Acts whose titles are printed in light type are those relating to day-to-day management of agricultural matters, and are generally valid for a limited period.

The titles of all other acts are printed in bold type and preceded by an asterisk.

All amounts in this budget document are expressed in euro unless otherwise indicated.

Any revenue provided for in Article 21(2) and (3) of the Financial Regulation, entered in Titles 5 and 6 of the statement of revenue, may lead to additional appropriations being entered on the headings which bore the initial expenditure giving rise to the corresponding revenue.

Figures for outturn refer to all authorised appropriations, including budget appropriations, additional appropriations and earmarked revenue.

---

Budgetary remarks are only executable insofar as they do not modify or extend the scope of an existing legal base, impinge on the administrative autonomy of institutions and can be covered by available resources (as indicated in the annex to the executability letter dated 28 October 2015).

## DEFINITIVE ADOPTION (EU, Euratom) 2016/150

## of the European Union's general budget for the financial year 2016

THE PRESIDENT OF THE EUROPEAN PARLIAMENT,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 314 thereof,

Having regard to the Treaty establishing the European Atomic Energy Community, and in particular Article 106a thereof,

Having regard to Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources <sup>(1)</sup>,

Having regard to Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 <sup>(2)</sup>,

Having regard to Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the years 2014-2020 <sup>(3)</sup>,

Having regard to the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management <sup>(4)</sup>,

Having regard to the draft general budget of the European Union for the financial year 2016, which the Commission adopted on 24 June 2015,

Having regard to the position on the draft budget of the European Union for the financial year 2016, which the Council adopted on 4 September 2015 and forwarded to Parliament on 17 September 2015,

Having regard to the Commission's Letters of Amendment No 1/2016 and No 2/2016 to the draft general budget of the European Union for the financial year 2016,

Having regard to the resolution adopted by Parliament on 28 October 2015 on the Council position on the draft general budget of the European Union for the financial year 2016,

Having regard to the amendments to the draft general budget adopted by Parliament on 28 October 2015,

Having regard to the letter of 28 October 2015 from the President of the Council stating that the Council was unable to approve all the amendments adopted by Parliament,

<sup>(1)</sup> OJ L 163, 23.6.2007, p. 17.

## A. INTRODUCTION AND FINANCING OF THE GENERAL BUDGET

### INTRODUCTION

The general budget of the Union is the instrument which sets out and authorises the total amount of revenue and expenditure deemed necessary for the European Union and the European Atomic Energy Community for each year.

The budget is established and implemented in compliance with the principles of unity, budgetary accuracy, annuality, equilibrium, unit of account, universality, specification, sound financial management and transparency.

- The *principle of unity* and the *principle of budgetary accuracy* mean that all revenue and expenditure of the Union when it is charged to the budget must be incorporated in a single document.
- The *principle of annuality* means that the budget is adopted for one budgetary year at a time and that both commitment and payment appropriations for the current budgetary year must, in principle, be used in the course of the year.
- The *principle of equilibrium* means that forecasts of revenue for the budgetary year must be equal to payment appropriations for that year; borrowing to cover any budget deficit which may arise is not compatible with the own resources system and will not be authorised.
- In accordance with the *principle of unit of account*, the budget is drawn up and implemented in euros and the accounts shall be presented in euros.
- The *principle of universality* means that total revenue is to cover total payment appropriations with the exception of a limited number of revenue items which are assigned to particular items of expenditure. Revenue and expenditure are entered in full in the budget without any adjustment against each other.
- The *principle of specification* means that each appropriation must have a given purpose and be assigned to a specific objective in order to prevent any confusion between appropriations.
- The *principle of sound financial management* is defined by reference to the principles of economy, efficiency and effectiveness.
- The budget is established in compliance with the *principle of transparency*, ensuring sound information on the implementation of the budget and the accounts.

The budget presents appropriations and resources by purpose (activity-based budgeting), with a view to enhancing transparency in the management of the budget with reference to the objectives of sound financial management and in particular efficiency and effectiveness.

The expenditure authorised by the present budget totals EUR 155 004 173 148 in commitment appropriations and EUR 143 885 295 484 in payment appropriations, representing a variation rate of – 4,48 % and of + 1,84 % respectively by comparison with the 2015 budget.

Budgetary revenue totals EUR 143 885 295 484. The uniform rate of call for the VAT resource is 0,30 % whilst that for the GNI resource is 0,7134 %. Traditional own resources (customs duties and sugar levies) account for 12,92 % of the financing of the budget for 2016. The VAT resource accounts for 13,07 % and the GNI resource for 72,88 %. Other revenue for this financial year is estimated at EUR 1 616 701 373.

The own resources needed to finance the 2016 budget account for 0,97 % of the total GNI, thus falling below the ceiling of 1,23 % of GNI calculated using the method set out in Article 3(1) of Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources (OJ L 163, 23.6.2007, p. 17).

The tables below set out step by step the method used to calculate the financing of the 2016 budget.

## FINANCING OF THE GENERAL BUDGET

**Appropriations to be covered during the financial year 2016 pursuant to Article 1 of Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources**

TABLE 4

Correction of budgetary imbalances for the United Kingdom for the year 2015 pursuant to Article 4 of Decision 2007/436/EC, Euratom (Chapter 1 5)

Description	Coefficient <sup>(1)</sup> (%)	Amount
1. United Kingdom's share (in %) of notional uncapped VAT base	19,4 288	
2. United Kingdom's share (in %) of enlargement-adjusted total allocated expenditure	7,3 919	
3. (1) – (2)	12,0 369	
<b>4. Total allocated expenditure</b>		<b>130 016 348 031</b>
5. Enlargement related expenditure <sup>(2)</sup>		36 305 752 879
6. Enlargement-adjusted total allocated expenditure = (4) – (5)		93 710 595 151
7. United Kingdom's correction original amount = (3) × (6) × 0,66		7 444 724 929
8. United Kingdom's advantage <sup>(3)</sup>		2 212 027 407
9. Core United Kingdom's correction = (7) – (8)		5 232 697 523
10. Windfall gains deriving from traditional own resources <sup>(4)</sup>		– 50 550 782
11. Correction for the United Kingdom = (9) – (10)		5 283 248 305

<sup>(1)</sup> Rounded percentages.  
<sup>(2)</sup> The amount of enlargement-related expenditure corresponds to total allocated expenditure in 13 Member States (that have acceded to the EU after 30 April 2004), except for agricultural direct payments and market-related expenditure as well as that part of rural development expenditure originating from the EAGGF, Guarantee Section.  
<sup>(3)</sup> The 'UK advantage' corresponds to the effects arising for the United Kingdom from the changeover to capped VAT and the introduction of the GNP/GNI-based own resource.  
<sup>(4)</sup> These windfall gains correspond to the net gains of the United Kingdom resulting from the increase — from 10 to 25 % as of 1 January 2001 — in the percentage of traditional own resources retained by Member States to cover the collection costs of traditional own resources (TOR).

### OWN RESOURCES

#### CHAPTER 1 1 — LEVIES AND OTHER DUTIES PROVIDED FOR UNDER THE COMMON ORGANISATION OF THE MARKETS IN SUGAR (ARTICLE 2(1)(A) OF DECISION 2007/436/EC, EURATOM)

##### 1 1 0 *Production levies related to the marketing year 2005/2006 and previous years*

Financial year 2016	Financial year 2015	Financial year 2014
p.m.	p.m.	– 200 437 776,87

##### *Remarks*

The common organisation of the market in the sugar sector provided that sugar, isoglucose and inulin syrup producers had to pay basic and B production levies. These levies were intended to cover market support expenditure. At present amounts entered under this article are a consequence of the revision of past established levies. Levies for the marketing years 2007/2008 and following years are entered under Article 1 1 7 of this chapter as a 'production charge'.

Figures are net of collection costs.

##### *Legal basis*

Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1).

Council Decision 2007/436/EC, Euratom of 7 June 2007 on the system of the European Communities' own resources (OJ L 163, 23.6.2007, p. 17), and in particular Article 2(1)(a) thereof.

Council Regulation (EU) No 1360/2013 of 2 December 2013 fixing the production levies in the sugar sector for the 2001/2002, 2002/2003, 2003/2004, 2004/2005 and 2005/2006 marketing years, the coefficient required for calculating the additional levy for the 2001/2002 and 2004/2005 marketing years and the amount to be paid by sugar manufacturers to beet sellers in respect of the difference between the maximum levy and the levy to be charged for the 2002/2003, 2003/2004 and 2005/2006 marketing years (OJ L 343, 19.12.2013, p. 2).

***Remarks***

This article is intended for the recording of income charged by new Member States in the event of non-elimination of sugar stocks considered surplus within the meaning of Commission Regulation (EC) No 60/2004 of 14 January 2004 laying down transitional measures in the sugar sector by reason of the accession of the Czech Republic, Estonia, Cyprus, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovakia (OJ L 9, 15.1.2004, p. 8).

It is also intended to record revenue from the outstanding sugar storage levies as Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1) abolished the storage levy.

This article also covers the outstanding amounts due pursuant to Article 5 of Commission Regulation (EEC) No 65/82 of 13 January 1982 laying down detailed rules for carrying forward sugar to the following marketing year (OJ L 9, 14.1.1982, p. 14) when the obligation to store sugar carried forward is not complied with, and the amounts due in accordance with Council Regulation (EEC) No 1789/81 of 30 June 1981 laying down general rules concerning the system of minimum stocks in the sugar sector (OJ L 177, 1.7.1981, p. 39) when the general rules concerning the system of minimum stocks in the sugar sector are not complied with.

Figures are net of collection costs.

*Remarks*

The GNI-based resource is an 'additional' resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments and other revenue in any particular year. By implication, the GNI-based resource ensures that the general budget of the Union is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (VAT-based payments, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States' gross national income for this financial year is 0,71 34 %.

*Remarks*

The budgetary imbalance correction mechanism in favour of the United Kingdom (UK correction) was introduced by the European Council in Fontainebleau in June 1984 and the resulting own resources decision of 1985. The purpose of the mechanism is to reduce the UK budgetary imbalance through a reduction in its payments to the Union.

p.m.	1 434 557 708	1 005 406 925,37

##### *Remarks*

In accordance with Article 18 of the Financial Regulation, the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 39 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 15 of Regulation (EC, Euratom) No 1150/2000.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget that must be presented by the Commission within 15 days following the submission of the provisional accounts.

A deficit is entered in Article 27 02 01 of the statement of expenditure in Section III 'Commission'.

##### *Legal basis*

*Remarks*

Under Article 7(1) of Regulation (EEC, Euratom) No 1553/89, Member States are to send the Commission a statement of the total amount of the VAT resources base for the previous calendar year before 31 July.

Each Member State is debited with an amount calculated on the basis of that statement according to Union rules and credited with the 12 payments actually made during the previous financial year. The Commission works out each Member State's balance and informs it in time for that Member State to enter its balance in the Commission's account referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 on the first working day of December of the same year.

Any corrections to the abovementioned statements resulting from Commission controls in accordance with Article 9 of Regulation (EEC, Euratom) No 1553/89 or/and any changes to the GNI of previous financial years that have an effect on the capping of the 'VAT' base will lead to adjustments of the 'VAT' balances.

*Legal basis*

*Remarks*

Article 3 of the Protocol on the position of Denmark and Article 5 of the Protocol on the position of the United Kingdom and Ireland, annexed to the Treaty on European Union and the Treaty on the Functioning of the European Union, grant full exemption to these Member States from supporting the financial consequences of some specific policies in the area of freedom, security and justice, with the exception of the related administrative costs. They can therefore obtain an adjustment to the own resources paid for each year in which they do not participate.

Each Member State's contribution to the adjustment mechanism is calculated by applying to the budget expenditure resulting from this operation or policy the scale of the aggregate gross national income and its components from the preceding year, supplied by the Member States in accordance with Article 2(2) of Council Regulation (EC, Euratom) No 1287/2003 of 15 July 2003 on the harmonisation of gross national income at market prices (OJ L 181, 19.7.2003, p. 1).

The Commission works out each Member State's balance and informs it in time for that Member State to enter its balance in the account referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 on the first working day of December, in accordance with Article 10a of that Regulation.

Financial year 2016	Financial year 2015	Financial year 2014
40 000 000	40 000 000	18 567 546,46

*Remarks*

This article is intended to record revenue from the interest yielded by pre-financing.

In accordance with Article 21(3)(d) of the Financial Regulation, this revenue may be used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Interest generated by pre-financing payments made from the budget shall not be due to the Union except as otherwise provided for in the delegation agreements, with the exception of those agreements concluded with third countries or the bodies they have designated. In cases in which it is provided for, such interest shall be reused for the corresponding action, deducted from payment requests in accordance with point (c) of the first subparagraph of Article 23(1) of the Financial Regulation, or recovered.

Delegated Regulation (EU) No 1268/2012 also lays down provisions regarding the accounting of interest yielded on pre-financing.

CHAPTER 5 2 — REVENUE FROM INVESTMENTS OR LOANS GRANTED, BANK AND OTHER INTEREST (*cont'd*)5 2 3 *Revenue generated on Trust Accounts — Assigned revenue*

Financial year 2016	Financial year 2015	Financial year 2014
p.m.	p.m.	123 434,10

*Remarks*

This article is intended to record interest and other revenue generated on Trust Accounts.

The Trust Accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank/Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) managing Union programmes and the amounts paid in by the Union remain on the account until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in accession countries.

In accordance with Article 21(4) of the Financial Regulation, interest generated by Trust Accounts used for Union programmes are used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

*Legal basis*

Financial year 2016	Financial year 2015	Financial year 2014
p.m.	p.m.	53 081 071,04

*Remarks*

Decision 2003/76/EC stipulates that the Commission is entrusted with winding up the financial operations of the European Coal and Steel Community which are still in progress upon expiry of the ECSC Treaty.

Pursuant to Article 4 of that Decision, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by the Research Fund for Coal and Steel.

The net revenue available for financing research projects in year  $n + 2$  appears in the balance sheet of the ECSC in liquidation for year  $n$ , and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2014 will be used for research in 2016. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2016 comes to EUR 43 100 000.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

7 0 0 0 Interest due on late payments into the accounts held with the treasuries of the Member States

Financial year 2016	Financial year 2015	Financial year 2014
5 000 000	10 000 000	62 832 700,78

#### *Remarks*

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 gives rise to the payment of interest by the Member State concerned.

In the case of Member States whose currency is the euro, the interest rate shall be equal to the rate as published in the *Official Journal of the European Union*, C series, which the European Central Bank applied to its refinancing operations, on the first day of the month in which the due date fell, increased by two percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay. The increased rate shall be applied to the entire period of delay.

In the case of Member States whose currency is not the euro, the rate shall be equal to the rate applied on the first day of the month in question by the central banks for their main refinancing operations, increased by two percentage points, or, for the Member States for which the Central Bank rate is not available, the most equivalent rate applied on the first day of the month in question on the Member State's money market, increased by two percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay. The increased rate shall be applied to the entire period of delay.

The interest rate applies to all entries of own resources enumerated under Article 10 of Regulation (EC, Euratom) No 1150/2000.

Financial year 2016	Financial year 2015	Financial year 2014
p.m.	p.m.	0,—

*Remarks*

This article is intended to record any excess emissions premium imposed by the Commission.

The objective of Regulation (EC) No 443/2009 is to set emission performance standards for new passenger cars registered in the Union, which forms part of the Union's integrated approach to reducing CO<sub>2</sub> emissions from light-duty vehicles while ensuring the proper functioning of the internal market.

However, in respect of each calendar year from 2012 onwards for which a manufacturer's average specific emissions of CO<sub>2</sub> exceed its specific emissions target in that year, the Commission shall impose an excess emissions premium on the manufacturer or, in the case of a pool, the pool manager.

*Legal basis*

Regulation (EC) No 443/2009 of the European Parliament and of the Council of 23 April 2009 setting emission performance standards for new passenger cars as part of the Community's integrated approach to reduce CO<sub>2</sub> emissions from light-duty vehicles (OJ L 140, 5.6.2009, p. 1), and in particular Article 9 thereof.

**8 1 0** *Capital repayments and interest in respect of special loans and risk capital granted in the framework of financial cooperation with Mediterranean third countries*

Financial year 2016	Financial year 2015	Financial year 2014
p.m.	30 000 000	292 611 339,40

*Remarks*

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapters 22 02 and 22 04 of the statement of expenditure in Section III 'Commission' to Mediterranean third countries.

It also comprises capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans/ risk capital were granted at a time those countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

## EUROPEAN PARLIAMENT

## TITLE 2

## BUILDINGS, FURNITURE, EQUIPMENT AND MISCELLANEOUS OPERATING EXPENDITURE

*Remarks*

Since risk cover has been revoked by insurance companies, the risk of industrial conflicts and terrorist attacks for the European Parliament buildings needs to be covered through the general budget of the European Union.

The appropriations of this title accordingly cover all expenses in connection with damage resulting from industrial conflicts and terrorist attacks.

## CHAPTER 2 0 — BUILDINGS AND ASSOCIATED COSTS

## COMMISSION

CHAPTER 5 2 — REVENUE FROM INVESTMENTS OR LOANS GRANTED, BANK AND OTHER INTEREST (*cont'd*)5 2 2 (*cont'd*)

In accordance with Article 21(3)(d) of the Financial Regulation, this revenue may be used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

Interest generated by pre-financing payments made from the budget shall not be due to the Union except as otherwise provided for in the delegation agreements, with the exception of those agreements concluded with third countries or the bodies they have designated. In cases in which it is provided for, such interest shall either be reused for the corresponding action, deducted from payment requests in accordance with point (c) of the first subparagraph of Article 23(1) of the Financial Regulation or recovered.

Delegated Regulation (EU) No 1268/2012 also lays down provisions regarding the accounting of interest yielded on pre-financing.

*Legal basis*

Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1), and in particular Article 8(4) and Article 21(3)(d) thereof.

Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1).

Financial year 2016	Financial year 2015	Financial year 2014
p.m.	p.m.	123 434,10

*Remarks*

This article is intended to record interest and other revenue generated on trust accounts.

The trust accounts are kept on behalf of the Union by international financial institutions (European Investment Fund, European Investment Bank, Council of Europe Development Bank/Kreditanstalt für Wiederaufbau, European Bank for Reconstruction and Development) managing Union programmes and the amounts paid in by the Union remain on the account until they are made available to the beneficiaries under the single programme, such as small and medium-sized enterprises or institutions managing projects in acceding countries.

In accordance with Article 21(4) of the Financial Regulation, interest generated by trust accounts used for Union programmes is used to provide additional appropriations on the lines which bore the initial expenditure giving rise to the corresponding revenue.

*Legal basis*

*Remarks*

Decision 2003/76/EC stipulates that the Commission is entrusted with winding up the financial operations of the European Coal and Steel Community (ECSC) which are still in progress upon expiry of the ECSC Treaty.

Pursuant to Article 4 of that Decision, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by the Research Fund for Coal and Steel.

The net revenue available for financing research projects in year  $n + 2$  appears in the balance sheet of the ECSC in liquidation for year  $n$ , and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2014 will be used for research in 2016. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2016 comes to EUR 43 100 000.

