award) in order to share their experiences, knowledge and expertise on sustainable urban development with other European cities. The network will promote environmental sustainability in European cities through a series of specific actions to help all cities — from 'greener' cities to those whose environmental performance is less advanced — to take further steps towards genuine sustainability.

Each year since 2010, the Union has awarded the title of European Green Capital to a city in the Union which has a consistent record of achieving high environmental standards, is committed to ongoing and ambitious goals for further environmental improvement and sustainable development, and can act as a role model to inspire other cities and promote best practices for all other European cities. While winning cities take some action throughout the year to promote the concept of the green city, their budget and scope for Europe-wide dissemination is very limited.

The idea of this project is to draw on the wide range of lessons learnt from all the previous applicants considered worthy of consideration for the award and to consolidate these valuable experiences and communicate them to other cities, so that they might be inspired by such actions and understand what was involved in putting them in place. In effect this will be about enhancing the impact of the European Green Capital Award in the long term and to achieve spill-over effects for the benefit of entire regions and countries.

This project will go beyond simply organising the exchange of examples of good practice (although this is an important element of it) and will also seek to develop a specific set of tool kits and education materials that different types of city administration wishing to take steps towards becoming more sustainable could use. These tools will be combined with strategically targeted seminars, workshops and/or conferences, aimed at maximising the environmental benefits of the work (i.e. based on an analysis of where in the Union such experience could most usefully be disseminated to greatest effect). The pilot project will also need to provide the necessary appropriations to finance the setting up and running of the network.

As a starting point the cities to be invited to join the 'Network of European Green Cities' will be:

- (a) former winners of the award: Stockholm (2010); Hamburg (2011); Vitoria-Gastiez (2012); Nantes (2013); Copenhagen (2014); Bristol (2015); Ljubljana (2016); and Essen (2017);
- (b) former runners-up: Amsterdam, Freiburg, Münster, Oslo, Barcelona, Malmö, Nuremberg, Reykjavik, Frankfurt, Brussels, Glasgow, Nijmegen, 's-Hertogenbosch and Umeå.

All future winners and runners-up will be invited to join. Management of the network's membership will be handled by the Commission.

Remarks

The existing pilot project should be continued by running awareness-raising and targeted information campaigns and specific capacity-building activities to implement the findings of the current project. In particular, the inclusion of capacity building at regional and local level to address e.g. monitoring and surveillance, the inclusion of dedicated measures in the relevant air quality plans and an assessment of the effectiveness of these measures will allow the first-phase results to be built upon and disseminated on a wider scale.

Specific support is also required for the application on a voluntary basis of the various measures identified in the first project by certain municipalities in the two countries concerned.

For the continuation of the project, the following objectives could also be considered:

- evaluation of the health hazard posed by residential solid waste burning relative to regular activities;
- a harmonised cost-benefit analysis of the results obtained in the experiments;
- a detailed strategy to curtail illegal residential burning of solid waste at European level.

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL (*cont'd*)07 02 77 (*cont'd*)07 02 77 39 (*cont'd*)*Remarks*

This pilot project was first introduced in 2017 and it should be continued for another year, with new funds, so that it can reach its full potential. The pilot project must not be restricted only to those eight organisations that have signed up to the EU Platform on Coexistence between People and Large Carnivores, but should be open to any other (local or regional) organisation whose objectives are in line with the EU Platform's activities.

The four main large carnivore species in Europe — brown bear, wolf, Eurasian lynx and wolverine — are among the most challenging groups of species in conservation terms. The Commission has made significant efforts to understand both their biological needs and the conflicts between stakeholders. There is a wide range of conflict mitigation experience available, ranging from local knowledge of traditional animal husbandry and hunting practices to the latest in high-tech research, including from projects applied locally and co-funded by the EU LIFE programme. In 2012, a prioritising exercise involving multiple experts and stakeholders allowed the establishment of cross-cutting and species-specific 'key actions' for each large carnivore population. In summer 2014, the EU Platform on Coexistence between People and Large Carnivores was established to allow farmers, herders, conservationists, hunters, landowners and scientists to exchange ideas and best practices. The mission of the Platform is 'to promote ways and means to minimise, and wherever possible, find solutions to, conflicts between human interests and the presence of large carnivore species, by exchanging knowledge and by working together in an open-ended, constructive and mutually respectful way'.

The EU Platform faces a serious challenge in transmitting the good practices discussed to, and cooperation with, stakeholders coexisting with large carnivores on the ground. Its members lack the resources to engage fully in communicating with their own members or to travel to regional meetings. In order to tackle the main coexistence problems at their sources, similar groupings are needed locally. At the same time, making the link to the Union level and improving communication both vertically and horizontally between governance levels in order to effectively transmit information is essential. The objective of this project is therefore to establish several pilot local or regional groupings of stakeholders based on the model of the EU Platform. Experience from other regional platforms, e.g. established through LIFE projects, will be built upon.

Methods and requirements

- Select two areas in Europe for the pilot studies where there are serious conflicts involving coexistence between humans and large carnivores and where few solutions have been tested.
- Establish a regional Platform on Coexistence between People and Large Carnivores involving a grouping of stakeholders representing the main interest groups active in the area, referencing the EU Platform's agreement as a starting point and taking into account experience of other regional platforms.
- Using 'Key actions for large carnivore populations in Europe' as a basis, carry out a prioritisation exercise with stakeholders to establish which key actions have the greatest potential to be implemented in which locations. The focus will be on actions relating to conflict resolution, communication, reducing socio-economic problems and establishing win-win socio-economic benefits in line with the objectives of EU Nature Directives and the EU 2020 biodiversity strategy.
- Support the implementation of two or three actions (funded through the pilot project).

In order to drive forward the action, a key beneficiary will be responsible for coordinating the action, taking steps to identify and establish local platforms and managing interaction between the Union and regional platforms. The key beneficiary will manage a budget for each regional platform to encourage stakeholder participation, support individual members on study trips or attending regional meetings and funding the key actions decided upon by the regional platform. Ensuring appropriate mediation, including in the selection of platform members, will also be important.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The Commission recently conducted a fitness check on the BHD to evaluate them in accordance with five criteria: effectiveness, efficiency, coherence, relevance, and Union added value. The evaluation revealed that key barriers to BHD performance relate to insufficient implementation, poor integration and conflicts with other policies and economic sectors, and insufficient cooperation among relevant stakeholders and organisations. Knowledge gaps and insufficient access to information have been identified as significant problems by stakeholders in implementation, including in relation to the effectiveness and efficiency of site and species permitting under the directives. Additionally, the collation and analysis of case studies, tools and recommendations for improving the BHD's implementation was beyond the scope of the fitness check.

The pilot project will fill that gap and help improve BHD implementation through systematically collecting and analysing the knowledge, evidence, tools and principles that can help improve BHD performance.

In view of the vast experience gained by scientists and other knowledge-holders across the Union, an effective way forward is therefore to conduct a systematic review and meta-analysis, and to develop a comprehensive set of guidelines for better implementation. Current approaches to do so could be complemented by having the scientific community co-produce the necessary knowledge base as a cost-effective way to maximise comprehensiveness, geographical representation and quality.

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL (*cont'd*)07 02 77 (*cont'd*)07 02 77 40 (*cont'd*)

The pilot project will focus on conducting such a systematic review and developing the first steps towards a preparatory action to implement the proposed improvements. Key elements of the review will be:

- (a) to generate a comprehensive database of peer-reviewed publications and other knowledge across all Member States, collecting and organising tools, principles, guidelines, recommendations and case-study experiences indicating how to improve BHD implementation. The database will build on, and extend, the existing literature database already collected during the fitness check and will include categorisation based on scale, geography and policy relevance;
- (b) to assess how:
 - effectiveness could be enhanced in terms of planning, management and monitoring;
 - cost-efficiency could be improved by reducing conflicts and improving use of existing funds;
 - other Union policies affect BHD implementation and where improvements can be made with a view to reducing conflicts and increasing policy integration;
 - enforcement mechanisms and administration can be improved to maximise the Union's role in effective implementation of the BHD;
- (c) to conduct workshops to collate knowledge, discuss options, interpret the application of the evidence, create evidence-based guidance and identify future knowledge needs (five workshops totalling at least 100 participants);
- (d) to conduct a robust meta-analysis of the outcomes, including a quantitative comparison of the cost-effectiveness and cost-efficiency of different policy instruments;
- (e) to generate a set of carefully regionalised, scale-sensitive, non-prescriptive recommendations;
- (f) to open the recommendations for discussion and a peer review by the scientific community in order to maximise outcome quality and transparency, and subsequently enhance cooperation with all relevant stakeholders.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Animal testing is used in Europe for four different purposes: basic research, applied research, toxicology and teaching.

Directive 2010/63/EU lays down a European framework for the protection of animals used for scientific purposes, making it a legal requirement to comply with the 3R principle (replacement, reduction, refinement).

As is set out in recital 28 of that Directive, the welfare of the animals used in procedures is highly dependent on the quality and professional competence of the personnel supervising procedures, as well as of those performing procedures or supervising those taking care of the animals on a daily basis. It is therefore imperative that, as regards animal welfare issues, the personnel responsible for those tasks in Member States should be properly informed, trained and proficient and that they should have access to all relevant information, tools and know-how needed to be able to make use of alternatives to animal testing.

One of the main obstacles to developing and using alternatives is the lack of linkage and of information pooling between scientific domains, thus preventing existing methods from being taken forward and used by animal testers.

The purpose of the project is to promote the use of alternatives to animal testing in the Union. Additional resources need to be marshalled and better coordinated in order to foster greater use of alternatives, with a view initially to reducing the number of animals used and, ultimately, to ending the practice altogether.

In expanding the remit and resources of existing bodies (e.g. ECVAM), the pilot project seeks to improve information and knowledge exchange between the scientific community, Union agencies, national authorities and users of animal testing in Member States, reflecting the policy approach taken by the Union in introducing Directive 2010/63/EU.

It aims actively to promote existing alternatives to animal testing, facilitate validation of new alternative methods, organise information campaigns, foster exchanges of information, knowledge and best practices between scientists and authorities in Member States on existing methods, on how to use them and on what is needed to develop new methods or improve existing ones.

In expanding the remit and resources of the Education and Training Platform for Laboratory Animal Science (ETPLAS), the pilot project also seeks to offer specific training courses, including on-line courses, not only for scientists, depending on their area of work (e.g. basic research or toxicology), doctors and veterinarians, but also for industry stakeholders.

The pilot project should also provide a forum for discussion and proposals, with a view to encouraging and optimising scientific research in order to develop alternatives, establish linkage between the Union regulatory set-up and national set-ups, and move towards making alternative methods in the Union more effective.

It should have a pivotal role to play in implementing current legislation and in realising the objective, shared by the Commission, of ultimately replacing animal testing by alternative methods.

Remarks

This pilot project will create a representative butterfly (Lepidoptera) monitoring network across the Union and a suite of Lepidoptera indicators, thus helping to improve the targeting and efficiency of conservation measures under Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7) (the Habitats Directive), and also monitor the biodiversity impact of the greening of the Common Agricultural Policy (CAP), ensuring payments to farmers for maintaining Natura 2000 areas in good condition, climate change and European sectoral and land use policies in general.

