RECOMMENDATIONS

EUROPEAN SYSTEMIC RISK BOARD

RECOMMENDATION OF THE EUROPEAN SYSTEMIC RISK BOARD

of 6 July 2023

amending Recommendation ESRB/2015/2 on the assessment of cross-border effects of and voluntary reciprocity for macroprudential policy measures

(ESRB/2023/4)

(2023/C 307/01)

THE GENERAL BOARD OF THE EUROPEAN SYSTEMIC RISK BOARD,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to the Agreement on the European Economic Area ⁽¹⁾, in particular Annex IX thereof,

Having regard to Regulation (EU) No 1092/2010 of the European Parliament and of the Council of 24 November 2010 on European Union macro-prudential oversight of the financial system and establishing a European Systemic Risk Board ⁽²⁾, and in particular Articles 3 and 16 to 18 thereof,

Having regard to Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and amending Regulation (EU) No 648/2012 ⁽³⁾, and in particular Article 458(8) thereof,

Having regard to Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions, amending Directive 2002/87/EC and repealing Directives 2006/48/EC and 2006/49/EC ⁽⁴⁾, and in particular Section II of Chapter 4 of Title VII thereof,

Having regard to Decision ESRB/2011/1 of the European Systemic Risk Board of 20 January 2011 adopting the Rules of Procedure of the European Systemic Risk Board ⁽⁵⁾, and in particular Articles 18 to 20 thereof,

Whereas:

- (1) In order to ensure effective and consistent national macroprudential policy measures, it is important to complement the recognition required under Union law with voluntary reciprocity.

⁽¹⁾ OJ L 1, 3.1.1994, p. 3.

⁽²⁾ OJ L 331, 15.12.2010, p. 1.

⁽³⁾ OJ L 176, 27.6.2013, p. 1.

⁽⁴⁾ OJ L 176, 27.6.2013, p. 338.

⁽⁵⁾ OJ C 58, 24.2.2011, p. 4.

- (2) The framework on voluntary reciprocity for macroprudential policy measures set out in Recommendation ESRB/2015/2 of the European Systemic Risk Board ⁽⁶⁾ aims to ensure that all exposure-based macroprudential policy measures activated in one Member State are reciprocated in other Member States.
- (3) Recommendation ESRB/2017/4 of the European Systemic Risk Board ⁽⁷⁾ recommends the relevant activating authority to propose a maximum materiality threshold when submitting a request for reciprocity to the European Systemic Risk Board (ESRB), below which an individual financial service provider's exposure to the identified macroprudential risk in the jurisdiction where the macroprudential policy measure is applied by the activating authority can be considered non-material. The ESRB may recommend a different threshold if deemed necessary.
- (4) With effect from 31 December 2018 credit institutions authorised in Sweden using the internal ratings-based (IRB) approach for calculating regulatory capital requirements are subject to a credit institution-specific floor of 25 % for the exposure-weighted average of the risk weights applied to the portfolio of retail exposures to obligors residing in Sweden secured by immovable property in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013. This stricter national measure applies until 31 December 2023 and the General Board of the ESRB decided on 15 January 2019 ⁽⁸⁾ to include this stricter national measure in the list of macroprudential policy measures that are recommended to be reciprocated under Recommendation ESRB/2015/2.
- (5) With effect from 30 September 2023, credit institutions authorised in Sweden using the IRB approach for calculating regulatory capital requirements are subject to a credit institution-specific minimum level (floor) of 35 % for the exposure-weighted average of the risk weights applied to the portfolio of certain corporate exposures in Sweden secured by immovable commercial properties and to a credit institution-specific minimum level (floor) of 25 % for the exposure-weighted average of the risk weights applied to the portfolio of certain corporate exposures in Sweden secured by immovable residential properties, in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013. The stricter national measure should apply for two years, with the possibility of being extended, or (if earlier) until the macroprudential or systemic risks cease to exist.
- (6) On 12 May 2023, *Finansinspektionen* (the Swedish Financial Supervisory Authority) submitted a request to the ESRB to recommend the reciprocity of the aforementioned macroprudential policy measure pursuant to Article 458(8) of Regulation (EU) No 575/2013. In order to prevent the materialisation of negative cross-border effects in the form of leakages and regulatory arbitrage that could result from the implementation of the macroprudential policy measure applied in Sweden in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013, the General Board of the ESRB has decided to include this measure in the list of macroprudential policy measures that are recommended to be reciprocated under Recommendation ESRB/2015/2.
- (7) The General Board of the ESRB has also decided to recommend a maximum institution-specific materiality threshold of SEK 5 billion to steer the application of the *de minimis* principle by the reciprocating Member State.
- (8) This amendment to Recommendation ESRB/2015/2 does not affect the continuity of recommending the reciprocity of the national macroprudential measures activated by the Swedish authorities on 31 December 2018 and recommended by the ESRB for reciprocity in Recommendation ESRB/2019/1.
- (9) Therefore, Recommendation ESRB/2015/2 should be amended accordingly,

⁽⁶⁾ Recommendation ESRB/2015/2 of the European Systemic Risk Board of 15 December 2015 on the assessment of cross-border effects of and voluntary reciprocity for macroprudential policy measures (OJ C 97, 12.3.2016, p. 9).

⁽⁷⁾ Recommendation ESRB/2017/4 of the European Systemic Risk Board of 20 October 2017 amending Recommendation ESRB/2015/2 on the assessment of cross-border effects of and voluntary reciprocity for macroprudential policy measures (OJ C 431, 15.12.2017, p. 1).

⁽⁸⁾ Recommendation ESRB/2019/1 of the European Systemic Risk Board of 15 January 2019 amending Recommendation ESRB/2015/2 on the assessment of cross-border effects of and voluntary reciprocity for macroprudential policy measures (OJ C 106, 20.3.2019, p.1).

HAS ADOPTED THIS RECOMMENDATION:

AMENDMENTS

Recommendation ESRB/2015/2 is amended as follows:

(1) in Section 1, sub-recommendation C(1) is replaced by the following:

1. The relevant authorities are recommended to reciprocate the macroprudential policy measures adopted by other relevant authorities and recommended for reciprocation by the ESRB. It is recommended that the following measures, as further described in the Annex, be reciprocated:

Belgium:

- a 9 % systemic risk buffer rate on all IRB retail exposures to natural persons secured by residential immovable property for which the collateral is located in Belgium;

Germany:

- a 2 % systemic risk buffer rate on (i) all IRB exposures secured by residential immovable property located in Germany, and (ii) all SA-based exposures fully and completely secured by residential immovable property, as referred to in Article 125(2) of Regulation (EU) No 575/2013 of the European Parliament and of the Council ^(*), which is located in Germany;

France:

- a tightening of the large exposure limit provided for in Article 395(1) of Regulation (EU) No 575/2013, applicable to exposures to highly-indebted large non-financial corporations having their registered office in France to 5 % of Tier 1 capital, applied in accordance with Article 458(2)(d)(ii) of Regulation (EU) No 575/2013 to global systemically important institutions (G-SIIs) and other systemically important institutions (O-SIIs) at the highest level of consolidation of their banking prudential perimeter;

Lithuania:

- a 2 % systemic risk buffer rate on all retail exposures to natural persons resident in the Republic of Lithuania that are secured by residential property;

Luxembourg:

- legally binding loan-to-value (LTV) limits for new mortgage loans on residential real estate located in Luxembourg, with different LTV limits applicable to different categories of borrowers:
 - (a) LTV limit of 100 % for first-time buyers acquiring their primary residence;
 - (b) LTV limit of 90 % for other buyers i.e. non first-time buyers acquiring their primary residence. This limit is implemented in a proportional way via a portfolio allowance. Specifically, lenders may issue 15 % of the portfolio of new mortgages granted to these borrowers with an LTV above 90 % but below the maximum LTV of 100 %;
 - (c) LTV limit of 80 % for other mortgage loans (including the buy-to-let segment);

Netherlands:

- a minimum average risk weight applied in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013 to credit institutions authorised in the Netherlands, using the IRB approach for calculating regulatory capital requirements in relation to their portfolios of exposures to natural persons secured by residential property located in the Netherlands. For each individual exposure item that falls within the scope of the measure, a 12 % risk weight is assigned to the portion of the loan not exceeding 55 % of the market value of the property that serves to secure the loan, and a 45 % risk weight is assigned to the remaining portion of the loan. The minimum average risk weight of the portfolio is the exposure-weighted average of the risk weights of the individual loans;

^(*) Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and amending Regulation (EU) No 648/2012 (OJ L 176, 27.6.2013, p. 1.)

Norway:

- a 4,5 % systemic risk buffer rate applicable to all exposures located in Norway, applied pursuant to Article 133 of Directive 2013/36/EU of the European Parliament and of the Council ⁽¹⁰⁾, as applicable to Norway as of 31 December 2022 pursuant to the terms of the Agreement on the European Economic Area ⁽¹¹⁾ (EEA Agreement) (hereinafter the “CRD as applicable to and in Norway as of 31 December 2022”), to all credit institutions authorised in Norway;
- a 20 % floor for (exposure-weighted) average risk weights for exposures to residential real estate located in Norway, applied pursuant to Article 458(2)(d)(iv) of Regulation (EU) No 575/2013, as applicable to Norway as of 31 December 2022 pursuant to the terms of the EEA Agreement (hereinafter the “CRR as applicable to and in Norway as of 31 December 2022”), to credit institutions, authorised in Norway, using the IRB approach for calculating regulatory capital requirements;
- a 35 % floor for (exposure-weighted) average risks weights of commercial real estate exposures located in Norway, applied pursuant to Article 458(2)(d)(iv) of the CRR as applicable to Norway as of 31 December 2022 to credit institutions authorised in Norway, using the IRB approach for calculating regulatory capital requirements;

Sweden:

- a credit institution-specific floor of 25 % for the exposure-weighted average of the risk weights applied to the portfolio of retail exposures to obligors residing in Sweden secured by immovable property applied in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013 to credit institutions authorised in Sweden using the IRB approach for calculating regulatory capital requirements.
- a credit institution-specific minimum level (floor) of 35 % for the exposure-weighted average of the risk weights applied to the portfolio of corporate exposures secured by mortgages on immovable commercial properties (properties physically located in Sweden owned for commercial purposes to generate rental income) and a credit institution-specific minimum level (floor) of 25 % for the exposure-weighted average of the risk weights applied to the portfolio of corporate exposures secured by mortgages on immovable residential properties (apartment buildings physically located in Sweden owned for commercial purpose to generate rental income, where the number of residences in the property exceeds three) applied in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013 to credit institutions authorised in Sweden using the IRB approach for calculating regulatory capital requirements;”;

(2) the Annex is replaced by the Annex to this Recommendation.

Done at Frankfurt am Main, 6 July 2023.

The Head of the ESRB Secretariat,
on behalf of the General Board of the ESRB
Francesco MAZZAFERRO

⁽¹⁰⁾ Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions, amending Directive 2002/87/EC and repealing Directives 2006/48/EC and 2006/49/EC (OJ L 176, 27.6.2013, p. 338).

ANNEX

ANNEX

Belgium

A 9 % systemic risk buffer rate on all IRB retail exposures secured by residential immovable property for which the collateral is located in Belgium

I. Description of the measure

1. The Belgian measure, applied in accordance with Article 133 of Directive 2013/36/EU, imposes a 9 % systemic risk buffer rate on IRB retail exposures to natural persons secured by residential immovable property for which the collateral is located in Belgium (both non-defaulted and defaulted exposures).

II. Reciprocation

2. Relevant authorities are recommended to reciprocate the Belgian measure by applying it to IRB retail exposures to natural persons secured by residential immovable property for which the collateral is located in Belgium (as both non-defaulted and defaulted exposures). Alternatively, the measure can be reciprocated using the following scope in COREP reporting: IRB retail exposures secured by residential immovable property vis-à-vis individuals located in Belgium (as both non-defaulted and defaulted exposures).
3. If the same macroprudential policy measure is not available in their jurisdiction, the relevant authorities are recommended to apply, following consultation with the ESRB, a macroprudential policy measure available in their jurisdiction that has the most equivalent effect to the above measure recommended for reciprocation, including adopting supervisory measures and powers laid down in Title VII, Chapter 2, Section IV of Directive 2013/36/EU. Relevant authorities are recommended to adopt the equivalent measure no later than four months following the publication of this Recommendation in the *Official Journal of the European Union*.

III. Materiality threshold

4. The measure is complemented by an institution-specific materiality threshold to steer the potential application of the *de minimis* principle by the relevant authorities reciprocating the measure. Institutions may be exempted from the systemic risk buffer requirement as long as their relevant sectoral exposures do not exceed EUR 2 billion. Therefore, reciprocation is only requested when the institution-specific threshold is exceeded.
5. In line with Section 2.2.1 of Recommendation ESRB/2015/2, the materiality threshold of EUR 2 billion is a recommended maximum threshold level. Reciprocating relevant authorities may therefore instead of applying the recommended threshold set a lower threshold for their jurisdictions where appropriate or reciprocate the measure without any materiality threshold.

Germany

A 2 % systemic risk buffer rate on (i) all IRB exposures secured by residential immovable property located in Germany, and (ii) all SA-based exposures fully and completely secured by residential immovable property, as referred to in Article 125(2) of Regulation (EU) No 575/2013, which is located in Germany

I. Description of the measure

1. The German measure, applied in accordance with Article 133 of Directive 2013/36/EU, imposes a 2 % systemic risk buffer rate on all exposures (i.e. retail and non-retail exposures) to natural and legal persons that are secured by residential real estate located in Germany. The measure shall apply to (i) credit institutions authorised in Germany and using the IRB approach for calculating their risk-weighted exposure amounts for exposures secured by residential immovable property located in Germany, and (ii) credit institutions authorised in Germany and using the SA for calculating their risk-weighted exposure amounts for exposures fully and completely secured by residential immovable property, as referred to in Article 125(2) of Regulation (EU) No 575/2013, which is located in Germany.

II. Reciprocation

2. Relevant authorities are recommended to reciprocate the German measure by applying it to domestically authorised credit institutions.
3. If the same macroprudential policy measure is not available in their jurisdiction, the relevant authorities are recommended to apply, following consultation with the ESRB, a macroprudential policy measure available in their jurisdiction that has the most equivalent effect to the above measure recommended for reciprocation, including adopting supervisory measures and powers laid down in Title VII, Chapter 2, Section IV of Directive 2013/36/EU.
4. Relevant authorities are recommended to ensure that the reciprocating measure applies and is complied with from 1 February 2023.

III. Materiality threshold

5. The measure is complemented by an institution-specific materiality threshold to steer the potential application of the *de minimis* principle by the relevant authorities reciprocating the measure. Credit institutions may be exempted from the systemic risk buffer requirement if their relevant sectoral exposures do not exceed EUR 10 billion. Therefore, reciprocation is only requested when the institution-specific threshold is exceeded.
6. Relevant authorities should monitor the materiality of exposures. In line with Section 2.2.1 of Recommendation ESRB/2015/2, the materiality threshold of EUR 10 billion is a recommended maximum threshold level. Reciprocating relevant authorities may therefore, instead of applying the recommended threshold, set a lower threshold for their jurisdictions where appropriate, or reciprocate the measure without any materiality threshold.

France

A tightening of the large exposure limit provided for in Article 395(1) of Regulation (EU) No 575/2013, applicable to exposures to highly-indebted large non-financial corporations having their registered office in France to 5 % of Tier 1 capital, applied in accordance with Article 458(2)(d)(ii) of Regulation (EU) No 575/2013 to global systemically important institutions (G-SIIs) and other systemically important institutions (O-SIIs) at the highest level of consolidation of their banking prudential perimeter.