*Remarks*

This item is intended to accommodate amounts recovered following irregularities or negligence, including the related interest, in particular amounts recovered in cases of irregularities or fraud, penalties and interest received, as well as securities, deposits or guarantees forfeited concerning expenditure financed by the European Agricultural Guidance and Guarantee Fund (Guarantee section) under Heading 1 of the 2000-2006 Financial Perspectives and the European Agricultural Guarantee Fund (EAGF), under Heading 2 of the 2007-2013 and the 2014-2020 Multiannual Financial Framework in accordance with Articles 54 and 55 of Regulation (EU) No 1306/2013.

This item is also intended to accommodate amounts recovered following irregularities or oversight, including interest, penalties and securities acquired, resulting from expenditure financed by the temporary scheme for the restructuring of the sugar industry (Sugar Restructuring Fund) in the Community established by Regulation (EC) No 320/2006, which ended on 30 September 2012.

This item is also intended to accommodate the net amounts recovered for which Member States may retain 20 % as provided for in Article 55 of Regulation (EU) No 1306/2013.

In accordance with Article 1(3) of Regulation (EC) No 320/2006 and Articles 43 and 55 of Regulation (EU) No 1306/2013, such amounts shall be regarded as assigned revenue within the meaning of Articles 21 and 174 of the Financial Regulation. Any revenue under this item will be used to provide additional appropriations to any budgetary item under EAGF of the statement of expenditure in this section.

The revenue under this item has been estimated at EUR 155 000 000. When establishing the budget for 2016, this amount was taken into account for financing the needs of measures under Article 05 03 01 (Item 05 03 01 10).

*Legal basis*

Financial year 2016	Financial year 2015	Financial year 2014
5 000 000	10 000 000	62 832 700,78

*Remarks*

Any delay by a Member State in making the entry in the account opened in the name of the Commission referred to in Article 9(1) of Regulation (EC, Euratom) No 1150/2000 gives rise to the payment of interest by the Member State concerned.

In the case of Member States whose currency is the euro, the interest rate shall be equal to the rate as published in the *Official Journal of the European Union*, C series, which the European Central Bank applied to its refinancing operations, on the first day of the month in which the due date fell, increased by two percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay. The increased rate shall be applied to the entire period of delay.

In the case of Member States whose currency is not the euro, the rate shall be equal to the rate applied on the first day of the month in question by the Central Banks for their main refinancing operations, increased by two percentage points, or, for the Member States for which the Central Bank rate is not available, the most equivalent rate applied on the first day of the month in question on the Member State's money market, increased by two percentage points. This rate shall be increased by 0,25 of a percentage point for each month of delay. The increased rate shall be applied to the entire period of delay.

The interest rate applies to all entries of own resources enumerated under Article 10 of Regulation (EC, Euratom) No 1150/2000.

*Remarks*

This article is intended to record any excess emissions premium imposed by the Commission.

The objective of Regulation (EC) No 443/2009 is to set emission performance standards for new passenger cars registered in the Union, which forms part of the Union's integrated approach to reducing CO<sub>2</sub> emissions from light-duty vehicles while ensuring the proper functioning of the internal market.

However, in respect of each calendar year from 2012 onwards for which a manufacturer's average specific emissions of CO<sub>2</sub> exceed its specific emissions target in that year, the Commission shall impose an excess emissions premium on the manufacturer or, in the case of a pool, the pool manager.

*Legal basis*

Regulation (EC) No 443/2009 of the European Parliament and of the Council of 23 April 2009 setting emission performance standards for new passenger cars as part of the Community's integrated approach to reduce CO<sub>2</sub> emissions from light-duty vehicles (OJ L 140, 5.6.2009, p. 1), and in particular Article 9 thereof.

**CHAPTER 8 0 — REVENUE RESULTING FROM THE EUROPEAN UNION GUARANTEE FOR BORROWING AND LENDING OPERATIONS IN THE MEMBER STATES** (*cont'd*)**8 0 2** *European Union guarantee for Union borrowings for financial assistance under the European Financial Stabilisation Mechanism*

Financial year 2016	Financial year 2015	Financial year 2014
p.m.	p.m.	0,—

*Remarks*

The Union guarantee is for borrowings raised on the capital markets or from financial institutions. The outstanding amount of loans or credit lines to be granted to Member States shall be in the limits set out in the legal basis.

This article is intended to record any revenue arising from exercise of rights in connection with a guarantee under Article 01 02 03, provided that this revenue has not been deducted from expenditure.

A summary of borrowing and lending operations, including debt management, in capital and interest, is given in Annex Part II to the statement of expenditure in this section.

*Legal basis*

For the legal basis, see the remark for Article 01 02 03 of the statement of expenditure in this section.

**CHAPTER 8 1 — LOANS GRANTED BY THE COMMISSION****8 1 0** *Capital repayments and interest in respect of special loans and risk capital granted in the framework of financial cooperation with Mediterranean third countries*

Financial year 2016	Financial year 2015	Financial year 2014
p.m.	30 000 000	292 611 339,40

*Remarks*

This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapters 22 02 and 22 04 of the statement of expenditure in this section to Mediterranean third countries.

It also comprises capital repayments and interest payments on special loans and risk capital granted to certain Mediterranean Member States which, however, represent a very small proportion of the overall amount. These loans/ risk capital were granted at a time the countries had not yet joined the Union.

The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans which may still be disbursed during the preceding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

This article may accommodate, in accordance with Article 21 of the Financial Regulation, assigned revenue which is used to provide additional appropriations to finance expenditure to which this revenue is assigned.

## TITLE 01 — ECONOMIC AND FINANCIAL AFFAIRS

CHAPTER 01 02 — ECONOMIC AND MONETARY UNION (*cont'd*)01 02 01 (*cont'd*)*Remarks**Former Article 01 02 01 (in part)*

This appropriation is intended to cover the cost of carrying out the Joint Harmonised EU Programme of Business and Consumer Surveys in the Member States and candidate countries. The programme was initiated by a Commission Decision in November 1961 and was modified through subsequent Council and Commission decisions. It was last approved through Commission Decision C(97) 2241 of 15 July 1997 and presented in the Commission communication COM(2006) 379 final on 12 July 2006 (OJ C 245, 12.10.2006, p. 5).

This appropriation is also intended to cover the cost of studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases and software and the part-financing and support of measures relating to:

- fiscal policy including monitoring of fiscal positions,
- assessment of transposition and application by the Member States of the new Union fiscal governance framework supporting the functioning of the economic and monetary union (EMU),
- economic monitoring, analysis of the combination of measures and coordination of economic policies,
- the external aspects of the EMU,
- macroeconomic developments in the euro area,
- monitoring structural reforms and improving the operation of markets in the EMU and in the Union,
- coordination with financial institutions and analysis and development of financial markets, and borrowing and lending operations involving Member States,
- the facility providing financial assistance for Member States' balance of payments and the European financial stabilisation mechanism,
- cooperation with economic operators and decision-makers in the abovementioned fields,
- expanding the EMU,
- software development, maintenance and related training for the protection of the euro against counterfeiting.

This appropriation is also intended to cover the funding of priority information measures on Union policies on all aspects of the rules and functioning of EMU, as well as on the benefits of closer policy coordination and structural reforms, and to address information needs of key stakeholders and citizens, in relation to the EMU.

**CHAPTER 01 02 — ECONOMIC AND MONETARY UNION** (*cont'd*)**01 02 01** (*cont'd*)

This measure is designed to be an effective channel of communication and dialogue between the citizens of the Union and the Union institutions, and to take account of specific national and regional characteristics, where appropriate in cooperation with the Member State authorities. Emphasis will also be placed on preparing citizens for the introduction of the euro in Member States planning for its introduction.

It includes:

- the development of communication activities at central level (brochures, leaflets, newsletters, website design, development and maintenance, social media, exhibitions, stands, conferences, seminars, audiovisual products, opinion polls, surveys, studies, promotional material, twinning programmes, training etc.), and similar activities at the national and regional level implemented in cooperation with the Commission's representations,
- partnership agreements with Member States that wish to provide information about the euro or the EMU,
- cooperation and networking with Member States in the appropriate forums,
- communication initiatives in third countries, in particular to point out the international role of the euro and the value of financial integration.

The Commission, when implementing this article, should take duly into account the outcomes of the meetings of the Interinstitutional Group on Information (IGI).

The implementation of the Commission's communication strategy takes place in close coordination with the Member States and the European Parliament.

The Commission adopts a strategy and an annual work plan drawing on the orientations set out in its Communication of 11 August 2004 (COM(2004) 552 final) and it reports regularly to the relevant committee of the European Parliament on the implementation of the programme and on planning for the coming year.

This appropriation is also intended to cover or to temporarily pre-finance costs incurred by the Union in concluding and carrying out operations linked with the borrowing and lending operations for macro-financial assistance, Euratom, balance of payment and European financial stabilisation mechanism.

Any revenue entered in Article 5 5 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(3)(a) of the Financial Regulation.

*Remarks*

Article 122(2) of the Treaty on the Functioning of the European Union provides for the possibility of granting Union financial assistance to a Member State in difficulties or seriously threatened with severe difficulties caused by exceptional occurrences beyond its control.

The guarantee provided by the Union is for borrowings raised on the capital markets or from financial institutions.

In accordance with Article 2(2) of Regulation (EU) No 407/2010, the outstanding amount of loans and credit lines granted to Member States under this stabilisation mechanism is to be limited to the margin available under the Union's own resources for payment appropriations.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission to service the debt should debtors default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. ## TITLE 01 — ECONOMIC AND FINANCIAL AFFAIRS

CHAPTER 01 02 — ECONOMIC AND MONETARY UNION (*cont'd*)01 02 77 (*cont'd*)01 02 77 01 (*cont'd*)*Remarks*

This preparatory action is intended to finance the provision of support to Member States for the implementation of key reforms in the areas of fiscal responsibility, growth-enhancing public administration and competitiveness.

This support will aim to enhance the capacity of Member States to implement reforms and to strengthen their public institutions. It should be focused in particular on fiscal, structural and institutional reforms that have been identified as priorities in the course of the Union's regular cycle of macroeconomic surveillance, in the course of an economic adjustment programme, during enhanced surveillance, or during post-programme surveillance. It will be delivered by the Commission upon request of the Member State concerned and is open to all Member States.

This appropriation may be used to cover the implementation of technical assistance programmes and projects by national and international public organisations with strong expertise in capacity development and institution building as well as by private sector actors. It may also be used to cover expenditure related to the preparatory phases of such programmes and projects (programming, identification and formulation) as well as monitoring, evaluation, audit and control during and after implementation. It may also cover the costs of short-term technical assistance, twinning-type arrangements between public authorities as well as support expenditure for such activities (training, meetings, seminars, studies).

*Legal basis*

Preparatory action within the meaning of Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

*Remarks*

Macro-financial assistance ('MFA') is a form of financial aid extended by the Union to partner countries experiencing a balance of payments crisis. MFA is designed for countries geographically, economically and politically close to the Union. These include candidate and potential candidate countries, countries covered by the European Neighbourhood Policy and, in certain circumstances, other third countries. In principle, MFA is only available to countries benefiting from an International Monetary Fund programme.

MFA is exceptional in nature and is mobilised on a case-by-case basis to help countries dealing with serious balance-of-payments difficulties. Its objective is to restore a sustainable external financial situation, while encouraging economic adjustments and structural reforms.

While MFA can take the form of medium/long-term loans or grants, or a combination of these, this article only covers the grant element of MFA operations.

Appropriations under this article will also be used to cover costs incurred in relation to MFA operations, and in particular: (i) costs incurred to conduct operational assessments in the beneficiary countries to obtain reasonable assurances on the functioning of administrative procedures and financial circuits, (ii) costs for ex-post evaluations of MFA operations, and (iii) costs to cover comitology requirements.

*Remarks*

Pursuant to Council Decision of 8 March 1977, the Union guarantees loans made by the European Investment Bank (EIB) in the context of the Union's financial commitments in respect of the Mediterranean countries.

That decision was the basis for a contract of guarantee between the European Economic Community and the EIB signed in Brussels on 30 October 1978 and in Luxembourg on 10 November 1978, setting up a comprehensive guarantee, equal to 75 % of all the funds available for loan operations in the following countries: Malta, Tunisia, Algeria, Morocco, Portugal (Financial Protocol, emergency aid), Turkey, Cyprus, Syria, Israel, Jordan, Egypt, former Yugoslavia and Lebanon.

Decision 90/62/EEC was the basis for a contract of guarantee between the European Economic Community and the EIB signed in Brussels on 24 April 1990 and in Luxembourg on 14 May 1990 as regards Hungary and Poland and for the extension of that contract to cover Czechoslovakia, Romania and Bulgaria, signed in Brussels and in Luxembourg on 31 July 1991.

Decision 93/696/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 22 July 1994 and in Luxembourg on 12 August 1994.

Pursuant to Decisions 93/115/EEC and 96/723/EC, the Union guarantees loans which may be made individually by the EIB in countries of Latin America and Asia with which the European Community has concluded cooperation agreements. Decision 93/115/EEC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 4 November 1993 and in Luxembourg on 17 November 1993. Decision 96/723/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 18 March 1997 and in Luxembourg on 26 March 1997.

Pursuant to Decision 95/207/EC, the Union guarantees loans which may be made individually by the EIB in South Africa. Decision 95/207/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 4 October 1995 and in Luxembourg on 16 October 1995.

## COMMISSION

## TITLE 01 — ECONOMIC AND FINANCIAL AFFAIRS

CHAPTER 01 03 — INTERNATIONAL ECONOMIC AND FINANCIAL AFFAIRS (*cont'd*)01 03 05 (*cont'd*)

Decision 97/256/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 25 July 1997 and in Luxembourg on 29 July 1997 setting up a guarantee restricted to 70 % of the aggregate amount of the appropriations opened, plus all related sums. The overall ceiling of the appropriations opened is equivalent to EUR 7 105 000 000.

Decision 2000/24/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 24 January 2000 and in Luxembourg on 17 January 2000, last restated in 2005, setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations opened, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 19 460 000 000. The EIB is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

Decision 2001/777/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Brussels on 6 May 2002 and in Luxembourg on 7 May 2002 setting up a guarantee at 100 % against losses under a special lending action for selected environment projects in the Baltic Sea basin of Russia under the Northern Dimension. The overall ceiling is EUR 100 000 000.

Decision 2005/48/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Luxembourg on 9 December 2005 and in Brussels on 21 December 2005 setting up a guarantee at 100 % against losses under loans for certain types of projects in Russia, Ukraine, Moldova and Belarus. The overall ceiling is EUR 500 000 000. It covers a period ending on 31 January 2007. At the end of this period, the loans granted by the EIB not having attained the overall amounts referred to above, the period was automatically extended by six months.

Decision 2006/1016/EC was the basis for a contract of guarantee between the European Community and the EIB signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007 setting up a guarantee restricted to 65 % of the aggregate amount of credits disbursed and guarantees provided in respect of EIB financing operations, less amounts reimbursed, plus all related sums. The overall ceiling of the appropriations made available for all countries under the Decision is equivalent to EUR 27 800 000 000 and covers the period beginning on 1 February 2007 and ending on 31 December 2013 with a possible extension of six months. That Decision has been replaced by Decision No 633/2009/EC.

Decision No 633/2009/EC was the basis for an amendment, signed on 28 October 2009, to the contract of guarantee between the European Community and the EIB which was signed in Luxembourg on 1 August 2007 and in Brussels on 29 August 2007. The Union guarantee is restricted to 65 % of the aggregate amount of credits disbursed and guarantees. The maximum ceiling of the EIB financing operations, less amounts cancelled, shall not exceed EUR 27 800 000 000, broken down in a basic ceiling of EUR 25 800 000 000 and an optional mandate of EUR 2 000 000 000. It covers a period ending on 31 October 2011.

Decision No 1080/2011/EU was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg and in Brussels on 22 November 2011. The Union guarantee is restricted to 65 % of the aggregate amount of credits disbursed and guarantees less amounts reimbursed, plus all related amounts. The maximum ceiling of the EIB financing operations, less amounts cancelled, shall not exceed EUR 29 484 000 000, broken down into a general mandate of EUR 27 484 000 000 and a Climate Change mandate of EUR 2 000 000 000. It covers a period beginning on 1 February 2007 and ending on 31 December 2013 with an extension until the entry into force of a new decision.

Decision No 466/2014/EU was the basis for a contract of guarantee between the European Union and the EIB signed in Luxembourg on 22 July 2014 and in Brussels on 25 July 2014. The Union guarantee is restricted to 65 % of the aggregate amount disbursed and guaranteed under EIB financing operations, less amounts reimbursed, plus all related amounts. The maximum ceiling of the EIB financing operations under the Union guarantee, less amounts cancelled, shall not exceed EUR 30 000 000 000, broken down into a fixed ceiling of EUR 27 000 000 000 and an optional mandate of EUR 3 000 000 000. The European Parliament and the Council shall decide in accordance with the ordinary legislative procedure on the activation in whole or in part of the optional mandate. The Union guarantee covers EIB financing operations signed during the period beginning on 25 July 2014 and ending on 31 December 2020 with an extension of six months if the European Parliament and the Council have not adopted a new decision granting the Union guarantee to the EIB against losses under its financing operations outside the Union before the end of 2020.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

This article constitutes the structure for the guarantee provided by the Union. It will enable the Commission, if necessary, to service the debt (repayment of principal, interest and other costs) should a debtor default on the loans granted by the EIB.

The European Investment Fund (EIF) will implement the SME window of the European Fund for Strategic Investments, which will support loan and equity financing of SMEs and mid-caps. The EIF will be entitled to receive management fees for the implementation of the SME window. As provided for in Regulation (EU) 2015/1017, fees due to the EIF shall be primarily met by revenues from the resources in the EFSI guarantee fund and the European Fund for Strategic Investments. However, to the extent that those revenues are not sufficient to cover the fees due to the EIF, those fees shall be covered by the general budget of the Union.

*Remarks*

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

Even though the end of the commitment period has been reached, the facilities have to be operated for several years during which time payments will be needed for investments and in order to honour guarantee obligations. Therefore reporting and monitoring requirements will continue until the end of the facility periods.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 2007/436/EC, Euratom on the system of the European Communities own resources (OJ L 130, 31.5.2000, p. 1) applies.

## TITLE 01 — ECONOMIC AND FINANCIAL AFFAIRS

CHAPTER 01 04 — FINANCIAL OPERATIONS AND INSTRUMENTS (*cont'd*)01 04 51 (*cont'd*)

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget of the Union.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates, for participating in Union programmes and entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenues and repayments generated on Trust Accounts entered in Article 5 2 3 of the statement of revenue will be returned to the general budget of the Union or transferred to the succeeding financial instruments under the Union equity instruments for research and innovation under Horizon 2020 or the Equity Facility for Growth under COSME, as the case may be, in accordance with the Financial Regulation and Regulations (EU) No 1287/2013 and (EU) No 1290/2013.