Rationale

- (1) The pilot project will develop a suite of Union Lepidoptera indicators which can help improve conservation measures and assess progress in implementing Union policies and legislation such as the Union Biodiversity Strategy to 2020 and the Habitats Directive. Besides providing a highly relevant indicator for measuring progress in terms of managing and restoring Natura 2000 sites, it will also contribute to monitoring progress on Target 3 of the Union Biodiversity Strategy, which aims to increase the contribution of agriculture and forestry to maintaining and enhancing biodiversity. In particular, the pilot project will deliver a representative indicator to help monitor the impact of the CAP on grassland biodiversity. It will also provide data to produce a climate change indicator, thereby contributing to the ongoing revision of climate change adaptation strategies. Indicators will also be possible for woodland, wetland and urban habitats.
- (2) Such indicators are needed for tracking and stimulating progress towards the Union and global headline biodiversity target for 2020 and the Sustainable Development Goals. The project is highly policy-relevant and can provide several benefits at Union level, such as linking science and policy and strengthening the evidence and knowledge base for Union policy-making; linking the efforts of citizens and volunteers with policy makers in Member States where this has not been a tradition; increasing professional opportunities for young people across Europe and increasing their skills; and linking knowledge across the environment and agriculture sectors, and involving climate change researchers and policy makers.

- (3) It can help to raise the profile of biodiversity and the importance of agricultural policy and practice to biodiversity recovery and contribute to the ongoing discussion on innovative agro-ecology approaches, paving the way for sustainable innovation in agriculture and measuring the effectiveness of payments for greening and sustainability improvement. Currently, agricultural Natura 2000 areas have the lowest conservation status; this project can further assist with improving the implementation of the Habitats Directive and stimulating further actions to improve the conservation status of Natura 2000 Lepidoptera and the habitats on which they depend, specifically by enabling better targeting of CAP pillar 2 funds and ensuring that Natura 2000 payments are effective and sufficient so that farmers are better incentivised to protect the areas and the species they support. It will complement the existing farmland birds indicators as it will be more sensitive in describing what high habitat quality means and the condition of ecosystems. Moreover, it replaces an ad hoc approach to Lepidoptera monitoring and indicator reporting with a sustainable system that covers more Member States, has more records and is more representative, in order for it to be more widely accepted.
- (4) This coherent project will enable the development of a system for collecting and recording validated Lepidoptera data at European level so as to allow cost-effective and regular updating of a grassland butterfly indicator and other indicators. This will be a significant improvement on the current approach. It involves the development and construction of a well-designed database with processes for collating systematic records of Lepidoptera numbers along a fixed route or transect (a methodology already agreed with European Environment Agency (EEA)) from more countries and a process for regularly compiling and updating a suite of Lepidoptera indicators.
- (5) The project will enable new monitoring schemes to be set up in some Member States where there is none at present and contribute to building capacity. This will involve, inter alia, finding citizen volunteers, training them, giving them some support and enabling them to report their findings cost-effectively. Validation and quality control can be effectively achieved in those Member States with modest support for knowledgeable part-time coordinators. This will increase opportunities and skills for young people.
- (6) As a result of this project we will have a greatly improved Union network for monitoring lepidopterans, more transects walked each year, more Member States and more citizens involved in monitoring, and a suite of Lepidoptera indicators and a comprehensive database that can provide a valuable resource for researchers, policy makers and evaluators. Results will be used to inform policy debates, improve policy implementation and raise the profile of biodiversity and ecosystem services, including pollination services.

Main tasks of the project

Objective 1

Constructing a unified, high-quality database and automated data entry system.

Expected results

A unified database of validated and standardised Lepidoptera counts from across searchable European monitoring schemes producing regular reports on Lepidoptera indicators and enriching research, which will directly contribute to the integrated spatial data infrastructure for natural capital developed by the EEA, the Joint Research Centre, Eurostat and DG Environment.

Main activities:

- producing an effective database for Lepidoptera monitoring records which can produce a suite of Lepidoptera indicators;

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL (*cont'd*)**07 02 77** (*cont'd*)07 02 77 42 (*cont'd*)

- establishing legal data sharing agreements with existing monitoring schemes to clarify intellectual property rights and rights of access to data;
- gathering data annually from existing monitoring schemes, validating counts and populating databases;
- developing an online data entry system and allowing countries to submit data efficiently and in a standard format (NB: some existing schemes are also adopting such a system);
- providing training for monitoring scheme volunteers in using the online data entry system;
- providing tools for calculating national Lepidoptera population trends;
- making the records available for research as appropriate.

Objective 2

Supporting and developing a unified, sustainable and cost-effective European monitoring network based on trained volunteer recorders, supported by new coordinators, together with local access to the on-line data recording system.

Expected results:

- Volunteer-based and expert-validated Lepidoptera monitoring schemes in most European countries, reporting high-quality data to central databases and providing input for national records.
- Increased opportunities for young people to become involved in a European-level project of practical value and policy importance, increasing their skills and employability and creating new jobs requiring coordination, data management and people skills and professional knowledge.

Activities:

- ensuring that existing Lepidoptera monitoring schemes contribute data to the central database: Belgium, Catalonia, Estonia, Finland, France, Germany, Ireland, Lithuania, Luxembourg, Netherlands, Slovenia, Sweden and the UK;
- supporting further development and improving the quality and sustainability of a number of existing and fledgling schemes, especially by adding transects, improving frequency of recording and recruiting more volunteers and supporting coordinators (e.g. in France, Slovenia, Estonia, Lithuania and Spain);
- working with partners and other key stakeholders, including national parks, where appropriate, to help set up new monitoring schemes in at least six of the following countries: Austria, Czech Republic, Italy, Portugal, Romania, Slovakia, Hungary, Poland, Bulgaria, Croatia, Greece, Cyprus, Malta, Denmark and Latvia;
- providing training and essential translations and facilitating learning among volunteers;
- providing feedback to volunteers and coordinators in the form of annual newsletters and by organising biennial meetings to co-ordinate efforts, share best practice and nurture long-term volunteer engagement.

Objective 3

Producing policy-relevant Lepidoptera indicators for a range of habitats, analysing results and disseminating findings to policy makers and the public.

Expected results

A suite of policy-relevant Lepidoptera indicators for different habitats within the Union and Europe as a whole. A series of reports which interpret the significance of Lepidoptera indicators and trends. Increased understanding among policy makers of the impact of their policies on lepidopterans, ecosystems and their services, including pollination services. Adoption by the Union and other European institutions of Lepidoptera as indicators; sharing of best practice; and improved awareness amongst the public. Development of specific indicators which can be used for result-based schemes.

Activities:

- developing automated systems for producing annual indicators and trends in different habitats and groups of species. Initial selection: grassland, woodland, wetland, urban areas and climate change;
- producing a European Lepidoptera indicator showing the general trend in lepidopterans on a Union and European scale;
- producing a European Lepidoptera indicator to help improve the implementation of the Habitats Directive and attain Favourable Conservation Status (FCS) for Natura 2000 Lepidoptera species and their habitats;
- producing reports on the European grassland butterfly indicator covering more countries and helping, inter alia, to monitor the impact of the CAP on biodiversity, including the new approach on result-based schemes;
- producing reports on Lepidoptera trends in woodland, wetland and urban habitats;
- showing how Lepidoptera communities are responding to rising temperatures and climate change;
- disseminating results to relevant institutions, including the Union, the Council of Europe, the Berne Convention and the United Nations Convention on Biological Diversity, and influencing policy debates and action at Union and national levels;
- working with representatives involved with other invertebrate groups to share knowledge and contribute to a Union pollinator initiative;
- disseminating the results more widely to the public via websites and social media.

Smooth running of the project; timely delivery of the above components on budget; annual progress reports; annual financial reports and overall evaluation of impacts.

Activities:

- managing the project to ensure delivery of the above and produce annual progress reports;
- establishing contracts to deliver the above components;
- administering finances for the project on a sound basis and publishing annual financial reports;
- producing annual progress reports and evaluating impacts.

This two-year pilot project has been established with a view to becoming a preparatory action and will have a total budget of EUR 800 000.

Remarks

This pilot project will unlock the potential of satellite imagery to support the operation of the Natura 2000 network of protected areas in the Union. It will use available satellites images to better understand and tackle the threats to protected areas stemming from habitat loss. Halting biodiversity loss by 2020 is the headline target of the Union Biodiversity Strategy, and an essential step to achieve this target is to ensure that current protected areas are protected and managed adequately.

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL (*cont'd*)07 02 77 (*cont'd*)07 02 77 43 (*cont'd*)

Under Directive 2009/147/EC of the European Parliament and of the Council of 30 November 2009 on the conservation of wild birds (OJ L 20, 26.1.2010, p. 7) (the Birds Directive) and Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7) (the Habitats Directive), Member States are obliged to protect Natura 2000 sites from destruction. However, in practice thousands of hectares of habitat (forests, grasslands) are lost in Natura 2000 sites every year due to a variety of factors, such as water abstraction and drainage, conversion of natural grassland into cropland, clear-cutting of forest and urbanisation, which were identified in the European Environment Agency's 2015 'State of Nature in the EU' report as key threats to biodiversity. Although habitat loss is poorly monitored, it probably varies greatly in nature and extent across the Union. Habitat loss is a very severe environmental problem, as either it is often irreversible or habitats can sometimes take centuries to recover (for example, old-growth forests).

Satellite technology is rapidly developing. The Union's Copernicus and other satellites, such as the freely available LANDSAT, are able to provide high-resolution images of the whole of Europe, with archives spanning several decades. However, much work is needed before the images can be used, and this is what is urgently needed at the moment.

First the satellite images will need to be processed. In order to understand how much habitat has been lost, and when, several images of the same area in different years will need to be aligned and further processed. The images will then be converted into habitat maps, preferably using MAES ecosystem types, and verified using existing maps and other data. The significant areas of habitat lost in Natura 2000 sites will then be analysed and estimates of habitat loss per ecosystem type over time will be compiled.

The maps will then be presented on an online platform accompanied by identified cases of past habitat loss, illustrating the drivers behind it. Citizens and civil society organisations are very active in scrutinising the operation of the Natura 2000 network, as is evident in the many complaints that the Commission receives every year about threats to Natura 2000 sites. By providing an online platform where habitat loss can be tracked, the project will empower them and encourage their involvement in the application of Union policy. The platform should be user friendly, with downloadable data, as this will enable citizens and scientists to use the project results to the fullest.

Ultimately, the project will contribute to land use in Natura 2000 areas that is compatible with conserving biodiversity, and contribute to resolving conflicts over land use. As such, the project will contribute to achieving the Sustainable Development Goals, in particular SDG 15 on sustainable forest management, halting and reversing land degradation and halting biodiversity loss.

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL (*cont'd*)07 02 77 (*cont'd*)07 02 77 44 (*cont'd*)*Remarks*

γ -HCH, commonly known as Lindane, was widely used from the early 1940s as an insecticide in agriculture, in households and in wood and textile protection.

Its agricultural use began to be restricted in the 1970s due to concerns over its effects on human health and the environment and it was finally banned in the Union in 2000. Finally in 2009, the production and agricultural use of Lindane was also banned internationally under the Stockholm Convention on persistent organic pollutants. Lindane can harm the nervous system, producing a range of symptoms from headache and dizziness to seizures, convulsions and, more rarely, death. Based primarily on evidence from animal studies, most evaluations of Lindane have concluded that it may cause cancer.

Although Lindane has been banned as a crop pesticide since 2000, old production and dumping sites for this highly toxic pesticide still exist throughout the Union (e.g. in Slovenia, Germany, Romania and Spain), and while there is extensive knowledge about other persistent organic pollutants (POPs) there is no clear picture of the scale of Lindane-contaminated sites in the Union, and the volume of HCH which can enter the waste/water regime via contaminated construction and demolition waste from historical production and storage sites is unknown.

