

**Corrigendum to Commission Implementing Decision (EU) 2024/2974 of 29 November 2024
establishing the best available techniques (BAT) conclusions, under Directive 2010/75/EU of the
European Parliament and of the Council on industrial emissions, for the smitheries and foundries
industry**

(Official journal of the European Union L, 2024/2974, 6 December 2024)

On page 44, in Table 1.8, footnotes:

- for:*
- (a) organic binder systems generating low or no emissions of substances classified as CMR 1A, CMR 1B or CMR 2 (see techniques (d), (e) and/or (f) in BAT 25) are used in core-making;
 - (b) one or both of the following conditions are met:
 - thermal or catalytic oxidation is not applicable,
 - substitution with water-based coatings is not applicable.
 - ⁽¹⁾ The BAT-AEL only applies in the cold-box process when amines are used.
 - ⁽²⁾ The BAT-AEL only applies when aromatic binders/chemicals are used.
 - ⁽³⁾ The BAT-AEL only applies when the substance concerned is identified as relevant in the waste gas streams based on the inventory of inputs and outputs mentioned in BAT 2.
 - ⁽⁴⁾ The BAT-AEL only applies when phenolic-based binder systems are used.
 - ⁽⁵⁾ In the case of core-making, the upper end of the BAT-AEL range may be higher and up to 100 mg C/Nm³ if both of the following conditions (a) and (b) are met:
- read:*
- ⁽¹⁾ The BAT-AEL only applies in the cold-box process when amines are used.
 - ⁽²⁾ The BAT-AEL only applies when aromatic binders/chemicals are used.
 - ⁽³⁾ The BAT-AEL only applies when the substance concerned is identified as relevant in the waste gas streams based on the inventory of inputs and outputs mentioned in BAT 2.
 - ⁽⁴⁾ The BAT-AEL only applies when phenolic-based binder systems are used.
 - ⁽⁵⁾ In the case of core-making, the upper end of the BAT-AEL range may be higher and up to 100 mg C/Nm³ if both of the following conditions (a) and (b) are met:
 - (a) organic binder systems generating low or no emissions of substances classified as CMR 1A, CMR 1B or CMR 2 (see techniques (d), (e) and/or (f) in BAT 25) are used in core-making;
 - (b) one or both of the following conditions are met:
 - thermal or catalytic oxidation is not applicable,