I. Description of the measures

1. The French measure, applied in accordance with Article 458(2)(d)(ii) of Regulation (EU) No 575/2013 and imposed on G-SIIs and O-SIIs at the highest level of consolidation of their banking prudential perimeter (not at a sub-consolidated level), consists of a tightening of the large exposure limit to 5 % of their Tier 1 capital, applicable to exposures to highly-indebted large non-financial corporations having their registered office in France.
2. A non-financial corporation is defined as a natural or legal person under private law having its registered office in France, and which, at its level and at the highest level of consolidation, belongs to the non-financial corporations' sector as defined in point 2.45 of Annex A to Regulation (EU) No 549/2013 of the European Parliament and of the Council ⁽¹⁾.
3. The measure applies to exposures to non-financial corporations having their registered office in France and to exposures to groups of connected non-financial corporations as follows:
 - (a) For non-financial corporations which are part of a group of connected non-financial corporations having its registered office at the highest level of consolidation in France, the measure applies to the sum of the net exposures towards the group and all its connected entities within the meaning of point (39) of Article 4(1) of Regulation (EU) No 575/2013;

⁽¹⁾ Regulation (EU) No 549/2013 of the European Parliament and of the Council of 21 May 2013 on the European system of national and regional accounts in the European Union (OJ L 174, 26.6.2013, p. 1).

- (b) For non-financial corporations which are part of a group of connected non-financial corporations having its registered office at the highest level of consolidation outside France, the measure applies to the sum of:
- (i) the exposures to those non-financial corporations having their registered office in France;
 - (ii) the exposures to the entities in France or abroad over which the non-financial corporations referred to in (i) have direct or indirect control within the meaning of point (39) of Article 4(1) of Regulation (EU) No 575/2013; and
 - (iii) the exposures to the entities in France or abroad which are economically dependent on the non-financial corporations referred to in (i) within the meaning of point (39) of Article 4(1) of Regulation (EU) No 575/2013.

Non-financial corporations which do not have their registered office in France and which are not a subsidiary or an economically dependent entity of, and which are not directly or indirectly controlled by, a non-financial corporation having its registered office in France, therefore fall outside the scope of the measure.

In accordance with Article 395(1) of Regulation (EU) No 575/2013, the measure is applicable after taking into account the effect of the credit risk mitigation techniques and exemptions in accordance with Articles 399 to 403 of Regulation (EU) No 575/2013.

4. A G-SII or an O-SII must consider a non-financial corporation having its registered office in France as large if its original exposure to the non-financial corporation, or to the group of connected non-financial corporations within the meaning of paragraph 3, is equal to or larger than EUR 300 million. The original exposure value is calculated in accordance with Articles 389 and 390 of Regulation (EU) No 575/2013 before taking into account the effect of credit risk mitigation techniques and exemptions set out in Articles 399 to 403 of Regulation (EU) No 575/2013, as reported in accordance with Article 9 of Commission Implementing Regulation (EU) No 680/2014 ⁽²⁾.
5. A non-financial corporation is considered highly-indebted if it has a leverage ratio that is greater than 100 % and a financial charges coverage ratio that is below three, calculated at the highest level of group consolidation as follows:
- (a) The leverage ratio is the ratio between total debt net of cash and equity; and
 - (b) The financial charges coverage ratio is the ratio between, on the one hand, the value added plus operating subsidies less: (i) payroll; (ii) operating taxes and duties; (iii) other net ordinary operating expenses excluding net interest and similar charges; and (iv) depreciation and amortisation, and, on the other hand, interest and similar charges.

The ratios are calculated based on accounting aggregates defined in accordance with the applicable standards, as presented in the non-financial corporation's financial statements, certified where appropriate by a chartered accountant.

II. Reciprocation

6. Relevant authorities are recommended to reciprocate the French measure by applying it to domestically authorised G-SIIs and O-SIIs at the highest level of consolidation within the jurisdiction of their banking prudential perimeter.
7. If the same macroprudential policy measure is not available in their jurisdiction, in line with sub-recommendation C(2), the relevant authorities are recommended to apply, following consultation with the ESRB, a macroprudential policy measure available in their jurisdiction that has the most equivalent effect to the above measure recommended for reciprocation. The relevant authorities are recommended to adopt the equivalent measure by no later than six months following the publication of this Recommendation in the *Official Journal of the European Union*.

⁽²⁾ Commission Implementing Regulation (EU) No 680/2014 of 16 April 2014 laying down implementing technical standards with regard to supervisory reporting of institutions according to Regulation (EU) No 575/2013 of the European Parliament and of the Council (OJ L 191, 28.6.2014, p. 1).

III. Materiality threshold

8. The measure is complemented by a combined materiality threshold to steer the potential application of the *de minimis* principle by the relevant authorities reciprocating the measure, which is composed of:
- (a) A threshold of EUR 2 billion for the total original exposures of domestically authorised G-SIIs and O-SIIs at the highest level of consolidation of the banking prudential perimeter to the French non-financial corporations sector;
 - (b) A threshold of EUR 300 million applicable to domestically authorised G-SIIs and O-SIIs equalling or exceeding the threshold mentioned in (a) for:
 - (i) a single original exposure to a non-financial corporation having its registered office in France;
 - (ii) the sum of original exposures to a group of connected non-financial corporations, which has its registered office at the highest level of consolidation in France, calculated in accordance with paragraph 3(a);
 - (iii) the sum of original exposures to non-financial corporations having their registered office in France which are part of a group of connected non-financial corporations having its registered office at the highest level of consolidation outside France as reported in templates C 28.00 and C 29.00 of Annex VIII to Implementing Regulation (EU) No 680/2014;
 - (c) A threshold of 5 % of the G-SII's or O-SII's Tier 1 capital at the highest level of consolidation, for exposures identified in (b) after taking into account the effect of the credit risk mitigation techniques and exemptions in accordance with Articles 399 to 403 of Regulation (EU) No 575/2013.

The thresholds referred to in paragraphs (b) and (c) are to be applied irrespective of whether the relevant entity or non-financial corporation is highly-indebted or not.

The original exposure value referred to in paragraphs (a) and (b) is to be calculated in accordance with Articles 389 and 390 of Regulation (EU) No 575/2013 before taking into account the effect of credit risk mitigation techniques and exemptions set out in Articles 399 to 403 of Regulation (EU) No 575/2013 as reported in accordance with Article 9 of Implementing Regulation (EU) No 680/2014.

9. In line with Section 2.2.1 of Recommendation ESRB/2015/2, the relevant authorities of the Member State concerned may exempt domestically authorised G-SIIs or O-SIIs at the highest level of consolidation of their banking prudential perimeter which do not breach the combined materiality threshold referred to in paragraph 8. When applying the materiality threshold, the relevant authorities should monitor the materiality of the exposures of domestically authorised G-SIIs and O-SIIs to the French non-financial corporations sector as well as the exposure concentration of domestically authorised G-SIIs and O-SIIs to large non-financial corporations having their registered office in France, and are recommended to apply the French measure to previously exempted domestically authorised G-SIIs or O-SIIs at the highest level of consolidation of their banking prudential perimeter when the combined materiality threshold referred to in paragraph 8 is breached. Relevant authorities are also encouraged to signal the systemic risks associated with the increased leverage of large non-financial corporations having their registered office in France to other market participants in their jurisdiction.
10. Where there are no G-SIIs or O-SIIs at the highest level of consolidation of their banking prudential perimeter authorised in the Member States concerned and having exposures to the French non-financial corporations sector above the materiality threshold referred to in paragraph 8, the relevant authorities of the Member States concerned may, pursuant to Section 2.2.1 of Recommendation ESRB/2015/2, decide not to reciprocate the French measure. In this case the relevant authorities should monitor the materiality of the exposures of domestically authorised G-SIIs and O-SIIs to the French non-financial corporations sector as well as the exposure concentration of domestically authorised G-SIIs and O-SIIs to large non-financial corporations having their registered office in France, and are recommended to reciprocate the French measure when a G-SII or O-SII at the highest level of consolidation of its banking prudential perimeter exceeds the combined materiality threshold referred to in paragraph 8. Relevant authorities are also encouraged to signal the systemic risks associated with the increased leverage of large non-financial corporations having their registered office in France to other market participants in their jurisdiction.

11. In line with Section 2.2.1 of Recommendation ESRB/2015/2, the combined materiality threshold referred to in paragraph 8 is a recommended maximum threshold level. Reciprocating relevant authorities may therefore instead of applying the recommended threshold set a lower threshold for their jurisdictions where appropriate, or reciprocate the measure without any materiality threshold.

Lithuania

A 2 % systemic risk buffer rate for all retail exposures to natural persons resident in the Republic of Lithuania that are secured by residential property.

I. Description of the measure

1. The Lithuanian measure, applied in accordance with Article 133 of Directive 2013/36/EU imposes a 2 % systemic risk buffer rate for all retail exposures to natural persons in Lithuania that are secured by residential property.

II. Reciprocation

2. Relevant authorities are recommended to reciprocate the Lithuanian measure by applying it to branches located in Lithuania of domestically authorised banks and direct cross-border exposures to natural persons in Lithuania that are secured by residential property. A significant share of total mortgage positions is held by foreign bank branches operating in Lithuania, therefore, reciprocity of the measure by other Member States would help foster a level playing field and ensure that all significant market participants take into account the increased residential real estate risk in Lithuania and increase their resilience.
3. If the same macroprudential policy measure is not available in their jurisdiction, the relevant authorities are recommended to apply, following consultation with the ESRB, a macroprudential policy measure available in their jurisdiction that has the most equivalent effect to the above measure recommended for reciprocation, including adopting supervisory measures and powers laid down in Title VII, Chapter 2, Section IV of Directive 2013/36/EU. Relevant authorities are recommended to adopt the equivalent measure by no later than four months following the publication of this Recommendation in the *Official Journal of the European Union*.

III. Materiality threshold

4. The measure is complemented by an institution-specific materiality threshold to steer the potential application of the *de minimis* principle by the relevant authorities reciprocating the measure. Institutions may be exempted from the systemic risk buffer requirement if their relevant sectoral exposures do not exceed EUR 50 million, which is approximately 0,5 % of the relevant exposures of the total credit institution sector in Lithuania. Therefore, reciprocation is only requested when the institution-specific threshold is exceeded.
5. Justification for such a threshold:
 - (a) The minimisation of the potential for regulatory fragmentation is necessary, as the same materiality threshold will also apply to credit institutions authorised in Lithuania;
 - (b) The application of such a materiality threshold would help to ensure a level playing field in the sense that institutions with exposures of similar size are subject to the systemic risk buffer requirement;
 - (c) The threshold is relevant for financial stability, as the further development of the residential real estate risk will mainly depend on housing market activity, which partly depends on the amount of new loans issued for house purchase. Therefore, the measure should apply to market participants who are active in this market even though their mortgage loan portfolios are not as large as those of the largest loan providers.

6. In line with Section 2.2.1 of Recommendation ESRB/2015/2, the materiality threshold of EUR 50 million is a recommended maximum threshold level. Reciprocating relevant authorities may therefore, instead of applying the recommended threshold, set a lower threshold for their jurisdictions where appropriate, or reciprocate the measure without any materiality threshold.

Luxembourg

Legally binding loan-to-value (LTV) limits for new mortgage loans on residential real estate located in Luxembourg, with different LTV limits applicable to different categories of borrowers:

- (a) LTV limit of 100 % for first-time buyers acquiring their primary residence;
- (b) LTV limit of 90 % for other buyers i.e. non first-time buyers acquiring their primary residence. This limit is implemented in a proportional way via a portfolio allowance. Specifically, lenders may issue 15 % of the portfolio of new mortgages granted to these borrowers with an LTV above 90 % but below the maximum LTV of 100 %;
- (c) LTV limit of 80 % for other mortgage loans (including the buy-to-let segment).

I. Description of the measure

1. The Luxembourg authorities activated legally binding LTV limits for new mortgage loans on residential immovable property located in Luxembourg. Following the Recommendation of the Comité du Risque Systémique (Systemic Risk Committee) ⁽³⁾, the Commission de Surveillance du Secteur Financier (Financial Sector Supervisory Commission) ⁽⁴⁾ acting in concert with the Banque centrale du Luxembourg has activated LTV limits that differ across three categories of borrowers. The LTV limits for each of the three categories are as follows:
 - (a) LTV limit of 100 % for first-time buyers acquiring their primary residence;
 - (b) LTV limit of 90 % for other buyers i.e. non first-time buyers acquiring their primary residence. This limit is implemented in a proportional way via a portfolio allowance. Specifically, lenders may issue 15 % of the portfolio of new mortgages granted to these borrowers with an LTV above 90 % but below the maximum LTV of 100 %;
 - (c) LTV limit of 80 % for other mortgage loans (including the buy-to-let segment).
2. LTV is the ratio between the sum of all loans or tranches of loans backed by the borrower with residential property at the time when the loan is granted and the value of the property at the same time.
3. The LTV limits apply independently from the type of ownership (e.g. full ownership, usufruct, bare ownership).
4. The measure applies to any private borrower taking out a mortgage loan to purchase residential real estate in Luxembourg for non-commercial purposes. The measure also applies if the borrower uses a legal structure like a real estate investment company to complete this transaction, and in the case of joint applications. "Residential real estate" includes construction land, whether the construction work takes place immediately after the purchase or years after. The measure also applies if a loan is granted to a borrower for purchasing a property with a long-term lease agreement. The real estate property may be for owner occupation or buy to let.

II. Reciprocation

5. Member States whose credit institutions, insurance corporations and professionals carrying out lending activities (mortgage lenders) have relevant material Luxembourg credit exposures through direct cross-border credit are recommended to reciprocate the Luxembourg measure in their jurisdiction. If the same measure is not available in their jurisdiction for all relevant cross-border exposures, the relevant authorities should apply available measures that have the most equivalent effect to the activated macroprudential policy measure.

⁽³⁾ Recommandation du comité du risque systémique du 9 novembre 2020 relative aux crédits portant sur des biens immobiliers à usage résidentiel situés sur le territoire du Luxembourg (CRS/2020/005).

⁽⁴⁾ CSSF Régulation N.20-08 du 3 décembre 2020 fixant des conditions pour l'octroi de crédits relatifs à des biens immobiliers à usage résidentiel situés sur le territoire du Luxembourg

6. Member States should notify the ESRB that they reciprocated the Luxembourg measure or used *de minimis* exemptions in accordance with Recommendation D of Recommendation ESRB/2015/2. The notification should be provided no later than one month after the reciprocating measure has been adopted, using the respective template published on the ESRB's website. The ESRB will publish the notifications on the ESRB's website, thereby communicating the national reciprocation decisions to the public. This publication will include any exemptions made by reciprocating Member States and their commitment to monitor leakages and act if needed.
7. Member States are recommended to reciprocate a measure within three months from the publication of this Recommendation in the *Official Journal of the European Union*.

III. Materiality threshold

8. The measure is complemented by two materiality thresholds to steer the potential application of the *de minimis* principle by the reciprocating Member States: a country-specific materiality threshold and an institution-specific materiality threshold. The country-specific materiality threshold for the total cross-border mortgage lending to Luxembourg is EUR 350 million which corresponds to approximately 1 % of the total domestic residential real estate mortgage market in December 2020. The institution-specific materiality threshold for the total cross-border mortgage lending to Luxembourg is EUR 35 million which corresponds to approximately 0,1 % of the total domestic residential real estate mortgage market in Luxembourg in December 2020. Reciprocation is only requested when both the country-specific threshold and the institution-specific threshold are exceeded.