*Remarks*

National (and regional) Promotional Banks (NPB), together with the European Investment Bank (EIB) and the European Investment Fund (EIF) are considered important actors to finance long-term projects at European level. The Commission communication of 27 March 2014 on long-term financing of the European economy — a follow-up to a Green Paper — confirmed that during consultations ‘calls were made for more joint Union-national or multinational initiatives to promote cooperation and synergies between the Union budget and the EIB/EIF, Multilateral Development Banks (MDBs) and NPBs’. In that communication, the Commission undertook to ‘encourage and monitor the cooperation of NPBs, as requested by the June 2013 European Council and to report to the December 2014 Council’.

In this context, it is important to enable the Commission to develop a pilot project to create, through visible support from the Union budget, a structured network of national and regional promotional banks based in the Member States, in order to enhance their cooperation and to achieve the objective of long-term financing of the real economy and thus support long-term growth, well-being and employment in Europe. Such cooperation will foster the exchange of best practices and help to develop innovative systems to channel private capital towards SMEs and towards project of public interest, such as investments in material and immaterial infrastructure, particularly in the regions hardest hit by recession and unemployment.

To this end, the project will include the following activities:

- promoting the exchange of information and best practices among participants and between participants and European Institutions, through meetings, seminars and publications,
- initiating research programmes and holding conferences for the participants,
- developing initiatives to promote the concept of long-term investment within the economic and financial sector,
- promoting the removal of obstacles and the development of incentives to favour long-term investing.

This appropriation is intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the ‘European Economic Area’ Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

## Remarks

This appropriation is intended to strengthen the competitiveness of enterprises, in particular that of small and medium-sized enterprises (SMEs), and to encourage entrepreneurship and foster the creation and growth of SMEs.

The implemented measures will include:

- networks bringing together a variety of stakeholders,
- market replication projects,

**CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) (*cont'd*)****02 02 01** (*cont'd*)

- policy analyses, development and coordination with participating countries,
- studies on gender-related discrimination linked to female entrepreneurship and implementation of policies to foster female entrepreneurship,
- information sharing, dissemination and awareness raising,
- support to joint actions of Member States or regions, as well as other measures under the COSME programme.

The Union will provide support to activities such as the Enterprise Europe Network and entrepreneurship promotion. It will also support projects concerned with the first applications or market replication of techniques, practices or products (e.g. new business concepts for consumer goods) of Union relevance that have already been technically demonstrated with success but, owing to residual risk, have not yet significantly penetrated the market. Those projects will be designed to promote wider use within the participating countries and facilitate market uptake.

Projects will also seek to improve the framework conditions including through capacity building in clusters and other business networks notably with regard to support SME internationalisation in order to ensure that Union enterprises are competitive and sustainable, including in the tourism sector, by supporting coherence and consistency in implementation, as well as informed policy-making at Union level. In addition, projects will be put in place to support the implementation of the Small Business Act for Europe. Support actions, directly linked to the achievement of these objectives are also considered for funding: meetings, studies, information and publications, participation in study groups, conferences, workshops.

In relation to gender equality, projects to promote the position of female entrepreneurs will receive particular attention in order to help overcome gender-based hurdles women may face and to attain an equal representation of male and female entrepreneurs throughout the EU.

Sustainable tourism activities will receive a special focus with initial priority given to soft mobility, cycling networks, eco-tourism and nature protection. Accessibility for all, particularly for people with reduced mobility and for socially disadvantaged people is also of high importance in this context.

The Union will coordinate, promote and support actions for sustainable tourism, such as:

- preservation of long-term sustainable tourism resources through protection of natural, cultural, historical and industrial heritage,

COMMISSION

TITLE 02 — INTERNAL MARKET, INDUSTRY, ENTREPRENEURSHIP AND SMES

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) (*cont'd*)02 02 01 (*cont'd*)

- coordination and support for access to sustainable tourism information and services for less-advantaged citizens living in poverty, as well as for persons with reduced mobility,
- cross-border coordination of European cycling networks, together with rail and long-distance bus information and services.

The Erasmus for Entrepreneurs programme aims to encourage European entrepreneurship, the sharing of knowledge and best practices, and the creation of valuable networks and partnerships.

Due to the currently difficult economic situation it is indispensable to support European enterprises, in particular young innovative start-ups and female entrepreneurs, and to foster entrepreneurship by assigning enough funds to programmes like the programme for the competitiveness of enterprises and small and medium-sized enterprises (COSME). In particular the programme 'Erasmus for young entrepreneurs' has been very successful, efficient and effective in contributing successfully to fighting unemployment and supporting robust start-ups across Europe. With regard to under-representation of women among entrepreneurs, special attention should be paid to involving young female entrepreneurs in the programme in order to encourage them to pursue their entrepreneurial career and to gain experience in how to overcome gender-specific hurdles they may face.

The financial means for the 'Erasmus for young Entrepreneurs' programme must be increased in particular due to the following reasons:

- the programme helps fostering European entrepreneurship, the sharing of knowledge and best-practices as well as the creation of valuable networks and partnerships,
- the programme is very successful and has shown an increasing number of participants over the last years which is expected to increase further,
- the programme effectively tackles the problem of youth unemployment as it helps young people without work to become self-employed and existing SME to create jobs by expanding and/or internationalising their business,
- the number of applications exceeds by far the possibilities the Commission can fulfil with the financial means currently available.

Part of this appropriation, within the 2016 COSME action 'Migrant Entrepreneurs Labs' will be allocated to national business support systems for migrant entrepreneurs and their informal networks. This should be done through information and networking events/platforms organised by mainstream business support organisations and targeted at migrant entrepreneurs. The aim will be to better inform migrant entrepreneurs about the support systems in the host country, connect informal and mainstream networks and draw attention to the migrant entrepreneurs' specific needs and problems.

*Remarks*

This appropriation is to be used to improve access to finance SMEs, including companies of female entrepreneurs in the form of equity and debt in their start-up, growth and transfer phase.

A loan guarantee facility (LGF) shall provide counter-guarantees, direct guarantees and other risk sharing arrangements for debt financing which shall reduce the particular difficulties that viable SMEs face in accessing finance either due to their perceived higher risk or their lack of sufficient available collateral and for securitisation of SME debt finance portfolios.

An equity facility for growth (EFG) shall allow investments in risk capital funds which invest in SMEs in the expansion and growth stage, whilst taking a gender-sensitive and non-discriminatory approach, and in particular in those operating cross-borders. The possibility shall exist to invest in early stage funds in conjunction with the equity facility for RDI under Horizon 2020. In cases of joint investments in multi-stage funds, investments will be provided on a pro-rata basis from the EFG of COSME and the equity facility for RDI under Horizon 2020. Support from the EFG shall be (a) either directly by the European Investment Fund (EIF) or other entities entrusted with the implementation on behalf of the Commission or (b) by funds-of-funds or investment vehicles investing across borders.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. SMEs in Europe are faced with the challenge of ageing entrepreneurs whose businesses could disappear if no successor is found. Given the number of bankruptcies or business failures where at least part of the business was profitable, the potential for saving activities and jobs is considerable. When a business closes down, jobs are lost, as are know-how, products and the services the business provided, and the indirect jobs among suppliers and local service providers. SMEs in particular find it difficult to prepare for business transfer because of a lack of time, money and know-how. A failure to prepare for business transfer leads to difficulties in finding successors and funds, as well as in reorganising the business.

The purpose of the project is to develop and implement concrete actions to help bring about successful business transfers with employee involvement. The overall objective is to facilitate the transfer of 'healthy' businesses to employees and employee buy-outs of failed or bankrupt businesses, using the cooperative model in both cases. Experience on the ground has demonstrated that the cooperative model is the one most often chosen by employees during restructuring processes. This pilot project will help raise awareness among entrepreneurs, employees, trade unions, business and trade associations, enterprise support service providers and public authorities of the added value of this option for business transfers. Many failures could be avoided if transfers were planned well ahead and specialised advice was sought. Working towards successful business transfers should thus be seen as an investment rather than a cost. The project will also support activities to make business owners aware of the need for timely preparation. Experience shows that the further in advance a transfer is prepared, the higher the chances are of its being a success. Member States should actively promote and support mentoring schemes involving the transfer of knowledge and core competencies essential to transfer businesses to employees as cooperatives. The main target groups for the pilot activities are SME entrepreneurs and employees.

Europe is not fully exploiting its entrepreneurial potential and lags behind in start-ups and self-employment. Women in particular are reluctant to create their own businesses. The Union has recognised that female entrepreneurship must be promoted and supported in order to strengthen Europe's competitiveness.

## CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) (cont'd)

02 02 77 (cont'd)

02 02 77 18 (cont'd)

One of the main obstacles for women in general is their lack of access to finance. Studies show that for female entrepreneurs it is significantly more difficult to obtain loan financing by comparison with their male partners. At the same time they also lack access to relevant technical, scientific and general business networks. Those networks are in many ways essential for creating and expanding a business, in particular for finding investors, business partners and mentors.

Europe should benefit from world-bridging tourism because of the increasing share of GDP accounted for by the tourism sector. It could bring significant economic growth, including the creation of sustainable employment. Europe should be prepared for the difficulties and challenges posed by the arrival of more visitors from countries with different cultural customs, such as China. Europe should become the lead economy within world tourism competition.

Over the last few decades, tourism has become one of the largest and fastest growing economic sectors in the world. International tourist arrivals rose from 278 million in 1980 to 1 035 million in 2012 and are expected to grow by 3,3% a year on average by 2030. Europe remains the world's number one tourist destination, accounting for half of all international tourist arrivals worldwide — with three quarters of those in the Member States. However, its position is being challenged by new tourist destinations in emerging economies.

Tourists from emerging economies such as Brazil, Russia, China and India have increased in number over the past few years. Statistics show that 1 026 000 visas were issued in 2011 to Chinese tourists, compared with 560 000 in 2008. In 2011, foreign visitor spending amounted to over EUR 330 billion and, according to recent estimates, could increase to around EUR 430 billion in 2022. The 'Europe – Whenever you're ready' campaign, highlighting Europe's diverse cultural and natural heritage and targeting potential tourists, in particular from Brazil, India and China, was introduced in 2012. This programme has been very successful and has achieved extremely positive results thanks to the development and implementation of a common visa policy. Visa facilitation has increased international tourist arrivals from relevant markets by between 5 and 25 %. But visas are not the only issue, as all foreign visitors have different needs and expectations.

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) (*cont'd*)02 02 77 (*cont'd*)02 02 77 19 (*cont'd*)

Among the emerging economies referred to above, the focus should be on China, which is the fastest-growing tourism source market in the world. According to the World Tourism Organisation's report on the Chinese Outbound Travel Market (2013), Chinese tourists' propensity to travel abroad is expected to continue rising in the coming decades. Furthermore, beyond Asia and the Pacific, Europe is the largest destination region for Chinese travellers. As Europe has a prominent place on the Chinese 'wish list', it is necessary to think about how Member States could better host Chinese tourists. What is needed is mutual understanding and continuous and sustainable training of tourism sector employees all over Europe.

Furthermore, Europe should be prepared for the challenges posed by the arrival of many Chinese tourists, including public security, laws on foreign nationals, and the possibility of racist and xenophobic attitudes stemming from cultural differences between our societies.

This pilot project has the following main objectives:

- facilitating the development of networks and exchanges of best practices between public decision-makers and representatives of the tourism industry,
- promoting opportunities to create new and sustainable jobs in the service sector across Europe,
- establishing professional and structural dialogue among the EU institutions,
- identifying best practices concerning the profile of the Chinese traveller (how to host them better) and promoting them in the European tourism industry, including service providers (hotels, restaurants),
- improving dialogue and collaboration between Chinese and European tour operators and travel agencies,
- facilitating the development of specific training for staff (for example improving language skills and cultural knowledge),
- raising public awareness through campaigns on multiculturalism in cooperation with Chinese cultural institutes (Confucius Institutes),
- incentivising the tailoring of tourist products and services to the needs of Chinese tourists, including marketing tools (websites and flyers in Chinese) and their promotion on Chinese social networks (Weibo),
- enhancing cross-border cooperation to boost the image of Europe and the European identity — this project could be linked to the preparatory action 'Promotion of European and transnational tourism products with special emphasis on cultural and industrial products' — for example preparing a unique promotional video in Chinese about the European Union.

Remarks

This appropriation is intended to cover commitments remaining to be settled from previous years under this pilot project.

To face its main societal challenges, the EU has set up the Horizon 2020 R & D investment programme for a competitive and sustainable Europe; and to help the EU regions to follow a common healthy path, through smart regional specialisation, the EU has introduced the Research and Innovation Strategies for Smart Specialisation (RIS3) initiative.

This pilot project will create closer links between Horizon 2020 and RIS3 in order to speed up R & D results exploitation and regional economic convergence at the same time. Although both Horizon 2020 and RIS3 are very well targeted programmes, a bridge between them which focused on social and economic convergence between EU regions would help to foster their success.

The TREC pilot project will include a call for tenders directed at European technology centres and the related industrial clusters, with the following conditions:

- clusters represented must have been selected in their regional RIS3 strategic plans,
- a common proposal must be presented by clusters from at least three Member States,
- a comprehensive economic picture of the clusters must be presented,
- there must be a readiness to share information and best practices.

Among the project candidates, at least three should be selected to receive financing for a project involving:

- complete benchmarking of the clusters,
- detecting bottlenecks and improvement opportunities,
- searching for available R & D results and drawing up an application plan,
- drawing up of an investment and training plan to meet the needs detected,
- making the necessary technology investments and implementing the training plans laid down,
- assessing and disseminating the results obtained.

Owing to the difficulties involved in estimating the necessary duration and investment levels, the pilot project will consist of two phases, the first covering the first four activities listed above, the second covering implementation and assessment and dissemination.

The first phase could last for up to one year and the necessary EU financing could be some EUR 500 000. The second phase could last for up to three years and require up to EUR 4 000 000 and would be co-financed by the participating companies and/or countries.

In terms of performance, the projects selected must demonstrate a cluster productivity increase of at least 10 % and a spread of about +/- 3 % between clusters.

The final aim is to analyse the impact of specific industrial policies which can be carried out by the EU. The TREC pilot project seeks to determine how an innovative entity can best apply existing innovation to improve exploitation of R & D results and reduce unemployment, thus contributing to growth and more jobs in the EU.

*Remarks*

The preparatory action will have the following main objectives:

- diversifying European tourism offerings,
- lessening the impact of seasonality at European destinations,
- enhancing the profile of Europe as a single tourist destination.

The Unesco logo is world-famous; it is a guarantee of the special cultural relevance of a site, but it is also a hook for attracting new tourism flows. Cooperation with Unesco, a specialised UN organisation, could be essential for enhancing international cooperation with the UN and developing a regional strategy for the promotion of European sites on the Unesco list. A map of emblematic Unesco sites grouped by theme (e.g. mediaeval towns, underwater heritage, Greek/Roman archaeological sites) or telling a story which pulls together their common strands will help to promote cultural tourism in both domestic and long-haul markets. Different communication tools can be developed on the basis of a European map of Unesco sites. This preparatory action will further explore the relationship between tourism and culture.

*Remarks*

This pilot project will explore the implementation of a cloud-based integration and synergy platform for Europe's manufacturers. An initial implementation will target inventory levels for critical and non-critical resources.

It is known that the pooling and dynamic redistribution of inventory for critical and non-critical manufacturing resources can drastically reduce the working capital required by manufacturers and lower their costs. The pilot project will investigate whether a transparent and intuitive cloud-based platform can build trust between manufacturers in order for them to pool resources and create a sharing economy. The overall reduction of working capital and inventory holding costs will free up resources that can be invested in an innovation funnel to make manufacturers more profitable or support growth. The objective is to present a first viable sharing platform which will lead to better integration and cooperation between manufacturers in Europe, thus driving economic growth.

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) (*cont'd*)02 02 77 (*cont'd*)02 02 77 23 (*cont'd*)*Remarks*

Today the European Union is being tested by a variety of structural changes affecting the whole economy; hence, tourism cannot escape them.

One of the most pressing problems Europe is facing is the lack of jobs and opportunities for young people. In November 2014, more than 5 million young people in Europe were unemployed. That means that one in four people under the age of 25 is looking for a job.

The tourism sector has long been known for recruiting young people. Statistics show that in the European Union alone, tourism provides more than 20 million jobs through more than two million companies. Furthermore, given its influence on the economy, tourism has a great impact on growth and employment. These are precisely the areas that require substantial strengthening in the EU after the economic crisis.

EU institutions and national governments can facilitate and support job creation, as has been seen with the deployment of the Youth Initiative Guarantee. However, only private companies and actors can create jobs or training opportunities. The tourism industry, which has many private actors (hotels, cafés, restaurants, etc.), has a unique role in helping to resolve Europe's jobs crisis and contributing to its recovery.

For instance, an interesting paradox is that countries with the highest youth unemployment rates — Greece, Spain, Italy, and Portugal — are among the most popular tourist destinations in Europe. Thus, the tourism industry is very well positioned to contribute proactively to the institutions' efforts to tackle the issue of youth unemployment.

The tourism industry also has to be involved in and take responsibility for addressing social problems, in this case youth unemployment, by supporting the public sector's efforts to create opportunities for young people. In order to achieve this goal, a special partnership on tourism (SPOT) should be established between European-level decision making and representatives of the tourism sector.

Under SPOT, a new public-private partnership should be devised to facilitate the uptake of high quality jobs, apprenticeships and traineeship positions in the tourism industry across the EU, with a particular focus on small and medium-sized businesses.

This could involve all types of companies, supply chains, trade unions, education providers, European/national/regional tourism associations, authorities and agencies, business organisations and youth associations.

This initiative could raise awareness of the importance of the tourism sector for the EU economy. It could also incentivise EU decision-makers to recognise its potential and to develop a specific industrial policy in the future that supports the further development and growth of the sector.

Moreover, such a partnership will harness the dynamism of European youth, so young people are not left without hope or opportunity and can look with confidence to a brighter future by having the chance to enter the job market.

Last but not least, it is important to stress that this is also in the best interests of the tourism sector. If Europe is to remain the world's number one tourist destination, the industry needs to prepare the next generation by building up a high-quality, sustainable labour supply with advance ITC skills and experience in hosting tourists with different expectations and priorities, especially from non-EU countries. This will enable more growth and keep the sector attractive.

The pilot project has the following main objectives:

- to conduct research into the importance of the tourism industry for the European economy and its employment levels (need to recognise it and raise public awareness),
- to boost, strengthen and develop the employability of young people by:
  - pledging to create new positions for young people (jobs, apprenticeships and traineeship) in the tourism industry,
  - helping them to acquire skills, knowledge and competences,
  - developing career pathways and facilitating the transition between school and employment (organising career guidance, CV workshops and interview training in close coordination with educational institutions and youth organisations).

*Remarks*

Europe is the world's number one tourism destination, with a 52 % market share. Furthermore, tourism is a major socio-economic activity in the European Union, with a wide-ranging impact on economic growth, employment and social development and can be a powerful tool in fighting economic decline and unemployment.

Nevertheless the tourism sector is facing a series of challenges that could be addressed by both tourism businesses and public stakeholders. One of those challenges is increasing competition from emerging destinations.

CHAPTER 02 02 — COMPETITIVENESS OF ENTERPRISES AND SMALL AND MEDIUM-SIZED ENTERPRISES (COSME) (*cont'd*)02 02 77 (*cont'd*)02 02 77 24 (*cont'd*)

That is why there is a need to promote Europe as a single tourist destination and strengthen its competitive image in long-haul markets. An inclusive holistic approach therefore needs to be taken in order to establish a clear brand image.

