#### *Article 2*

##### **Definitions**

For the purposes of this Regulation, the following definitions shall apply:

- (1) 'fieldwork period' means the period of time during which the data collection from respondents is conducted;
- (2) 'reference period' means the period of time to which a particular item of information relates.

#### *Article 3*

The technical characteristics of variables shall be those laid down in the Annex and refer to:

- (a) variable identifier;
- (b) variable name and description;
- (c) codes and labels;
- (d) filter;
- (e) variable type.

#### *Article 4*

##### **Characteristics of target populations, observation units and rules for respondents**

1. The target populations in the use of information and communication technologies domain shall be private households in the territory of the Member State and individuals who have their usual residence, as defined according to Article 2(11) of Regulation (EU) 2019/1700, in the territory of the Member State.

2. The procedure applied to the data shall preserve the variation and the correlation between variables. Methods that incorporate 'error components' into the imputed values shall be preferable to those that simply impute a predicted value.
3. Methods which take into account the structure or other characteristics of the joint distribution of the variables shall be preferable to the marginal or univariate approach.

*Article 8*

**Deadline and standards for transmitting information**

1. Member States shall transmit the final data to the Commission (Eurostat) by 5 October 2021. The data shall be transmitted in the form of microdata files (including appropriate weights). The data must have been fully checked and validated, using the statistical data and metadata exchange standard through the single entry point to allow the Commission (Eurostat) to retrieve the data by electronic means. That data shall comply with the validation rules in accordance with the specification of variables based on the coding and filters as described in the Annex.