Netherlands

A minimum average risk weight applied by credit institutions using the IRB approach in relation to their portfolios of exposures to natural persons secured by residential property located in the Netherlands. For each individual exposure item that falls within the scope of the measure, a 12 % risk weight is assigned to a portion of the loan not exceeding 55 % of the market value of the property that serves to secure the loan, and a 45 % risk weight is assigned to the remaining portion of the loan. The minimum average risk weight of the portfolio is the exposure-weighted average of the risk weights of the individual loans.

I. Description of the measure

1. The Dutch measure applied in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013 imposes a minimum average risk weight for IRB credit institutions' portfolio of exposures to natural persons secured by mortgages on residential property located in the Netherlands. Loans covered by the National Mortgage Guarantee scheme are exempted from the measure.
2. The minimum average risk weight is to be calculated as follows:
 - (a) For each individual exposure item that falls within the scope of the measure, a 12 % risk weight is assigned to the portion of the loan not exceeding 55 % of the market value of the property that serves to secure the loan, and a 45 % risk weight is assigned to the remaining portion of the loan. The LTV ratio to be used in this calculation should be determined in accordance with the applicable provisions of Regulation (EU) No 575/2013.
 - (b) The minimum average risk weight of the portfolio is the exposure-weighted average of the risk weights of the individual loans, calculated as explained above. Individual loans that are exempt from the measure are disregarded when calculating the minimum average risk weight.
3. This measure does not replace the existing capital requirements set out in and arising from Regulation (EU) No 575/2013. Banks to which the measure applies must calculate the average risk weight of the part of the mortgage portfolio that falls within the scope of this measure on the basis of both the regular applicable provisions contained in Regulation (EU) No 575/2013 and the method as set out in the measure. In calculating their capital requirements, they must subsequently apply the higher of the two average risk weights.

II. Reciprocation

4. Relevant authorities are recommended to reciprocate the Dutch measure by applying it to domestically authorised credit institutions using the IRB approach that have exposures to natural persons secured by residential property located in the Netherlands, as their banking sector may, through their branches, be or become exposed to the systemic risk in the Dutch housing market directly or indirectly.
5. In accordance with sub-recommendation C(2), the relevant authorities are recommended to apply the same measure as the one that has been implemented in the Netherlands by the activating authority within the deadline specified in sub-recommendation C(3).
6. If the same macroprudential policy measure is not available in their jurisdiction, the relevant authorities are recommended to apply, following consultation with the ESRB, a macroprudential policy measure available in their jurisdiction that has the most equivalent effect to the above measure recommended for reciprocation, including adopting supervisory measures and powers laid down in Title VII, Chapter 2, Section IV of Directive 2013/36/EU. Relevant authorities are recommended to adopt the equivalent measure by no later than four months following the publication of this Recommendation in the *Official Journal of the European Union*.

III. Materiality threshold

7. The measure is complemented by an institution-specific materiality threshold to steer the potential application of the *de minimis* principle by the relevant authorities reciprocating the measure. Institutions may be exempted from the minimum average risk weight for the IRB credit institutions' portfolio of exposures to natural persons secured by mortgages on residential property located in the Netherlands if this value does not exceed EUR 5 billion. Loans covered by the National Mortgage Guarantee scheme will not be calculated towards the materiality threshold.
8. In line with Section 2.2.1 of Recommendation ESRB/2015/2, the materiality threshold of EUR 5 billion is a recommended maximum threshold level. Reciprocating relevant authorities may, therefore, instead of applying the recommended threshold set a lower threshold for their jurisdictions where appropriate or reciprocate the measure without any materiality threshold.

Norway

- **a 4,5 % systemic risk buffer rate for exposures located in Norway, applied pursuant to Article 133 of Directive 2013/36/EU, as applicable to and in Norway as of 31 December 2022 pursuant to the terms of the Agreement on the European Economic Area (EEA Agreement) (hereinafter the 'CRD as applicable to and in Norway as of 31 December 2022), to all credit institutions authorised in Norway;**
- **a 20 % floor for (exposure-weighted) average risk weights for exposures to residential real estate located in Norway, applied pursuant to Article 458(2)(d)(iv) of Regulation (EU) No 575/2013, as applicable to and in Norway as of 31 December 2022 pursuant to the terms of the EEA Agreement (hereinafter the 'CRR as applicable to and in Norway on 31 December 2022), to credit institutions authorised in Norway using the internal ratings-based (IRB) approach for calculating regulatory capital requirements;**
- **a 35 % floor for (exposure-weighted) risk weights for exposures to commercial real estate located in Norway, applied pursuant to Article 458(2)(d)(iv) of the CRR as applicable to and in Norway as of 31 December 2022 to credit institutions authorised in Norway using the IRB approach for calculating regulatory capital requirements.**

I. Description of the measures

1. With effect from 31 December 2020, Finansdepartementet (the Norwegian Ministry of Finance) introduced three macroprudential measures, namely (i) a systemic risk buffer for exposures located in Norway, pursuant to Article 133 of the CRD as applicable to and in Norway as of 31 December 2022; (ii) a risk weight floor for exposures to residential real estate located in Norway, pursuant to Article 458(2)(d)(iv) of the CRR as applicable to and in Norway as of 31 December 2022; and (iii) a risk weight floor for exposures to commercial real estate located in Norway, pursuant to Article 458(2)(d)(iv) of the CRR as applicable to and in Norway as of 31 December 2022.

2. The systemic risk buffer rate is set at 4,5 % and applies to the domestic exposures of all credit institutions authorised in Norway. However, for credit institutions that do not use the advanced IRB approach, the systemic risk buffer rate applicable to all exposures is set at 3 % until 30 December 2023; thereafter, the systemic risk buffer rate applicable to domestic exposures is set at 4,5 %.
3. The residential real estate risk weight floor measure is an institution-specific average risk weights floor for residential real estate exposures in Norway, applicable to credit institutions using the IRB approach. The real estate risk weight floor concerns the exposure-weighted average risk weight in the residential real estate portfolio. Norwegian residential real estate exposures should be understood as retail exposures collateralised by immovable property in Norway.
4. The commercial real estate risk weight floor measure is an institution-specific average risk weights floor for commercial real estate exposures in Norway, applicable to credit institutions using the IRB approach. The real estate risk weight floor concerns the exposure-weighted average risk weight in the commercial real estate portfolio. Norwegian commercial real estate exposures should be understood as corporate exposures collateralised by immovable property in Norway.

II. Reciprocation

- 5a. Relevant authorities are recommended to reciprocate the Norwegian measures for exposures located in Norway in accordance with Article 134(1) of Directive 2013/36/EU and with Article 458(5) of Regulation (EU) No 575/2013, respectively. Relevant authorities are recommended to reciprocate the systemic risk buffer rate within 18 months following the publication of Recommendation ESRB/2021/3 of the European Systemic Risk Board ⁽⁵⁾ in the *Official Journal of the European Union*. The risk weight floors for residential and commercial real estate exposures in Norway should be reciprocated within the standard three-month transition period following the publication of Recommendation ESRB/2021/3 in the *Official Journal of the European Union*.
- 5b. As the lowering of the materiality threshold as referred to in Recommendation ESRB/2023/1 of the European Systemic Risk Board ⁽⁶⁾ might require a relevant authority to adopt a new national reciprocating measure or amend existing national measures reciprocating the Norwegian systemic risk buffer measure, the standard three-month transition period following the publication of Recommendation ESRB/2023/1 in the *Official Journal of the European Union* for the implementation of reciprocating measures applies.
6. If the same macroprudential policy measures are not available in their jurisdiction, in accordance with sub-recommendation C(2), the relevant authorities are recommended to apply, following consultation with the ESRB, macroprudential policy measures available in their jurisdiction that have the most equivalent effect to the above measures recommended for reciprocation. The relevant authorities are recommended to adopt the equivalent measures for the reciprocation of average risk weight floors for residential and commercial real estate exposures within 12 months and for the reciprocation of the systemic risk buffer rate within 18 months, respectively, following the publication of Recommendation ESRB/2021/3 in the *Official Journal of the European Union*. To the extent that the lowering of the materiality threshold requires a relevant authority to adopt a new national reciprocating measure as described in this subparagraph or amend existing national measures reciprocating the Norwegian systemic risk buffer measure, the standard three-month transition period following the publication of Recommendation ESRB/2023/1 in the *Official Journal of the European Union* for the implementation of reciprocating measures applies.

[7. Paragraph 7 was deleted by Recommendation ESRB/2023/1.]

⁽⁵⁾ Recommendation ESRB/2021/3 of the European Systemic Risk Board of 30 April 2021 amending Recommendation ESRB/2015/2 on the assessment of cross-border effects of and voluntary reciprocity for macroprudential policy measures (OJ C 222, 11.6.2021, p. 1).

⁽⁶⁾ Recommendation ESRB/2023/1 of the European Systemic Risk Board of 6 March 2023 amending Recommendation ESRB/2015/2 on the assessment of cross-border effects of and voluntary reciprocity for macroprudential policy measures (OJ C 158, 4.5.2023, p. 1).

III. Materiality threshold

8. The measures are complemented by institution-specific materiality thresholds based on exposures located in Norway to steer the potential application of the *de minimis* principle by the relevant authorities reciprocating the measure as follows:
 - (a) for the systemic risk buffer, the materiality threshold is set at a risk-weighted exposure amount of NOK 5 billion, which corresponds to around 0,16 % of total risk-weighted exposures of credit institutions reporting in Norway;
 - (b) for the residential real estate risk weight floor, the materiality threshold is set at a gross lending of NOK 32,3 billion, corresponding to about 1 % of gross collateralised residential real estate lending to Norwegian customers;
 - (c) for the commercial real estate risk weight floor, the materiality threshold is set at a gross lending of NOK 7,6 billion, corresponding to about 1 % of gross collateralised commercial real estate lending to Norwegian customers.
9. In line with Section 2.2.1 of Recommendation ESRB/2015/2, relevant authorities of the Member State concerned may exempt individual domestically authorised credit institutions having non-material exposures in Norway. Exposures are deemed non-material if they are below the institution-specific materiality thresholds set under paragraph 8 above. When applying the materiality thresholds, the relevant authorities should monitor the materiality of exposures and are recommended to apply the Norwegian measures to previously exempted individual domestically authorised credit institutions when the materiality thresholds set under paragraph 8 above are exceeded.
10. In line with Section 2.2.1 of Recommendation ESRB/2015/2, the materiality thresholds set under paragraph 8 above are recommended maximum threshold levels. Reciprocating relevant authorities may therefore, instead of applying the recommended thresholds, set lower thresholds for their jurisdictions where appropriate, or reciprocate the measures without any materiality threshold.
11. Where there are no credit institutions authorised in the Member States having material exposures in Norway, relevant authorities of the Member States concerned may, pursuant to Section 2.2.1 of Recommendation ESRB/2015/2, decide not to reciprocate the Norwegian measures. In this case, the relevant authorities should monitor the materiality of the exposures and are recommended to reciprocate the Norwegian measures when a credit institution exceeds the respective materiality thresholds.

Sweden

- **a credit institution-specific floor of 25 % for the exposure-weighted average of the risk weights applied to the portfolio of retail exposures to obligors residing in Sweden secured by immovable property applied in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013 to credit institutions authorised in Sweden using the IRB approach for calculating regulatory capital requirements;**
- **a credit institution-specific minimum level (floor) of 35 % for the exposure-weighted average of the risk weights applied to the portfolio of corporate exposures secured by mortgages on immovable commercial properties (properties physically located in Sweden owned for commercial purposes to generate rental income) and a credit institution-specific minimum level (floor) of 25 % for the exposure-weighted average of the risk weights applied to the portfolio of corporate exposures secured by mortgages on immovable residential properties (apartment buildings physically located in Sweden owned for commercial purposes to generate rental income, where the number of residences in the property exceeds three) applied in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013 to credit institutions authorised in Sweden using the IRB approach for calculating regulatory capital requirements.**

I. Description of the measures

1. The Swedish measure applied in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013 and imposed on credit institutions authorised in Sweden using the IRB approach, consists of a credit institution-specific floor of 25 % for the exposure-weighted average of the risk weights applied to the portfolio of retail exposures to obligors residing in Sweden secured by immovable property. The exposure-weighted average is the average of the risk weights of the individual exposures calculated in accordance with Article 154 of Regulation (EU) No 575/2013, weighted by the relevant exposure value.

2. The Swedish measure applied in accordance with Article 458(2)(d)(iv) of Regulation (EU) No 575/2013 and imposed on credit institutions authorised in Sweden using the IRB approach, consists of an exposure-weighted risk weight credit institution-specific minimum level (floor) of 35 % for certain corporate exposures in Sweden secured by mortgages on immovable commercial properties and an exposure-weighted risk weight credit institution-specific minimum level (floor) of 25 % for certain corporate exposures in Sweden secured by mortgages on immovable residential properties. The exposure-weighted average is the average of the risk weights of the individual exposures calculated in accordance with Article 153 of Regulation (EU) No 575/2013, weighted by the relevant exposure value. This measure does not cover corporate exposures secured by: (i) agricultural properties; (ii) properties owned directly by municipalities, states or regions; (iii) properties where more than 50 % of the property is used for own business; and (iv) multi-dwelling properties where the purpose of the property is not commercial (for example housing associations that are owned by the residents and that are non-profit making) or where the number of dwellings is less than four.

II. Reciprocation

3. In accordance with Article 458(5) of Regulation (EU) No 575/2013, relevant authorities of the Member States concerned are recommended to reciprocate the Swedish measures by applying them to branches located in Sweden of domestically authorised credit institutions using the IRB approach for calculating regulatory capital requirements. In accordance with Article 458(5) of Regulation (EU) No 575/2013, relevant authorities of the Member States concerned are recommended to reciprocate the Swedish measures by applying them to domestically authorised credit institutions using the IRB approach for calculating regulatory capital requirements that have retail exposures to obligors residing in Sweden secured by mortgages on immovable properties and/or corporate exposures in Sweden secured by mortgages on commercial or residential properties. In accordance with sub-recommendation C(2), the relevant authorities are recommended to apply the same measure as the ones that have been implemented in Sweden by the activating authority by no later than three months following the publication of the corresponding Recommendation in the *Official Journal of the European Union* ⁽⁷⁾.
4. If the same macroprudential policy measures are not available in their jurisdiction, the relevant authorities are recommended to apply, following consultation with the ESRB, a macroprudential policy measure available in their jurisdiction that has the most equivalent effect to the above measures recommended for reciprocation. Relevant authorities are recommended to adopt the equivalent measures by no later than four months following the publication of the corresponding Recommendation in the *Official Journal of the European Union* ⁽⁸⁾.

III. Materiality threshold

5. The measures are complemented by an institution-specific materiality threshold of SEK 5 billion for each of the measures described in paragraphs 1 and 2, respectively, to steer the potential application of the *de minimis* principle by the relevant authorities reciprocating the measure.
6. In line with Section 2.2.1 of Recommendation ESRB/2015/2, relevant authorities of the Member State concerned may exempt individual domestically authorised credit institutions using the IRB approach that have exposures below the materiality threshold of SEK 5 billion for the measures described in paragraphs 1 and 2, respectively. When applying the materiality threshold, the relevant authorities should monitor the materiality of exposures and are recommended to apply the relevant Swedish measures to previously exempted individual domestically authorised credit institutions when the materiality threshold of SEK 5 billion is exceeded for that measure.
7. Where no domestically authorised credit institution using the IRB approach has retail exposures, as described in paragraph 1, of more than SEK 5 billion, through branches located in Sweden and/or direct cross-border activity, relevant authorities of the Member States concerned may, pursuant to Section 2.2.1 of Recommendation ESRB/2015/2, decide not to reciprocate the measure. In this case, the relevant authorities

⁽⁷⁾ See Recommendation ESRB/2019/1 for the macroprudential policy measure activated on 31 December 2018

⁽⁸⁾ See Recommendation ESRB/2019/1 for the macroprudential policy measure activated on 31 December 2018.

should monitor the materiality of the exposures and are recommended to reciprocate the measure described in paragraph 1 where a domestically authorised credit institution using the IRB approach exceeds the threshold of SEK 5 billion.