This pilot project will develop a strategically coordinated series of actions to establish a long-term strategy for the promotion of Destination Europe. EU destinations must have a specific approach for each market in order to include the European brand in global packages using new communication tools.

In order to increase the number of tourists in the EU and maintain Europe's position as the world's number one tourist destination, the Commission should encourage investment in tourist infrastructures and regional development and increase efforts to market 'Destination Europe Brand' in cooperation with the Member States.

The pilot project has the following main objectives:

- introduce a clear brand image and ensure Europe's visibility in major third countries: for instance, organise four large-scale industry round tables in Europe (London and/or Brussels), Asia, North America and Latin America,
- strengthen public-private partnerships: build on existing good relationships with trade bodies and cooperation with major international stakeholders and organisations, such as the European Parliament, the Commission, the Chinese National Tourism Administration (CNTA), the European Tourism Association (ETOA), the US Travel Association, BRAZTOA, JATA, major companies' CEOs, etc.,
- gather input and knowledge from the industry on a wide range of topics: devise a SWOT model of the European tourism industry and define critical success factors:

*Strengths* — which products are really driving bookings for Europe and what interesting trends are beginning to emerge?*Weaknesses* — which factors are limiting bookings of European vacations (consumer perception, safety concerns, currency fluctuation, hotel and air capacity, price, visas, etc.)?*Opportunities* — to strengthen or widen Europe's product offerings, in particular to support a stronger pan-European offer and awareness of lesser-known destinations and cultural routes.*Threats* — competitor analysis to gain insight into the value proposition that other destinations have where Europe has an opportunity to directly compete for business.*Critical success factors* — what do Destination Europe's brand and strategy need to do to achieve positive results for Europe in the coming years, and what role can the industry play in ensuring that the brand is adopted and promoted, ensuring the strategy's success?

- develop cooperative marketing tools and strategies:
  - online and offline marketing campaigns to raise awareness of Destination Europe, built around stakeholder round tables (cooperative marketing together with main private tourism companies),
  - collaboration with main global media partners (CNN, BBC, Financial Times, etc.),
  - participation in tourism fairs and in other major national and international events (youth festivals, sport events, food fairs),
- raise political awareness of the importance of inbound tourism for the European economy and gain the support of policy makers at all levels in order to overcome the disadvantages affecting the European tourism industry.

*Remarks*

Knowledge and skills are crucial not only for the personal welfare of each citizen, but also for sustainable development and economic growth. It is therefore important to offer a perspective to people coming from countries in economic and social crisis, especially young people, so that they have an opportunity to create added value not only for themselves, but also for the general public.

It is therefore important to empower young migrants and refugees to gain access to knowledge and to develop skills they are able to use and leverage on when going back to their home countries.

This way they are not only able to build a solid livelihood but may possibly become entrepreneurs, build up their own businesses and create employment.

The core of this initiative will be targeted mentoring programmes from different organisations, such as civil protection and community services, as well as companies (including local suppliers). Elements of a dual-training system would help beneficiaries to identify the specific needs of organisations or companies on the ground.

The legal situation regarding the waiting period for taking up an economic activity differs considerably from Member State to Member State. To make the pilot project a success, it will therefore also be necessary to conduct a review of the current national legal frameworks and to identify best practices which could be promoted in order to speed up procedures, so that young migrants can take advantage of the proposed programmes as soon as possible upon arrival.

*Remarks*

The aim of this pilot project is to finance start-ups in the sharing economy. It will help them develop their ideas, covering at least a part of the initial costs and possibly providing a financial guarantee for the most ambitious and risky proposals. Given the small scale and the lower cost of this type of initiative, even with a relatively limited allocation of EU money, the project should be able to kick-start a good number of small companies that could eventually grow to compete in the sector.

## Specific objectives:

- identify which sectors are going to benefit from a sharing economy approach,
- define new legislative instruments to regulate the sharing economy, avoiding any weakening of its innovative potential,
- conduct a specific census of the sharing economy in Europe, sharing best practices between Member States and relevant business associations,
- offer financial support and economic guarantees to promising companies, even if their proposals are too risky to be funded by regular banking institutions,
- define a sharing economy model in line with European values that is mindful of the rights of consumers and of the workers involved.

## Proposed actions:

- work with local companies and associations in order to create a European network of sharing-economy companies,
- establish scholarships and forms of financial support specifically for researchers and young entrepreneurs wishing to focus their work on the sharing-economy-related fields.

## Remarks

In the EU two groups currently affected by unemployment have huge potential: young people and graduates. These groups could create jobs in the EU by working in cooperatives which they also own, but to do so they need guidance and support in the form of labour market training.

Worker cooperatives are an economically feasible way to start up as an entrepreneur, and given the communality and the shared opportunities and obligations involved, they are a low-risk way for participants to both work in and own part of a company at the same time. Participants will establish new worker cooperatives, combining individuals' special skills and knowledge to their shared benefit and advantage. Those cooperatives have a good chance of offering sustainable jobs to their owners/employees, as they have a competitive advantage over most other kinds of companies because of their low overheads. The pilot project is to be launched in three EU countries with the most experience in this field.

The main objective is to help reduce youth unemployment by establishing best practice in this area for the whole of Europe. The pilot project will involve:

- preliminary actions and set-up in the three countries (first year),
- development and delivery of training courses (first and second years),
- follow-up and setting up of cooperatives with target groups (second year),
- expert evaluation of legal business barriers (third year, if the pilot project continues as a preparatory action),
- evaluation of outcomes (third year, if the pilot project continues as a preparatory action), and
- outcome report, to include proposals for any follow-on operational activities (third year, if the pilot project continues as a preparatory action).

This appropriation is intended to cover expenditure arising in connection with measures contributing to the completion of the internal market and its operation and development:

## COMMISSION

## TITLE 02 — INTERNAL MARKET, INDUSTRY, ENTREPRENEURSHIP AND SMES

CHAPTER 02 03 — INTERNAL MARKET FOR GOODS AND SERVICES (*cont'd*)02 03 01 (*cont'd*)

- measures intended to make the operation of the internal market more effective and to ensure that citizens and businesses have access to the most extensive rights and opportunities resulting from the opening up and deepening of the internal market without borders and are able to exercise those rights and take advantage of those opportunities in full; and monitoring and evaluation measures relating to the practical exercise by citizens and businesses of their rights and opportunities with a view to identifying and facilitating the removal of any obstacles which may be preventing them from exercising those rights in full,
- approximation of standards and introduction of an information system for technical standards and regulations, examination of the rules notified by Member States, EFTA States and Turkey and translation of the draft technical regulations,
- financing of administrative and technical coordination and of cooperation between the notified bodies, grants in support of the European Technical Approval Organisation (EOTA), and of projects of Union interest undertaken by outside bodies,
- application of Union legislation on medical devices, cosmetics, foodstuffs, textile products, chemicals, classification and labelling of substances and preparations, cars and safety, toys, legal metrology, pre-packaging and the quality of the environment, aerosol dispensers, and information and publicity measures for greater awareness of Union legislation,
- a comprehensive review of regulations with a view to making necessary changes and producing an overall analysis of the effectiveness of the measures taken to further the sound operation of the internal market and an evaluation of the overall impact of the internal market on businesses and the economy, including the purchase of data and access by Commission departments to external databases, as well as targeted actions aimed at improving understanding of the functioning of the internal market and rewarding active participation in fostering its functioning,
- greater sectorial approximation in the fields of application of the 'new approach' directives, especially the extension of the 'new approach' to other sectors,
- implementation of the strategic programme on the internal market and market monitoring, and measures implementing Regulation (EC) No 765/2008, both for the infrastructures and market surveillance, and Regulation (EC) No 764/2008, for procedures relating to the application of certain national technical rules to products lawfully marketed in another Member State,
- the development of a unified area for security and defence, with measures implementing Directive 2009/43/EC simplifying terms and conditions of transfers of defence-related products within the Union and actions working towards the coordination of public procurement procedures for these products at Union level, as well as, where appropriate, devising studies and awareness-raising measures regarding the application of the legislation adopted,
- participation in the negotiation of agreements on mutual recognition and, under European agreements, support for the associate countries to allow them to adopt the *acquis* of the Union,
- implementation measures for Regulation (EC) No 1907/2006, especially those resulting from the REACH review (communication COM(2013) 49 final),
- actions related to the implementation of Directive 2014/60/EU,
- implementing and monitoring the provisions governing public contracts with a view to ensuring their optimum operation and that tenders are genuinely open, including the awareness-raising and training of the various parties to these contracts; the introduction and use of new technologies in the various fields of operation of these contracts; the continuous adaptation of the legislative and regulatory framework in the light of developments arising from these contracts, particularly the globalisation of markets and existing or future international agreements,

**CHAPTER 02 03 — INTERNAL MARKET FOR GOODS AND SERVICES** (*cont'd*)**02 03 01** (*cont'd*)

- strengthening administrative cooperation through, inter alia, the Internal Market Information System (IMI), the deepening of knowledge of internal market legislation in the Member States and its sound application by them, and support for administrative cooperation between the authorities responsible for implementing legislation relating to the internal market with a view to achieving the Lisbon strategic goals as set out in the annual policy strategy,
- guaranteeing the completion and management of the internal market, especially in the fields of free movement of services, recognition of professional qualifications, and intellectual and industrial property, in particular the development of proposals for establishing a Union patent,
- analysis of the effects of removing obstacles to the internal market for services and of the effects of measures in place as part of the follow-up to the progressive liberalisation of postal services, coordination of Union policies on postal services with regard to international systems and in particular with regard to participants in Universal Postal Union (UPU) activities, cooperation with central and eastern European countries, as well as analysis of practical implications of the application of the General Agreement on Trade in Services (GATS) provisions to the postal sector and overlap with UPU regulations.

This appropriation is also intended to cover expenditure on consultations, studies, evaluations, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this article, as maintenance, updating and development of informatics systems related to technical regulations or linked to putting into place and monitoring policies launched within the framework of the internal market, and any other expenditure on technical and administrative assistance not involving public authority tasks.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

In accordance with the general aim of maintaining the proper functioning of the internal market and the competitiveness of European industry, in particular through the mutual recognition of standards and the establishment of European standards in suitable cases, this appropriation is intended to cover:

- financial obligations arising from contracts to be signed with the European standardisation organisations (such as ETSI, CEN and Cenelec), for the development of standards,
- checking and certifying conformity with the standards, and demonstration projects,
- contract expenditure for the execution of the programme and projects indicated above. The contracts in question cover the following: research, association, evaluation, technical operations, coordination, scholarships, grants, training and mobility of scientific staff, participation in international agreements and participation in expenditure on equipment,
- improving the performance of standards bodies,
- promoting quality in standardisation, and the verification thereof,
- supporting the transposition of European standards into national standards, particularly by having them translated,
- measures relating to information, promotion and profile-raising of standardisation and the promotion of European interests in international standardisation,
- secretarial services for the technical committees,
- technical projects in the field of tests for compliance with the standards,
- examination of the compliance of draft standards to the relevant mandates,
- programmes of cooperation with and assistance to third countries,
- carrying out the work needed to apply international information technology standards uniformly throughout the Union,
- specifying methods of certification and laying down technical methods of certification,
- encouraging use of these standards in public procurement contracts,

*Remarks*

This appropriation is intended to cover the costs of the functioning and activities of European non-governmental and non-profit organisations representing the interests of SMEs and consumers, as well as environmental and social interests, in standardisation activities.

Such representation in the standardisation process at European level forms part of the statutory objectives of such organisations, and they have been mandated by national non-profit organisations in at least two thirds of the Member States to represent those interests.

Contributions to such European organisations have previously been covered by the Competitiveness and Innovation Programme, the consumer policy and the Financial Instrument for the environment, LIFE+. In Regulation (EU) No 1025/2012 the actions in the field of standardisation financed by specific programmes have been brought together in a single legal act.

*Remarks*

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2), and operational expenditure in connection with the work programme (Title 3).

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this Item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 20 of the Commission Delegated Regulation (EU) No 1271/2013 constitute assigned revenue (Article 21(3)(c) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

*Remarks**Former Article 12 02 02*

This appropriation is intended to cover expenditure arising in connection with measures for the management and development of Solvit and for the implementation of the single market assistance services action plan.

The Solvit system has proved to be one of the most effective out-of-court dispute settlement mechanisms.

It can effectively and efficiently deal with problems faced by citizens or businesses, arising as a result of the misapplication of internal market legislation by a public administration in another Member State. Furthermore, the Solvit system is able to produce feedback information by using an online database system which is accessible to all coordination centres and to which citizens and businesses can directly submit their problems.

However, Solvit, like many other public assistance services relating to Union issues, is still not widely known among potential users of the system. At the same time citizens and businesses are often very confused about the right address for their requests for information, assistance or problem solving. To remedy this, the Commission announced, as part of the single market review, that it would endeavour to create a single web-based access point guiding citizens and businesses to the right service. In October 2010 the Commission launched a new website, Your Europe, which provides citizens and businesses with information, and refers them directly to relevant services such as Solvit in the event that they need help. Your Europe, together with the Europe Direct call centre, represents the single contact point for the Solvit system. The Commission is to inform the competent committee of the European Parliament in a yearly report about the frequency of use of the contact point and possible measures to further improve it.

## COMMISSION

CHAPTER 02 03 — INTERNAL MARKET FOR GOODS AND SERVICES (*cont'd*)02 03 04 (*cont'd*)

Member States should be encouraged to take appropriate measures to inform their citizens about the existence of the single contact point.

Moreover, in the Commission's action plan of 8 May 2008 on an integrated approach for providing single market assistance services to citizens and businesses, a range of actions was proposed to increase cooperation between the existing assistance services so that they can offer a better, faster and more streamlined overall service to citizens and businesses.

Promotion of all these services also needs to take place in a more coordinated way to avoid citizens and businesses being confused by too many brand names.

Additionally, the Commission is to inform the competent committee of the European Parliament about the concrete measures which have been undertaken in this field.

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This appropriation is intended to fund stepped-up support measures for traditional retailing, with a view to revitalising and modernising it. The pilot project will help to coordinate measures and channel funding from various sources in order to address the sector's problems more effectively.

The pilot project will involve:

- (1) defining the features of the traditional trading sector and identifying the constraints and threats it currently faces;
- (2) proposing solutions to encourage revitalisation and modernisation of the sector;
- (3) identifying Union instruments and funding directly or indirectly usable by the sector;
- (4) establishing the uses to which the instruments, actions, measures and funding available are being put by the sector;
- (5) analysing the extent to which existing instruments meet the needs of the traditional retailing sector and, on the basis of that analysis, proposing any adjustments that may be necessary;
- (6) implementing the proposals referred to in point (2);
- (7) analysing the results and assessing the feasibility of a possible future Union programme of support for traditional retailing.

## Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for the Horizon 2020 — the Framework Programme for Research and Innovation which covers the 2014 to 2020 period, and for the completion of the previous research programmes (Seventh Framework Programme and preceding framework programmes) and the Competitiveness and Innovation Framework Programme (CIP).

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area. Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof. Particular attention will be paid to the involvement of female entrepreneurs and female researchers, in order to strengthen their participation in innovation and the knowledge-based economy.

**CHAPTER 02 04 — HORIZON 2020 — RESEARCH RELATING TO ENTERPRISES** (*cont'd*)

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research entered in Item 6 0 1 6 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 02 04 50 01.

Administrative appropriations of this chapter will be provided under Article 02 01 05.

**02 04 02 Industrial leadership***Remarks*

This priority of Horizon 2020 aims at making Europe a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of European companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

*Remarks*

The aim of this appropriation is to:

- foster a competitive and innovative space industry and research community to develop and exploit space infrastructure to meet future Union policy and societal needs. The lines of activities are: enabling European competitiveness, non-dependence and innovation of the European space sector, enabling advances in space technologies, enabling exploitation of space data and enabling European research in support of international space partnerships,
- foster today's industrial forms of production towards more sustainable and low-carbon manufacturing and processing resulting in more innovative products, processes and services. In particular, sustainable and low-carbon technologies in energy-intensive process industries will be targeted to increase the competitiveness of process industries, by drastically improving resource and energy efficiencies and reducing the environmental impact of such industrial activities through the whole value chain, promoting the adoption of low-carbon technologies.

The aim of this appropriation is to help remedy market deficiencies in accessing risk finance for research and innovation. In particular, the equity facility will target investments in risk capital funds which make early stage investments. It shall enable equity investments in, amongst others, seed capital funds, cross-border seed funds, business angel co-investment vehicles and early-stage venture capital funds. The equity facility, which will be demand-driven, shall use a portfolio approach, where venture capital funds and other comparable intermediaries select the firms to be invested in. Special attention should be paid to encouraging female entrepreneurs to participate in such schemes.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(3)(i) of the Financial Regulation.

- support the implementation and complementing the SME specific measures across Horizon 2020, notably to enhance the innovation capacity of SMEs. Activities may include awareness raising, information and dissemination, training and mobility activities, networking and exchange of best practices, developing high quality innovation support mechanisms and services with strong Union added value for SMEs (e.g. intellectual property and innovation management, knowledge transfer), as well as assisting SMEs to connect to research and innovation partners across the Union, allowing them to spin in technology and develop their innovation capacity. Awareness-raising campaigns to encourage female entrepreneurs to take part in the projects should be included among the activities. Intermediary organisations representing groups of innovative SMEs shall be invited to conduct cross-sectoral and cross-regional innovation activities with SMEs having mutually reinforcing competences, in order to develop new industrial value chains,
- support market-driven innovation in view of enhancing the innovation capacity of firms by improving the framework conditions for innovation as well as tackling the specific barriers preventing the growth of innovative firms, in particular SMEs and enterprises of intermediate size with potential for fast growth. Specialised innovation support (e.g. IP exploitation, networks of procurers, support to technology transfer offices, strategic design) and reviews of public policies in relation to innovation may be supported.

02 04 03 **Societal challenges***Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test-beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

The aim of this appropriation will be to support secure supply of raw materials in order to meet the needs of a growing global population within the sustainable limits of the planet's natural resources. Activities will target the improvement of the knowledge base on raw materials and the development of innovative solutions for the cost-effective and environmentally friendly exploration, extraction, processing, recycling and recovery of raw materials and for their substitution by economically attractive alternatives.

Support will also be provided for tackling barriers impeding the deployment of circular-economy business models, in particular by SMEs, such as the use of materials from waste streams, the development of industrial symbiosis processes and the building of eco-industry clusters.

Former Article 02 04 51 (*in part*)

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

This appropriation will also cover expenditure corresponding to revenue giving rise to the provision of additional appropriations from (non-European Economic Area) third parties or third countries participating in projects in the field of research and technological development.

02 04 77 01 Pilot project — Design, roll-out and implementation of an EU-wide technical architecture to assess 112 PSAPs' readiness to transport GNSS location and other data from 112 emergency apps to European PSAPs securely and reliably

**Remarks**

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

People use smartphones and apps for everyday activities. Smartphone penetration is growing rapidly and, while society benefits from the digital world, how we will make emergency calls in the future, using apps, is not so clear. Accurate and reliable GNSS-based location data is being used for commercial and other purposes, but it is not accessible for emergency services when citizens make an emergency call.