Although the Union has a comprehensive legal framework as regards production of POPs and a fairly well developed system for authorising or reauthorising the introduction of new pesticides, there are no rules or remedies in connection with existing Lindane sites, decontamination techniques and the regeneration of industrial sites. There is also a variety of techniques, ranging from incineration and chemical reaction to the use of genetically modified plants and sealed confinement, etc.

National, regional and local authorities sometimes are given no assistance with addressing negative effects on the environment and health as regards decontaminating industrial production sites, including a lack of Union funding possibilities. In order to deal with this and taking into account the new Union opportunities under the circular economy proposals, this pilot project has the following objectives:

- (1) identifying and mapping Lindane waste sites in the Union and cataloguing the actions taken by the various administrations to decontaminate Lindane waste sites and to assess the effectiveness of the actions carried out and the public investments made. This project will identify the strengths and weaknesses of POP and other pesticide decontamination as part of the endocrine disruptors debate;
- (2) facilitating the exchange of knowledge, best practices and technological transfer involved in HCH and Lindane decontamination actions throughout the Union so that this knowledge can be transferred to other regions with similar problems. This project will also disseminate the results of specific actions financed under previous LIFE and Horizon 2020 projects;
- (3) identifying possible additional Union funding for decontamination of sites in the Union and best practices in connection with projects to regenerate former industrial sites, in particular specific projects to be financed under the European Fund for Strategic Investments (EFSI) in close cooperation with the EFSI hub;
- (4) identifying research needs for developing further additional methods for more efficient and safe HCH and Lindane waste decontamination;
- (5) drawing up guidelines on a sustainable and environmentally-friendly approach to site redevelopment for regional/national/local administrations.

Building on the successful 2015 pilot project (operational in 2016-17) entitled 'Capacity building, programmatic development, and communication in the field of environmental taxation and budgetary reform' and the five thematic areas defined within that project (biodiversity and land use; air pollution; water stress; water quality; and the circular economy) to develop best practices in the field of environmental taxes, this preparatory action will provide the necessary tools for organisations to become better prepared to participate in policy-making processes at both national and Union level.

It will have four pillars:

- (1) developing capacity-building toolkits for civil society actors and decision-makers at local, regional, national and European levels to provide guidance for participating in environmental taxation reforms;
- (2) mapping out windows of opportunity across the five thematic areas for stakeholder engagement, and developing roadmaps for potential stakeholder actions relating to environmental reforms until 2030, both at European level and in a sample of Member States (e.g. three per thematic area);
- (3) organising strategic meetings relating to the five thematic areas to refine the roadmaps and promote the involvement of decision makers and civil society actors in the field of environmental taxation and budgetary reform;
- (4) looking into various types of subsidies where reforms would be important for greening the economy, including grants, tax exemptions (e.g. corporate taxes) and subsidised loans, together with modelling analysis for issues such as optimum design and compensation for those who lose out as a result of subsidy reform.

Remarks

On 22 October 2014, the European Parliament and the Council adopted Regulation (EU) No 1143/2014 (the 'IAS Regulation'), according to which 'invasive alien species' (IAS) means an 'alien species whose introduction or spread has been found to threaten or adversely impact upon biodiversity and related ecosystem services'.

IAS are one of the major causes of biodiversity loss. Stricter control of IAS is one of the six main targets of the Union Biodiversity Strategy adopted by the Commission in May 2011 and applicable until 2020. IAS can also cause significant harm to human health and the economy. The cost to the European economy is estimated to be at least EUR 12 billion per year.

The IAS Regulation introduces an EU-wide system to tackle this issue. As provided for by Article 4 of that Regulation, on 13 July 2016 the Commission adopted a list of IAS of Union concern (the 'Union List'). This is the list of priority species which require Union action to prevent, minimise or mitigate their adverse impacts. Member States need to carry out the following measures with regard to species on the list: (1) prevention, (2) early detection and rapid eradication of new invasions, and (3) management of invasions that are already widely spread.

The control and management of IAS on the Union List can impact large numbers of animals for sustained periods of time, thereby raising concerns for animal welfare, reflecting increasing public concern that invasive alien animals are sentient beings and, more generally, increasing civil society interest in the humane treatment of animals.

As clearly stated in the IAS Regulation, non-lethal methods can be used for the management of species: 'Member States and any operator involved in the eradication, control or containment of invasive alien species should take the necessary measures to spare avoidable pain, distress and suffering of animals during the process [...]. Non-lethal methods should be considered'.

However, it is up to the Member States to select measures 'appropriate to the local conditions'. Non-lethal and humane methods are rarely used because they are poorly developed and are not well known in Europe.

Remarks

This pilot project will establish an urban air quality sensor network (PM, NO₂, CO, BC) and implement enhanced quality assessment and control (QA/QC) strategies to collect reliable output data from that network. The network will consist of both fixed and portable sensors.

A sensor network will improve the availability of data on local air quality and on human exposure to pollutants because of the higher spatial and temporal resolution than traditional measurement systems (monitoring stations). However, because of the lower accuracy of air quality sensors advanced QA/QC strategies need to be implemented.

This research project will develop and implement on-line calibration procedures for individual air quality sensors. The unique hybrid approach of combining high-resolution modelling with high-resolution monitoring will also be demonstrated to improve the QA/QC procedures and eventually make the network output data more reliable. Furthermore, network optimisation procedures will be developed and implemented to guarantee maximum network performance.

Selected sensors will be tested and calibration algorithms will be set. Sensor performance before deployment (e.g. development of sensor calibration models), as well as methods that are applied to follow up sensor performance through the deployment phase, will be demonstrated. In addition, network and power supply issues will be tackled too.

The project will also include combining or assimilating the Internet of Things (IoT) sensor network and air quality modelling applications. The model chain can provide the air quality sensor network with an independent source of information to identify faulty sensor nodes or aid in providing a calibration framework. In addition, the abundance of data from a sensor network will reveal shortcomings in the modelling and result in better exposure assessment.

TITLE 08 — RESEARCH AND INNOVATION

TITLE 08**RESEARCH AND INNOVATION***Remarks*

These remarks apply to all the budget lines in this title.

Research and innovation activities under this title will contribute to two main research programmes, i.e. Horizon 2020 and Euratom. It will also cover research programmes of the Research Fund for Coal and Steel.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively, and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations are also intended to cover administrative expenditure, including expenditure on staff, whether covered by the Staff Regulations or not, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and initiatives necessary for preparation and monitoring of the Union's strategy on research, technological development and demonstration (RTD).

Revenue resulting from the cooperation agreement between the European Atomic Energy Community and Switzerland will be entered in Item 6 0 1 1 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contribution by outside bodies to Union activities will be entered in Item 6 0 3 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be made available under Items 08 02 50 01, 08 03 50 01 and 08 04 50 01.

Administrative appropriations of this title will be provided under Article 08 01 05.

Remarks

These budgetary remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the Framework Programme for Research and Innovation, which covers the 2014-2020 period and brings together all existing Union research and innovation funding, including the framework programme for research, the innovation related activities of the competitiveness and innovation framework programme and the European Institute of Innovation and Technology (EIT). The programme shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'A digital agenda for Europe' 'Resource-efficient Europe' and 'An industrial policy for the globalisation era', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. This appropriation will be used also for the completion of the previous research programmes (Seventh Framework Programme and preceding framework programmes).

This appropriation will be used in accordance with the Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

CHAPTER 08 02 — HORIZON 2020 — RESEARCH (*cont'd*)

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

08 02 01 *Excellent science**Remarks*

This priority of Horizon 2020 aims to reinforce and extend excellence in the Union's science base and ensure a steady stream of world-class research to secure the Union's long-term competitiveness. It will support the best ideas, develop talent within the Union, provide researchers with access to priority research infrastructure, and make the Union an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without pre-determined thematic priorities. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

Remarks

The fundamental activity of the European Research Council (ERC) shall be to provide attractive long-term funding to support excellent investigators and their research teams to pursue ground-breaking, high-gain/high-risk research. Particular priority shall be given to assisting excellent starting researchers to make the transition to independence by providing adequate support at the critical stage, when they are setting up or consolidating their own research team or programme. The ERC shall also give support, as necessary, to emerging new ways of working in the scientific world with the potential to create breakthrough results and facilitate exploration of the commercial and social innovation potential of the research which it funds.

Remarks

Activities under the 'Future and emerging technologies' (FET) specific objective shall support fundamental science and technology research exploring new future technologies by challenging current paradigms and venturing into unknown areas. In addition, FET activities shall address a number of promising exploratory research themes with the potential to generate a critical mass of inter-related projects that, together, make up a broad and multifaceted exploration of the themes and build a European pool of knowledge. Finally, FET activities shall support ambitious large-scale, science-driven research aiming to achieve a scientific breakthrough. Such activities will benefit from the alignment of European and national agendas.

Remarks

Research infrastructures activity will ensure the implementation and operation of the ESFRI (European Strategy Forum for Research Infrastructure) and other world-class research infrastructures, including the development of regional partner facilities, for 2020 and beyond. In addition, the integration of and access to national research infrastructures and the development, deployment and operation of e-infrastructures will be ensured. The activity will also encourage research infrastructures to act as early adopters of technology, promote research and development (R & D) partnerships with industry, facilitate industrial use of research infrastructures and stimulate the creation of innovation clusters.

08 02 02 **Industrial leadership***Remarks*

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

The aim of this activity is to help companies and other types of organisation engaged in research and innovation (R & I) to gain easier access, via financial instruments, to loans, guarantees, counter-guarantees and hybrid, mezzanine and equity finance. Debt and equity facilities will be run in a demand-driven manner, though the priorities of particular sectors or of other Union programmes will be targeted if top-up funding is made available. The focus is on attracting private investments into R & I. The European Investment Bank (EIB) and the European Investment Fund (EIF) will play an important role, as entrusted entities, in implementing each financial instrument facility on behalf of and in partnership with the Commission. Part of this appropriation will be used to reinforce, in the form of paid-in capital, the EIF's capital base.

CHAPTER 08 02 — HORIZON 2020 — RESEARCH (*cont'd*)08 02 02 (*cont'd*)08 02 02 03 (*cont'd*)*Remarks*

To support the participation of SMEs in Horizon 2020 a dedicated market-oriented instrument has been introduced, targeting all types of innovative SMEs that wish to develop, grow and internationalise. In addition, support will be provided to research intensive SMEs in transnational research projects and to women-led start-ups. Activities enhancing the innovation capacity of SMEs and improving the framework conditions for innovation will also be supported.

In accordance with Regulation (EU) No 1291/2013, support will be provided to innovation in SMEs through the implementation of an SME instrument under a single management system and implemented in a bottom-up manner. In accordance with Annex II to that Regulation within the target of allocating a minimum of 20 % of the total combined budgets for the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' for SMEs, a minimum of 5 % of those combined budgets will be initially allocated to the dedicated SME instrument. A minimum of 7 % of the total budgets of the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' will be allocated to the dedicated SME instrument averaged over the duration of Horizon 2020.

08 02 03 **Societal challenges***Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level and take a gender-sensitive approach while aiming for balanced participation of men and women.