8. Where no domestically authorised credit institutions using the IRB approach has corporate exposures, as described in paragraph 2, of more than SEK 5 billion, through branches located in Sweden and/or direct cross-border activity, relevant authorities of the Member States concerned may, pursuant to Section 2.2.1 of Recommendation ESRB/2015/2, decide not to reciprocate the measure. In this case the relevant authorities should monitor the materiality of the exposures and are recommended to reciprocate the measure described in paragraph 2 where a domestically authorised credit institution using the IRB approach exceeds the threshold of SEK 5 billion.
 9. In line with Section 2.2.1 of Recommendation ESRB/2015/2, the materiality threshold of SEK 5 billion is a recommended maximum threshold level. Reciprocating relevant authorities may therefore, instead of applying the recommended threshold, set a lower threshold for their jurisdictions where appropriate, or reciprocate the measures without any materiality threshold.

III

(Preparatory acts)

EUROPEAN CENTRAL BANK

OPINION OF THE EUROPEAN CENTRAL BANK

of 5 July 2023

on amendments to the Union crisis management and deposit insurance framework

(CON/2023/19)

(2023/C 307/04)

Introduction and legal basis

On 18 April 2023 the European Commission adopted proposals for (1) a regulation of the European Parliament and of the Council amending Regulation (EU) No 806/2014 as regards early intervention measures, conditions for resolution and funding of resolution action ⁽¹⁾ (hereinafter the ‘proposed amendments to the Single Resolution Mechanism Regulation’ or the ‘proposed amendments to the SRMR’); (2) a directive of the European Parliament and of the Council amending Directive 2014/59/EU as regards early intervention measures, conditions for resolution and financing of resolution action ⁽²⁾ (hereinafter the ‘proposed amendments to the Bank Recovery and Resolution Directive’ or the ‘proposed amendments to the BRRD’); (3) a directive of the European Parliament and of the Council amending Directive 2014/49/EU as regards the scope of deposit protection, use of deposit guarantee schemes funds, cross-border cooperation, and transparency ⁽³⁾ (hereinafter the ‘proposed amendments to the Deposit Guarantee Schemes Directive’ or the ‘proposed amendments to the DGSD’); and (4) a proposal for a directive of the European Parliament and of the Council amending Directive 2014/59/EU and Regulation (EU) No 806/2014 as regards certain aspects of the minimum requirement for own funds and eligible liabilities ⁽⁴⁾ (hereinafter the ‘proposed amendments regarding daisy chains’). The proposed amendments to the SRMR, the proposed amendments to BRRD, the proposed amendments to the DGSD and the proposed amendments regarding daisy chains, are hereinafter collectively referred to as ‘the proposed legislative package’.

The Commission has proposed that the ECB be consulted on the proposed amendments to the SRMR, the proposed amendments to the BRRD and the proposed amendments to the DGSD. On 23 June and on 3 July 2023 the ECB received requests from the Council of the European Union and from the European Parliament, respectively, for an opinion on the proposed amendments regarding daisy chains.

The ECB’s competence to deliver an opinion is based on Articles 127(4) and 282(5) of the Treaty on the Functioning of the European Union since the proposed legislative package contains provisions affecting: (1) the task of the European System of Central Banks (ESCB) to contribute to the smooth conduct of policies pursued by the competent authorities relating to the prudential supervision of credit institutions and the stability of the financial system pursuant to Article 127(5) of the Treaty; and (2) the tasks conferred upon the ECB concerning the prudential supervision of credit institutions in accordance with Article 127(6) of the Treaty. In accordance with the first sentence of Article 17.5 of the Rules of Procedure of the European Central Bank, the Governing Council has adopted this opinion.

⁽³⁾ COM(2023) 228 final.

⁽⁴⁾ COM(2023) 229 final.

General observations

1. *A necessary update of the Union crisis management and deposit insurance framework*
 - 1.1. The ECB strongly welcomes the European Commission's proposed legislative package, which seeks to make improvements across all the different stages of the Union crisis management and deposit insurance (CMDI) framework ⁽⁵⁾. A well-functioning Union CMDI framework is essential to address possible or actual failures of credit institutions of all sizes within and across Member States. The current CMDI framework, introduced in response to the global financial crisis of 2008, has been in place for some years now and experience has shown that the reforms implemented over the last decade have significantly strengthened the effectiveness of the framework. This review is an important opportunity to further enhance the CMDI framework in the light of the lessons learned in the first years of its application.
 - 1.2. The proposed legislative package aims to increase the resilience of European financial markets in crisis situations. It further harmonises the applicable crisis management rules across the Union, reducing the complexity of cross-border crisis management. It also widens the scope, and aims to improve the effectiveness, of the crisis management toolkit available to address crisis situations, in particular in relation to failures of smaller and medium-sized credit institutions.
 - 1.3. The ECB welcomes the improvements to the early intervention regime, as well as the new provisions on cooperation and exchange of information between supervisory and resolution authorities, which aim to further enhance the crisis management process. Within this regime it will be important to maintain a clear distribution of responsibilities between supervisory and resolution authorities.
 - 1.4. The ECB also welcomes the proposed expansion of resolution ⁽⁶⁾, as this will improve the effective management of failures of smaller and medium-sized credit institutions across Member States in a harmonised way ⁽⁷⁾. At the same time, it is imperative that this wider scope for resolution is accompanied by adequate resolution funding for these smaller and medium-sized credit institutions. Without improved access to funding, expanding the scope of resolution risks being impossible to implement in practice. The ECB therefore fully supports that, building on the principle that losses in a credit institution failure should be borne first and foremost by shareholders and creditors, the proposed legislative package also provides for a stronger role for deposit guarantee schemes (DGSs) in resolution, subject to certain safeguards. It is important that such role is facilitated by a harmonised least-cost test and a single-tier depositor preference.
 - 1.5. The proposed legislative package will make access to resolution financing arrangements more feasible in certain scenarios. Yet, in systemic crises where multiple credit institutions simultaneously face issues, or where the bail-in of a certain category of creditors threatens to seriously undermine financial stability, it would be beneficial to allow extraordinary access to resolution financing arrangements in order to safeguard the public interest and to avoid systemic fallout. To deal with such exceptional situations, the ECB would support introducing a financial stability exemption catering for the possibility to access resolution financing arrangements prior to a loss absorption of 8 % total liabilities and own funds (TLOF) in exceptional circumstances, subject, however, to strong safeguards.

⁽⁵⁾ See Opinion CON/2017/6 of the European Central Bank of 8 March 2017 on a proposal for a directive of the European Parliament and of the Council on amending Directive 2014/59/EU as regards the ranking of unsecured debt instruments in insolvency hierarchy (OJ C 132, 26.4.2017, p. 1) and Opinion CON/2017/47 of the European Central Bank of 8 November 2017 on revisions to the Union crisis management framework (OJ C 34, 31.1.2018, p. 17). All ECB opinions are available on EUR-Lex. See also ECB contribution to the European Commission's targeted consultation on the review of the crisis management and deposit insurance framework, available on the ECB's website at www.ecb.europa.eu.

⁽⁶⁾ See explanatory memorandum to the proposed amendments to the SRMR, pp. 5 and 10.

⁽⁷⁾ See ECB contribution to the European Commission's targeted consultation on the review of the crisis management and deposit insurance framework, p. 1.

- 1.6. Regardless of the expansion of the scope of resolution, some credit institutions will continue to be wound up under the national liquidation or insolvency proceedings. In such cases it is important to ensure a smooth and timely process to avoid any 'limbo' situation ⁽⁸⁾ following a negative public interest assessment.
- 1.7. The proposed legislative package also seeks to harmonise and enhance, e.g. by means of the single-tier depositor preference, the ability of DGSs' to intervene through preventive and alternative measures. The ECB would, however, support further harmonisation of these measures. Furthermore, the ECB would have appreciated an explicit requirement to segregate institutional protection scheme (IPS) funds and DGS funds in the articles of the DGSD. This would notably ensure that the specific functions of an IPS can then continue to be carried out with the help of those dedicated IPS funds.
- 1.8. The ECB sees a need for improvements to the current rules governing the transfer of DGS contributions in cases where credit institutions change their affiliation to a different DGS within the Union, as these rules could otherwise impede a more integrated single market for banking services in the Union. In this regard the ECB supports mandating the European Banking Authority (EBA) with developing a methodology for calculating the amount of contributions to be transferred to ensure alignment with the transferred risks.
- 1.9. The ECB strongly supports a swift finalisation of the legislative process, in line with the objective of finalising discussions during the current legislature ⁽⁹⁾. The proposed legislative package strikes the right balance between the key objectives to protect taxpayers and depositors and preserve financial stability. It forms a coherent package, which must be discussed holistically, as its key elements will only function as intended if they are put in place at the same time.

2. *Completing the Banking Union*

- 2.1. Beyond the proposed legislative package, which represents a critical step towards strengthening the Banking Union, further initiatives will be essential to complete the Banking Union in the coming years.
- 2.2. First, a European deposit insurance scheme (EDIS) is the necessary third pillar to complete the Banking Union ⁽¹⁰⁾ and would further strengthen the resilience of the Union banking sector. Putting in place an EDIS with full risk-sharing, including full coverage of both liquidity needs and losses, remains a key priority ⁽¹¹⁾. A common scheme would ensure that the level of confidence in the safety of bank deposits is equally high in all Member States ⁽¹²⁾, thereby reducing the risk of bank runs and safeguarding financial stability. Keeping depositor protection at the national level maintains the link between a credit institution and its sovereign. This impedes the creation of a level playing field, weakens financial stability and implies that one of the main objectives of the Banking Union has not been achieved. Establishing an EDIS could also unlock further improvements to the crisis management framework and cross-border integration in the Banking Union. The ECB welcomes the Commission's call for a renewed effort to reach a political agreement on EDIS ⁽¹³⁾ and calls on the Union legislators to make progress in this respect.
- 2.3. Second, full operationalisation of the European Stability Mechanism in its backstop function to the Single Resolution Fund (SRF) needs to be ensured as a matter of priority.

⁽⁸⁾ See explanatory memorandum to the proposed amendments to the BRRD, p. 19.

⁽⁹⁾ See Eurogroup statement on the future of the Banking Union of 16 June 2022, available on the Council of the European Union's website at www.consilium.europa.eu.

⁽¹⁰⁾ See paragraph 1.1 of Opinion CON/2016/26 of the European Central Bank of 20 April 2016 on a proposal for a Regulation of the European Parliament and of the Council amending Regulation (EU) No 806/2014 in order to establish a European Deposit Insurance Scheme (OJ C 252, 12.7.2016, p. 1).

⁽¹¹⁾ See ECB contribution to the European Commission's targeted consultation on the review of the crisis management and deposit insurance framework, pp. 1-4 and 14-15.

⁽¹²⁾ See paragraph 1.1 of Opinion CON/2016/26.

⁽¹³⁾ See Communication from the Commission to the European Parliament, the Council, the European Central Bank, the European Economic and Social Committee and the Committee of the Regions on the review of the crisis management and deposit insurance framework contributing to completing the Banking Union (COM(2023) 225 final).

- 2.4. Third, access to liquidity is essential for successful resolution, as also demonstrated by recent crisis events. The Banking Union currently still lacks a framework for liquidity in resolution. Such a framework should be set up in accordance with the Guiding Principles of the Financial Stability Board and with international best practices.

Specific observations

3. *Early intervention measures adopted by the supervisor*

- 3.1. The ECB welcomes the Commission's proposals with regard to the early intervention framework, which build on past ECB recommendations ⁽¹⁴⁾. The proposed legislative package is important to address the current challenges in the application of this framework. Providing a direct legal basis for the ECB's exercise of early intervention powers under Regulation (EU) No 806/2014 of the European Parliament and of the Council ⁽¹⁵⁾ (hereinafter the 'Single Resolution Mechanism Regulation' (SRMR)) ⁽¹⁶⁾ reduces the risk arising from potentially diverging transpositions of Directive 2014/59/EU of the European Parliament and of the Council ⁽¹⁷⁾ (hereinafter the 'Bank Recovery and Resolution Directive' (BRRD)) into national law. The proposed legislative package also removes the overlap between early intervention and supervisory measures, enhancing their respective practical application ⁽¹⁸⁾. In addition to those changes, the ECB supports aligning the conditions for adopting early intervention measures with the conditions for the adoption by the ECB of supervisory measures. This would broaden the possibility for the supervisory authority to intervene promptly through the adoption of early intervention measures to address identified weaknesses, even if an infringement or likely infringement of prudential requirements has not yet materialised. The ECB recommends deleting the reference to a rapid and significant deterioration of the financial condition of the entity as a prerequisite for taking an early intervention measure. Such a reference could undermine the supervisor's capability to properly and in a timely manner address a deterioration of the entity's situation where, for example, such deterioration is not rapid, but still significant or such deterioration is related to governance issues, internal controls and other non-financial parameters.
- 3.2. The ECB also welcomes the proposal to include the power to adopt all early intervention measures under a single provision ⁽¹⁹⁾, subject to the same conditions, without including an escalation ladder. This would enable the swift adoption of the most appropriate early intervention measure(s), taking into account the specific circumstances of each situation.
- 3.3. The proposed amendments to the SRMR seek to empower the ECB to adopt early intervention measures based on an infringement or likely infringement of the minimum requirements for own funds and eligible liabilities (MREL) ⁽²⁰⁾, even if such infringement does not breach prudential requirements. MREL are intended to facilitate the implementation of an orderly resolution strategy for a credit institution that is no longer viable. As such, they serve a separate purpose compared with prudential requirements, which aim to ensure the safety and soundness of credit institutions. It follows that resolution authorities are best placed, as well as legally competent, to monitor compliance with MREL targets and to initiate remedial measures in connection therewith. Therefore, the prerogative of addressing MREL breaches should remain exclusively with resolution authorities in all cases where MREL breaches do not simultaneously qualify as breaches of own funds requirements. This would avoid the duplication of tasks and the blurring of responsibilities between prudential supervisory and resolution authorities.

⁽¹⁵⁾ Regulation (EU) No 806/2014 of the European Parliament and of the Council of 15 July 2014 establishing uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms in the framework of a Single Resolution Mechanism and a Single Resolution Fund and amending Regulation (EU) No 1093/2010 (OJ L 225, 30.7.2014, p. 1).

⁽¹⁶⁾ See Article 1, point (15), of the proposed amendments to the SRMR, which amends Article 13 of the SRMR.

⁽¹⁷⁾ Directive 2014/59/EU of the European Parliament and of the Council of 15 May 2014 establishing a framework for the recovery and resolution of credit institutions and investment firms and amending Council Directive 82/891/EEC, and Directives 2001/24/EC, 2002/47/EC, 2004/25/EC, 2005/56/EC, 2007/36/EC, 2011/35/EU, 2012/30/EU and 2013/36/EU, and Regulations (EU) No 1093/2010 and (EU) No 648/2012, of the European Parliament and of the Council (OJ L 173, 12.6.2014, p. 190).

⁽¹⁸⁾ See Article 1, point (15), of the proposed amendments to the SRMR, which amends Article 13 of the SRMR.

⁽¹⁹⁾ See Article 1, point (15), of the proposed amendments to the SRMR, which amends Article 13 of the SRMR.

⁽²⁰⁾ See Article 1, point (15), of the proposed amendments to the SRMR, which amends Article 13 of the SRMR.