As a result, very many 112-related apps have been created and are available today, but with limited functionality and accessibility. In the recent past, almost all European emergency services have been contacted by app developers who have made proposals to develop 112 apps in order to establish a voice connection and send location data and other data directly to 112 centres.

Unfortunately, these apps can only be used by citizens living in certain geographical areas and often do not work in the same way if they are used outside the boundaries of a given Public Service Answering Points (PSAPs) area. It is therefore common for apps developed in one region/country not to work in another region/country, making them redundant outside their own regions/countries.

Therefore, there is currently no pan-EU common architecture for utilising 112 apps.

Vice-Presidents Kroes and Kallas decided to work jointly on this, stating in 2010 that they intended to ensure that every European could access a 112 smartphone app in his or her own language. In recent years many 112 mobile apps had been developed, but much more could be done in the field.

Clearly, both Vice-Presidents identified the need for a common approach to developing a pan-EU architecture for 112 apps.

This project seeks to ensure PSAP readiness by funding the creation of a common EU-wide architecture to make it possible to send data, including GNSS location data and other vital information, using existing 112 apps to the most appropriate PSAP. This will ensure market freedom, which will have direct societal benefits. A series of interoperability and capability tests of both the apps and the platforms on which they run can be carried out at national and EU level.

The societal benefits will be for all citizens and will have a direct positive impact for citizens with disabilities.

The pilot project will be implemented in close collaboration with the relevant Commission stakeholders, who are currently looking into the use of GNSS location data for 112 services, using EGNOS and Galileo. The technical architecture designed as part of the project will strictly comply with the requirements of those stakeholders, ensure the involvement of 112 PSAPs and prepare the way for additional data to be sent in a harmonised manner.

CHAPTER 02 04 — HORIZON 2020 — RESEARCH RELATING TO ENTERPRISES (*cont'd*)02 04 77 (*cont'd*)02 04 77 01 (*cont'd*)

The project will:

- identify the main requirements of the emergency services (the demand side), in the medium term, building on extensive research already conducted as well as carrying out further research,
- involve the design and implementation of a method for conducting interoperability tests on 112 apps and platforms in a number of EU countries,
- involve readiness and compatibility tests on a number of PSAPs across the Member States participating in the pilot project,
- benefit citizens, including those with disabilities or special needs, by creating the environment and infrastructure required to allow apps technology and solution providers (the supply side) to send GNSS-based location and other data to the most appropriate PSAP,
- build on the successful work completed as part of the REACH112 project, which identified the requirements for ensuring that people with disabilities have greater access to 112 services, and the PEACE research project, which examined IP-based emergency applications and services for next-generation networks,
- partner European data protection authorities, European technology providers, free software communities, emergency services organisations, research and development laboratories, application developers, telecommunication network providers, Voice- Over-IP providers and other software providers to build on expertise in a collaborative fashion,
- map the future of 112 apps in line with citizens' and emergency services' needs and requirements in order to deliver on the vision for greater efficiencies and more impactful and effective services for our society.

At present, most 112 PSAPs in Europe are based on old analogue technologies and legacy-based networks. As a result, PSAPs have a very limited capability to handle emergency communications other than voice and are significantly out of step with the speed of modern communications systems. Citizens' expectations are also significantly greater than emergency services' capabilities, and many citizens with disabilities are not receiving an equivalent service. The 2014 COCOM Report also highlighted the lack of accessibility for citizens with disabilities and of accurate, reliable and on-time caller location information.

Many Member States are struggling to understand the impact and reach of apps based services and, especially, how such services access and interact with 112. European national authorities have limited exposure to apps-based services and urgently need to test the boundaries in order to be able to regulate effectively and proportionately and protect the consumer appropriately. Given the lack of cohesion and coordination with apps services and technologies, there is a need for such services to be developed and tested so that there is a match between their capabilities and an appropriate and effective standardisation and regulatory approach which includes assessment of privacy, data theft and surveillance risks.

As a result, all stakeholders need to be provided with a neutral, non-discriminatory, innovative architecture to ensure interoperability and to help design apps solutions that make for a more effective and efficient 112 service for the benefit of European citizens and visitors.

- continuing to develop cooperation between the Commission and the European Defence Agency (EDA) in connection with the Agency implementing Union objectives and managing Union budget appropriations, as provided for by Council Decision 2011/411/CFSP of 12 July 2011 defining the statute, seat and operational rules of the European Defence Agency and repealing Joint Action 2004/551/CFSP (OJ L 183, 13.7.2011, p. 16),
- continuing the pilot project with the aim of funding or co-funding two defence-related research and development activities in line with Articles 42(1) and 42(2) TEU:
  - one high-risk, high-payoff research activity whose outcome could potentially reshape future operations. The beneficiaries should be selected by means of a competition of ideas. The EDA will carry out the activity on behalf of the Union. Member States, the Commission and the EEAS will keep a watching brief on the activity in an advisory capacity. Third countries and organisations which have concluded an administrative arrangement with the EDA may also be invited to monitor the activity,
  - one research and development activity for certification against military and — if applicable — civilian requirements. Member States and third countries and organisations which have concluded an administrative arrangement with the EDA will be invited to contribute to the activity. The EDA will manage the activity on behalf of the Union and the other contributing members,

*Remarks*

The aim of this appropriation is to:

- enable operations of Copernicus services, tailored to the needs of users,
- contribute to ensure access to data of the observation infrastructure necessary to operate Copernicus services,
- create opportunities for increased private sector usage of information sources, thereby facilitating innovation by value-adding service providers.

This appropriation will, in particular, fund the set-up, the establishment and operation of the six services mentioned in the Copernicus Regulation and the related activities.

This appropriation may also fund cross-cutting activities among the services or their articulation and co-ordination, as well as for the in-situ co-ordination, user uptake and training and communication.

## COMMISSION

## TITLE 02 — INTERNAL MARKET, INDUSTRY, ENTREPRENEURSHIP AND SMES

CHAPTER 02 06 — EUROPEAN EARTH OBSERVATION PROGRAMME (*cont'd*)02 06 01 (*cont'd*)

The budget envelope will be managed either directly by the Commission services or indirectly via delegation agreements with Union agencies and international organisations, or any entity eligible under Article 58 of the Financial Regulation.

When the Commission manages the budget directly, it may entrust the Joint Research Centre (JRC) with scientific and technical support tasks. The funding of these tasks may be entered into the JRC's indirect budget under Article 183(2)(c) and (6) of the Financial Regulation.

In addition, in support of competitiveness and growth, this appropriation may also fund data dissemination and the incubation of new businesses by supporting more robust and innovative IT structures in Europe.

Copernicus services will facilitate access to key data required in policy formulation at Union, national, regional and local level in fields such as agriculture, forest monitoring, water management, transport, urban planning, climate change and many others. This appropriation covers mainly the implementation of delegation agreements for the Copernicus programme, pursuant to Article 58 of the Financial Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget. Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item in accordance with the Financial Regulation.

*Remarks*

The aim of this appropriation is to:

- build an autonomous Union's Earth observation capacity by funding the space infrastructure and favouring the European industry in that regard, namely in the construction and launch of satellites,

**CHAPTER 02 06 — EUROPEAN EARTH OBSERVATION PROGRAMME** (*cont'd*)**02 06 02** (*cont'd*)

- contribute to the availability of the observation capacity necessary to enable the Copernicus services, in particular through the operations of the ground segment of the space infrastructure,
- create opportunities for increased private sector usage of information sources, thereby facilitating innovation by value-adding service providers.

The development of a European space infrastructure has a key role in enhancing competitiveness and innovation, and requires consistent public intervention to sustain the industrial effort.

This appropriation will fund the development and construction of satellites, as well as their operation. The data and information obtained through the space infrastructure is subject to the free, full and open data policy, which will increase their availability and thereby boost the downstream market.

To supplement the data needed by users, this appropriation may also fund the acquisition of data from third parties and the access to contributing mission from Member States, as well as the dedicated dissemination platform (core ground segment) which will serve, in priority the operational services funded by Article 02 06 01.

The budget envelope will be managed either directly by the Commission services or indirectly via delegation agreements with Union agencies and international organisations, or any entity eligible under Article 58 of the Financial Regulation.

When the Commission manages the budget directly, it may entrust the Joint Research Centre (JRC) with scientific and technical support tasks. The funding of these tasks may be entered into the JRC's indirect budget under Article 183(2)(c) and (6) of the Financial Regulation.

*Remarks*

In order to ensure that the rules on competition concerning agreements, decisions by associations of undertakings and concerted practices (Article 101 of the Treaty on the Functioning of the European Union), abuses of a dominant position (Article 102 of the Treaty on the Functioning of the European Union), aids granted by States (Articles 107 and 108 of the Treaty on the Functioning of the European Union) and concentrations between undertakings (Regulation (EC) No 139/2004) are enforced, the Commission is empowered to take decisions, to conduct investigations and to impose penalties or order recovery.

The Commission’s decisions are subject to review by the Court of Justice of the European Union in accordance with the Treaty on the Functioning of the European Union.

As a prudential measure, it is appropriate to take into account the possibility of budgetary implications stemming from rulings of the Court of Justice of the European Union.

This appropriation is intended to cover any expenditure arising from damages awarded by the Court of Justice of the European Union to claimants and resulting from legal proceedings against the Commission’s decisions in the field of competition.

Since a reasonable estimate of the financial impact on the general budget cannot be established beforehand, a token entry (‘p.m.’) appears in this article. If necessary, the Commission will propose to make available the appropriations related to actual needs by means of transfers or through a draft amending budget.

*Remarks*

This appropriation is intended to cover expenditure on studies, committees, meetings of experts, conferences, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

*Remarks*

This appropriation is intended to cover:

- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,
- expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the Instrument for Pre-Accession Assistance.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

This appropriation covers administrative expenditure under Chapter 04 05.

## Remarks

Article 175 of the Treaty on the Functioning of the European Union (TFEU) provides that the objectives of economic, social and territorial cohesion set out in Article 174 shall be supported by the action it takes through the Structural Funds, which includes European Social Fund (ESF). The tasks, priority objectives and the organisation of the Structural Funds are defined in accordance with Article 177 TFEU.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Article 39 of Regulation (EC) No 1260/1999, Articles 100 and 102 of Regulation (EC) No 1083/2006 and Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the ESF.

Any revenue from the financial corrections carried out on that basis is entered in Article 6 5 1, 6 5 2, 6 5 3 or 6 5 4 of the statement of revenue and constitutes assigned revenue in accordance with point (c) of Article 21(3) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 82 of Regulation (EC) No 1083/2006 provides for specific rules on repayment of pre-financing amounts applicable to the ESF.

*Remarks*

This appropriation is intended to cover the funding by the ESF of commitments remaining to be settled from the 2000-2006 programming period for innovative actions and technical assistance as provided for in Articles 22 and 23 of Regulation (EC) No 1260/1999. The innovative actions included studies, pilot projects and exchanges of experience. They were intended in particular to bring about a qualitative improvement in Structural Fund measures. Technical assistance covered preparatory, monitoring, evaluation, supervision and management measures required for implementation of the ESF. This appropriation was, in particular, used to cover:

- support expenditure (representation expenses, training, meetings and missions),
- information and publishing expenditure,
- expenditure on information technology and telecommunications,
- contracts for the provision of services and studies,
- grants.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled for programmes under the ESF convergence objective in the 2007-2013 programming period. That objective is aimed at speeding up the convergence of the least developed Member States and regions by improving conditions for growth and employment.

This appropriation aims to reduce the economic, social and territorial disparities which have arisen, particularly in countries and regions whose development is lagging behind, in connection with the speeding-up of economic and social restructuring and population ageing.

In accordance with Article 105a(1) of Regulation (EC) No 1083/2006, as modified by point 7 of Annex III to the Treaty concerning the Accession of the Republic of Croatia to the European Union (OJ L 112, 24.4.2012), programmes and major projects which, on the date of accession of Croatia, have been approved under Regulation (EC) No 1085/2006 and the implementation of which has not been completed by that date, shall be considered to have been approved by the Commission under Regulation (EC) No 1083/2006, with the exception of the programmes approved under the components referred to in points (a) and (e) of Article 3(1) of Regulation (EC) No 1085/2006.

Remarks

This appropriation is intended to provide additional support to measures against youth unemployment financed by the ESF. It represents the specific allocation to the Youth Employment Initiative under the Investment for growth and jobs goal in regions with a level of youth unemployment exceeding 25 % in 2012 or for Member States where the youth unemployment rate has increased by more than 30 % in 2012, regions that have a youth unemployment rate of more than 20 % in 2012 ('eligible regions'). The additional EUR 3 000 000 000 allocated to this line for the 2014-2020 period is intended to provide match funding to ESF interventions in the eligible regions. This appropriation is intended to finance the creation of decent jobs.

While promoting gender equality, special attention should be paid to the situation of young women who can face gender-specific obstacles to get a good quality offer of employment, continued education, an apprenticeship or a traineeship.

This appropriation is to be used, amongst others, to support the establishment of educational structures combining non-formal education, language courses, democratic awareness and vocational training in the regions most affected by youth unemployment, both by state-actors and non-governmental organisations.

The margins available below the multiannual financial framework (MFF) ceilings for commitment appropriations for 2014-2017 will constitute a global MFF margin for commitments, to be made available over and above the ceilings established in the MFF for 2016-2020 for policy objectives related to growth and employment, in particular youth employment, as established in Council Regulation (EU, Euratom) No 1311/2013 of 2 December 2013 laying down the multiannual financial framework for the years 2014-2020 (OJ L 347, 20.12.2013, p. 884).

This appropriation is intended to cover expenditure on preliminary consultation meetings between European trade union representatives with a view to helping them form their opinions and harmonise their positions regarding the development of Union policies.

This appropriation is also intended to cover the cost of studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases and software and the part-financing and support of measures relating to economic monitoring, analysis of the combination of measures and coordination of economic policies.

*Legal basis*

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

*Remarks*

The objective of this activity is to promote geographic and professional mobility (including the coordination of social security schemes) of workers in Europe in order to overcome the obstacles to free movement of workers and to contribute to the establishment of a real labour market at European level. It can also be used to support the integration of regular migrant workers, including those from third countries, into European labour markets.

This appropriation is intended to cover actions supporting the monitoring of Union law through financing of a network of experts on free movement of workers and social security reporting regularly on the implementation of Union legal acts in the Member States and at Union level, and analysing and evaluating the major trends in legislations of the Member States with regard to the free movement of workers and coordination of social security systems. This appropriation is also intended to cover actions supporting governance of Union legal acts through meetings of the committees, actions for awareness raising and implementation and other specific technical support and the development of Electronic Exchange of Social Security Information (EESSI) system and its implementation.

This appropriation is intended to cover in particular:

- expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts,
- the analysis and evaluation of the major trends in legislation of the Member States with regard to the free movement of workers, and coordination of social security systems, as well as the financing of networks of experts in those fields,
- the analysis and research on new policy developments in the domain of free movement of workers linked for example to the end of transitional periods and modernisation of social security coordination provisions,
- ensuring fair mobility by setting up additional information centres,
- support for the work of the Administrative Commission and its sub-groups and follow-up of the decisions taken, as well as support for the work of the Technical and Advisory Committees on free movement of workers,
- support for actions preparing for the application of the new regulations on social security, including transnational exchanges of experience and information and training initiatives developed at national level,
- the financing of actions aimed at providing a better service and raising public awareness, including measures aimed at identifying migrant workers' social security and employment problems, and measures speeding up and simplifying administrative procedures, gender-sensitive analysis of the barriers to free movement of workers and lack of coordination of social security systems and their impact on people with disabilities, including adaptation of administrative procedures to new information-processing techniques, in order to improve the system for acquiring rights and the calculation and payment of benefits pursuant to Regulations (EEC) No 1408/71, (EEC) No 574/72, Regulation (EC) No 859/2003 as well as Regulation (EC) No 883/2004, its implementing Regulation (EC) No 987/2009, and Regulation (EU) No 1231/2010,
- the development of information and actions to make members of the public aware of their rights on free movement of workers and coordination of social security schemes,
- the support of the electronic exchange of social security information among Member States, with a view to facilitating the implementation of Regulation (EC) No 883/2004 and its implementing Regulation (EC) No 987/2009. This includes the maintenance of the central node of the EESSI system, testing system components, helpdesk activities, support for further development of the system and training.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION (*cont'd*)04 03 01 (*cont'd*)04 03 01 04 (*cont'd*)

This appropriation is intended to cover actions promoting the development of comparative analysis and the exchange of views and experience at all relevant levels (regional, national, Union, international) regarding the social and demographic situation and the socio-economic trends in the Union, as well as the gender pay gap and discrimination against women in the workplace. This appropriation is also intended to cover actions supporting an Observatory of the Social Situation, the cooperation with relevant activities in Member States and with international organisations and the management of a technical support group for the European Alliance for Families.

This appropriation is intended to cover in particular expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programme or measures falling under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

This appropriation is intended to cover in particular expenditure on Commission reports (including an annual report on the social situation and a report on demographic change and its implications every 2 years, in accordance with Article 159 of the Treaty on the Functioning of the European Union (TFEU), as well as Commission reports on problems concerning the social situation (which can be requested by the European Parliament pursuant to Article 161 TFEU).

This appropriation is also intended to cover expenditure on analysis for the reporting referred to in TFEU, as well as for the dissemination of knowledge on major social and demographic challenges and ways of tackling them. In particular, the following activities can be pursued with due consideration of the gender aspect:

- analysis of the impact of population ageing in the context of a society for all ages, in terms of trends in care and social protection needs, behaviour and flanking policies, including research on elderly minorities or migrants and the situation of informal carers,
- analysis of the impact of demographic change on Union and Member State policies, measures and programmes, and formulation of recommendations for adjustments to economic and other policies, measures and programmes at Union and national levels in order to prevent the ageing of society from having a negative impact,
- analysis of the links between family units and demographic trends,
- analysis of trends in poverty, income and wealth distribution and their broader societal impact,
- identification of the existing relations between technological development (impact on communication technologies, geographical and occupational mobility) and the consequences for households and society in general,
- analysis of the links between disability and demographic trends, analysis of the social situation of people with disabilities and their families and the needs of children with disabilities within their families and communities,
- analysis of trends in social objectives (in terms of safeguarding acquired rights or extending them) regarding both goods and services, taking account of new social challenges as well as demographic trends and changing the relationships between generations,
- development of appropriate methodological tools (sets of social indicators, simulation techniques, data collection on policy initiatives at all levels, etc.), so as to underpin the reports on the social situation, on social protection and social inclusion with a solid quantitative and scientific foundation,

*Remarks*

This appropriation is intended to cover expenditure on information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from Union action in the framework of the implementation of the Union social dimension. Those measures should help workers' organisations to address the overarching challenges facing European employment and social policy as laid down in the Europe 2020 strategy and within the context of Union initiatives to address the consequences of the economic crisis. Special attention will be given to training on gender challenges at work.