Remarks

Former Item 08 02 03 01 (in part)

Lifelong health and well-being for all, high-quality and economically sustainable health and care systems, with health care becoming more personalised for more efficacy, and opportunities for new jobs and growth in the health sector and its related industries are the aims of this activity. To that respect activities will focus on effective health promotion and disease prevention (e.g. understanding the determinants of health, developing better preventive vaccines). Particular attention will be paid to gender- and age-related health specificities. In addition, emphasis will be placed on managing, treating and curing disease (notably via an increased personalisation of medicine), disability and reduced functionality (e.g. by transferring knowledge to clinical practice and scalable innovation actions, better use of health data, independent and assisted living). Furthermore, efforts will be made to improve decision-making in prevention and treatment provision, identify and support the dissemination of best practice in the health care sector, and support integrated care and the uptake of technological, organisational and social innovations empowering in particular older persons as well as disabled persons to remain active and independent. Finally, activities will be based on a gender-sensitive approach that recognises, amongst other things, the position of women in both the informal and the formal care sector.

Former Item 08 02 03 02 (in part)

This activity will focus on developing more sustainable and productive agriculture and forestry systems, while at the same time developing services, concepts and policies for thriving rural livelihoods. In addition, emphasis will be placed on healthy and safe foods for all as well as competitive food processing methods that use fewer resources and produce fewer by-products. In parallel, efforts will be made on sustainably exploiting aquatic living resources (e.g. sustainable and environmentally friendly fisheries). Low carbon, resource efficient, sustainable and competitive European bio-based industries will also be promoted.

Research efforts to ensure a secure, clean and efficient energy supply will focus on reducing the Union's energy consumption and carbon footprint and on securing a low-cost, low-carbon electricity supply. These efforts will build on the objectives and priorities of the Energy Union and the Strategic Energy Technology (SET) Plan.

At least 85 % of the budget appropriations will be allocated to the renewables and energy efficiency policy areas, including smart grids, energy storage and smart cities and communities.

Under this activity emphasis will be placed on resource-efficient transport (e.g. accelerating the development and deployment of a new generation of electric and other low or zero emission aircraft, vehicles and vessels) as well as on better mobility with less congestion and more safety and security (e.g. promoting integrated door-to-door transport and logistics). The focus will also be on reinforcing the competitiveness and performance of European transport manufacturing industries and related services, by, for instance, developing the next generation of innovative transport means and preparing the ground for the following one. Activities aiming at improving the understanding of transport-related socioeconomic trends and prospects, and at providing policymakers with evidence-based data and analyses will also be supported.

Remarks

Former Item 08 02 03 06 (in part)

The aim of this activity is to contribute to making European societies more inclusive, innovative and reflective, by promoting smart, sustainable and inclusive growth. Actions will support coordinated policymaking through the development of evidence, tools, forward-looking activities and pilots to increase transnational efficiency and economic impact of research and innovation policies and achieve a well-functioning European Research Area and Innovation Union. Actions will also aim at closing the innovation divide, ensuring societal engagement in research and innovation and fostering gender balance in research teams, promoting coherent and effective cooperation with third countries and developing an understanding of Europe's intellectual basis: its history and the many European and non-European influences, as an inspiration for our lives today.

Remarks

The aim of those activities is to fully exploit the potential of Europe's talent pool and to ensure that the benefits of an innovation-led economy are both maximised and widely distributed across the Union in accordance with the principle of excellence. By nurturing and connecting pools of excellence, the activities proposed will contribute to strengthening the European Research Area.

The activities will focus on teaming of excellent research institutions and low-performing RDI regions aiming at the creation of new (or significant upgrade of existing) centres of excellence in low performing RDI Member States and regions, twinning of research institutions, establishing 'ERA Chairs', a Policy Support Facility to improve the design, implementation, and evaluation of national/regional research and innovation policies, supporting access to international networks for excellent researchers and innovators who lack sufficient involvement in European and international networks and strengthening the administrative and operational capacity of transnational networks of national contact points, including through training.

Remarks

The Clean Sky 2 Joint Undertaking, a joint undertaking (JU) between the Commission and the European aeronautical industry, will build up on the results of its predecessor, Clean Sky. Clean Sky 2 JU's objective is to improve the environmental impact of European aeronautical technologies through advanced research and full-scale demonstration in green technology for air transport, thus contributing to the future international competitiveness of the aeronautical sector. The technical activity is developed through different technical areas and aims at building full scale demonstrators in all flying segments.

Remarks

The Fuel Cells and Hydrogen 2 (FCH 2) Joint Undertaking (JU) is a public private partnership between the Commission, the industry and the Research Grouping. FCH 2 JU's objective is to tackle a series of obstacles to the commercialisation of fuel cells and hydrogen technologies by reducing the cost of FCH systems, increasing their efficiency and demonstrating their feasibility, thus paving the way for a strong, sustainable and globally competitive fuel cells and hydrogen sector in the Union. This appropriation is intended to cover the operational costs of the FCH 2 JU.

FCH 2 JU shall continue to contribute to the implementation of Horizon 2020 and, in particular, of the specific objectives 'Making the transition to a reliable, affordable, publicly accepted, sustainable and competitive energy system' and 'Achieving a European transport system that is resource-efficient, environmentally friendly, safe and seamless' of the priority 'Societal challenges'.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

An important question that has emerged in recent years concerns clitoral reconstruction after female genital mutilation (FGM). Clitoral reconstruction is a relatively new surgical technique and in spite of the interest in the surgery, evidence is lacking as to its safety and effectiveness. Short- and long-term complications rates and long-term outcomes, including sexual function, body self-image and gender, social and aesthetic identity have been repeatedly indicated as future research gaps. More specifically, it is unclear which women could benefit from this surgical intervention and who might be better off with alternative care such as psycho-sexual therapy.

CHAPTER 08 02 — HORIZON 2020 — RESEARCH (*cont'd*)**08 02 77** (*cont'd*)08 02 77 09 (*cont'd*)

The project will answer the question below. Firstly, the existing (non-official) guidelines, protocols and good practices in the Union will be individualised and analysed. Secondly, complications rate, postoperative sexual desire, sexual function, vulvar pain, body self-image and gender identity will be studied through the use of a validated and standardised tool in women who have undergone the surgery, or will in the course of the project, and women who have not. Finally, recommendations for best practices for a care pathway will be developed for clitoral reconstruction in the Union.

Remarks

The Euratom research and training programme (2014-2018) ('Euratom Programme') complements Horizon 2020 in the field of nuclear research and training. Its general objective is to pursue nuclear research and training activities with an emphasis on continually improving nuclear safety and radiation protection, notably to contribute to the long-term decarbonisation of the energy system in a safe, efficient and secure way. By supporting this research, the Euratom Programme shall reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership, and societal challenges.

The indirect actions of the Euratom Programme are focused on two areas: nuclear fission, safety and radiation protection, and fusion research and development programme.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS (*cont'd*)08 03 01 **Operational expenditure for the Euratom Programme***Remarks*

The scope of the Euratom Programme for indirect actions includes nuclear fission safety and radiation protection as well as the fusion research and development which aim to ensure the success of the ITER project while enabling Europe to reap its benefits. It will reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership and societal challenges.

Remarks

The Euratom activity in the field of fusion will support common research activities undertaken by the fusion stakeholders involved in the implementation of the tasks derived from the fusion roadmap. In addition, it will support joint activities to develop and qualify materials for a demonstration power plant as well as to address reactor operation issues and develop and demonstrate all relevant technologies for a fusion demonstration power plant. The activity will also implement or support knowledge management and technology transfer from the research co-funded by this programme to industry, exploiting all innovative aspects of the research. Furthermore, the activity will support the construction, refurbishment, use and continued availability of key research infrastructures under the Euratom Programme.

CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS (*cont'd*)08 03 01 (*cont'd*)08 03 01 02 (*cont'd*)*Remarks*

The Euratom activity in the field of nuclear fission will provide support to joint research activities concerning the safe operation of reactor systems in use or which may be used in the future in the Union. It will also contribute to the development of solutions for the management of ultimate nuclear waste. In addition, the activity will support joint and/or coordinated research activities, placing emphasis on the risks from low doses from industrial, medical or environmental exposure. Furthermore, Euratom fission will promote joint training and mobility activities between research centres and industry as well as between different Member and Associated States while it will provide support for maintaining multidisciplinary nuclear competences.

CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS (*cont'd*)08 03 51 (*cont'd*)

Fusion research, which includes activities that range from basic research to technology development, construction of major projects and training and education activities. It offers the prospect of an almost limitless supply of clean energy, with ITER being the crucial next step in the progress towards this ultimate goal. The realisation of the ITER project therefore lies at the heart of the present Union strategy. It must be accompanied by a strong and focused European research and development programme on fusion to prepare for the exploitation of ITER and to develop the technologies and knowledge base that will be needed during ITER operation and beyond.

Fission research, which aims to establish a sound scientific and technical basis in order to accelerate practical developments for the safer management of long-lived radioactive waste, to promote safer, more resource-efficient and cost-effective nuclear energy and to ensure a robust and socially acceptable system of protection of man and the environment against the effects of radiation.

Remarks

The Research Fund for Coal and Steel funds every year innovative projects to enhance the safety, efficiency and competitive edge of the Union coal and steel industries. It was created in 2002 to build on the successes of the European Coal and Steel Community. The distribution of the budgets between coal (27,2 %) and steel (72,8 %) is defined in Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

Remarks

This appropriation is intended to cover expenditure supporting actions directly linked to the achievement of the objectives of the Connecting Europe Facility such as studies, meetings of experts, information and publications, software and databases or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

It is also intended to cover expenditure on technical and/or administrative assistance relating to the identification, preparation, management, monitoring, audit and supervision of the facility or actions.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the ‘European Economic Area’ Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Remarks

This appropriation is intended to cover expenditure on a set of measures designed to:

- coordinate a better regulatory framework for competition, investment and growth over the entire range of issues in the e-communications field: economic analysis, impact assessment, policy development, regulatory compliance,
- carry out and review the Union's policy on electronic communication networks and services with a view to launching initiatives designed to meet the challenges in this dynamically evolving sector (convergence of electronic communications with audiovisual and content delivery),
- facilitate the implementation of the digital single market, in actions related to broadband targets through regulation, policy and public financial assistance, including coordination with cohesion policy in the areas relevant to electronic communications networks and services,
- develop policies and coordination measures which will ensure that Member States implement their national broadband plans with reference to the fixed and mobile infrastructure and their possible convergence, including coherence and economic efficiency of public interventions at Union and Member State levels,
- develop policy and legislation with a particular focus on issues related to access and authorisation of e-communications networks and services, notably interoperability, interconnection, civil works, the independence of regulators and new measures to strengthen the single market,
- facilitate the monitoring and implementation of relevant legislation in all Member States,
- provide coordination of infringement proceedings, and input to relevant State aid matters,
- develop policy and legislation with a particular focus on issues related to retail and consumer issues notably net neutrality, switching, roaming, demand and use stimulation and universal service,
- promote, monitor and review the implementation of the Union roaming policy as established under Regulation (EU) 2015/2120 of the European Parliament and of the Council of 25 November 2015 laying down measures concerning open internet access and amending Directive 2002/22/EC on universal service and users' rights relating to electronic communications networks and services and Regulation (EU) No 531/2012 on roaming on public mobile communications networks within the Union (OJ L 310, 26.11.2015, p. 1),
- develop and implement consistent market-based regulations to be applied by national regulatory authorities and to respond to individual notifications from those authorities, notably regarding relevant markets, competition and appropriate regulatory intervention, in particular for next generation access networks,
- develop policies across the board which will ensure that Member States manage all uses of spectrum, including the different internal market realms such as e-communications, 5G (including broadband internet), and innovation,