3.4. While supervisory measures can indeed effectively address some structural viability issues, they may prove insufficient in cases involving credit institutions with weak business models that experience prolonged difficulties and a continual depletion of capital. As long as such credit institutions do not meet the conditions for being deemed 'failing or likely to fail' (FOLTF) the current toolkit may not provide the competent authority with sufficient tools to prompt these credit institutions to take the adequate steps to address these risks. Recent experience demonstrates that a gradual voluntary wind-down, accompanied by appropriate capital and liquidity support, could, under specific conditions, be a cost-effective solution for credit institutions with a weak business model to exit the market, thus avoiding a protracted decline, including further losses and capital depletion over several years, culminating in the credit institution's failure. In the light of this, the ECB supports the inclusion of an explicit provision empowering competent authorities, in the context of early intervention, to request the submission of a plan to be implemented in the case of a voluntary wind-down scenario. The competent authority may require the institution to include additional elements in the plan. The preparation of such a plan would raise the institution's awareness about the available strategic options and related costs. In any event, the final decision about the implementation of the plan would be left to the institution concerned and its shareholders.

4. *Preparation for resolution*

4.1. The ECB fully supports the proposals to further enhance cooperation and information exchange between the ECB and the Single Resolution Board (SRB) within the context of preparations for resolution ⁽²¹⁾. While cooperation and information exchange between the ECB, in its supervisory function, and the SRB is already comprehensive on the basis of the bilateral Memorandum of Understanding ⁽²²⁾, the ECB welcomes the proposals to provide for this closer cooperation directly in the legislation.

4.2. The ECB understands that the proposed power for the ECB to collect resolution-related information, for example through on-site inspections, and provide it to the SRB ⁽²³⁾, seeks to replace the current early intervention power provided for in the BRRD ⁽²⁴⁾. Nevertheless, the ECB suggests some minor modifications to the relevant provisions detailing such power and to introduce an explanatory recital that clarifies the need to assess on a case-by-case basis how to collect that information.

4.3. Furthermore, the term 'supervisory activity' is not defined in the proposed legislative package, which makes it difficult to define the scope of the proposed duty of the ECB to inform the SRB of such 'supervisory activity' ⁽²⁵⁾. The ECB may instead inform the SRB of all relevant ECB supervisory assessments, shared with its decision-making bodies.

5. *Precautionary recapitalisation and government liquidity support*

5.1. The ECB reiterates that precautionary recapitalisation constitutes a useful tool for extraordinary circumstances within the current crisis management framework that should be maintained ⁽²⁶⁾. It is one of the few exceptions to the general rule that the provision of extraordinary public financial support to a credit institution leads to it being considered a credit institution that is failing or likely to fail. Precautionary recapitalisation is subject to stringent conditions that have been fulfilled only in a limited number of cases in the past. The limited use of the instrument indicates that the current conditionality is appropriate. Indeed, the relevant authorities need to be able to take the specific circumstances of each case fully into account.

⁽²¹⁾ See recital 14 and Article 1, point (16), of the proposed amendments to the SRMR, which inserts a new Article 13c in the SRMR.

⁽²²⁾ Memorandum of Understanding between the Single Resolution Board and the European Central Bank in respect of Cooperation and Information Exchange, available on EUR-Lex.

⁽²³⁾ See Article 1, point (16), of the proposed amendments to the SRMR, which inserts a new Article 13c in the SRMR.

⁽²⁴⁾ See Article 27(1), point (h), of the BRRD.

⁽²⁵⁾ See Article 1, point (16), of the proposed amendments to the SRMR, which inserts a new Article 13c(1), point (b), in the SRMR.

⁽²⁶⁾ See ECB contribution to the European Commission's targeted consultation on the review of the crisis management and deposit insurance framework, pp. 2 and 6-7.

- 5.2. The ECB generally welcomes the clarifications set out in the proposed amendments to the SRMR as well as the proposals to maintain the existing toolkit for identifying incurred losses (i.e. no mandatory asset quality review, as other tools such as on-site inspections could be suitable as well), since precautionary recapitalisations typically have to be implemented quickly to be effective ⁽²⁷⁾.
- 5.3. At the same time, the conditions for precautionary recapitalisation should not constrain the ability of the relevant authorities to take the specific circumstances of each case into account. In this regard, the newly proposed definition of solvency ⁽²⁸⁾ would force the competent authority to conclude that an entity is not solvent for this specific purpose of precautionary recapitalisation also based on mere technical or foreseeably temporary breaches of capital requirements, which may unjustifiably further constrain precautionary recapitalisations as well as government liquidity support. Therefore, the ECB recommends clarifying the new definition so that an entity can still be assessed as solvent also in cases of breaches or likely breaches of capital requirements if those breaches are considered of a temporary nature in the light of the specific circumstances of the case.
- 5.4. The ECB acknowledges the merits of requiring an exit strategy from the support measure ⁽²⁹⁾. However, setting a fixed timeline without the possibility to extend it creates the risk of a cliff edge effect, because markets may anticipate the exit deadline, creating adverse consequences for market conditions to the detriment of public revenue. Moreover, it should be possible to take into account unexpected market developments. The ECB also sees no need to approve any exit strategy from the supervisory perspective in addition to the Commission's approval already required under the general State aid process. In order to be able to react effectively in the event of unexpected circumstances, the automatic linkage between any delays regarding the implementation of the exit strategy and a FOLTF assessment should be removed. Finally, limiting the amount of Common Equity Tier 1 (CET1) instruments acquired through a precautionary recapitalisation to 2 % of the total risk exposure amount may also unduly constrain the use of available solutions. For instance, it may create undesirable cliff edge effects and entail the risk that the recapitalisation measure may be insufficient and fail to restore market confidence.
6. *Interventions of deposit guarantee schemes*
- 6.1. DGS preventive measures have proven to be a useful crisis prevention tool. Under the proposed legislative package, allowing the DGSs to finance preventive interventions would remain an option for Member States ⁽³⁰⁾. Given the potential benefits of these tools, the ECB encourages Union legislators to make DGS preventive measures available across the Union under a harmonised deposit insurance framework. The ECB acknowledges, however, that building up the necessary capacity for preventive measures may take some time for DGSs and considers that a transition period may therefore be appropriate. Further harmonisation is warranted to ensure a level playing field across the Union, adequate safeguards and a better equipped toolkit, thus ensuring consistency with the overall objectives of the CMDI framework.
- 6.2. The ECB welcomes the clarifications proposed to the SRMR ⁽³¹⁾ and the BRRD ⁽³²⁾ that DGS interventions made in accordance with the DGSD ⁽³³⁾ rules on preventive measures do not trigger a FOLTF assessment. This will provide greater clarity and certainty to competent authorities. Nevertheless, the ECB has some reservations regarding the condition under which the competent authority would need to establish that a DGS intervention is necessary to

⁽²⁷⁾ See Article 1, point (20), of the proposed amendments to the SRMR, which inserts a new Article 18a(2) in the SRMR.

⁽²⁸⁾ See Article 1, point (20), of the proposed amendments to the SRMR, which inserts a new Article 18a in the SRMR and Article 1, point (19), of the proposed amendments to the BRRD, which inserts a new Article 32c in the BRRD.

⁽²⁹⁾ See Article 1, point (20), of the proposed amendments to the SRMR, which inserts a new Article 18a(2), point (b), in the SRMR.

⁽³⁰⁾ See Article 1, point (12), of the proposed amendments to the DGSD, which amends Article 11 of the DGSD.

⁽³¹⁾ See Article 1, point (19)(b), of the proposed amendments to the SRMR, which amends Article 18(4), point (d), of the SRMR.

⁽³²⁾ See Article 1, point (17)(b), of the proposed amendments to the BRRD, which amends Article 32(4), point (d), of the BRRD.

⁽³³⁾ Directive 2014/49/EU of the European Parliament and of the Council of 16 April 2014 on deposit guarantee schemes (OJ L 173, 12.6.2014, p. 149).

preserve the financial soundness and long-term viability of the concerned credit institution in order for the preventive intervention not to trigger a FOLTF assessment⁽³⁴⁾. Therefore, the ECB recommends deleting that reference in the proposed amendments to the SRMR and the BRRD.

- 6.3. The ECB also welcomes the harmonisation of the least-cost test before using DGS funds or when considering applying a DGS preventive measure⁽³⁵⁾. In all cases of DGS use, a harmonised least-cost test framework will help level the playing field and ensure consistency across Member States. For the specific situation of preventive measures, the proposed amendments to the DGSD note that predicting liquidation recoveries is challenging, as preventive measures should be taken long before any foreseeable liquidation⁽³⁶⁾. These proposals therefore suggest applying a scaling factor of 85 % to the estimated ratio of recoveries when carrying out a least-cost test for a preventive measure, unlocking additional funding from the DGS. Applying such a scaling factor evenly for preventive and alternative measures as well as contributions of the DGS to resolution would further level the playing field and help facilitate these DGS interventions in more scenarios. However, as the situations of institutions to which preventive measures are applied can be very diverse in terms of their balance sheets and the degree of their deterioration, a scaling factor may not adequately address the specificities of preventive measures. This issue may be addressed more effectively by the EBA as part of its proposed draft regulatory technical standards⁽³⁷⁾.
- 6.4. The proposed amendments to the DGSD provide that credit institutions that request a DGS to finance preventive measures are to present to the competent authority for consultation a note with measures that those credit institutions commit to undertake in order to ensure or restore compliance with supervisory requirements, including actions to mitigate the risk of deterioration of financial soundness and strengthen the credit institution's capital and liquidity position. The ECB proposes to clarify that the supervisor would only be required to check envisaged compliance with prudential requirements. This would include verifying the prudential and supervisory aspects of the remediation plans, which aim to ensure or restore compliance with supervisory requirements, and ensuring the long-term viability of the credit institution. The supervisor should cooperate closely with national designated authorities or DGS authorities in matters within their mandate and for which they remain responsible. Moreover, the DGS and/or the designated authority have a genuine interest and are in the best position to monitor the credit institution's repayment of the amount contributed by the DGS to the preventive measure, as well as the associated timeframe, and to decide on that basis whether or not to grant further preventive measures to that credit institution.
- 6.5. The ECB proposes an explicit requirement to segregate IPS and DGS funds. Past experience has shown that a separate IPS fund is important for the smooth functioning of such schemes. There would also be significant benefits from having separate IPS and DGS funds, given that separate IPS funds are not subject to the constraints imposed by the DGSD. Hence, a separate IPS fund ensures that other functions of an IPS can continue to be carried out with the help of those funds dedicated to the IPS purpose. For example, by intervening proactively and in a timely manner the IPS ensures that its member institutions fulfil the regulatory own funds and liquidity requirements. The ECB welcomes that, as in the past, these separate IPS funds would not be subject to DGSD requirements. As regards their role as DGSs, the ECB supports that the IPSs should remain subject to the DGSD to ensure a level playing field. The Commission proposal – combined with a separation of IPS and DGS funds – therefore keeps the necessary flexibility, whilst ensuring legal clarity and a level playing field.

7. *Early warning of a possible FOLTF assessment*

- 7.1. The proposed amendments to the SRMR provide that the ECB or the relevant national competent authority should notify the SRB, as early as possible, when they consider that there is a material risk that one or more of the conditions for an institution to be considered failing or likely to fail would be met⁽³⁸⁾. The ECB or the national

⁽³⁴⁾ See Article 1, point (20), of the proposed amendments to the SRMR, which inserts a new Article 18a(1), point (b), in the SRMR and Article 1, point (19), of the proposed amendments to the BRRD, which inserts a new Article 32c(1), point (b), in the BRRD.

⁽³⁵⁾ See Article 1, point (13), of the proposed amendments to the DGSD, which inserts a new Article 11e in the DGSD.

⁽³⁶⁾ See recital 30 of the proposed amendments to the DGSD.

⁽³⁷⁾ See Article 1, point (13), of the proposed amendments to the DGSD, which inserts a new Article 11e(5) in the DGSD.

⁽³⁸⁾ See recital 15 and Article 1, point (16), of the proposed amendments to the SRMR, which inserts a new Article 13c in the SRMR.

competent authority and the SRB will then exchange views on possible measures to prevent such failure from materialising, as well as a reasonable timeframe for their implementation. The ECB or national competent authority and the SRB will monitor the evolution of the case and meet regularly.

7.2. The ECB supports this new early warning process and welcomes that it does not affect the well-established resolution procedure⁽³⁹⁾, including in particular the principles, competence and process for assessing that an institution is failing or likely to fail. This will further develop best practices regarding cooperation between the ECB and the SRB. Additionally, it ensures that the ECB or national competent authority and the SRB can assess crisis situations as they evolve and react in the most appropriate way with their full toolkit.

7.3. In this vein, the ECB welcomes that the triggering of this new early warning process is not a precondition for a subsequent FOLTF assessment⁽⁴⁰⁾. In times of fast-evolving crises, it may be appropriate to proceed immediately to such assessment, given the gravity of the situation and the absence of readily available measures that could prevent the failure.

8. *Resolution procedure*

8.1. The ECB welcomes the expansion of the scope of resolution. A broader scope of resolution will make resolution tools available to a broader set of credit institutions, thus improving access to international best-practice resolution tools and ensuring further harmonisation in crisis management. At the same time, the ECB understands that the proposal will not require resolution authorities to earmark smaller credit institutions for resolution where such action would be disproportionate. These credit institutions could still be wound down under national insolvency procedures where this would lead to a more satisfactory outcome. In any event, the ECB would welcome an analysis whether the cumulative effect of the proposed changes to the public interest assessment, including the new objective to minimise losses for DGSs, achieves the intended proportionate expansion of resolution.

8.2. Broadening the scope of resolution to include smaller and medium-sized credit institutions can only be credible if realistic solutions are found to ensure adequate funding of resolution, including credit institutions' internal loss absorption capacity, but, importantly, also access to DGS funding and resolution financing arrangements.

8.3. The principle that losses in a credit institution failure should first and foremost be borne by shareholders and creditors is a cornerstone of the Union crisis management framework. The ECB therefore welcomes that this key principle is confirmed in the proposed legislative package.

8.4. At the same time, widening the scope of resolution to smaller and medium-sized credit institutions entails challenges. These credit institutions are often strongly reliant on deposits as a funding source and, depending on local market conditions, may have difficulties with issuing other financial instruments that can reliably absorb losses or be converted to equity when the credit institution fails. There may be situations where the bail-in of deposits that are not protected by the DGS (uncovered deposits) can trigger financial stability risks, which could lead to a destruction of value harming the public interest. This may for instance occur where the bail-in of uncovered deposits in one credit institution leads to withdrawals of uncovered deposits in other credit institutions, hence spreading contagion. The ECB welcomes that the proposed legislative package puts in place options to improve the protection of depositors by enhancing the ability of the DGS to provide funding in resolution⁽⁴¹⁾. Crucially, this would be achieved by clarifying and broadening the least-cost test⁽⁴²⁾ and introducing a single-tier depositor preference with an equal ranking of all deposits⁽⁴³⁾. Similarly, the ECB welcomes the Commission's proposal to count the contribution of the DGS towards the minimum loss absorption requirement for accessing resolution financing arrangements, including the SRF, when a transfer tool is used⁽⁴⁴⁾. These changes, improving

⁽³⁹⁾ See recital 15 of the proposed amendments to the SRMR.

⁽⁴⁰⁾ See recital 16 of the proposed amendments to the SRMR.

⁽⁴¹⁾ See, for example, Article 1, point (56), of the proposed amendments to the BRRD, which amends Article 109 of the BRRD.

⁽⁴²⁾ See Article 1, point (13), of the proposed amendments to the DGSD, which inserts a new Article 11e in the DGSD.

⁽⁴³⁾ See Article 1, point (55)(a), of the proposed amendments to the BRRD, which amends Article 108(1) of the BRRD.