This appropriation is intended to cover in particular the following activities:

- support for the work programmes of the two specific trade union institutes, European Trade Union Institute and European Centre for Workers' Questions, which have been established to facilitate capacity-building through training and research at European level, as well as to improve the degree of involvement of workers' representatives in European governance,
- information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from the implementation of Union action in the framework of the implementation of the Union social dimension,
- measures involving representatives of the social partners in the candidate countries with the specific purpose of promoting social dialogue at Union level. It is also intended to promote equal participation of women and men in the decision-making bodies of workers' organisations.

*Remarks*

The European Year for Active Ageing and Solidarity between Generations was intended to raise general awareness of the value of active ageing, to stimulate debate, to exchange information and to develop mutual learning between Member States and stakeholders at all levels, to offer a framework for commitment and concrete action to enable the Union, Member States and stakeholders at all levels to develop innovative solutions, policies and long-term strategies through specific activities and to pursue specific objectives relating to active ageing and intergenerational solidarity, and to promote activities which will help to combat age discrimination.

This appropriation is intended to cover at Union-level activities in line with the European Year's for Active Ageing and Solidarity between Generations objectives and to cover the costs relating to the organisation of the closing Union conference by the incumbent Presidency. Part of this appropriation is also intended to cover the costs relating to the evaluation of the European Year for Active Ageing and Solidarity between Generations.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

**CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION** (*cont'd*)**04 03 02** (*cont'd*)04 03 02 01 (*cont'd*)*Remarks*

The general objective of the European Union Programme for Employment and Social Innovation (EaSI) is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

To achieve the general objectives of EaSI in terms of promoting a high level of employment, guaranteeing adequate social protection, combating social exclusion and poverty, improving working conditions and protecting worker's safety and health, the specific objectives of the Progress axis are to:

- develop and disseminate high-quality comparative analytical knowledge in order to ensure that Union employment and social policy and working conditions and occupational health and safety legislation are based on sound evidence and are relevant to needs, challenges and conditions in the individual Member States and the other participating countries,
- facilitate effective and inclusive information-sharing, mutual learning and dialogue on Union employment and social policy and working conditions and occupational health and safety legislation at Union, national and international level in order to assist the Member States and the other participating countries in developing their policies and in implementing Union law,
- provide policymakers with financial support to promote social and labour market policy reforms, build up the main actors' capacity to design and implement social experimentation, and make the relevant knowledge and expertise accessible,
- monitoring and evaluating the implementation of the European Employment Guidelines and Recommendations and their impact, notably through the Joint Employment Report, and analysing the interaction between the EES and general economic and social policy areas,
- provide Union and national organisations with financial support to develop, promote and support the implementation of Union employment and social policy and working conditions and occupational health and safety legislation,
- raising awareness, exchanging good practice, disseminating information and promoting the debate on the key challenges and policy issues in relation to working conditions, gender equality, occupational health and safety and the reconciliation of work and family life and the ageing society, including among social partners,
- to encourage job creation, promote youth employment and fight poverty by promoting increased social convergence by means of Social Mark.

In addition support could be provided to actions related to the implementation of the common provisions of EaSI such as monitoring, evaluation, dissemination of results and communication. Article 16 of Regulation (EU) No 1296/2013 describes the types of actions which may be financed.

*Remarks*

The general objective of the European Union Programme for Employment and Social Innovation (EaSI) is to contribute to the Europe 2020 strategy and the related headline targets for employment, education and poverty by providing financial support for the Union's objectives.

The EaSI is structured around three complementarity axes: Progress, EURES and Microfinance and Social Entrepreneurship.

To achieve the general objectives of EaSI in particular to promote workers' geographical mobility and boost employment opportunities by developing Union labour markets that are open and accessible to all, the specific objectives of the EURES axis are to:

- ensure that job vacancies and applications, and any related information as well as working conditions and rights are transparent for the potential applicants and the employers; this shall be achieved through their exchange and dissemination at transnational, interregional and cross-border level using standard interoperability forms,
- help ensure that European-level job vacancies and mobility options are advertised in parallel to national job vacancies and applications and not only after local or national options are exhausted,

**CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION** (*cont'd*)**04 03 02** (*cont'd*)04 03 02 02 (*cont'd*)

- develop services for the recruitment and placing of workers in employment through the clearance of job vacancies and applications at European level; this shall cover all phases of placement, ranging from pre-recruitment preparation to post-placement assistance, including language skill development options, with a view to the applicant's successful integration into the labour market; such services shall include targeted mobility schemes to fill job vacancies where labour market shortcomings have been identified and/or help particular groups of workers such as young people,
- provide assistance for national and cross-border support activities organised by EURES partners,
- initial and further training of EURES advisers in the Member States,
- contacts between EURES advisers and cooperation between government employment services, including those of candidate countries,
- promotion of EURES among firms and the general public,
- development of special structures for cooperation and services in border regions pursuant to point (b) of Article 17(1) of Regulation (EEC) No 1612/68,
- measures to help remove mobility obstacles, particularly in the field of work-related social security.

This programme should also facilitate the matching and placement of apprentices and trainees as a critical element in helping the transition of young people from school to work, as already begun under the preparatory action 'Your first EURES job' and complemented by the Youth Employment Initiative. Companies, particularly small and medium-sized enterprises (SMEs), will be encouraged to recruit more young people, including by financial support.

Target groups:

- young people up to 30 years of age, regardless of their qualifications and work experience as the scheme is not exclusively tailored for labour market entrants,
- all legally established businesses, particularly SMEs, to assist with reducing the costs of international hiring that affect mostly smaller companies.

Eligible jobs under this part of the programme will offer young people apprenticeships, a first work experience or specialised jobs. The scheme will not support situations of job substitution or precarious employment, or in any circumstances be contrary to national labour law.

To be eligible for funding, jobs have also to comply with the following criteria:

- be located in a EURES member country other than the country of origin of the young job seeker (transnational vacancies),
- ensure a work placement for a minimum contractual period of 6 months.

The EaSI is structured around three complementarity axes: Progress, EURES and Microfinance and Social Entrepreneurship.

To achieve the general objectives of EaSI in particular to promote employment and social inclusion by increasing the availability and accessibility of microfinance for vulnerable groups and micro-enterprises, and by increasing access to finance for social enterprises, the specific objectives of the Microfinance and Social Entrepreneurship axis are to:

- increase access to, and the availability of, microfinance for persons who have lost or are at risk of losing their jobs, or who have difficulty in entering or re-entering the labour market, persons at risk of social exclusion and vulnerable persons, including women wishing to start entrepreneurial careers, who are in a disadvantaged position with regard to access to the conventional credit market and who wish to start up or develop their own micro-enterprises; and for micro-enterprises, especially those which employ these persons as referred to,
- build up the institutional capacity of microcredit providers,
- support the development of social enterprises.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

This appropriation is intended to cover the European Foundation for the Improvement of Living and Working Conditions (Eurofound) staff and administrative expenditure (Titles 1 and 2), and operational expenditure for the work programme (Title 3).

The Eurofound must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The Union contribution for 2016 amounts to a total of EUR 20 371 000. An amount of EUR 11 000 coming from the recovery of surplus is added to the amount of EUR 20 360 000 entered in the budget.

Part of this appropriation is intended for the work of the European Monitoring Centre for Change, decided upon at the Nice European Council of 7 to 9 December 2000 with a view to identifying, anticipating and managing technological, social (in particular demographic) and economic trends. To that end, high-quality information must be collected, processed and analysed.

Part of this appropriation is intended to cover also work on three topics of importance in relation to family policies:

- family-friendly policies in the workplace (balance between work and family life, working conditions, etc.),
- factors influencing the situation of families with regard to community housing (access to decent housing for families),
- lifelong family support concerning, for example, childcare and other issues that fall within the Foundation's forms of reference.

This appropriation is also intended to cover studies on the impact of new technologies in the workplace and on occupational illnesses.

The Foundation's establishment plan is set out in Annex 'Staff' to this section.

*Remarks*

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2), and operational expenditure relating to the work programme (Title 3).

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The Agency's objective is to provide the Union institutions, Member States and interested parties with technical, scientific and economic information of use in the area of health and safety at work. Special attention will be paid to gender aspects in the area of health and safety at work.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The Union contribution for 2016 amounts to a total of EUR 14 679 000. An amount of EUR 16 000 coming from the recovery of surplus is added to the amount of EUR 14 663 000 entered in the budget.

This appropriation is intended to cover the measures necessary to accomplish the Agency's tasks as defined in Regulation (EC) No 2062/94, and in particular:

- awareness-building and risk anticipation measures, with special emphasis on SMEs,
- operation of the European Risk Observatory based on examples of good practice collected from firms or specific branches of activity,
- preparation and provision of relevant tools for smaller companies to manage health and safety at work,
- operation of the network comprising the main component elements of the national information networks, including the national social partner's organisations, according to national legislation and/or practice, as well as the national focal points,
- also in collaboration with the International Labour Organization and other international organisations, organising exchanges of experience, information and good practices,
- integrating the candidate countries into these information networks and devising working tools which are geared to their specific situation,

*Remarks*

This pilot project will investigate the benefits of introducing and – if appropriate – making available a forgery-proof European electronic document containing individuals' social security details, on which could be stored all the data needed to verify the bearer's employment status, such as details on his or her social security status and working hours, and which would be subject to strict data-protection rules, particularly where privacy-sensitive personal data is processed. This card should not only be an information tool for workers, but also and primarily a tool for labour inspectorates to help them uncover abuses and ensure the enforcement of social and labour legislation in the Union. The Commission should report back to European Parliament on a regular basis about the development of this pilot project.

The measures covered will include:

- a report on best practices in Member States which have already implemented similar systems,
- devising a preparatory action, based on the report, to help introduce this document in specific sectors/countries,
- an impact assessment and cost-benefit analysis of the production of such an electronic document,
- a comparative analysis of the social security systems in the EU-28 which can serve as a basis for building knowledge about the significant variations between Member States with regard to economic structures, size and composition of social systems.

This pilot project could also cover the design of an EU-model electronic card providing relevant information for verifying the bearer's employment status, such as details of his or her social security status and working hours.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

The preparatory action is to: strengthen the capacity of national minimum income networks to develop a strategy to act on the recommendations that have emerged from the pilot project as well as links with the Europe 2020 strategy by following up on the implementation of the relevant country-specific recommendations; further develop awareness raising in connection with minimum income schemes, focusing on coverage, adequacy and take-up; engage Union-level actors in further dialogue on minimum income schemes; and promote the common methodology for reference budgets (under preparation as part of another pilot project, 'Reference Budget Network') at local, national and Union level to ensure that minimum income support is adequate.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action will contribute to overall Union policy for combating poverty and social exclusion, especially among disadvantaged groups such as migrants. In particular, it will tie in with the Commission communications entitled 'European Platform against Poverty and Social Exclusion' (COM(2010) 758 final) and 'Towards Social Investments for Growth and Cohesion' (COM(2013) 83 final) as well as with the European Social Fund Regulation of 17 December 2013 (Regulation No 1304/2013).

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION (*cont'd*)04 03 77 (*cont'd*)04 03 77 19 (*cont'd*)*Objective*

This preparatory action will contribute to the welfare and full social and economic integration of migrants in Europe (both European nationals and third country nationals), especially those in extremely difficult social and economic situations (unemployment, habitual exclusion, health problems, addictions and other forms of marginalisation) through development and testing of pilot integration centres in member states with different welfare systems and labour market configurations. Those centres will form part of the European Platform against Poverty and Social Exclusion and will strengthen migrants' skills and capacities and empower them to participate fully in employment and social life by providing an integrated package of activities and services.

*Actions/measures to be funded*

The measures covered will include:

- creation of pilot social integration centres, which will:
  - be established in urban and rural areas with severe integration problems in selected Member States, in partnership with local social, public and economic stakeholders,
  - run workshops and full-time vocational training schemes, job coaching schemes and apprenticeships that meet local community needs in areas such as care services, green area upkeep services, professional cleaning services and building construction services,
  - serve as one-stop-shops for marginalised migrants looking for assistance with all legal and community-related issues (social assistance, job advice, financial incentives),
  - create favourable environments and local partnerships for the development of social entrepreneurship.

The pilot centres will assist with trial arrangements for the future creation of local centres for social and economic integration in all Member States as part of the European Platform against Poverty and Social Exclusion. The aim of local centres will be twofold: (1) to activate and empower migrants in order to improve their chances of re-entry into the mainstream economy and full integration in the host communities and society; (2) to assist local authorities, social partners and civil society organisations in removing barriers, supporting mobility and fostering social and economic inclusion of marginalised migrants.

*Remarks*

Despite public perceptions, labour mobility is low in the Union. High unemployment and low labour mobility within and between countries coexist with skill and labour shortages in some countries and regions. Well-performing labour markets are important for facilitating adjustment to shocks, allocating resources to best effect and dealing with potential ageing-related labour market shortages. Mobility within the Union can, in principle, help to remedy labour market shortages and imbalances. The over-35 age group also faces higher mobility barriers, and it is therefore important to put financial and/or other support specifically designed for this group to the test.

Reactivate is a mobility programme for adult traineeships and work trials lasting between 6 and 12 months in other Member States. It is targeted at unemployed citizens in the 35+ age group, including the long-term unemployed (LTU). This age group generally represents a population segment with strong skills based on work experience, whence the need for this programme.

In the light of the number of LTUs, Reactivate will test support tailor-made for them. In order to encourage employers to make job offers to unemployed persons from other Member States, Reactivate will test ways of engaging with employers and forms of financial and/or other support for employers.

CHAPTER 04 03 — EMPLOYMENT, SOCIAL AFFAIRS AND INCLUSION (*cont'd*)04 03 77 (*cont'd*)04 03 77 23 (*cont'd*)

Reactivate is intended as an extension of the successful EURES First Job programme, offering similar advantages for unemployed persons, in particular LTUs, over the age of 35. This project can build on EURES First Job as a sound mobility platform.

Reactivate will give unemployed persons, including LTUs, in this age group an unprecedented opportunity to acquire diversified knowledge and skills, to learn new languages, and to better understand the European internal market. All these advantages greatly militate in favour of a stronger European identity and diversity while increasing labour mobility and the employment rate.

The following actions and measures will be funded: monitoring entrepreneurs in Europe and verifying what influence current policies have on creating quality employment for job starters.

*Remarks*

This appropriation is intended to cover the EGF so as to enable the Union to demonstrate solidarity towards, and to support workers made redundant and self-employed persons whose activity has ceased as a result of major structural changes in world patterns due to globalisation, as a result of the continuation of the global financial and economic crisis addressed in Regulation (EC) No 546/2009 of the European Parliament and of the Council of 18 June 2009 amending Regulation (EC) No 1927/2006 on establishing the European Globalisation Adjustment Fund (OJ L 167, 29.6.2009, p. 26), or as a result of a new global financial and economic crisis and to provide financial support for their rapid reintegration into sustainable employment.

The actions undertaken by the EGF should be complementary to those of the European Social Fund and there must be no double funding from these instruments. EGF-supported actions or measures should aim to ensure that the largest possible number of beneficiaries participating in these actions find sustainable employment as soon as possible before the final report is due.

The rules for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 13 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1).

*Remarks*

This appropriation is intended to cover the EGF so as to enable the Union to provide time-limited and targeted support for workers made redundant as a result of major structural changes in world trade patterns due to globalisation where these redundancies have a significant adverse impact on the regional or local economy. It is applicable to all applications submitted up to 31 December 2013. For applications submitted between 1 May 2009 and 31 December 2011, it may also be used to provide support to workers made redundant as a direct result of the global financial and economic crisis.

The actions undertaken by the EGF should be complementary to those of the European Social Fund. There must be no double funding from these instruments.

The rules for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 13 of the Interinstitutional Agreement of 2 December 2013 between the European Parliament, the Council and the Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management (OJ C 373, 20.12.2013, p. 1).

*Remarks*

Under the Instrument for Pre-accession Assistance (IPA II), this appropriation will address the following specific objectives in Iceland:

- support for political reforms,
- strengthening of the ability of the beneficiaries listed in Annex I to Regulation (EU) No 231/2014 at all levels to fulfil the obligations stemming from Union membership in the area of political reforms by supporting progressive alignment with and adoption, implementation and enforcement of the Union *acquis*.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under point (b) of Article 21(2) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks*

Article 174 of the Treaty on the Functioning of the European Union sets out the Union's objective of economic, social and territorial cohesion while Article 175 specifies the role of the Structural Funds in achieving this objective and makes provisions for the adoption of specific actions outside the Structural Funds.

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Articles 56 and 57 of Regulation (EU) No 223/2014 on criteria for financial corrections by the Commission provide for specific rules on financial corrections applicable to the Fund for European Aid to the Most Deprived (FEAD).

Any revenue from the financial corrections carried out on that basis is entered in Item 6 5 0 0 of the statement of revenue and constitutes assigned revenue in accordance with point (c) of Article 21(3) of the Financial Regulation.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Article 44 of Regulation (EU) No 223/2014 provides for specific rules on repayment of pre-financing applicable to the FEAD.

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Article 19 of Regulation (EU, Euratom) No 1311/2013 lays down the conditions for the revision of the multiannual financial framework in order to transfer to subsequent years, in excess of the corresponding expenditure ceilings, allocations not used in 2014, in the event of the adoption after 1 January 2014 of new rules or programmes.

*Legal basis*

*Remarks*

The Fund for European Aid to the Most Deprived (FEAD) replaces the European Union's Food Distribution Programme for the Most Deprived Persons of the Community, which was discontinued at the end of 2013.

To ensure continuity between the two programmes, expenditure shall be eligible for a support from a FEAD operational programme if it is incurred by a beneficiary and paid between 1 December 2013 and 31 December 2023.

FEAD shall promote social cohesion, enhance social inclusion and therefore ultimately contribute to the objective of eradicating poverty in the Union by contributing to achieving the poverty reduction target of at least 20 million of the number of persons at risk of poverty and social exclusion in accordance with the Europe 2020 strategy, whilst complementing the Structural Funds. Since the proportion of women at risk of poverty or social exclusion is higher than is the case for men, FEAD will take a gender-sensitive approach by adapting measures to the groups actually at risk, including women and the elderly. It shall contribute to achieving the specific objective of alleviating and eradicating the worst forms of poverty, by providing non-financial assistance to the most deprived persons by food and/or basic material assistance, and social inclusion activities aiming at the social integration of the most deprived persons.

**CHAPTER 04 06 — FUND FOR EUROPEAN AID TO THE MOST DEPRIVED** (*cont'd*)**04 06 01** (*cont'd*)

This objective and the results of the implementation of the Fund shall be qualitatively and quantitatively assessed.

FEAD shall complement and shall not replace or reduce sustainable national poverty eradication and social inclusion policies, which remain the responsibility of Member States.

The resources for the Fund available for budgetary commitment for the period 2014-2020 shall be EUR 3 395 684 880 in 2011 prices.