CHAPTER 09 02 — DIGITAL SINGLE MARKET (*cont'd*)09 02 01 (*cont'd*)

- promote and monitor the implementation of the regulatory framework for communication services (including the mechanism provided for in Article 7 of Directive 2002/21/EC of the European Parliament and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services (Framework Directive) (OJ L 108, 24.4.2002, p. 33),
- enable third countries to pursue a policy of opening up their markets to the same extent as in the Union,
- promote and monitor the implementation of the radio spectrum policy programme (Decision No 243/2012/EU of the European Parliament and of the Council of 14 March 2012 establishing a multiannual radio spectrum policy programme (OJ L 81, 21.3.2012, p. 7)),
- develop policies on copyright at Union level, including on Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases (OJ L 77, 27.3.1996, p. 20),
- develop, implement and monitor policies in the context of the digital single market, on e-commerce in the Union, in particular those related to Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the Internal Market ('Directive on electronic commerce') (OJ L 178, 17.7.2000, p. 1), including the assessment of legal and economic barriers stemming from the internal market framework for electronic commerce or from related measures,
- support the implementation and take-up of policies in the context of eGovernment (in particular the eGovernment Action Plan 2016-2020) and eIDAS (Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC (OJ L 257, 28.8.2014, p. 73)) in order to advance the quality and innovation of public administrations and accelerate the large-scale public and private sector use of trusted identification and trust services in the digital single market,
- support actions to safeguard the continued stability and security of the internet governed by a genuine multi-stakeholder model to ensure that economic and social opportunities offered by electronic communications can be fully exploited,
- continue implementing the action lines put forward in the Commission communication of 12 February 2014 entitled 'Internet Policy and Governance — Europe's role in shaping the future of Internet Governance' (COM(2014) 072 final), and notably
- providing financial support for the Internet Governance Forum, the Pan-European dialogue on Internet Governance (EuroDIG) and the secretariat of the Internet Corporation for Assigned Names and Numbers (ICANN) Governmental Advisory Committee,
- promote the importance of ICTs in the development of the post-2015 sustainable development goals, including through capacity and confidence-building measures in the area of electronic communications addressed at third countries.

The specific objectives of those measures are:

- the formulation of a Union policy and strategy in the field of communication services and networks (including convergence between electronic communications and audiovisual environments, aspects related to the internet, etc.),
- the continuous development of radio spectrum policy in the Union,

CHAPTER 09 02 — DIGITAL SINGLE MARKET (*cont'd*)**09 02 01** (*cont'd*)

- the development of activities in the mobile and satellite communications sector, particularly as regards frequencies, and demand stimulation,
- an analysis of the situation and the legislation adopted in these areas, as well as State aid decisions,
- an analysis of the financial state of play and investment intensities in the sector,
- the coordination of these policies and initiatives as regards the international environment (e.g. WRC, CEPT, etc.),
- the development of activities and initiatives in relation to the digital single market, including on roaming,
- the development of activities and initiatives in relation to cohesion policy,
- the continuous development and maintenance of the database in relation to the radio spectrum policy programme and other actions related to monitoring and the implementation of the programme,
- the promotion and further advancement of the Union's vision of the multi-stakeholder model of Internet governance.

Those measures consist, inter alia, in preparing analyses and progress reports, consulting stakeholders and the public, preparing communications, legislative proposals and monitoring the application of legislation, and translations of notifications and consultations under Article 7 of Directive 2002/21/EC.

This appropriation is also intended to cover, in particular, contracts for analysis and expert reports, specific studies, evaluation reports, coordination activities, grants and the part-financing of certain measures.

In addition, it is also intended to cover expenditure on meetings of experts, communication events, membership fees, information and publications directly linked to the achievement of the objectives of the policy or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

TITLE 09 — COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY

CHAPTER 09 02 — DIGITAL SINGLE MARKET (*cont'd*)09 02 03 (*cont'd*)*Remarks*

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2) and operational expenditure relating to the work programme only (Title 3).

The Agency was set up to enhance the capability of the Union, the Member States and, as a consequence, the business community to prevent, address and respond to network and information security problems. In order to achieve this goal, the Agency will be developing a high level of expertise and stimulating broad cooperation between actors from the public and private sectors.

The Agency's aim is to provide assistance and to deliver advice to the Commission and the Member States on issues related to network and information security falling within its competencies and to assist the Commission, where called upon, in the technical preparatory work for updating and developing Union legislation in the field of network and information security.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 23 of Commission Delegated Regulation (EU) No 1271/2013 constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

Pursuant to Article 208 of the Financial Regulation and the corresponding Articles of the framework Financial Regulation for each of the bodies set up by the Union, the role of the European Parliament and the Council has been strengthened.

The establishment plan of the Agency is set out in the Annex 'Staff' to this section.

The Union contribution for 2018 amounts to a total of EUR 10 529 000. An amount of EUR 38 436 coming from the recovery of surplus is added to the amount of EUR 10 490 564 entered in the budget.

Remarks

This appropriation is intended to cover the Office's staff and administrative expenditure (Titles 1 and 2), and operational expenditure relating to the work programme only (Title 3).

BEREC acts as a specialised and independent expert advisory body assisting the Commission and the national regulatory authorities in the implementation of the Union regulatory framework for electronic communications in order to promote a consistent regulatory approach across the Union. BEREC is neither a Union body nor does it have legal personality.

The Office is established as a Union body with legal personality, providing BEREC with professional and administrative support in carrying out the tasks conferred on it by Regulation (EC) No 1211/2009.

The Office must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 23 of Commission Delegated Regulation (EU) No 1271/2013 constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

Pursuant to Article 208 of the Financial Regulation and the corresponding Articles of the framework Financial Regulation for each of the bodies set up by the Union, the role of the European Parliament and the Council has been strengthened.

The establishment plan of the Office is set out in the Annex 'Staff' to this section.

The Union contribution for 2018 amounts to a total of EUR 4 331 000. An amount of EUR 206 664 coming from the recovery of surplus is added to the amount of EUR 4 124 336 entered in the budget.

Remarks

This appropriation is intended to cover the following measures:

- the implementation of the Directive 2010/13/EU of the European Parliament and of the Council of 10 March 2010 on the coordination of certain provisions laid down by law, regulation or administrative action in Member States concerning the provision of audiovisual media services (Audiovisual Media Services Directive) (OJ L 95, 15.4.2010, p. 1),
- the monitoring of the evolution of the media sector, including pluralism and freedom of the media and media literacy,
- the collection and dissemination of economic and legal information and analysis concerning the audiovisual sector and converging media and content industries.

It is also intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

Legal basis

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

Remarks

In order to protect media freedom and pluralism and to promote professionalism in journalistic content, the project will improve understanding of the consequences and challenges of digital developments through a press council forum, and in parallel support the transition of media self-regulatory bodies to the online world and engage them in discussions with internet intermediaries and internet media stakeholders.

CHAPTER 09 02 — DIGITAL SINGLE MARKET (*cont'd*)**09 02 77** (*cont'd*)09 02 77 06 (*cont'd*)

Suggested activities:

- conduct a survey to provide an in-depth examination of the state and models of media self-regulation in the digital environment, to bring clarity on how to achieve, in a converged media environment, the traditional goals of media regulation (i.e. a pluralistic and diverse media landscape in which the media benefit from independence from political, commercial and other influences and are accountable to the public),
- compile the first online database on the current functioning of media self-regulatory bodies and promote the work of press councils in Europe,
- develop a pan-Union working group on the digital challenges to applying the recommendations of the survey,
- provide direct support to newly established press councils in Europe,
- include press/media councils in a global dialogue on media ethics in the digital age (participation at global internet conferences etc.),
- organise regular meetings with internet intermediaries with the objective of achieving online recognition of media content already under the supervision of a press council.

Remarks

Media innovations are called for by political and economic developments.

Democracy requires quality news and the media need innovations. As platforms dominate, the risk increases of a 'post-truth' era where 'fake news' and populism flourish. The recent white paper on 'The Future of Europe' states: 'We want to live in a democracy with a diversity of views and a critical, independent and free press'.

COMMISSION

TITLE 09 — COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY

CHAPTER 09 02 — DIGITAL SINGLE MARKET (*cont'd*)09 02 77 (*cont'd*)09 02 77 07 (*cont'd*)

The number of journalists and news outlets is shrinking (apart from broadcasting, which is largely publicly funded). Subsidising endangered models is not the solution. Innovation requires cross-border cooperation, mobility and faster careers for 'fresh blood'. An 'Erasmus for media professionals' — financing cross-border exchanges between media professionals under whatever project name — should be piloted.

This pilot project fits policy trends and is widely called for by the media. It focuses not only on mobility of media professionals, content exchanges and journalism quality, but also on media innovation and sustainable business models. Moreover, it includes a 'reciprocal exchange' for journalists and other media professionals, with all participating media both hosting and sending candidates. This will ensure the quality of training and maximise the 'return on investment' for the sending media. The pilot project will be organised in thematic waves. It will involve not only journalists, but also communication, marketing and IT professionals. A steering committee will be set up and involve media stakeholders.

Several policy trends lead to this media skills pilot project. First, consideration is being given to making skills programmes more sector-specific under the post 2020 Multiannual Financial Framework, complementing education programmes such as Erasmus+ and Erasmus Pro without affecting their budgets. Secondly, the digital single market is currently only a horizontal concept; its pending review could lead to 'vertical' media sector initiatives. Thirdly, the media sector is seen by the Union chiefly as a communication channel or an area for press freedom issues, and not as an economic sector in crisis. The Union's R&D programmes are mostly unrelated to this sector. This pilot project will test a concept suited to a strategic industry in crisis, with low risks and high impact. Finally, the project will build on the results of the earlier Commission feasibility study on 'Erasmus for Journalists' (2011).

Interviews with 30 editors and publishers in the #Media4EU series provided the basis for this project. All this translates into strong support in media and political circles (project findings and support list to be available). Fifty media organisations, experts and associations already back this project, as do a number of MEPs from several groups. (A fuller list of those providing moral support, including 14 MEPs, is available online under 'Yes, rising stars for media innovation' (Erasmus4media, provisional name).)

To ensure innovation, the principles of independence and effectiveness should be respected.

Several elements have been taken into account — previous attempts based chiefly on exchanging content, training journalists and good external inspirations — focusing on sustainable media innovations, and not just on coverage of European topics. Indeed, there are several ways of furthering media coverage at European level, but typically they are not sustainable after the Union support ends.

Media professionals are most mobile, innovative and credible when they have between five and 10 years of professional experience. Hence, the core target group will be around 25 to 30 years old, but there will be exceptions.

The thematic waves will be set up in cooperation with relevant media associations in order to match like-minded media and quality ideas. Topics for calls for proposals (not exhaustive) could be broken down by sub-sector (business media, centre-right, centre-left, green, community radio, etc.), by innovation area (data journalism, light video, mobile, etc.) or by editorial angle (investigation, European elections, migration, development, etc.). Participants from selected pairs will swap locations for one to three months, as well as taking part in initial training and debriefing/follow-up sessions, ensuring cooperation for nearly a year within each 'thematic wave'.

CHAPTER 09 02 — DIGITAL SINGLE MARKET (cont'd)

09 02 77 (cont'd)

09 02 77 07 (cont'd)

The project will be very cost-effective and have a major impact. Project promotion and preselection of candidates will take into account not only individual profiles but also the project ideas they wish to explore (ensuring a good return on investment, in terms of time and pay, for their employers).

