I. INTRODUCTION

Pursuant to Article 1 (1) of the above instruments, the essential elements of the agreements listed in Annexes I and II to Council Regulation (EEC) No 3568/90 are appended.

These are annual quotas by volume or value for duty-free imports into the territory of the former German Democratic Republic of goods originating in the abovementioned countries. Relief extends to anti-dumping duties as well. As provided in Article 1 (1), however, some agricultural products are excluded. The suspension runs until 31 December 1992.

The product lists are based on the protocols on trade between the beneficiary countries and the former German Democratic Republic for 1990 (Poland 1989). In the case of the Soviet Union there are additional entitlements for three lines (serial numbers 256a, 404 and 412) for 1991 and 1992 under long-term cooperation agreements.

1. Preliminary comments on the structure of the schedules

The pages are set out in six columns.

- Column 1: serial number.
- Column 2: heading number from the CMEA standard foreign trade nomenclature.
- Column 3: description.

A dash ('—') indicates services, not included here, or an agricultural product excluded from the tariff suspension.

Imports under the heading 'job-processing' refer to re-imports of goods following processing abroad.

- Column 4: quantity.

Where units are not shown, figures refer to pieces. The following abbreviations have been used:

bn	billion
g	gram
hl	hectolitre
kg	kilogram
khl	kilohectolitre (1 000 hl)
km	kilometre

kt	kilotonne (1 000 tonnes)
kWh	kilowatt hour
l	litre
m	metre
m ²	square metre
m ³	cubic metre
Mio	million
Mp	Megapascal
t	tonne
Tm ²	thousand square metres
Tlm:	thousand linear metres
Tb	thousand bales, bundles
Tm	thousand metres
Tddl	thousand decalitres (10 000 l)
Thl	thousand hectolitres (1 000 l)
Tpr	thousand pairs
Tpc	thousand pieces

- Column 5: value (ECU 1 000).

The agreed values have been converted into ecus at the rates of: 1 transferable rouble = ECU 1,33389, 1 transferable dollar (Yugoslavia) = DM 1,85, DM 2,06368 = ECU 1.

- Column 6: indicative reference to relevant chapter, heading or subheading of the Harmonized Commodity Description and Coding System (or combined nomenclature (OJ L 247, 10. 9. 1990, p. 1)).

2. Token entry 'p.m.' volume or value quotas

The letters 'p.m.' appear against headings where no trade was agreed for 1990 (Poland 1989), although goods had been traded in previous years.

Where actual imports into the territory of the former German Democratic Republic took place in the period 1987 to 1989, the volume or value quota was based on an average of those imports, with the entry 'p.m.'

Where there was no trade in those years the letters 'p.m.' appear with no figure; in this case duty-free importation under Council Regulation (EEC) No 3568/90 or Commission Decision No 3788/90/ECSC is excluded.

3. Issue of licences

Article 1 (2) of Regulation (EEC) No 3568/90 provides that suspension applies only where the goods are released for free circulation in the territory of the former German Democratic Republic for consumption there, or processing that confers on them the status of Community goods.

The declaration of entry for release for free circulation must be supported by a licence issued by the competent

German authorities attesting that the goods can be imported under Article 1 of the appropriate instrument.

The licences are issued upon written application to: Bundesamt für Wirtschaft, Außenstelle Berlin, Unter den Linden 44 – 60, D-0-1080 Berlin, for industrial goods (Chapters 25 – 97 of the Common Customs Tariff); and to: Bundesamt für Ernährung und Fortwirtschaft, Adickesallee 40, Postfach 180203, D-6000 Frankfurt am Main 18, for agricultural goods (Chapters 1 – 24 of the Common Customs Tariff).