*Remarks*

This appropriation is intended to cover:

- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the Commission and beneficiaries,
- expenditure on external personnel in Union delegations (contract staff, local staff or seconded national experts) for the purposes of devolved programme management in the Union delegations in third countries or for internalisation of tasks of phased-out technical assistance offices, as well as the additional logistical and infrastructure cost, such as cost of training, meetings, missions, and renting of accommodation directly resulting from the presence in the delegation of the external personnel remunerated from the appropriations entered in this item,
- expenditure on studies, meetings of experts, information systems, awareness-raising, training, preparation and exchange of lessons learnt and best practices, as well as publications activities and any other administrative or technical assistance directly linked to the achievement of the objective of the programme,
- research activities on relevant issues and the dissemination thereof,
- expenditure related to the provision of information and communication actions, including the development of communication strategies and corporate communication of the political priorities of the Union.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks*

The appropriations of this reserve article are intended to cover expenditure for measures needed to cope with major crises affecting agricultural production or distribution.

The reserve is to be established by applying at the beginning of each year a reduction to direct payments (Chapter 05 03) with the financial discipline mechanisms in accordance with Articles 25 and 26 of Regulation (EU) No 1306/2013 as well as Article 8 of Regulation (EU) No 1307/2013. When the Commission considers the reserve needs to be called on, in accordance with the relevant legislative act, it shall present to the European Parliament and the Council a proposal for a transfer from the reserve to the corresponding budget lines financing the measure deemed necessary. Any Commission proposal for a transfer to draw on the reserve must be preceded by an examination of the scope for reallocating appropriations. By the end of the financial year, any amount of the reserve not made available for crisis measures shall be reimbursed proportionally as direct payments to the budget lines from which the reduction was made. Any reimbursement will be done under Article 05 03 09 from appropriations carried over from the previous financial year.

Transfers calling on the reserve and transfer back from the reserve to direct payments shall be made in accordance with the Financial Regulation.

CHAPTER 05 05 — INSTRUMENT FOR PRE-ACCESSION ASSISTANCE — AGRICULTURE AND RURAL DEVELOPMENT (*cont'd*)05 05 03 (*cont'd*)05 05 03 01 (*cont'd*)*Remarks*

Under the Instrument for Pre-accession Assistance (IPA II), this appropriation will address the following specific objectives in the Western Balkans:

- support for political reforms,
- strengthening of the ability of the beneficiaries listed in Annex I to Regulation (EU) No 231/2014 at all levels to fulfil the obligations stemming from Union membership in the area of political reforms by supporting progressive alignment with and adoption, implementation and enforcement of the Union *acquis*.

Any income from financial contributions from Member States and third countries, including in both cases their public agencies, entities or natural persons to certain external aid projects or programmes financed by the Union and managed by the Commission on their behalf, may give rise to the provision of additional appropriations. Such contributions under Article 6 3 3 of the statement of revenue constitute assigned revenue under Article 21(2)(b) of the Financial Regulation. The amounts entered on the line for administrative support expenditure will be determined, without prejudice to Article 187(7) of the Financial Regulation, by the contribution agreement for each operational programme with an average not exceeding 4 % of the contributions for the corresponding programme for each chapter.

*Remarks*

This appropriation is intended to cover:

- expenditure on the improvement of systems of agricultural statistics in the Union,
- subsidies, contractual expenditure and expenditure involving payments for services connected with the purchasing and the consulting of databases,
- subsidies, contractual expenditure and expenditure involving payments for services connected with agricultural sector modelling and short- and medium-term forecasts of market and agricultural structure trends, and with the dissemination of results,
- subsidies, contractual expenditure and expenditure involving payments for services connected with the implementation of operations for applying remote sensing, area sampling and agrometeorological models to agricultural statistics,
- subsidies, contractual expenditure and expenditure involving payments for services connected with the carrying out of economic analyses and development of indicators in the field of the agricultural policy,
- subsidies, contractual expenditure and expenditure involving payments for services connected with measures required for the analysis, management, monitoring of agricultural resources and implementation of the common agricultural policy in accordance with Articles 6(c) and 22 of Regulation (EU) No 1306/2013 as well as for the implementation of the Common Monitoring and Evaluation Framework in accordance with Articles 6(a) and 110 of Regulation (EU) No 1306/2013,
- outstanding commitments made under Council Regulation (EC) No 78/2008.

*Remarks*

Rural depopulation presents common challenges across the Union and is particularly acute in Central and Eastern Europe. The smart eco-social village project will develop models for a number of different types of 'smart village' in the Union, with a particular focus on the Visegrád group countries.

The project will create replicable, socially useful models, will act as an incentive by identifying successful practices, and will provide support, using an ICT/online method.

The project will focus on developing growth and jobs in rural areas by:

- analysing common features of rural villages in the Union (with a particular focus on the Visegrád group countries): infrastructure, various resources, services, access to markets, Digital Single Market opportunities, urban-rural links, links to the bioeconomy and the circular economy (innovation, precision farming, environmental management, local renewable energies, supply chain, services, local food), opportunities for improving quality of life and employment, with due regard for the importance of women and young people;
- identifying and documenting best practices and effective programmes in rural areas of the Union, analysing sustainable environmental and village management in line with the above features. The project will use regional case studies, filming, ICT and documentation and will identify best practices;
- assessing case studies involving local administration, academics, local communities, the private sector and NGOs in rural areas;
- developing a number of eco-socially oriented and replicable models for smart villages, and providing operational IT support.

*Remarks*

Regulation (EU) No 1308/2013 establishing a common organisation of the market in agricultural products provides horizontal and sectoral crisis prevention and management measures in agriculture.

However, the regulation does not define or specify what is meant by ‘crisis situation’. It is therefore essential to set up a typology of crisis situations.

The pilot project will establish a list of parameters to clarify and simplify implementation of crisis prevention and management measures in agriculture.

It could also assess the feasibility of setting up ‘market watchers/observatories’ whose role would be to provide a basis for coping better with crisis situations and market volatility by providing early warning of the need to take counter-measures.

The main objective is to clarify the criteria for the activation of the instruments available to European farmers to cope with exposure to both natural disasters and market fluctuations, which have gradually become more common over the last few years.

Europe must give itself the wherewithal to manage crises in the agricultural sector more effectively.

(cont'd)**05 08 77** (cont'd)

05 08 77 14 (cont'd)

*Remarks*

The disappearance of bees has an impact throughout the Union, causing a fall-off in pollination and posing a threat to biodiversity and public health. The Union must be able to tackle this problem by developing a genuine economic strategy from production to consumption, focusing on the entire honey production chain.

This pilot project will combine the various Union strategies on innovation, social inclusion and job creation in order to establish linkage between them and a reoriented common agricultural policy and to support the gearing of agriculture more towards greater sustainability and practical research on breeding of a bee population that is resistant to Varroa in particular.

*Methodology:*

- implementation of a series of complementary and integrated actions, i.e. genetic selection (particularly Varroa resistance selection), breeding and conservation, training in apidology/sanitation (bee behaviour, veterinary and sanitary techniques);
- support for local swarms and queen reproduction/breeding farms;
- cooperation with relevant scientists and scientific institutes, in order to obtain maximum synergy (including with existing Union honey bee research programmes).

There is a great need for specific applied research, particularly on Varroa resistance selection, to save the honey bee, as well as for funding practical arrangements to give volunteers access to the results of fundamental research from apiology projects at Union-supported scientific institutes.

Know-how transfer and support for implementing this methodology and for relevant communication tools cannot be funded under any existing programme. A first European Apidology Training Centre would provide a basis for looking into the following issues: research, selection and conservation, repopulation and biodiversity.

Although the honeybee plays a very important role in agriculture, most beekeepers and breeders are volunteers. As regards pollination and honey production, there are professional beekeepers and small companies managing larger numbers of bee colonies. But these professionals often get their breeding material from breeding groups that are mainly organised by volunteers.

As a result, the beekeeping community has almost no budget for the application of findings from research into breeding Varroa-resistant bee lines through an Union-wide link-up between volunteers (beekeepers) and scientists. This pilot project seeks to bridge this practical gap in the FP7 programme SmartBees and national apiculture programmes.

The measurable value of this action is expected to be EUR 7 billion for the 2016-2020 period, i.e.:

- creation of 10 million hives in the Union, representing a business volume of over EUR 2 billion;

**CHAPTER 05 08 — POLICY STRATEGY AND COORDINATION OF THE ‘AGRICULTURE AND RURAL DEVELOPMENT’ POLICY AREA**  
(*cont'd*)

**05 08 77** (*cont'd*)

05 08 77 14 (*cont'd*)

— purchase of equipment needed to keep a hive and produce honey, representing, for hive manufacturers and sellers, a business volume of more than EUR 3 billion;

— increase in honey production in the Union resulting from the creation of 10 million hives, replacing current annual imports (50% of demand) from third countries and representing a business volume of more than EUR 2 billion euros.

Stepping up pollination to the level required to sustain and expand agricultural production of the Union, with more and better products, will mean not only increased agricultural production, but also fewer subsidies paid to farmers to offset productivity losses.

The creation of 30 000 jobs would in turn generate 30 000 associated jobs, making for a total of 60 000 jobs.

This pilot project will analyse:

— the incentives and disincentives for farmers to form and work together in producer organisations (POs);

— the governance arrangements, areas for cooperation and levels of concentration of supply which best allow POs to carry out their activities effectively and provide support to their members;

— the most effective financial and legal tools available under the common agricultural policy to support POs.

Remarks

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for the Horizon 2020 — the framework programme for research and innovation which covers the 2014 to 2020 period.

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

## COMMISSION

## TITLE 05 — AGRICULTURE AND RURAL DEVELOPMENT

CHAPTER 05 09 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO AGRICULTURE (*cont'd*)

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the framework programme for research and innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research entered in Item 6 0 1 6 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 05 09 50 01.

Administrative appropriations of this chapter will be provided under Article 05 01 05.

CHAPTER 05 09 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO AGRICULTURE (*cont'd*)05 09 03 *Societal challenges**Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

*Remarks*

This activity will focus on developing more sustainable and productive agriculture and forestry systems, while at the same time developing services, concepts and policies for thriving rural livelihoods. In addition, emphasis will be placed on healthy and safe foods for all as well as competitive food processing methods that use fewer resources and produce fewer by-products. In parallel, efforts will be made on sustainably exploiting aquatic living resources (e.g. sustainable and environmentally friendly fisheries). Low carbon, resource-efficient, sustainable and competitive European bio-based industries will also be promoted.

*Remarks*

The objective of 'Removing bottlenecks and bridging missing links' refers to Article 4(2)(a) of Regulation (EU) No 1316/2013. This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting financing decisions within the meaning of Article 84 of the Financial Regulation, of the core network transport projects and Union transport corridors, which are defined in the annexes to the Connecting Europe Facility and TEN-T guidelines. The implementation of this objective is expected to be measured through new and improved cross-border connections and removed bottlenecks, which have benefitted from the Connecting Europe Facility.

*Legal basis*

Regulation (EU) No 1316/2013 of the European Parliament and of the Council of 11 December 2013 establishing the Connecting Europe Facility, amending Regulation (EU) No 913/2010 and repealing Regulations (EC) No 680/2007 and (EC) No 67/2010 (OJ L 348, 20.12.2013, p. 129), and in particular Article 4(2)(a) thereof.

*Remarks*

The objective of 'Ensuring sustainable and efficient transport in the long run' refers to Article 4(2)(b) of Regulation (EU) No 1316/2013. This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting the financing decisions within the meaning of Article 84 of the Financial Regulation.

In the 2014-2020 period, a follow-up of the Marco Polo programme will be implemented by the Connecting Europe Facility within the framework of the revised TEN-T guidelines. In accordance with Article 32 of Regulation (EU) No 1315/2013 of the European Parliament and of the Council of 11 December 2013 on Union guidelines for the development of the trans-European transport network and repealing Decision No 661/2010/EU (OJ L 348, 20.12.2013, p. 1), it will introduce a new approach in support of freight transport services in the Union (indicative budget EUR 70-140 million per year). It is important to optimise the use of transport infrastructure by shifting cargo to more sustainable modes, including inland waterways, and increase the efficiency of multimodal services. Sustainable schemes for partial reimbursement of the cost of modal shift for trucks (eco-bonus) can also be supported.

*Remarks*

The objective of 'Optimising the integration and interconnection of transport modes and enhancing the interoperability, safety and security of transport' refers to Article 4(2)(c) of Regulation (EU) No 1316/2013.

This objective will be implemented through calls for proposals under the annual and multiannual work programmes constituting financing decisions within the meaning of Article 84 of the Financial Regulation.

The achievement of this objective will be measured by the number of inland and maritime ports and airports connected to the railway network, by the number of improved multimodal logistics platforms, by the number of improved connections through motorways of the sea and by the number of supply points in alternative sources of energy on the core network.

The implementation of the Single European Sky policy and the deployment of SESAR are pursued under this objective.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 01 (*cont'd*)06 02 01 04 (*cont'd*)*Remarks*

This appropriation is intended to cover the support from the Cohesion Fund under the 'Investment for growth and jobs' goal for transport infrastructure under the Connecting Europe Facility in accordance with Article 84(4) of Regulation (EU) No 1303/2013.

In accordance with Article 5(1)(a) of Regulation (EU) No 1316/2013, an amount of EUR 11 305 500 000 in current prices should be transferred from the Cohesion Fund to be spent in line with that Regulation exclusively in Member States eligible for funding from the Cohesion Fund.

In accordance with Article 11, this objective will be implemented through calls for proposals under the annual and multiannual work programmes, which are opened exclusively for the Member States eligible for financing under the Cohesion Fund. These annual and multiannual work programmes constitute financing decisions in the meaning of Article 84 of the Financial Regulation.

In accordance with Article 2(7) and Article 5(2), up to 1 % of the financial envelope will cover expenses pertaining to 'programme support actions'.

*Legal basis*

*Remarks*

This objective of 'Creating an environment more conducive to private investment for transport infrastructure projects' aims to implement the projects of common interest through financial instruments, based on an *ex ante* assessment as required by Article 224 of Commission Delegated Regulation (EU) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union (OJ L 362, 31.12.2012, p. 1). In accordance with Article 21(4) of Regulation (EU) No 1316/2013, from 10 % to 20 % of the financial envelope for CEF transport will be available for innovative financing instruments such as the Project Bonds Instrument, the Loan Guarantee Instrument and other instruments such as joint ventures and the equity instruments to combine public and private financial resources to accelerate infrastructure investments in Europe. The financial instruments are intended to facilitate access to private financing and thus to accelerate or to make possible financing of the TEN-T projects eligible under the TEN-T guidelines and Regulation (EU) No 1316/2013. The financial instruments are intended to be established as 'debt' or 'equity' frameworks and they should address specific market failures and provide appropriate financing solutions. They are intended to be implemented as direct management by the entrusted entities, within the meaning of the Financial Regulation or jointly with the entrusted entities. The entrusted entities must be accredited to provide guarantees to the Commission on the protection of the Union financial interests in line with the requirements of the Financial Regulation.

Any repayment from financial instruments pursuant to Article 140(6) of the Financial Regulation, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenues may give rise to the provision of additional appropriations in accordance with Article 21(3)(i) of the Financial Regulation.

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 02 (*cont'd*)*Remarks*

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2) and operational expenditure relating to the work programme (Title 3).

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The establishment plan of the Agency is set out in Annex 'Staff' to this section.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget of the Union.

The amounts repaid in accordance with Article 20 of Commission Delegated Regulation (EU) No 1271/2013 of 30 September 2013 on the framework financial regulation for the bodies referred to in Article 208 of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council (OJ L 328, 7.12.2013, p. 42) constitute assigned revenue (Article 21(3)(c) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

The Union contribution for 2016 amounts to a total of EUR 36 370 000. An amount of EUR 1 551 450 coming from the recovery of surplus, is added to the amount of EUR 34 818 550 entered in the budget.

## TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 05 (*cont'd*)*Remarks*

This appropriation is intended to cover expenditure on studies and meetings of experts directly linked to the achievement of the objective of the programme or measures coming under this item, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

It is intended to cover expenditure on information and communication, conferences and events promoting activities in the transport sector as well as electronic and paper publications directly linked to the achievement of the objective of transport policy, as well as safety and protection of transport users.

This appropriation is also intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the Union's common transport policy, for all transport modes (road, rail, air, sea and inland waterways) and for all transport sectors (transport safety, internal market of transport with its implementation rules, optimisation of transport network, passengers' rights and protection in all transport modes, the use of alternative fuels in all transport modes, clean vehicles procurement and urban mobility, employment data, as well as for all other sectors related to transport). The main endorsed actions and objectives are intended to support the Union's common transport policy, including extension to third countries, technical assistance for all transport modes and sectors, specific training, definition of rules of transport safety, simplification of administrative procedures, the use of ICT technologies, the contribution to the standardisation process, and promotion of the common transport policy including establishment and implementation of trans-European network orientation endorsed by the Treaty on the Functioning of the European Union as well as strengthening passengers' rights and protection in all transport modes and to improve the application and enforcement of existing Regulations on passenger rights, in particular through awareness-raising activities about the content of those Regulations, targeted at both the transport industry as well as the travelling public.

*Maritime transport and logistics*

This appropriation is intended to cover the development and implementation of the Union's maritime transport strategy, in line with the objectives defined in the White Paper on the future of transport.

This includes analyses of economic and technological developments, support of international negotiations, developing and interpreting cabotage rules, following complaints and infringements procedures, development and implementation of actions to promote short sea shipping, administrative simplification and use of ICT systems in the waterborne and logistic sector, as well as support of the sustainable development of the shipping sector.

This appropriation is intended to cover the development and implementation of a Union strategy for freight transport logistics, including the digital transport and logistics agenda, providing a framework and actions for interoperable multimodal transport information and management systems and related standardisation issues, administrative (European) single window(s) for multimodal transport, a single transport document and a multimodal liability regime.

This appropriation is also intended to cover the development of a reference framework on carbon footprint calculators, modal shift follow-up (former Marco Polo programme), supporting standardisation and harmonisation of equipment and combined transport.

**CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY** (*cont'd*)**06 02 05** (*cont'd*)*Maritime safety*

This appropriation is intended to cover monitoring, evaluation and revision (impact assessment) of Union legislation on maritime safety, protecting the maritime environment and promoting qualifications and working conditions for seafarers.

*Passenger rights*

This appropriation is intended to cover expenditure on monitoring, evaluation, revision and raising awareness actions of Union legislation on passenger rights.

In connection with Regulation (EC) No 261/2004 of the European Parliament and of the Council of 11 February 2004 establishing common rules on compensation and assistance to passengers in the event of denied boarding and of cancellation or long delay of flights, and repealing Regulation (EEC) No 295/91 (OJ L 46, 17.2.2004, p. 1), the Commission needs to develop additional measures to make enforcement of that Regulation more efficient. The implementation of Regulation (EC) No 1107/2006 of the European Parliament and of the Council of 5 July 2006 concerning the rights of disabled persons and persons with reduced mobility when travelling by air (OJ L 204, 26.7.2006, p. 1) and Council Regulation (EC) No 2027/97 of 9 October 1997 on air carrier liability in the event of accidents (OJ L 285, 17.10.1997, p. 1) needs also to be ensured.

The implementation of Regulation (EC) No 1371/2007 of the European Parliament and of the Council of 23 October 2007 on rail passengers' rights and obligations (OJ L 315, 3.12.2007, p. 14) requires specific implementation action due to legal reporting requirements of the Commission and due to the complex interaction of regional, national and international (COTIF) administrative structures involved in the implementation.