Depending on the budget available, up to several hundred 'rising stars' and media organisations could be linked up. The project will not pay participants' salaries, only travel and training expenses (in addition to promotion, selection and administration). Therefore the cost per participant will be reasonable; there will be real results and a good budget multiplier effect. Experience suggests that many more applications will be received than there are places available. Selection will therefore be strict, providing a boost to participants' careers and a good 'brand'.

A process is suggested for media independence, impact for participants and effectiveness. To ensure editorial reach and business innovation, this pilot project originates with media professionals, who should make up most of the project steering committee.

To also ensure a focus on young professionals (not students) and on sector-specific skills, the right Commission department should be involved. The project could be administered either by DG GROW (a 'sectoral leg' of its 'Erasmus for Young Entrepreneurs' programme), or by DG CONNECT (a new media directorate complementing its R&D-originated actions with innovation-enabling skills). Different procedures exist, from open calls to restricted selection, in order to ensure prompt select of a good 'managing organisation'.

Remarks

New technologies are dramatically and constantly changing the dynamics of opinion-making and the media landscape. While they allow easy distribution of information of public interest to wider audiences, fostering pluralism, the way in which information is created, searched for and distributed online may accentuate polarisation, exposing individuals to news, sources and ideas that match their stated preferences. This can significantly reduce the scope for encountering and debating opposing viewpoints and, as such, may pose a risk to media pluralism and democracy itself. As the impact of online information is growing, citizens are increasingly forming their opinions through information distributed online. This poses severe risks to effective pluralism when that information is false or is 'misinformation' or 'disinformation'. While some policy responses to proliferation of misinformation call on online intermediaries and social media platforms to adopt self-regulatory measures to limit the circulation of false and fake information, it is evident that entrusting those private companies with filtering information online may lead to a limiting of freedom of expression too.

This preparatory action will support the development of a study on a set of indicators to measure the risks to media pluralism in the online environment. The Union has already invested resources in devising a media pluralism monitor that can assess risks to media pluralism and freedom. This comprehensive tool has proved effective and useful for assessing risks to media pluralism at country level. It is of the utmost importance that the methodology of that tool should be reusable for a new monitor that fully takes into account the online dimension of pluralism. The preparatory action will map the threats to information pluralism online, create a tool to assess the risks to pluralism online and test it in the 28 Member States.

This appropriation is intended to support entities with a public mission for the installation of local wireless access points in centres of public life such as public administrations, libraries, health centres and outdoor public spaces. Such local wireless connectivity should be provided on a non-commercial basis or be ancillary to the provision of other public services.

The expenses shall also cover programme support actions as defined in point (7) of Article 2 of Regulation (EU) No 1316/2013.

Legal basis

Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and in particular Article 4(4) thereof.

Remarks

This appropriation is intended to cover earlier commitments relating to the Safer Internet programme.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation.

Legal basis

Decision No 1351/2008/EC of the European Parliament and of the Council of 16 December 2008 establishing a multiannual Community programme on protecting children using the Internet and other communication technologies (OJ L 348, 24.12.2008, p. 118).

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the Framework Programme for Research and Innovation, which covers the 2014-2020 period, and for the completion of the previous research programmes (Seventh Framework Programme and preceding framework programmes) and previous information and communication technologies programmes (ICT PSP (2007-2013) and programmes prior to 2007).

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'Digital Agenda for Europe', as well as in the development and functioning of the European Research Area. Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

CHAPTER 09 04 — HORIZON 2020 (*cont'd*)

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively, and research and innovation capacities in the whole of the Union and ensuring optimum use thereof.

In Horizon 2020, gender equality is addressed as a cross-cutting issue in order to rectify imbalances between women and men and to integrate a gender dimension in research and innovation content. Particular account will be taken of the need to step up efforts to enhance the participation at all levels, including decision making, of women in research and innovation.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Administrative appropriations of this chapter will be provided under Article 09 01 05.

09 04 01 *Excellent science**Remarks*

This priority of Horizon 2020 aims to reinforce and extend excellence in the Union's science base and ensure a steady stream of world-class research to secure the Union's long-term competitiveness. It will support the best ideas, develop talent within the Union, provide researchers with access to priority research infrastructure, and make the Union an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without predetermined thematic priorities. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

Remarks

The specific objective is to foster radically new technologies by exploring novel and high-risk ideas building on scientific foundations. By providing flexible support to goal-oriented and interdisciplinary collaborative research on various scales and by adopting innovative research practices, the aim is to identify and seize opportunities of long-term benefit for citizens, the economy and society.

Activities under the 'Future and Emerging Technologies' specific objective shall address the entire spectrum of science-driven innovation: from bottom-up, small-scale early explorations of embryonic and fragile ideas to building new research and innovation communities around transformative emerging research areas and large and federated research initiatives built around a research agenda aiming to achieve ambitious and visionary goals.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

CHAPTER 09 04 — HORIZON 2020 (*cont'd*)**09 04 01** (*cont'd*)09 04 01 02 (*cont'd*)*Remarks*

The specific objective is to endow Europe with world-class research infrastructure which is accessible to all researchers in Europe and beyond and fully exploit their potential for scientific advance and innovation.

Activities will focus on development, deployment and operation of e-infrastructure. In addition, activities for innovation, strengthening human resources for research infrastructure, policy development and international cooperation are foreseen.

An integrated and service-driven approach will be taken to deliver e-infrastructures that respond to the needs of European science, industry and society in terms of development and deployment of integrated e-infrastructure services for a wide range of research communities ('de-siloing'). Maximising coordination and synergies with e-infrastructure development at national level and expanding e-infrastructure beyond science as such, to the science-industry-society triangle.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

09 04 02 **Industrial leadership***Remarks*

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

*Remarks**Former Item 09 04 02 01 (in part)*

The specific objective is to maintain and build global leadership in enabling technologies, which underpin competitiveness across a range of existing and emerging industries and sectors. In line with the digital single market, the specific objective of ICT research and innovation is to enable Europe to develop and exploit the opportunities brought by ICT progress for the benefits of its citizens, businesses and scientific communities.

ICT underpins innovation and competitiveness across a broad range of private and public markets and sectors, and enables scientific progress in all disciplines. Over the next decade, the transformative impact of digital technologies, ICT components, infrastructures and services will be increasingly visible in all areas of life.

Activities will strengthen the Union's scientific and technology base and insure its global leadership in ICTs, help drive and stimulate innovation through ICT use and ensure that ICT progress is rapidly transformed into benefits for Europe's citizens, businesses, industry and governments. The activities under the 'Leadership in information and communications technology' specific objective will be primarily based on research and innovation agendas defined by industry and business, together with the research community and will have a strong focus on leveraging private sector investment.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

09 04 03 **Societal challenges***Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

The vision of the eHealth action plan 2012-2020 is to utilise and develop e-health to address several of the most pressing health and health systems challenges of the first half of the twenty-first century, namely:

- to improve chronic disease and multi-morbidity (multiple concurrent disease) management and to strengthen effective prevention and health promotion practices,
- to increase the sustainability and efficiency of health systems by unlocking innovation, enhancing patient-/citizen-centric care and citizen empowerment and encouraging organisational changes,
- to foster cross-border healthcare, health security, solidarity, universality and equity,
- to improve legal and market conditions for developing e-Health products and services.

09 04 03 01 (cont'd)

ICT-based products and services have demonstrated their capacity to help address these major challenges in the form of personalised health, telehealth and telecare solutions, service robotics for health and care, support for prolonged active and independent living and home-based care. It is also a major new growth opportunity as large new markets for ICT-based products and services emerge to address health, demographic change and well-being.

Activities will cover development and exploitation of ICT for health, well-being and 'ageing well' solutions. This will build on the emergence of underpinning technologies arising out of ICT in LEIT such as micro-nano systems, embedded systems, robotics, internet of the future and cloud technologies. It will also build on further development of security- and privacy-enhancing technologies.

The ambient assisted living research and development joint programme will also be supported to contribute to market availability and exploitation of ICT-based products and services and the ICT innovation and pilot projects will be further supported in response to the European Innovation Partnership on Active and Healthy Ageing and the eHealth 2020 action plan.

Activities will cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

CHAPTER 09 04 — HORIZON 2020 (*cont'd*)**09 04 03** (*cont'd*)09 04 03 02 (*cont'd*)*Remarks**Former Item 09 04 03 02 (in part)*

The specific objective is to foster inclusive, innovative and reflective European societies in a context of unprecedented transformations and growing global interdependencies.

Activities will cover four main areas: ICT-enabled public sector innovation, understanding and preserving Europe's intellectual basis and cultural heritage, learning and inclusion.

ICT-enabled public sector innovation refers to the use of ICT for the creation and implementation of new processes, products, services and methods of delivery which result in significant improvements in the efficiency, effectiveness and quality of public services. The future public administrations should be digital and cross-border by default. Activities will cover fostering efficient, open and citizen-centric public services, involving the public sector as an agent for innovation and change as well as cross-border innovation measures or seamless delivery of public services.

The aim of the second challenge is 'to contribute to an understanding of Europe's intellectual basis and cultural heritage: its history and the many European and non-European influences; as an inspiration for our lives today', as well as to facilitate the access and exploitation of this cultural heritage.

The aim of the third challenge is to support the widespread adoption of ICT in schools and for training in Europe.

The fourth challenge is to get the elderly (aged 65 and above), the unemployed and low-educated persons, migrants, people in need of care, people living in remote or poorer areas, persons with disabilities, and the homeless people to fully participate in society. Activities will focus on empowering them with the necessary digital skills and providing them with access to digital technologies. Activities aiming at fostering a better consideration for inclusiveness and responsibility aspects in ICT-related innovations will also be supported.

Activities will cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

Part of the support of the Union to the COST intergovernmental framework for transnational cooperation among researchers, engineers and scholars across Europe will also be covered from this appropriation.

Remarks

Former Item 09 04 03 03 (in part)

The specific objective is to foster secure societies, contributing to the protection of freedom and security of the Union and its citizens.

The integrated portfolio of activities will develop solutions to protect our society and economy against accidental or man-made disruptions of the information and communication technologies our society and economy depends on; providing solutions for end-to-end secure ICT systems, services and applications; safeguarding the human right of privacy in the digital society; providing the incentives for the industry to supply secure ICT; stimulating the uptake of secure ICT.

The aim is to ensure cyber security, trust and privacy in the digital single market, whilst at the same time improving the competitiveness of the Union's security, ICT and service industries. Another objective is to increase users' trust in their participation in the digital society and overcome citizens' concern with the disclosure of their personal information online because of security issues (e.g. internet usage for banking or purchases).

Activities will cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

Higher education and research are rapidly evolving. Creating new knowledge technologies requires training for teachers, students and researchers alike, as well as any individual who needs to adapt to new market demands. Many endeavours, such as citizen science, scientific discovery games and MOOCs (Massive Open Online Courses), show that — like many other sectors — education and research are rapidly evolving. In order to fully exploit the potential of this new type of learning system for the labour market, methods are needed to validate the quality of their learning. Consequently, a mechanism has to be found that allows individuals to assess their competencies (creating their individual knowledge map), the knowledge required on the labour market and the learning path that can link the two, hence providing the right content for each individual. Only by doing so can it be ensured that the right content is available to the right target group of individuals. In order to be able to track the learning path, there must be validation of the knowledge acquired, which is possible through online certificates or badges.

This type of social and technological innovation can benefit all citizens regardless of their level of resources, the languages they speak, their age, their health or their cultural capital. Such an action will thus help bridge the knowledge gap and reduce unemployment by helping young unemployed people in particular to maximise their learning and find new career opportunities.