⁽⁴⁴⁾ See Article 1, point (24)(a), of the proposed amendments to the SRMR, which amends Article 27(7) of the SRMR.

the ability of the DGS and resolution financing arrangements to support the resolution of smaller and medium-sized credit institutions, are an indispensable counterpart to meaningfully expanding the application of resolution tools to such credit institutions. It is therefore important to adopt the proposed legislative package holistically and to ensure that changes to the CMDI framework are articulated coherently. Implementing only some of the elements of the proposed legislative package could lead to the inability to successfully apply resolution in practice.

- 8.5. In accordance with the principle that losses in a credit institution failure should be borne first and foremost by shareholders and creditors, all credit institutions earmarked for resolution are required to have a minimum loss absorption capacity as a first line of defence, adequately calibrated in line with the resolution strategy, thereby ensuring market discipline and minimising reliance on external funding sources. However, even with the possibility for DGSs to contribute to funding of resolution and for this contribution to count towards the 8 % TLOF minimum loss absorption requirement ⁽⁴⁵⁾, reaching the 8 % TLOF threshold could reinforce adverse dynamics in a systemic crisis, e.g. where multiple credit institutions fail simultaneously or where this would require imposing losses on certain creditors, which in turn could seriously undermine financial stability. Therefore, the ECB would support, for exceptional cases, the introduction of a financial stability exemption for accessing resolution financing arrangements in line with the recommendation of the International Monetary Fund (IMF) ⁽⁴⁶⁾. This would allow access to resolution financing arrangements prior to loss absorption of 8 % TLOF in cases where this is strictly necessary to protect the public interest and safeguard financial stability. This option should therefore be subject to strict conditions and governance arrangements, along the lines of a comparable mechanism that exists in the United States, e.g. requiring the joint approval of the SRB, the Commission and the ECB. The exemption would be used only in times of a euro area-wide or Member State-wide crisis or where there is a risk of such a crisis, as a last resort and after using credit institutions' loss absorbing capacity to the maximum extent possible without creating adverse effects for financial stability ⁽⁴⁷⁾.
- 8.6. Even with an expansion of the public interest assessment, a number of smaller credit institutions are likely to remain outside the scope of resolution. For these credit institutions, for which the application of the resolution framework would still not be proportionate, the ECB would welcome improvements to and further harmonisation of national insolvency proceedings ⁽⁴⁸⁾. The level of ambition of the proposed legislative package is limited in this regard. The ECB encourages the Union legislators to harmonise and expand across all Member States the availability of alternative measures in liquidation, in particular, the ability for DGSs to support transfers of assets and liabilities to an acquiring credit institution. The ECB welcomes the proposed amendments to the creditor hierarchy and the clarifications to the least-cost test, which will lead to better access to DGS funding and a broader availability of these measures. Having these alternative measures in all Member States would allow for a swifter, more efficient and more harmonised process to manage credit institution liquidations, which will ultimately benefit financial stability and depositors, and limit pay-out needs for DGSs.
- 8.7. Finally, the ECB welcomes the clarification that the division of responsibilities in the procedure for the write-down of capital instruments and other eligible liabilities fully mirrors the division of responsibilities in the resolution procedure ⁽⁴⁹⁾. This entails that the supervisor's primary responsibility pertains to FOLTF assessments, whereas the remaining conditions for the write-down are assessed by the resolution authority.

⁽⁴⁵⁾ See Article 1, point (24)(a), of the proposed amendments to the SRMR, which amends Article 27(7) of the SRMR.

⁽⁴⁶⁾ See IMF, Financial Sector Assessment Program – Technical Note – Bank Resolution and Crisis Management (2018), pp. 6 and 30, available on the IMF's website at www.imf.org.

⁽⁴⁷⁾ See also ECB contribution to the European Commission's targeted consultation on the review of the crisis management and deposit insurance framework, p. 4.

⁽⁴⁸⁾ See ECB contribution to the European Commission's targeted consultation on the review of the crisis management and deposit insurance framework, pp. 3 and 11. The ECB encouraged the Commission to explore the feasibility of solutions such as the creation of a European administrative liquidation framework – supported by EDIS – in order to ensure that failures of such credit institutions are handled in an efficient and harmonised way.

⁽⁴⁹⁾ See recital 26 and Article 1, point (23), of the proposed amendments to the SRMR, which amends Article 21 SRMR.

9. Depositor preference

- 9.1. The ECB welcomes the Commission's proposal to establish a single-tier depositor preference ⁽⁵⁰⁾. This approach will ensure greater harmonisation of the credit institution creditor hierarchy across the Union and ensure that all deposits, including those of large corporates and excluded deposits, rank *pari passu* and above ordinary unsecured claims. This approach will improve access to DGS funding with the benefit of preserving the deposit book as a whole, which means that the DGS can better contribute to crisis management measures, in resolution as well as via preventive or alternative measures, including transfer strategies. This significantly enhances the available crisis management solutions ⁽⁵¹⁾ and makes it easier to prevent contagion-induced financial stability concerns due to other credit institutions facing bank runs of uninsured depositors. The expanded availability of sale-of-business strategies, either in resolution or in the context of DGS alternative measures, can reduce the use of piecemeal liquidation as a means of managing credit institution failures. This is beneficial, as piecemeal liquidation can destroy value and be disruptive for depositors and for financial stability. The proposed approach also reduces the need for depositor pay-outs, which often require the mobilisation of large sums by DGSs, thereby constraining their liquidity and their ability to handle further credit institution failures. By better safeguarding access to deposits and financial stability, incentives to use taxpayers' money in credit institution failures are also reduced. Importantly, covered depositors remain fully protected by the DGS in all scenarios, but also benefit from transfer strategies that can achieve uninterrupted access to their deposits ⁽⁵²⁾.
- 9.2. By preferring all deposits to senior claims in the creditor hierarchy, this approach would also facilitate the allocation of losses to unsecured credit institution debt instruments, making it easier to ensure full loss absorption by bail-inable creditors without facing financial stability issues. It would also minimise the risk of compensation claims under the 'no creditor worse off' principle, thereby enhancing resolvability ⁽⁵³⁾.
- 9.3. At the same time, the ECB acknowledges that the introduction of a single-tier depositor preference may lead to additional costs for DGSs in some bank crisis management scenarios. While the ECB notes that a single-tier depositor preference has proven successful in a number of jurisdictions, some further analysis of the specific situations in which additional costs might be generated for DGSs or unwarranted consequences may arise would be welcome. This analysis should also consider, to the extent possible and taking into account the experience gained in jurisdictions that have introduced a single-tier depositor preference, the impact of the proposed changes on the rating and pricing of senior unsecured debt, and should further examine the interaction between the single-tier depositor preference and the eligibility of certain deposits for the purposes of MREL. Furthermore, the ECB is open to explore alternative solutions that improve DGSs' ability to contribute to resolution (as well as by means of preventive and alternative measures) to the same extent as would be possible with a single-tier depositor preference, while limiting DGSs' exposure to losses following a pay-out in liquidation. In exploring such solutions, it will be imperative to ensure that any extension of the scope of resolution is coupled with adequate access to funding in resolution, including in particular funding from DGSs. Finally, the impact from the introduction of a single-tier depositor preference on credit institutions' liability structure would obviously merit close supervisory attention, and the ECB stands ready to assess this carefully for the credit institutions under its remit.

10. Addressing the risk of 'limbo' situations

- 10.1. The BRRD already requires Member States to ensure a failing institution that is not subject to resolution is wound up in an orderly manner in accordance with applicable national law ⁽⁵⁴⁾. The ECB supports the proposed amendments to the BRRD that further clarify this mechanism ⁽⁵⁵⁾, ensuring that such winding-up is initiated without delay and that it results in the credit institution exiting the market or terminating its banking activities within a reasonable timeframe ⁽⁵⁶⁾.

⁽⁵⁰⁾ See Article 1, point (55)(a), of the proposed amendments to the BRRD, which amends Article 108(1) of the BRRD.

⁽⁵¹⁾ See also in this regard ECB contribution to the European Commission's targeted consultation on the review of the crisis management and deposit insurance framework, pp. 4 and 13.

⁽⁵²⁾ For further information about the US approach, which includes a single-tier depositor preference and a significant reliance on transfer strategies, see speech by Andrea Enria, Chair of the Supervisory Board of the ECB, 'Of temples and trees: on the road to completing the European banking union', available on the ECB's Banking Supervision website at www.bankingsupervision.europa.eu.

⁽⁵³⁾ See paragraph 2.3.2 of Opinion CON/2017/6.

⁽⁵⁴⁾ See Article 32b of the BRRD.

⁽⁵⁵⁾ See Article 1, point (18), of the proposed amendments to the BRRD, which amends Article 32b of the BRRD.

⁽⁵⁶⁾ See paragraph 3.2 of Opinion CON/2020/25; ECB contribution to the European Commission's targeted consultation on the review of the crisis management and deposit insurance framework, pp. 2 and 8.

- 10.2. National procedures for managing non-resolution cases should be further harmonised by empowering the resolution authorities to start an administrative winding-up procedure for institutions that meet the first two resolution conditions, but are not subject to resolution because of the lack of a public interest in resolution ⁽⁵⁷⁾. This would be the most efficient route to decisively address the possibility of a ‘limbo’ situation for an extended period of time.
- 10.3. The ECB supports empowering the competent authority to withdraw the authorisation of credit institutions that are failing or likely to fail but not put into resolution ⁽⁵⁸⁾. At the same time, the amendments should not introduce any automaticity, maintaining the withdrawal as a discretionary power of the ECB in line with Council Regulation (EU) No 1024/2013 ⁽⁵⁹⁾.
- 10.4. Regarding the proposal to establish that the withdrawal of the authorisation is a sufficient condition for the initiation of a winding-up ⁽⁶⁰⁾, the ECB considers it of utmost importance to avoid any unintended consequences in terms of conflicting interpretations or diverging national transposition. The Commission’s principal proposal to address ‘limbo’ situations provides that when a resolution authority determines that a credit institution meets all conditions for resolution except the public interest condition, the relevant national authority must also have the power to initiate without delay the procedure to wind up the credit institution ⁽⁶¹⁾. The proposal that the withdrawal of the authorisation is a ‘sufficient’ condition for the winding-up may create an impetus for Member States to forego appropriate transposition of this important requirement to empower national authorities ⁽⁶²⁾. Such an approach could lead to the incorrect interpretation that the supervisor’s withdrawal of the licence would be the exclusive trigger for the opening of winding-up proceedings, without any account being taken of the earlier decision by the resolution authority regarding whether the conditions for resolution have been met. This approach could lead to a practice where national administrative authorities or national courts postpone the commencement of a winding-up procedure until the licence is withdrawn. This would disregard the possibility that in some cases it would be more appropriate for the winding-up proceedings to be initiated while the credit institution still has a banking license. In view of these considerations, the ECB recommends that the withdrawal of authorisation is not a harmonised precondition for the winding-up of credit institutions.

11. Irrevocable payment commitments to the SRF

- 11.1. The ECB strongly recommends not to increase the share of irrevocable payment commitments from 30 % to 50 % of the total amount of institutions’ ex ante contributions to the SRF and resolution financing arrangements ⁽⁶³⁾. The practice of credit institutions having subscribed irrevocable payment commitments has shown that the treatment applied by some credit institutions may generate a risk of overstating their CET1 capital. This could, where the assessment of the credit institution’s situation shows that such risk exists and remains uncovered, trigger the adoption of supervisory measures to mitigate that risk.

⁽⁵⁷⁾ See also paragraph 8.6 above.

⁽⁵⁸⁾ See Article 1, point (18), of the proposed amendments to the BRRD, which amends Article 32b(3) of the BRRD.

⁽⁵⁹⁾ See Article 4(1), point (a), and Article 14(5) of Council Regulation (EU) No 1024/2013 of 15 October 2013 conferring specific tasks on the European Central Bank concerning policies relating to the prudential supervision of credit institutions (OJ L 287, 29.10.2013, p. 63).

⁽⁶⁰⁾ See recital 16 and Article 1, point (18) of the proposed amendments to the BRRD, which amends Article 32b(4) of the BRRD.

⁽⁶¹⁾ See recital 16 and Article 1, point (18) of the proposed amendments to the BRRD, which amends Article 32b(1) and (2) of the BRRD.

⁽⁶²⁾ See Article 1, point (18), of the proposed amendments to the BRRD, which amends Article 32b(1) of the BRRD and provides that the relevant national administrative or judicial authority must have the power to initiate without delay the procedure to wind up the institution or entity in an orderly manner.

⁽⁶³⁾ See Article 1, point (37)(a), of the proposed amendments to the SRMR, which amends Article 70(3) of the SRMR and Article 1, point (53)(a), of the proposed amendments to the BRRD, which amends Article 103(3) of the BRRD.

- 11.2. The background to this prudential issue is that for accounting purposes many credit institutions do not record an irrevocable payment commitment as a liability but keep it off their balance sheet, and at the same time they record the cash collateral as an asset, without recording any expense in the profit and loss statement. In this way, the CET1 capital of the credit institution is overstated because it does not reflect the fact that the resources contributed as collateral to the resolution fund cannot be retrieved without a corresponding cash payment. The existence of a prudential risk in connection with irrevocable payment commitments has been acknowledged also by the General Court ⁽⁶⁴⁾. Note that even the proposed clarifications would not resolve this issue ⁽⁶⁵⁾.
- 11.3. In any case, the ECB welcomes the clarifications ⁽⁶⁶⁾ that where a credit institution no longer falls within the scope of the SRMR or the BRRD and is no longer subject to the obligation to pay contributions to the SRF, the resolution authority will call the irrevocable payment commitments made and still due. This amendment further confirms that credit institutions cannot under any circumstances retrieve the cash collateral posted to secure the irrevocable payment commitments, unless a corresponding payment is made to the resolution fund, triggering the need to deduct such cash collateral from the credit institutions' CET1 capital.
- 11.4. Finally, given that some credit institutions do not record these contributions to the SRF as an expense during the build-up of the fund, they would then have to record these contributions as an expense when the fund is used. While the effect on prudential ratios is limited by the prudential deductions applied by the ECB, irrevocable payment commitments raise credit institutions' profits in calm economic times (when the SRF is built up) and deepen losses in crisis (when the SRF is used), thereby creating a procyclical contagion channel. The ECB therefore considers irrevocable payment commitments, when not accounted for as an expense during the build-up phase of the SRF, as problematic from the perspective of systemic risk and suggests minimising their use.
12. *Compliance with minimum requirements for own funds and eligible liabilities requirements (daisy chains)*
- 12.1. The proposed amendments regarding daisy chains empower resolution authorities to permit certain subsidiary entities to comply with internal MREL requirements on a consolidated basis ⁽⁶⁷⁾, rather than on an individual basis. This possibility is subject to two sets of safeguards ⁽⁶⁸⁾. First, for resolution entities that are Union parent (mixed) financial holding companies, it is required that the subsidiary entity is the only direct subsidiary held by the resolution entity, and that both the resolution entity and the subsidiary entity are established in the same Member State and are part of the same resolution group. Alternatively, for other types of resolution entities, it is required that the subsidiary entity is subject to a Pillar 2 requirement or a combined buffer requirement on a consolidated basis. Second, the resolution authority must have concluded that compliance with internal MREL requirements on a consolidated basis does not negatively affect the resolvability of the relevant group, nor the application of the write down and conversion powers to that intermediate entity or to other entities in the same resolution group.
- 12.2. With regard to resolution entities that are not Union parent (mixed) financial holding companies, a link is made with a Pillar 2 requirement imposed on the subsidiary entity on a consolidated basis. The ECB notes that consolidated or sub-consolidated requirements imposed on a subsidiary entity within a Union banking group must be set in accordance with the relevant conditions under Regulation (EU) No 575/2013 of the European Parliament and of the

⁽⁶⁴⁾ See Judgment of 9 September 2020, *BNP Paribas v European Central Bank*, T-150/18 and T-345/18, EU:T:2020:394, paragraph 78.

⁽⁶⁵⁾ See Article 1, point (37)(b), of the proposed amendments to the SRMR, which inserts a new Article 70(3a) in the SRMR and Article 1, point (53)(b), of the proposed amendments to the BRRD, which inserts a new Article 103(3a) in the BRRD.

⁽⁶⁶⁾ See Article 1, point (37)(b), of the proposed amendments to the SRMR, which inserts a new Article 70(3a) in the SRMR and Article 1, point (53)(b), of the proposed amendments to the BRRD, which inserts a new Article 103(3a) in the BRRD.

⁽⁶⁷⁾ See Article 1, point (3)(a), and Article 2, point (7)(a), of the proposed amendments regarding daisy chains, which amend Article 45f(1) of the BRRD and Article 12g(1) of the SRMR respectively.

⁽⁶⁸⁾ See Article 1, point (3)(a), and Article 2, point (7)(a), of the proposed amendments regarding daisy chains, which amend Article 45f(1) of the BRRD and Article 12g(1) of the SRMR respectively.

Council ⁽⁶⁹⁾ (hereinafter the ‘Capital Requirements Regulation’ (CRR)) and Directive 2013/36/EU of the European Parliament and of the Council ⁽⁷⁰⁾ (hereinafter the ‘Capital Requirements Directive’ (CRD)). For example, when the subsidiary institution is neither a parent institution in a Member State nor holds subsidiaries in third countries, the supervisor may require compliance with certain obligations under the CRR and the CRD ⁽⁷¹⁾ on a sub-consolidated basis only when this is justified for supervisory purposes by the specificities of the risk or of the capital structure of an institution or where Member States adopt national laws requiring the structural separation of activities within a banking group ⁽⁷²⁾.

13. *Other aspects relating to the deposit insurance framework*

13.1. The proposed amendments to the DGSD propose a number of other changes to the deposit insurance framework ⁽⁷³⁾. The ECB welcomes those changes that lead to further harmonisation and enlarge the authorities’ toolkit under the CMDI framework.

13.2. A few of the proposed DGSD changes are a source of concern for the ECB. First, the proposed amendments to the DGSD seek to confer on the supervisor an obligation to ensure compliance by credit institutions with their obligations as DGS members ⁽⁷⁴⁾. The supervisor’s powers under the CRD can only be used to fulfil the objectives set out therein, and cannot be extended to unrelated issues, such as a lack of compliance by credit institutions with their obligations as DGS members. In addition, DGS authorities are much better placed to assess such compliance and should instead be empowered with the relevant enforcement powers. Therefore, the ECB recommends that this proposal is reconsidered.

13.3. Second, the proposed amendments to the DGSD suggest that DGSs will be permitted to hold their funds in national central bank (NCB) accounts ⁽⁷⁵⁾. While the opening of such accounts would be consistent with the Treaty ⁽⁷⁶⁾, this provision might require changes to some NCBs’ statutes under national law to ensure that both public and private DGSs are eligible to open the necessary accounts. Moreover, any financing by an NCB of a DGS, for example through the extension of overdraft facilities in respect of a DGS’s account at an NCB, would not be compatible with the monetary financing prohibition insofar as the DGS qualifies as a ‘body governed by public law’ within the meaning of Article 123(1) of the Treaty ⁽⁷⁷⁾.

14. *Facilitating the transfer of DGS contributions*

14.1. Currently, when a credit institution ceases to be a member of a DGS and joins another DGS, or if some of its activities are transferred to another DGS, the DGS of origin transfers only a small share of the credit institution’s past contributions to the new DGS. As of 2024, once DGSs have reached their target level, the possibility to transfer contributions may cease entirely, as only the contributions of the last 12 months can be transferred. In the case of a credit institution changing its DGS affiliation, this will lead to a funding surplus in the DGS of origin as the risks covered by this DGS are reduced while its financial means remain very similar. On the other hand, in the receiving

⁽⁶⁹⁾ Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and amending Regulation (EU) No 648/2012 (OJ L 176, 27.6.2013, p. 1).

⁽⁷⁰⁾ Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions, amending Directive 2002/87/EC and repealing Directives 2006/48/EC and 2006/49/EC (OJ L 176, 27.6.2013, p. 338).

⁽⁷¹⁾ See Parts Two to Eight of the CRR and Title VII of the CRD.

⁽⁷²⁾ See Article 11(6) of the CRR.

⁽⁷³⁾ The majority of these changes can be traced back to the Opinion of the European Banking Authority on deposit guarantee scheme funding and uses of deposit guarantee scheme funds (EBA/OP/2020/02), available on the EBA’s website at www.eba.europa.eu.

⁽⁷⁴⁾ See Article 1, point (3)(a), of the proposed amendments to the DGSD, which amends Article 4(4) of the DGSD.

⁽⁷⁵⁾ See Article 1, point (11)(e), of the proposed amendments to the DGSD, which inserts a new Article 10(7a) in the DGSD.

⁽⁷⁶⁾ See Article 17 of the Statute of the European System of Central Banks and of the European Central Bank (hereinafter the ‘Statute of the ESCB’), which provides that, in order to conduct their operations, NCBs may open accounts for credit institutions, public entities and other market participants.

⁽⁷⁷⁾ See ECB’s Convergence Report 2022, paragraph 2.2.3; and Opinion CON/2020/24.

DGS, a funding gap arises as the transferred resources are not commensurate with the transferred risks. This gap must be filled by the transferring credit institution or all members of the receiving DGS. The current deposit insurance framework treats the DGS of origin favourably at the expense of the transferring credit institution and/or the members of the receiving DGS. If left unchanged, the deposit insurance framework imposes significant sunk costs on a credit institution changing its DGS affiliation. This constitutes a material obstacle to the objective of promoting the single market for banking services in the Union.

14.2. The ECB regrets that the Commission proposal does not follow the EBA recommendation ⁽⁷⁸⁾ to mandate the EBA with developing a methodology that would address this flaw in the deposit insurance framework. The ECB would propose to give the EBA the mandate to develop a methodology for calculating the amount of contributions to be transferred to ensure there is alignment with the transferred risks. This would minimise the funding surplus in the DGS of origin and any funding gap in the receiving DGS, and thereby avoid imposing unnecessary costs on the transferring credit institution and other members of the receiving DGS. Such methodology should balance the interests of the DGSs involved and should preserve financial stability across the system.

15. *Exchange of information*

15.1. The proposed legislative package aims to further enhance the provisions governing the exchange of information in the context of crisis management ⁽⁷⁹⁾.

15.2. The ECB supports comprehensive and timely exchange of information between competent authorities and resolution authorities for the purposes of crisis management. The ECB and the SRB already have in place a comprehensive bilateral Memorandum of Understanding facilitating such exchange ⁽⁸⁰⁾. The Memorandum establishes multiple channels for information exchange and cooperation, ensuring that the SRB is informed of relevant developments concerning entities directly supervised by the ECB.

15.3. The ECB has concerns, however, about the proposed amendments to the SRMR and to the BRRD requiring the ECB and other members of the ESCB to provide the SRB with all the information necessary for the performance of the SRB's tasks under the SRMR ⁽⁸¹⁾ and to provide the Commission with all information necessary for the performance of the Commission's tasks under the BRRD related to policy development, including the preparation of impact assessments and the preparation and negotiation of legislative proposals ⁽⁸²⁾.

15.4. The material scope of these obligations is not clear and therefore a further specification of the type of information to be transmitted to the SRB and the Commission would be welcome. Specifically, any new provisions on the exchange of information to be included in the BRRD can only apply to the subject matter of that Directive. Such an information exchange would not encompass, for example, information related to the prudential supervision of credit institutions or the Commission's activities in the field of policy development. The ECB understands that this information exchange concerns only information in aggregated form that does not concern individual credit institutions. In addition, the ECB would welcome the establishment of cooperation arrangements with the Commission in order to ensure an effective and smooth transmission of this information. Finally, the ECB understands that any confidential information will be transmitted to the Commission in compliance with relevant sectoral Union law establishing the protection of confidential information and the exceptions to such protection.

⁽⁷⁸⁾ See Opinion of the European Banking Authority on the eligibility of deposits, coverage level and cooperation between deposit guarantee schemes (EBA/OP/2019/10), available on the EBA's website at www.eba.europa.eu.

⁽⁷⁹⁾ See Article 1, points (25) and (43), of the proposed amendments to the SRMR, which amend Article 30 and Article 88 SRMR respectively.

⁽⁸⁰⁾ Memorandum of Understanding between the Single Resolution Board and the European Central Bank in respect of cooperation and information exchange.

⁽⁸¹⁾ See Article 1, point (29), of the proposed amendments to the SRMR, which amends Article 34 of the SRMR and Article 1, point (58), of the proposed amendments to the BRRD, which amends Article 128 of the BRRD.

⁽⁸²⁾ See Article 1, point (58), of the proposed amendments to the BRRD, which amends Article 128 of the BRRD.

15.5. It should also be recalled that confidential statistical information may only be transmitted to the SRB and the Commission in compliance with relevant Union law on the protection of confidential information. In particular, Article 8(4a) of Council Regulation (EC) No 2533/98 ⁽⁸³⁾ allows ESCB members to transmit confidential statistical information ⁽⁸⁴⁾ to authorities or bodies of the Member States and the Union responsible for the supervision of financial institutions, markets and infrastructures or for the stability of the financial system to the extent and at the level of detail necessary for the performance of their respective tasks. Pursuant to the same Article, the authorities or bodies receiving confidential statistical information must take all the necessary regulatory, administrative, technical and organisational measures to ensure the physical and logical protection of confidential statistical information. On that basis, and upon the SRB's request, the ECB transmits confidential statistical information to the SRB.

16. *Personal data transfers*

16.1. While the proposed legislative package seeks to further enhance the provisions governing exchange of information in the context of crisis management, it does not touch upon the issue of personal data protection, which is an important topic and a fundamental right. The SRMR could provide clearer guidance on personal data exchange and appropriate safeguards for data subjects in order to ensure a fair balance between the different interests at stake.

16.2. In addition, experience has shown that the compliance with data protection rules could require additional time in order to perform the actions needed before exchanging the relevant information. This additional time needed could lead to potential delays. This would be particularly problematic in the context of a crisis situation when, for example, the SRB needs prompt information to prepare for resolution. Therefore, there could be a need to introduce specific provisions to temporarily ease the procedural data protection requirements in order to ensure a fair balance between the different interests at stake in those crisis circumstances.

Where the ECB recommends that the proposed regulation and directives are amended, specific drafting proposals are set out in a separate technical working document accompanied by an explanatory text to this effect. The technical working document is available in English on EUR-Lex.

Done at Frankfurt am Main, 5 July 2023.

The President of the ECB
Christine LAGARDE

⁽⁸³⁾ Council Regulation (EC) No 2533/98 of 23 November 1998 concerning the collection of statistical information by the European Central Bank (OJ L 318, 27.11.1998, p. 8). The legal basis for Regulation (EC) No 2533/98 is Article 5.4 of the Statute of the ESCB, which provides that the Council, in accordance with the procedure laid down in Article 41 of the Statute of the ESCB, shall, inter alia, define the confidentiality regime applicable to the collection of statistical information by the ECB, assisted by the NCBs.

⁽⁸⁴⁾ As defined in Article 1, point (12), of Regulation (EC) No 2533/98.

(Announcements)

PROCEDURES RELATING TO THE IMPLEMENTATION OF COMPETITION
POLICY

EUROPEAN COMMISSION

Prior notification of a concentration

(Case M.11214 – MUBADALA CAPITAL / FORTRESS MANAGEMENT / FIG)

Candidate case for simplified procedure

(Text with EEA relevance)

(2023/C 307/06)

1. On 24 August 2023, the Commission received notification of a proposed concentration pursuant to Article 4 of Council Regulation (EC) No 139/2004 ⁽¹⁾.

This notification concerns the following undertakings:

- Mubadala Capital LLC ('Mubadala Capital', Saudi-Arabia), controlled by Mubadala Investment Company PJSC (Saudi-Arabia),
- FIG Buyer GP ('Fortress Management', USA), a newly formed entity wholly-owned by members of the current management team of Fortress Investment Group LLC,
- Fortress Investment Group LLC ('FIG', USA).

Mubadala Capital and Fortress Management will acquire within the meaning of Article 3(1)(b) of the Merger Regulation joint control of the whole of FIG.

The concentration is accomplished by way of purchase of equity interests and a limited partnership agreement.

2. The business activities of the undertakings concerned are the following:

- Mubadala Capital is the asset management subsidiary of MIC,
- Fortress Management is owned by members of the current management team of FIG,
- FIG is a diversified investment management firm.

3. On preliminary examination, the Commission finds that the notified transaction could fall within the scope of the Merger Regulation. However, the final decision on this point is reserved.

Pursuant to the Commission Notice on a simplified procedure for treatment of certain concentrations under Council Regulation (EC) No 139/2004 ⁽²⁾ it should be noted that this case is a candidate for treatment under the procedure set out in the Notice.

4. The Commission invites interested third parties to submit their possible observations on the proposed operation to the Commission.

⁽¹⁾ OJ L 24, 29.1.2004, p. 1 (the 'Merger Regulation').

⁽²⁾ OJ C 366, 14.12.2013, p. 5.

Observations must reach the Commission not later than 10 days following the date of this publication. The following reference should always be specified:

M.11214 - MUBADALA CAPITAL / FORTRESS MANAGEMENT / FIG

Observations can be sent to the Commission by email or by post. Please use the contact details below:

Prior notification of a concentration
(Case M.11229 – MFE-MEDIAFOREUROPE / PROSIEBENSAT1)
Candidate case for simplified procedure

(Text with EEA relevance)

(2023/C 307/07)

1. On 24 August 2023, the Commission received notification of a proposed concentration pursuant to Article 4 of Council Regulation (EC) No 139/2004 ⁽¹⁾.

This notification concerns the following undertakings:

- MFE-MEDIAFOREUROPE N.V. ('MFE', Netherlands), controlled by Fininvest S.p.A. (Italy),
- ProSiebenSat.1 Media SE ('P7S1', Germany).

MFE will acquire within the meaning of Article 3(1)(b) of the Merger Regulation sole control of the whole of P7S1.

The concentration is accomplished by way of purchase of shares.

2. The business activities of the undertakings concerned are the following:

- MFE is a multinational media group that operates Italian and Spanish language Free-TV channels, radio stations and Pay-TV offer contents and engages in business activities related to the audio-visual sector including the sale of advertising across various distribution platforms.
- P7S1 is a mass media and digital company that operates in the entertainment, dating and video, and commerce and venture segments, focusing on German-speaking countries.

3. On preliminary examination, the Commission finds that the notified transaction could fall within the scope of the Merger Regulation. However, the final decision on this point is reserved.

Pursuant to the Commission Notice on a simplified procedure for treatment of certain concentrations under Council Regulation (EC) No 139/2004 ⁽²⁾ it should be noted that this case is a candidate for treatment under the procedure set out in the Notice.

4. The Commission invites interested third parties to submit their possible observations on the proposed operation to the Commission.

Observations must reach the Commission not later than 10 days following the date of this publication. The following reference should always be specified:

M.11229 – MFE-MEDIAFOREUROPE / PROSIEBENSAT1

Observations can be sent to the Commission by email or by post. Please use the contact details below:

EUROPEAN COMMISSION

Publication of an approved standard amendment to a product specification of a protected designation of origin or protected geographical indication in the sector of agricultural products and foodstuffs, as referred to in Article 6b(2) and (3) of Commission Delegated Regulation (EU) No 664/2014

(2023/C 307/08)

This communication is published in accordance with Article 6b(5) of Commission Delegated Regulation (EU) No 664/2014 ⁽¹⁾.