The overall objective of this preparatory action is to demonstrate a Europe-wide ICT-based system shortening the up- and re-skilling time for European citizens, in particular the unemployed, by maximising the use of online courses and open education resources. The action will develop and deploy a technological platform integrating online services, including inter alia the following modules:

- (1) skill/competence mapping;
- (2) tailored learning roadmaps (via educational services, including specific open educational resources);
- (3) mechanisms for the validation of knowledge acquired.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

REIsearch seeks to accelerate full use of Europe's intellectual capital to the benefit of citizens, entrepreneurs and scientists through new media tools. Growing from a successful pilot project, this preparatory action will expand the work of the platform.

The preparatory action involves expansion of an e-infrastructure platform developed around the concept of social networks which facilitates direct communication between researchers, policymakers and citizens, with the involvement of media, across the European Research Area (ERA).

Inspired by the 'societal challenges' outlined in Horizon 2020, REIsearch supports the creation of virtual clusters around key topics, creating a direct path for open dialogue between science and society.

The action promotes active interaction between science, citizens and policymakers through the involvement of European media and social networks, in order to support participation of citizens in research agenda-setting, ongoing research processes and discussions on the results and impacts of research for society, policy and further research. It supports the use of evidence-based policymaking in all Union actions, in line with the drive for better regulation. REIsearch supports science-based policymaking by affording access to scientific information across the spectrum and providing a critical mass of knowledge to inspire confidence in any users of the platform. It is a neutral platform with no bias as to national origin or disciplinary background. Discussions are linked to the scientific evidence they are based on.

Building on the successful 14-month pilot project, REIsearch will expand and grow to cover the full range of societal challenges, enabling users to engage with the issues of their choice and self-determine the clusters and direction of discussions. Alongside the platform itself, REIsearch will integrate a range of tools such as big data/social media data-mining, applications of new artificial intelligence and semantic web applications to extract information about the trends and flows of the scientific consensus and discussions.

The objectives of the preparatory action are:

- to expand and fortify the reliable, non-profit e-infrastructure (similar to social networks) launched as a beta in 2015 to promote stronger communication and dialogue across disciplines, sectors and borders,
- to analyse and assess the results of the beta launch and develop the search algorithms and data-mining mechanisms underpinning the trend-mapping capabilities,

CHAPTER 09 04 — HORIZON 2020 (cont'd)**09 04 77** (cont'd)

09 04 77 08 (cont'd)

- to further promote interoperability with existing research databases and platforms, with a single access point to research results from all countries and disciplines (interoperability) and with linkage to existing European initiatives,
- to expand the number of virtual clusters to include all the 'societal challenges' that bring together researchers, industry, citizens and policymakers to enhance collaboration on these key themes,
- to create a direct dialogue between those virtual clusters and citizens by linking in with leading European media.

The preparatory action seeks to respond to some of the needs and concerns outlined in the Digital Agenda and Horizon 2020. It also supports the underlying infrastructures of the European Research Area, which serves as a vital engine in unlocking Europe's potential for innovations that could lead to jobs and economic growth.

Current issues addressed by the action: recent ICT developments have shown how the power of social networks and e-infrastructures can help harness the potential of networks.

The problems of the existing online environment for research e-infrastructures are:

- size: the majority of existing networks are too small to go beyond a specific field and research group (according to Commission statistics the average size of an online network of researchers is around 100 users). There is a need for a large interoperable network that allows researchers and other stakeholders to find the information they are looking for across sectors and disciplines, using a familiar tool,
- reach: traditionally, networks bring together users within the same field and sector. In order to unlock Europe's innovation capacity, transdisciplinary (intersectoral and interdisciplinary) connections need to be made easier,
- reliability: one of the major reasons why big research networks have not been successful is that existing relations are still based on personal connections and online identities are not trusted. In order to really foster transdisciplinary connections, a system is needed in which identity verification creates a secure environment for all users,
- trust: this is a pivotal aspect for any network. Market studies suggest that a European social network/e-infrastructure would need to be developed in collaboration with stakeholders, be non-profit and have a clear intellectual property policy developed together with researchers.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The preparatory action will seek to ensure a coherent, coordinated and sustainable approach, to secure, develop and enhance engagement of all relevant stakeholders from Eastern Europe (business, academia, research organisations and civil society) and to inform, prepare and help regional entities from this part of Europe as regards developing projects under the Commission's smart factories scheme. The action will cover those regions in Eastern Europe hard hit by deindustrialisation where no smart factories have been planned or brought into operation and those whose industrial capacity needs to be improved.

The preparatory action will also seek to identify, assess and support exploitation of the industrial potential in a selected region, and to explore its innovation potential and the scope for its expansion. It will clearly target identification of industrial competitive advantages and the potential for specialisation at regional level based on an entrepreneurship discovery process, establishing a governance structure and framework for continuous collaboration between businesses and researchers, and support for preparation of the relevant policy documents.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Cybercrime is a growing industry. In today's extremely interconnected world, child sexual abuse material (CSAM) sadly transcends national boundaries to an extent never seen before. It is arguably one of the most heinous forms of cybercrime. In recent years the challenges of this horrific crime have grown as technology has become more advanced and the perpetrators and criminal facilitators and producers of CSAM have become more elusive. In addition, on a daily basis, hotline content analysts from the INHOPE network come across more graphic and violent content, with ever-younger victims, including pre-speech children, as the demand for new material grows.

CHAPTER 09 04 — HORIZON 2020 (cont'd)

09 04 77 (cont'd)

09 04 77 10 (cont'd)

INHOPE member hotlines offer public service value so that digital citizens can take action, by anonymously reporting suspected CSAM if they come across it when they are online. With dedicated police units overstretched globally, national hotlines are essential partners for the police in ensuring that they only receive images that are confirmed CSAM (according to the legislation in the hosting country). INHOPE hotlines have proven instrumental in the process of 'Notice-and-Takedown' across all Member States and beyond since 1999, growing the INHOPE network membership every year, while additionally serving the victim identification imperative.

Because every child has a right to a childhood free from violence and abuse and to be protected from harm, this pilot project will conduct qualitative research to identify the challenges faced by hotlines tackling child sexual abuse in Member States. This research will help create a framework of best practices that can support the development and improvement of hotlines across the Union. What may work in one Member State will not necessarily work in another: Research is therefore required to help navigate the challenges that Member States may face and determine how to work with various stakeholders such as law enforcement, ministries and industry. By means of qualitative research the most important challenges faced by national hotlines tackling child sexual abuse in Member States will be identified. The research will take the form of interviews, case studies, surveys etc. with the intention of identifying the challenges and obstacles faced by hotlines.

Given its unique position and expertise in the field, this framework could be developed by INHOPE, the global network of Internet hotlines covering all Member States.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

The pilot project will address the potential impacts and the need for transparency in algorithms for the benefit of citizens and democracies, and to contribute to the development of the digital single market.

The pilot project could focus on the following issues:

— raising end-user awareness of the role of algorithms in digital societies,

- assessing the spectrum of potential positive and negative impacts of algorithms and reflecting on the technical and non-technical aspects leading to discriminatory practices. The assessment could highlight likely opportunities unlocked by algorithms and look at how algorithms impact and create opportunities for innovation, SMEs, privacy, free speech and the free flow of information, and how algorithmic transparency can be balanced with, for example, protecting commercial trade secrets,
- considering, on the basis of the results of the assessment and involving appropriate stakeholders, an appropriate and proportionate policy response addressing the need for transparency, trust and awareness-raising, but also the institutional and capability implications for potential government oversight. This could include monitoring and conducting sporadic tests on algorithms to ensure that algorithms respect ethical and competitive best practices and compiling basic information that is intelligible for customers and citizens. This would provide users with a better understanding of basic types of algorithmic criteria and enable them to make informed choices,
- getting the governance of algorithmic decision-making right, which is a challenge for policymakers and all actors involved. Governments need to ramp up their understanding and use of relevant tools to tackle effectively the challenges raised by algorithmic decision-making. There is a need to further the cooperation and collaboration of governments across Europe and build a flexible approach tailored to a global digital world. This should be based on a better understanding of what policy choices can be made in response to the variety of issues emerging, from technical challenges to ethical and legal considerations. The complexity of these issues should be reflected in the guiding policy objectives, from safeguarding fundamental rights to stimulating an innovative environment in Europe.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Supporting dynamic, growth-oriented SMEs and start-ups in familiarising themselves with digital technologies so that they integrate them into their core activities represents a crucial factor in helping companies to develop their business, enhance their innovative capacity and enter new markets, thus increasing their competitiveness. The vast majority of SMEs, especially small businesses operating in traditional sectors, face great difficulties in understanding the potential of new digital technologies — such as data analysis, e-commerce, robotics, microelectronics and mechatronics — and the benefits deriving from using them in how they operate, in their production processes and in their relations with customers and clients.

In this context, the main objective of the pilot project is to match growth-oriented SMEs with highly skilled digital experts in order to make up for the lack of adequate technological competences in companies, equipping them with the appropriate tools and enabling their digital transformation, as an essential instrument for internationalisation either within the internal market or in third countries.

Quite often growth-oriented SMEs and start-ups cannot use their own human resources to follow the constant evolution of new technologies, even on a part-time basis. This is why matching with a digital enabler will allow companies to discover and apply suitable digital technologies, to explore new opportunities in terms of innovation and to enhance their capacity to enter new markets, including within the Union. It will also provide an opportunity for young digital enablers — experts with specific skills coming from incubator centres or universities — to make use of their technological knowledge inside an established SME.

The project will allow young highly skilled digital experts (not simply IT managers) to work in growth-oriented SMEs established in another Member State for up to six months according to the digitalisation needs of the companies.

Key elements of the pilot project are:

- support for the matching phase (company selection, job vacancies — also involving the EURES Portal — and recruitment),
- placement of digital enablers in SMEs (Union grant covering consultancy services offered by them),

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action will enhance the potential of digital hubs and accelerators across Europe by making them work together, develop common projects and construct a digital community that can increase European competitiveness in this sector. The action will therefore connect all the European digital stakeholders and hubs in order to develop an integration and cooperation plan designed to generate common projects and create European digital accelerators that can use the full potential existing across Europe. The action will target the most innovative hubs and accelerators, with high added value and multiplier effect potential. The preparatory action will therefore involve identification of the network of hubs and accelerators and of their comparative advantages, assessment of their current status and their development and cooperation potential, creation of an active and animated experts and stakeholders working group, generation of a common integration plan based on concrete projects and elaboration of policy solutions that can help reinforce ties and cooperation between the European hubs and accelerators.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action will ensure a coherent, coordinated and sustainable approach, ensure, develop and enhance engagement of all relevant stakeholders interested in the digitalisation of European industry (business, academia, research organisations and civil society) and inform, prepare and help them develop projects designed to face the new transformations.

The action will cover those regions and sectors heavily affected by digitalisation which do not have a digitalisation programme/plan and those whose industrial capacity needs to be improved.

This preparatory action will identify, assess and support exploitation of the industrial potential of the digitalisation process and explore its innovation potential and possibilities for expansion.