COMMUNICATING THE APPROVAL OF A STANDARD AMENDMENT TO THE PRODUCT SPECIFICATION OF A PROTECTED DESIGNATION OF ORIGIN OR PROTECTED GEOGRAPHICAL INDICATION ORIGINATING IN A MEMBER STATE

(Regulation (EU) No 1151/2012)

‘Bardejovský Med / Med z Bardejova’

EU No: PDO-SK-02778-AM01 - 14.6.2023

PDO (X) PGI ()

1. Name of product

‘Bardejovský Med / Med z Bardejova’

2. Member State to which the geographical area belongs

Slovakia

3. Member State authority communicating the standard amendment

Industrial Property Office of the Slovak Republic

—

4. Description of the approved amendment(s)

‘BARDEJOVSKÝ MED / MED Z BARDEJOVA’

ORIGINAL TEXT

Fir-tree honeydew honey

Physicochemical characteristics

⁽¹⁾ OJ L 179, 19.6.2014, p. 17.

Water content:	maximum 18 % on the surface in the vessel after settling
Hydroxymethylfurfural (HMF) content:	for undissolved honey after centrifugation, no more than 5 mg/kg for dissolved honey after crystallisation, no more than 15 mg/kg
Sucrose content:	no more than 5 g/100 g
Glucose and fructose content:	at least 60 %
Trace element content:	more than 1 %
Electrical conductivity:	at least 100 mS/m

It contains very high quantities of minerals and trace elements.

Organoleptic properties

Appearance

Colour:	clear, dark to black, with slight hint of green following crystallisation, 95-114 mm on the Pfund scale
Crystallisation:	crystallisation produces very fine crystals which dissolve rapidly at low temperature when the honey is dissolved
Smell:	mild, not over-pronounced, delicately sweet buttery aroma
Taste:	delicately sweet with a mild, not over-pronounced buttery flavour

Lime-tree honeydew honey

Physicochemical characteristics

Water content:	maximum 18 % on the surface in the vessel after settling
Hydroxymethylfurfural (HMF) content:	for undissolved honey after centrifugation, no more than 5 mg/kg for dissolved honey after crystallisation, no more than 15 mg/kg
Sucrose content:	no more than 5 g/100 g
Glucose and fructose content:	at least 60 %
Trace element content:	more than 1 %
Electrical conductivity:	at least 90 mS/m

Organoleptic properties

Appearance

Colour:	clear, dark-brown to black, with slight trace of green following crystallisation, 95-110 mm on the Pfund scale
---------	--

Crystallisation:	the crystallisation of lime-tree honeydew is relatively rapid compared with that of other species; the crystals are quite large and resemble coarse grains of sand
Smell:	spicy with a strong aroma of lime blossom
Taste:	slightly spicy with a distinctive flavour similar to menthol

Honeydew honey

Physicochemical characteristics

Water content:	maximum 18 % on the surface in the vessel after settling
Hydroxymethylfurfural (HMF) content:	for undissolved honey after centrifugation, no more than 5 mg/kg for dissolved honey after crystallisation, no more than 15 mg/kg
Sucrose content:	no more than 5 g/100 g
Glucose and fructose content:	at least 60 %
Trace element content:	more than 1 %
Electrical conductivity:	at least 95 mS/m

Organoleptic properties

Appearance

Colour:	clear, brownish red, brown to dark brown 95-110 mm on the Pfund scale
Crystallisation:	rapid, forming rather thick crystals
Smell:	slightly spicy
Taste:	slightly buttery and spicy with a characteristic honeydew taste

NEW WORDING:

Fir-tree honeydew honey

Physicochemical characteristics

Water content:	maximum 18 % on the surface in the vessel after settling
Hydroxymethylfurfural (HMF) content:	for undissolved honey after centrifugation, no more than 5 mg/kg for dissolved honey after crystallisation, no more than 15 mg/kg
Sucrose content:	no more than 5 g/100 g
Glucose and fructose content:	at least 45 %
Electrical conductivity:	at least 100 mS/m

It contains very high quantities of minerals and trace elements.

Organoleptic properties

Appearance

Colour:	clear, dark to black, with slight hint of green following crystallisation, more than 65 mm on the Pfund scale
Crystallisation:	crystallisation produces very fine crystals which dissolve rapidly at low temperature when the honey is dissolved
Smell:	mild, not over-pronounced, delicately sweet buttery aroma
Taste:	delicately sweet with a mild, not over-pronounced buttery flavour

Lime-tree honeydew honey

Physicochemical characteristics

Water content:	maximum 18 % on the surface in the vessel after settling
Hydroxymethylfurfural (HMF) content:	for undissolved honey after centrifugation, no more than 5 mg/kg for dissolved honey after crystallisation, no more than 15 mg/kg
Sucrose content:	no more than 5 g/100 g
Glucose and fructose content:	at least 45 %
Electrical conductivity:	at least 90 mS/m

Organoleptic properties

Appearance

Colour:	clear, dark-brown to black, with slight trace of green following crystallisation, more than 65 mm on the Pfund scale
Crystallisation:	the crystallisation of lime-tree honeydew is relatively rapid compared with that of other species; the crystals are quite large and resemble coarse grains of sand
Smell:	spicy with a strong aroma of lime blossom
Taste:	slightly spicy with a distinctive flavour similar to menthol

Honeydew honey

Physicochemical characteristics

Water content:	maximum 18 % on the surface in the vessel after settling
Hydroxymethylfurfural (HMF) content:	for undissolved honey after centrifugation, no more than 5 mg/kg for dissolved honey after crystallisation, no more than 15 mg/kg
Sucrose content:	no more than 5 g/100 g

Glucose and fructose content:	at least 45 %
Electrical conductivity:	at least 95 mS/m
Organoleptic properties	
Appearance	
Colour:	clear, dark-brown to black, with slight trace of green following crystallisation, more than 65 mm on the Pfund scale
Crystallisation:	rapid, forming rather thick crystals
Smell:	slightly spicy
Taste:	slightly buttery and spicy with a characteristic honeydew taste

The amendment affects the single document.

SINGLE DOCUMENT

‘Bardejovský Med / Med z Bardejova’

EU No: PDO-SK-02778-AM01 - 14.6.2023

PDO (X) PGI ()

1. Name(s) [of PDO or PGI]

‘Bardejovský Med / Med z Bardejova’

2. Member State or Third Country

Slovakia

3. Description of the agricultural product or foodstuff

3.1. Type of product [listed in Annex XI]

Class 1.4. Other products of animal origin (eggs, honey, various dairy products except butter, etc.)

3.2. Description of the product to which the name in (1) applies

‘Bardejovský med/Med z Bardejova’ encompasses three separate products:

Fir-tree honeydew honey;

Lime-tree honeydew honey; and

Honeydew honey.

It is presented in liquid or crystallised form.

Fir-tree honeydew honey

Physicochemical characteristics

Water content: maximum 18 % on the surface in the vessel after settling

Hydroxymethylfurfural (HMF) content: for undissolved honey after centrifugation, no more than 5 mg/kg
for dissolved honey after crystallisation, no more than 15 mg/kg

Sucrose content: no more than 5 g/100 g

Glucose and fructose content: at least 45 %

Electrical conductivity: at least 100 mS/m

It contains very high quantities of minerals and trace elements.

Organoleptic properties

Appearance

Colour: clear, dark to black, with slight hint of green following crystallisation, 95-65 mm on the Pfund scale

Crystallisation: crystallisation produces very fine crystals which dissolve rapidly at low temperature when the honey is dissolved

Smell: mild, not over-pronounced, delicately sweet buttery aroma

Taste: delicately sweet with a mild, not over-pronounced buttery flavour

Lime-tree honeydew honey

Physicochemical characteristics

Water content: maximum 18 % on the surface in the vessel after settling

Hydroxymethylfurfural (HMF) content: for undissolved honey after centrifugation, no more than 5 mg/kg
for dissolved honey after crystallisation, no more than 15 mg/kg

Sucrose content: no more than 5 g/100 g

Glucose and fructose content: at least 45 %

Electrical conductivity: at least 90 mS/m

Organoleptic properties

Appearance

Colour: clear, dark-brown to black, with slight trace of green following crystallisation, more than 65 mm on the Pfund scale

Crystallisation: the crystallisation of lime-tree honeydew is relatively rapid compared with that of other species; the crystals are quite large and resemble coarse grains of sand

Smell: spicy with a strong aroma of lime blossom

Smell:	slightly spicy
Taste:	slightly buttery and spicy with a characteristic honeydew taste

3.3. *Feed (for products of animal origin only) and raw materials (for processed products only)*

—

3.4. *Specific steps in production that must take place in the identified geographical area*

All steps in the production of 'Bardejovský med/Med z Bardejova', from the placement of hives to the filling of jars, must take place in the defined geographical area.

3.5. *Specific rules concerning slicing, grating, packaging, etc. of the product the registered name refers to*

'Bardejovský med/Med z Bardejova' must be packaged in the defined geographical area referred to in point 4 so as to better protect the authenticity and quality of the product and to ensure the traceability of and supervision over the product.

This is the only way to preserve quality and prevent any changes to the physicochemical and organoleptic characteristics. Transporting the goods to a new location leads to changes in temperature, humidity and the absorption of extraneous odours, and an increase in the quantity of HMFs and loss of diastase. Packaging the product in the defined area reduces the risk of it mixing with honey from outside the area defined in point 4.

3.6. *Specific rules concerning labelling of the product the registered name refers to*

—

4. **Concise definition of the geographical area**

'Bardejovský med/Med z Bardejova' is made in the area of the Čergov Mountains in the Bardejov district, in the municipalities of Hertník, Šiba, Hervartov, Richvald, Kríže, Tarnov, Rokytov and Mokroluh, and in the following parts of Bardejov town: Koligrund, Bardejovská zábava, Poštárka and Bardejov-Mihaľov.

5. Link with the geographical area

The application for registration of the designation of origin 'Bardejovský med/Med z Bardejova' is based solely on the specific quality and characteristics of the product, which result from the natural and human factors present in the geographical area.

The Čergov Mountains lie in the north-eastern part of Slovakia. The range has formed on a flysch base with sandstone and claystone. The surface is covered in mixed forests dominated by beech, fir and spruce. The Bardejov section of the hills has homogeneous fir stands that in one area are also interspersed with small-leaved lime trees and beech trees. The proportion of fir trees in the forests of this defined geographical area is very high – estimated at 70 %. Around 6 000 ha of the forested area is covered in fir, and the beehives are located in those areas on permanent or nomadic sites.

The entire Čergov range is in the cool climate zone, with average temperatures of -3 to -6 °C in winter and 14 to 16 °C in summer, and snow cover of 120 to 160 days annually. The area enjoys 10 to 30 days a year when the temperature reaches 25 °C or more. The climate is rather cool and humid, which creates suitable conditions for the life cycle of the green-striped fir aphid (*Cinara pectinatae*) in the *Lachnidea* family, and for its proliferation into large colonies. The aphid secretes honeydew and this is a basic resource for the production of 'Bardejovský med/Med z Bardejova'.

The aphids feed by piercing the branches of fir trees or the leaves of other deciduous or coniferous trees and sucking their sap. Their metabolism cannot process some of the sap's components and so they excrete it in the form of sweet drops, which bees take to their hives and enrich with specific substances (enzymes); they thicken them, store them in honeycombs in the hives and produce honey from them. The Carniolan honey bee (*Apis mellifera carnica*) has been kept in this area for a long time, and it has adapted to the local climatic conditions and the gathering of honeydew. The Carniolan honey bee (*Apis mellifera carnica*) has been kept in this area for a long time, and it has adapted to the local climatic conditions and the gathering of honeydew.

Bees produce 'Bardejovský med/Med z Bardejova' in hives located permanently in apiaries or in nomadic hives within the precisely determined boundaries of municipalities in the defined geographical area. The hives must be made of natural material: wood. Bees may not be kept in plastic or polystyrene hive assemblies.

The honey is obtained from honeycombs through centrifugation in honey extractors. Centrifugation is done when the honey is ripe and the water content does not exceed 18 %. Brood comb may not be centrifuged. During the beekeeping season, chemical medicinal products may not be used in the hives. The water content of the honey may not be reduced through technical evaporation. After centrifugation, the honey is filtered using screens to remove impurities (wax, bees etc.). Only impurities may be removed from the honey, and nothing may be added to it. The honey is then stored in containers intended for that purpose or it may be packaged immediately in glass jars intended for final sale to the consumer. After centrifugation, if the honey has been stored in containers, it can only dissolve at temperatures below 45 °C. The entire process of centrifugation and packaging of the honey may only take place in a plant designated for that purpose and approved by the relevant regional veterinary and food administration, and which must be located in the defined territory.

Beekeepers collect honey in a traditional, artisanal way, which is closely linked to the area. The skill of local beekeepers is in their selection of locations to place the apiaries, the way in which the honey is obtained, its centrifugation and the principles of storing and decanting the honey. Only old rotting wood from local trees, which produces harmless and non-irritating smoke, is used in the smoker. During the beekeeping season bees may not be fed with sugar or other feed. The honeycombs are uncapped in a traditional way using a fork. The honey is extracted from the frame by centrifugation, without the use of heat. It is not pasteurised.

The specificity of 'Bardejovský med/Med from Bardejov' lies mainly in the fact that both lime-tree honeydew and honeydew honey also contain fir-tree honeydew, which influences their colour, from dark brown to black; the composition creates a very delicate taste. It owes this specific quality to its composition and its high flavonoid, mineral and trace element content. Honey originating in this way is characterised by a rather thick consistency, a delicate flavour, a dark colour and an aroma. It contains very high quantities of minerals and trace elements.

Quality 'Bardejovský med/Med z Bardejova' produced at clean, natural sites has won several awards at prestigious global fairs. The quality of the product was also demonstrated in a text published in the newspaper *Pravda* on 5 July 2016: 'For example, a while ago honeydew honey from Bardejov was declared the benchmark product of its type.' A newspaper article in *Nový čas* dated 14 October 2012 carried the headline 'Bardejov honey is the best in the world: Jozef the beekeeper wins gold'.

'Bardejovský med/Med z Bardejova' has close links to its area of origin. The product's specific qualities are linked to the geographical area. Homogeneous fir stands grow only in a very favourable and clean environment. The microclimatic conditions, the elevation above sea level, the climate and the humidity of the defined area create favourable conditions for aphids to reproduce, which in turn affect the production of honeydew. The hives are located in dense fir forests.

The electrical conductivity of honeydew honey in the defined geographical area is much higher than the usual conductivity of honeydew honeys in other areas. The electrical conductivity is caused by the high content of trace elements and minerals, such as magnesium, manganese, iron, copper, cobalt, calcium, phosphorus and others. It is the presence of these minerals and trace elements in the local subsoil where the fir stands grow that gives 'Bardejovský med/Med z Bardejova' its specific characteristics and quality. These rare substances enter the branches of the fir trees through the root system and are then secreted by the aphids that feed on their sap. The bees then transfer them to their hives, where the honey is produced. These facts have an impact on the composition and quality of the honey and give Bardejov honey its characteristic properties.

Honey has been produced from fir trees in this area for a very long and unbroken period. The experience and skill of the local beekeepers are reflected in the method of producing the honey. Thanks to their high skill level, local beekeepers are also able to comply with the many requirements placed on honey production and to produce honey with the specific characteristics ensuing from the exceptional nature of this geographical area.