It will clearly target identifying the industrial competitive advantages and the potential for digital specialisation at sector level based on entrepreneurship discovery processes, establishing a governance structure and framework for continuous collaboration between businesses and researchers, and support for preparation of the necessary policy documents.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project will directly encourage and support adoption of the relevant accessibility requirements of European standard EN 301 549 V1.1.2 by awarding grants to firms and associations or other not-for-profit groupings which will incorporate settings that meet the requirements of this European standard as the default option in their authoring tools or platforms. Special priority will be given to open source or free-to-use tools and platforms. These grants will also be open to Member State authorities that develop internal web authoring tools or platforms for public sector websites and may be used to hire user testing services.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project will develop an interactive online map summarising the existing best practices developed for better integration of vulnerable/disadvantaged groups in the Information Society across the 28 Member States.

Best practices will include information on existing tools, practices, capacities, systems, infrastructure and standards.

This pilot project will help stakeholders understand what already exists and exploit the experience derived from existing tools at local/national and European levels.

It will allow stakeholders to avoid duplication and 'reinventing the wheel', to consolidate knowledge in order to better integrate vulnerable communities in Europe and to step up information exchange between public, private and civil society stakeholders.

CHAPTER 09 04 — HORIZON 2020 (*cont'd*)**09 04 77** (*cont'd*)09 04 77 16 (*cont'd*)

The project could be developed in coordination with the Global Internet Policy Observatory (GIPO) and the European Internet Forum.

Direct outcome: interactive online map hosted by an online platform mapping existing best practices.

Global overview

Aspects of the Information Society are present in all spheres of life and have become an integral part of daily activities at work, at home and when socialising.

The Internet and ICTs are a catalyst for change; they are also a perfect tool that can empower vulnerable people to fully discover the opportunities offered by the Information Society and fully enjoy their human rights as Union citizens.

ICTs can provide an essential, enabling environment for the empowerment of all, especially people living in vulnerable circumstances, and help address the demographic changes that are taking place throughout the Union.

Target groups of vulnerable people are:

- people with disabilities and the elderly,
- marginalised young people and children,
- the unemployed persons or people with social problems,
- people defined as marginalised who are affected by current socio-economic or political events (current vulnerabilities).

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

Building on the infrastructure of a start-up hub (e.g. Business Link) in Szczecin, the project will bring together entrepreneurs and Western Pomeranian university students, researchers and teachers to establish a more start-up-friendly environment.

To change what is still an unfavourable start-up market within the Union, including in Poland, a start will be made with a pilot project to build an ecosystem meeting three basic needs of the market: sharing knowledge, new ideas and know-how in order to build a start-up scheme.

Remarks

This preparatory action will address the need to improve digital skills through education and professional training more actively and homogeneously throughout Europe. Despite the efforts made at European and national level, such as the Digital Skills for Jobs Coalition initiatives, there is still a huge digital skills gap to contend with in society. Existing initiatives are of great benefit in tackling Member States' current challenges. Therefore, the action should not duplicate those initiatives; rather, it should complement them instead. The Academy will address the lack of a well-developed, transnational network in Europe that supports and facilitates exchanges between and coordination of all stakeholders in this area. It could showcase, scale and multiply European best practices in training and in developing the digital skills of different target groups.

The European Digital Academy should be considered a possible long-term solution to the current challenges resulting from the combined impact of increasing robotisation and digitisation of the workspace, on the one hand, and, on the other, the lack of digital skills in society.

CHAPTER 09 04 — HORIZON 2020 (cont'd)**09 04 77** (cont'd)

09 04 77 18 (cont'd)

The European Digital Academy will have the following remit:

- Making the workforce fit for the new digital era by ensuring that employees can update their e-skills and knowledge on an ongoing basis. The Digital Academy will offer regular workshops and consulting services on robotics and automation issues. For information and communication technology (ICT) beginners, the Academy could offer an opportunity to participate in occupational retraining and to become familiar with the advantages of robotics and automation technology in order to use them profitably within the workspace.

SMEs in particular could benefit from such an academy because they often do not have the financial and human resources to provide training internally.

- Making schoolchildren and students fit for the new digital era by bringing robotics and automation technology into school life. The Academy should offer courses on e-skills which excite, inspire, and motivate young people about the importance and impact of robotics technologies in daily life. The Academy could provide a great opportunity to assist in equipping students with the necessary skills for the jobs of tomorrow. However, the courses offered by the Academy should have no implications for national education systems; rather, they should instead be considered an optional complement and support.
- Creating a European environment that empowers and encourages girls and young women to consider careers in the growing ICT field, thereby enabling both girls and technology companies to reap the benefits of greater female participation in the ICT sector.

The Academy will be established in cooperation with ministries, industry, specialist ICT companies, national institutions or initiatives with responsibility for professional training and lifelong learning programmes, and social partners. They all have the necessary expertise to coordinate and devise content and programmes for workshops and courses. In order to guarantee that this can be offered at European level, the Academy will set up a network of regional and national professional training centres throughout Europe. The network could provide considerable added value for addressing the challenge of reducing the various imbalances between skills offered and skills needed in Europe.

CHAPTER 09 04 — HORIZON 2020 (*cont'd*)09 04 77 (*cont'd*)09 04 77 19 (*cont'd*)

European start-up and scale-up ecosystems have clear particularities such as growth models, density, investments, sectors, education programs, regulations and cross-border collaborations. In this economic sector, various sources report a large pool of private capital that exists and continues to grow in countries such as the United Kingdom, France, Germany and Sweden. Consequently, this particular financial interest generated a large volume of data regarding start-ups and scale-ups located in about 60 European cities.

This pilot project will accelerate the process of knowledge gathering through the StartupHubs project within the Startup Europe initiative, creating a measurable impact that ultimately serves as a trustworthy tool for evidence-based policymaking.

Objectives

The main objective of this project pilot is to investigate the growth potential of various start-up and scale-up ecosystems, in a dynamic way, based on socio-economic data gathered through effective and reliable data collecting and processing methods. All this information will be gathered and made accessible to the public through a user-friendly online platform that will map and link key connections for numerous parameters that make up the start-up and scale-up ecosystems.

As a result, this initiative should provide a better understanding of what is happening locally in various hubs, for example assessing strengths and weaknesses, and yearly growth, and measure their overall contribution to generating socio-economic welfare.

Since the image of European ICT start-up and scale-up scene must be strengthened at global level, this initiative will target the positioning of such ecosystems, with a view to showcasing their strengths, and ultimately reinforce the European Digital Single Market strategy, create new jobs in the region and foster growth and collaboration across the Member States.

These objectives being in line with the Digital Single Market strategy, DG Connect is the most appropriate entity to take the lead on this pilot project. It will seek collaboration opportunities and share responsibilities, in terms of policymaking and data analysis, with other DGs.

The Commission will organise a call for proposals, building upon the main lines set out under this pilot project, and assign project development and implementation to a suitable IT company.

Description of elements

The pilot project will implement novel approaches to data visualisation and predictive analytics, ultimately taking the final form of an interactive platform containing essential information for possible investors or other stakeholders.

Expenditure must relate to the following: data acquisition, data analysis, setting up and maintaining the platform, providing advice on developing evidence-based policy, information campaigns and other activities relating to interaction with governments or communities.

Remarks

Europe's capacity to compete in the global market will depend on its capacity to convert scientific and technological knowledge into innovative products and services; even more, the appeal of Europe will very much depend on how its regions can conceive an inspiring, motivating and future-oriented environment for its citizens. The transformation of society by digital technologies is creating opportunities for Europe that a joint effort between the arts and technology could help fully exploit. In the digital world, Europe can stake a claim to leadership as regards way of life and in those elements of the digital revolution that most depend on creativity, i.e. broadly speaking, 'content'.

A committed partnership between arts and technology can make this claim a reality in areas as diverse as social inclusion, new digital media (augmented reality, new media such as social media, etc.), urban development (smart cities, Internet of Things, etc.) or the future of mobility. Enhanced collaboration between art and technology would not only stimulate innovation and thereby enhance the competitiveness of Europe; it would also help unleash creativity in society and in European regions. The 2015 Latvian Presidency conclusions on 'crossovers from culture to businesses' therefore invited the European institutions to consider enhancing collaboration between arts and technology for a holistic exploration of opportunities that overcomes the traditional boundaries of sectors, disciplines or the culture-engineering divide.

The Commission — DG Connect — has reacted by launching the Starts programme — innovation at the nexus of science, technology and the arts. This is a highly pertinent step focused on promoting innovation in industry with the arts as a catalyst for unconventional thinking and exploration. The Commission is fostering innovation rooted in such collaboration by introducing lighthouse projects that will put forward the crucial role of the arts in tackling challenges in the context of the digital single market.

This pilot project will explore how best to put the programme on as broad a footing as possible and have Starts ideas extended from pure industrial settings to, for instance, areas of regional and urban development where the digital also plays a prominent role. It will develop a coherent horizontal framework for 'art-technology' thinking in Europe across sectors and disciplines as well as across pertinent activities of European institutions (including framework programmes, structural funds, education programmes, etc.).

The pilot project will create a network of key players from the arts world (arts institutions and artists engaging with technology), digital media relying on the arts for media content, industry that considers art as a means for exploration for possible application, and regions and cities willing to create infrastructure to host collaborations of artists and technologists as a seed for urban development. It will support artistic explorations of technology, e.g. by supporting technologies for performances and installations and will stimulate the most promising pathways by seed-funding ideas for arts-technology collaborations. It will in particular foster practical mechanisms that help convert emerging ideas from such collaborative explorations into tangible assets for European society and industry.

Remarks

This pilot project will consist of two phases: (1) a mapping exercise by the Joint Research Centre (JRC) on: (a) the European ecosystem of companies and other organisations developing distributed ledger technologies (DLTs) for social and public good, and/or cooperating with different policy actors at supranational, national, regional or local levels; (b) relevant topics or use cases these companies or organisations are working on (e.g. DLTs for distribution and tracking of funding or benefits, issuing digital IDs or remittance systems for migrants or displaced groups, and increasing transparency of supply chains in order to combat trade in conflict minerals, etc.); (c) potential advisers from different disciplines and sectors that can guide or support these organisations; (2) an open challenge designed and launched by the JRC and DG Connect to select up to 10 DLT projects or innovations tackling the topics identified. The selected projects would be coached by advisers for a specific period of time (up to two months) in an incubator environment. Specific JRC support for the projects through a 'co-creation' and 'experimental' approach is planned. After this period, the projects will present their proof-of-concept prototypes to an independent panel. At a final event, one main prize and two runner-up prizes will be announced.

This appropriation is intended to cover the following measures relating to MEDIA Sub-programme of the Creative Europe programme:

- facilitating the acquisition and improvement of skills and competences of audiovisual professionals and the development of networks, including the use of digital technologies to ensure adaptation to market development, testing new approaches to audience development and testing new business models,
- increasing the capacity of audiovisual operators to develop European audiovisual works with a potential to circulate in the Union and beyond and to facilitate European and international co-production, including with television broadcasters,
- encouraging business-to-business exchanges by facilitating access to markets and business tools enabling audiovisual operators to increase the visibility of their projects on Union and international markets,
- supporting theatrical distribution through transnational marketing, branding, distribution and exhibition of audiovisual works,
- promoting transnational marketing, branding and distribution of audiovisual works on all other non-theatrical platforms,
- supporting audience development as a means of stimulating interest in, and improving access to, European audiovisual works, in particular through promotion, events, film literacy and festivals,
- promoting new distribution modes in order to allow the emergence of new business models.

This appropriation covers the prospective financial contribution of the European Commission to the LUX Prize through the promotion/communication of European films shortlisted by the LUX Prize.

It will also cover the Commission's prospective financial contribution to the LUX Prize, for subtitling and promoting participating European films.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e), (f) and (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.