The implementation of Regulation (EU) No 1177/2010 of the European Parliament and of the Council of 24 November 2010 concerning the rights of passengers when travelling by sea and inland waterway (OJ L 334, 17.12.2010, p. 1) requires specific implementation actions to ensure its correct application and enforcement in the Member States and the compliance by Member States with their legal reporting obligations towards the Commission.

The implementation of Regulation (EU) No 181/2011 of the European Parliament and of the Council of 16 February 2011 concerning the rights of passengers in bus and coach travel (OJ L 55, 28.2.2011, p. 1) requires specific implementation actions in order to ensure its correct application and enforcement in the Member States and the compliance by Member States with their legal reporting obligations towards the Commission.

As an important implementation support measure the Commission conducts targeted actions covering some or all Member States to raise public awareness on passenger rights. Nearly one third of Union citizens are aware of their rights and obligations when buying a ticket to travel (31 %), although 59 % are said to be unaware of them (Eurobarometer on passenger rights 2014).

These actions and objectives could be supported at different levels (local, regional, national, European and international), for all transport modes and sectors and related to transport, as well as in technical, technological, regulatory, informative, environmental, climatic and political fields and for sustainable development.

Air transport has long been one of the sectors in which the consumer authorities receive most complaints in the Union. The increase in the number of commercial transactions performed electronically (using the internet or a mobile telephone) has merely resulted in more breaches of Union consumer legislation.

## COMMISSION

## TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 05 (*cont'd*)

One of the main complaints by Union consumers is that there are no effective means of redress at airports themselves, particularly when disputes arise as a result of failure on the part of airlines and other service providers to meet their obligations. Union consumers and air transport authorities therefore need to work together to secure an immediate improvement in passenger support and information facilities at airports and, at the same time, step up co-regulation in the sector.

*Road safety*

The Commission communication of 20 July 2010 entitled 'Towards a European road safety area: policy orientations on road safety 2011-2020' (COM(2010) 389 final) presents seven objectives: road user education, enforcement of traffic rules, safe infrastructure, safe vehicles, use of modern technology, post-injury emergency responses and a special focus on vulnerable road users. Work continues on the Commission's proposal, on the new Union driving licences, and on the revision of the rules on qualification and training for professional drivers, on the follow-up to the Directives 2014/45/EU, 2014/46/EU and 2014/47/EU, and the work towards a strategy on serious road traffic injuries. The Commission's road safety work also includes the management of the European Road Safety Charter, the management of rules relating to dangerous goods, the maintenance of a European database on road accidents (CARE), the follow-up on the infrastructure management and tunnel safety directives and on various aspects of vulnerable road user safety. The implementation of the policy orientations 2011-2020 would also require specific implementation action for the exchange of good practices, road safety campaigns, calls for proposals and development of the road safety observatory; as well as the evaluations of options for making the road safety in the Union work more effectively and efficiently in the future.

This appropriation is also intended to cover expenditure on communication activities and on public events such as the annual European Road Safety Day and similar awareness-raising and citizen interaction initiatives.

It is also intended to establish efficient cross-border cooperation between Member States concerning the enforcement of road safety related traffic offences.

*Land transport*

The main activities in the land transport area concern the implementation and review of existing policies and the planning of new initiatives. Among others, this includes activities in areas such as road charging, market access, social rules (including their enforcement), technical rules and international aspects (land transport relations with third countries and international organisations dealing with land transport issues).

*Single European Sky*

The full implementation of the Single European Sky (four basic Regulations (EC) No 549/2004, (EC) No 550/2004, (EC) No 551/2004 and (EC) No 552/2004, and more than 20 implementing rules) is a key priority to improve the performance of the air navigation services in terms of safety, cost efficiency of the air navigation service provision, reduction of air traffic flow delays and environmental performance, and hence of air transport in Europe.

The extension of the Single European Sky legislation to the south-east states through the Multilateral Agreement on the Establishment of a European common aviation area (ECAA) is an important step for the achievement of the neighbouring policy. This action is based on Article 7 of Regulation (EC) No 549/2004.

**CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY** (*cont'd*)**06 02 05** (*cont'd*)*Aviation safety and environment*

The uses of several legislative tools are important to ensure the safety of European Aviation and to ensure the achievement of an environmentally sustainable growth.

According to Articles 3 to 5 of Regulation (EC) No 2111/2005, the Commission may impose total bans or partial restrictions on air carriers from third countries coming to the Union. In that context and in accordance with Article 3(4) of Commission Regulation (EC) No 473/2006, the Commission, the European Aviation Safety Agency (EASA) and experts from the Member States may carry out assessment missions to conduct on-the-spot checks and to identify safety deficiencies of the air carriers and the authorities responsible for their oversight. The cost of on-site assessment visits for national experts is either reimbursed by the Union or comes out of their own budget.

There is a clear need to complement these missions with more positive and preventive actions as well as with *ex post* technical cooperation to assist the countries concerned by the ban or restrictions to correct the deficiencies. In addition, the Commission and EASA have as their objective the promotion of the highest standards of aviation safety across the world.

In this context, the large-scale Union projects in the area of civil aviation cooperation managed by other Directorates-General (ELARG and DEVCO), which can only be implemented on a long-term basis, do not provide an immediate answer to short-term needs.

The objective of this initiative is therefore to complement the existing instruments by establishing a flexible tool to implement *ad hoc* preventive and assistance (corrective) actions in favour of the national authorities responsible for the oversight of air carriers affected by the Union ban within the Union. The actions envisaged are small-scale and short-term activities.

Since the framework service contract concluded between EASA and MOVE in 2009 proved to be an effective and efficient tool to carry out technical assistance, a new contract with EASA was concluded for the period 2013-2016.

In addition, Regulation (EU) No 996/2010 on the investigation and prevention of accidents and incidents in civil aviation provides for the establishment of a European Network of Civil Aviation Safety Investigation Authorities (Encasia). Encasia is required to develop actions in order to further improve the quality of investigations conducted by safety investigation authorities and to enhance accident prevention in the Union. According to that Regulation, the Commission is associated with Encasia's work and provides Encasia with the necessary support.

Moreover, the Commission has been cooperating with Eurocontrol since 2003 under the Memorandum of Cooperation related to support to the Single European Sky and other Union policies. The Commission adopted a new framework agreement MOVE/E2/2012/FV/397-3 on 19 December 2012. The aim of this framework agreement is to assist the Commission in preparing and implementing Union environmental policies in aviation. These policies cover noise and emissions (CO<sub>2</sub> or NO<sub>x</sub>), where ICAO is developing standards for aircraft, which are quasi-automatically transposed into Union law by virtue of Article 6 of Regulation (EC) No 216/2008. In addition, the implementation and assessment of Union legislation requires the development of data and methods contributing to the overall European environmental assessment capacity. This fiche does not cover new activities but activities which used to be financed under the general envelope attributed to Eurocontrol.

## TITLE 06 — MOBILITY AND TRANSPORT

CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY (*cont'd*)06 02 05 (*cont'd*)

Finally, the Memorandum of Cooperation covers areas of aviation for which both the Commission and ICAO have responsibilities (i.e. safety, environment, air traffic management and aviation security). This strengthened cooperation will ensure the indispensable participation in and contribution to ICAO initiatives in several key aviation policy areas which are being pursued at the global level. This includes the initiative to strengthen the safety of international aviation on a worldwide basis, or arriving at measures with regard to the environmental impact of aviation which are acceptable worldwide. It aims to ensure that European interests (including of an industrial nature, for example in the area of the definition of worldwide technical standards) are better taken into consideration by ICAO. Through the agreement, ICAO will also be brought to accept, support and enhance the increasingly important role which regional organisations play in the current and future development of international aviation.

*Urban mobility*

The appropriation is intended to support the implementation of the 2013 'Urban mobility' package. This package aims to reinforce the support to European cities for tackling urban mobility challenges. To this end, the Commission will, among other actions, promote studies, conferences, campaigning actions (such as the European Mobility Week), and the establishment of platforms for the exchanges of information and best practices.

*Use of alternative fuels in transport*

The appropriation is intended to support the implementation of the strategy defined in the 'Clean power for transport' package (Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions 'Clean power for transport: a European alternative fuels strategy' (COM(2013) 17 final). The appropriation will also support the Commission with monitoring and assessing the implementation of national policy frameworks to be submitted by the Member States to comply with Article 3 of Directive 2014/94/EU on the deployment of alternative fuels infrastructure, as well as with the preparation of the reports foreseen by Article 10 of that Directive. Activities in support of the decarbonisation strategy and alternative fuels action plan to be adopted in 2017 will also be covered.

*Clean vehicles procurement*

Full transposition of Directive 2009/33/EC on the promotion of clean and energy-efficient road transport vehicles was completed in November 2013. The results of the first report on the application of the Directive were published on 18 April 2013. An external evaluation aimed at providing policy recommendations was undertaken. The appropriation is intended to cover the reporting and review requirements established by Article 10 of Directive 2009/33/EC on the promotion of clean and energy-efficient road transport vehicles as well as other support actions (e.g. communication activities).

*Legal basis*

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 54(2) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union and repealing Council Regulation (EC, Euratom) No 1605/2002 (OJ L 298, 26.10.2012, p. 1).

*Remarks*

This appropriation is intended to cover expenditure incurred by the Commission for collecting and processing information of all kinds needed for the analysis, definition, promotion, monitoring, evaluation and implementation of the rules and measures required to improve the security of inland, air and sea transport, including extension to third countries, technical assistance and specific training.

The main objectives are to develop and apply security rules in the field of transport and in particular:

- measures to prevent malicious acts in the transport sector,
- approximation of legislation, technical standards and administrative monitoring practices relating to transport security,
- definition of common indicators, methods and security objectives for the transport sector and collection of the data necessary for such definition,
- monitoring of measures taken on transport security by the Member States, in all modes,
- international coordination on transport security,
- promoting research into transport security.

This appropriation is intended in particular to cover expenditure on the establishment and operation of a corps of inspectors to check compliance with the requirements of Union security legislation of airports, ports and port facilities in the Member States, including extension to third countries, and of ships flying the flag of a Member State. This expenditure includes the subsistence allowances and travel expenses of the Commission inspectors and the expenses of inspectors from the Member States, borne in accordance with the provisions laid down in that legislation. The costs of training inspectors, of preparatory meetings and of the supplies needed for inspections must, in particular, be added to that expenditure.

This appropriation is also intended to cover expenditure on information and communication, as well as electronic and paper publications directly linked to the achievement of the objective of transport policy, as well as safety and protection of transport users.

*Remarks*

Although the Commission gathers and publishes a large volume of transport-related figures and relevant statistics, general aviation has not been covered. This preparatory action will produce significant data on general aviation in Europe, such as passenger kilometres, workforce, turnover and economic output. As the European Aviation Safety Agency will continue to bring forward new regulations for this sector over the coming years, having a complete database could provide added value for better regulation.

This preparatory action is in line with the European Parliament resolution of 3 February 2009 on an agenda for sustainable future in general and business aviation (OJ C 67 E, 18.3.2010, p. 5), which highlights 'a lack of data and statistical information on general and business aviation' (recital C) and calls on the Commission to 'develop and implement a systematic approach to the gathering and sharing of international and European data' (paragraph 27).

The preparatory action also takes into account the Commission communication entitled 'An agenda for sustainable future in general and business aviation' (COM(2007) 869 final), which calls for 'development at the European level of the basic set of objective and coherent data'.

The preparatory action will aim to collect the most important data on general aviation in Europe, including passenger kilometres (available and flown), number of flights with a shorter distance than 500 km, workforce, turnover, economic output, environmental effect (including data on climate-relevant emissions), direct and indirect impact on related industries, safety issues, taxation (including number and percentage of tickets exempted from VAT and quantity and percentage of the kerosene used that is exempted from taxation) as well as social and economic impacts. The preparatory action will also aim to gather information on ground handling services for general aviation and the legal (including social) framework for the provision of those services.

*Remarks*

The pilot project will involve a study assessing the scope for developing a GNSS monitoring system in Europe for heavy commercial vehicles. The aim is to improve transport safety, traceability and compliance with rules and laws, and to ensure fair competition. The study will assess the best ways of using a GNSS monitoring system to improve the implementation of road transport legislation. Through real-time monitoring it will be possible to combat illegal practices in transport sector and illegal trafficking of goods and waste more effectively and to carry out real-time checks on all information regarding trucks and drivers.

On the basis of existing regulations and systems (digital tachographs monitoring working time and on-board weighing systems monitoring compliance with permissible weights), the study will involve, in stages:

- (1) defining objectives by reviewing the legislation to be monitored by the system (for instance tracking/tracing of dangerous goods, cabotage rules), possible new upcoming legislation for HOVs (e.g. eCall, event data recorders), taking particular account of the results of the study 'Benefit and feasibility of a range of new technologies and unregulated measures in the fields of vehicle occupant safety and protection of vulnerable road users' published by the Commission in March 2015;

- (2) defining the functional requirements for the applications listed in point (1);
- (3) establishing a system architecture incorporating digital tachographs, and providing the technical requirements for all modules needed for the system;
- (4) assessing the security mechanisms to avoid fraud and jamming;
- (5) verifying the conditions for market introduction;
- (6) assessing the acceptability of the project by the road transport industry through open consultation of the stakeholders on a steering group monitoring all project stages;
- (7) assessing impacts for potential legislation with a view to making the system mandatory or 'strongly recommended'.

Studies have already been carried out by the Commission on the technical aspects of such an integrated on-board system (stages 1 and 3 above). This study will therefore focus essentially on the political aspects (stages 5 to 7) and go further into the technical issues (stages 1 to 4).

*Remarks*

In order to be competitive the transport sector requires a highly skilled, competitive and well prepared and trained workforce. In a number of areas there is today a clear need for specialised workers, as the labour market is not providing enough incentives to fill some of the high specialised vacancies in this sector, while at the same time it is difficult to fill some vacancies for low-skilled jobs. In the maritime sector more and more seaman jobs are disappearing and it has become more and more difficult to attract EU workers to this sector, mostly because of the demanding working standards and poor conditions. In aviation, more and more pilots and cabin crew are leaving the EU and an increasing number are accepting working arrangements in the EU that fall well below the well-established standards in the sector.

Furthermore, there is an urgent need to prepare for the imminent replacement of workers retiring in the transport sector.

**CHAPTER 06 02 — EUROPEAN TRANSPORT POLICY** (*cont'd*)**06 02 77** (*cont'd*)06 02 77 09 (*cont'd*)

Objectives:

- to prepare for this scenario and to provide the tools the Commission and the European Parliament and the Council require in order to identify urgent actions to avert an adverse impact on the labour market in this sector,
- to make transport professions more attractive, identify training and lifelong learning needs at Union level, costs and barriers to taking up employment in the transport sector, and propose appropriate measures,
- to provide a comprehensive picture of the needs of the transport sector in terms of employment and training in the coming years.

Proposed actions:

- to conduct a review of job profiles and educational and professional qualifications needed for the most in-demand positions and identify the main universities, learning centres and establishments providing training for highly specialised technical posts in this sector,
- to carry out a study to review the career development opportunities and career paths for new generations and identify, together with relevant authorities and stakeholders, including social partners, incentives to attract Union workers to the sector, and the scope for tying in with Union funding opportunities or support programmes such as the European Youth Initiative,
- to develop a web portal for the future workforce identifying the main career openings and career development opportunities and the relevant costs and including a job vacancy section. The platform will cover all transport modes and all stakeholders. It will include a tool for pooling experience and best practices. It will also include information about working conditions, career paths, etc. for each transport mode. Special attention will be paid to apprenticeships. The primary target audience will be young people.

The web platform will also include:

- a module on 'better enforcement' listing guidance material (at national and Union level) and information about the 'just culture' and the 'culture of compliance',
- a special gender-balance module addressing the issue of the very low proportion of female workers in the transport sector and paying special attention to urban transport,
- a special module on the work of social partners,
- a record, within the best practice pooling tool, of recent campaigns and details of their effectiveness,
- statistical support for labour market analysis in the sector, including comparative analyses with other regions and an inventory of relevant studies and statistics (data available from Eurostat, the OECD, the European Institute for Gender Equality and other sources), as well as works in the field of the digital economy.

The pilot project will identify available tools (including funding) and possible future cost-effective actions for promoting transport jobs, including an assessment of possible effective incentives for good social practices in the transport sector (e.g. a social charter or social awards).

*Remarks*

The preparatory action will support exchanges of good practices on city-port relations and innovative smart port city projects. It could be coordinated with smart and sustainable cities actions.

Port cities are facing huge challenges in reconciling competition and sustainable urban development. Those challenges include relocation of port functions, container transport, redevelopment of port-city interfaces and waterfronts and dialogue with city inhabitants. Tensions between city and port, tourism and industry, natural and built-up areas need to be addressed. Smart city and smart port city ambitions should be complementary. A knowledge- and ICT-based smart port city could work hand in hand with inland interfaces to further increase service efficiency and quality. Having regard to the motorways of the sea concept, this is in line with the Europe 2020 strategy and the revised White Paper on transport and the TEN-T.

Cities and ports are faced with the same problems and have the same opportunities, so there should be innovative solutions for: (a) reducing greenhouse gas emissions from ocean shipping and also from port operations; (b) developing the linkage with hinterland transport (rail, road, inland); (c) enhancing renewable energy use and improving energy efficiency; (d) promoting ICT use and interoperability; (e) strengthening the competitiveness of port cities, bearing in mind the strategic position of the outermost regions and the importance of connectivity between islands; and (f) promoting synergies between city and port.

These innovative actions should also have an impact on maritime and coastal tourism. Actions should also focus on port facilities and dialogue between port and city authorities for urban and port planning. Coastal and maritime tourism also has a role to play in the diversification of ports. This preparatory action will identify the benefits of smart port city development around Europe and take into consideration the full significance of ports. The action will also include initiatives to create a European smart port city network.

Appropriations 2016		Appropriations 2015		Outturn 2014

*Remarks*

For many years the Union has been supporting through grants the deployment of the ERTMS on railway lines and on board rail vehicles in order to increase interoperability within the single European rail area and maximise train operating safety. According to preliminary assessments, the ERTMS may also be able to increase capacity on existing rail lines. The EU ERTMS Coordinator presented in December 2014 an ERTMS work plan highlighting the current deployment of the ERTMS on rail networks and future needs. It is clear from that report that completion of the deployment of the ERTMS along the core network corridors will take more than 50 years and require substantial financial resources beyond the capacity of Union and Member States' budgets. The current Union policy of supporting the ERTMS through grants from the EU budget has proved limited in effectiveness and in scope. Involvement of private-sector financing is a useful option.

Taking stock of the limits of the current financing scheme, the Commission has commissioned a study to develop tailor-made solutions for using innovative financing to support deployment of the ERTMS, in particular along nine core network corridors. This study is looking at various options for the involvement of the private sector and will be completed in 2015, but in order to test the business case for involving innovative financing to support the ERTMS, a European pilot project is needed as a follow-up to that study. In view of the preliminary analysis and the limited experience of the Commission and the EIB with private sector involvement in the deployment of the ERTMS, this pilot project will assess the feasibility of setting up a public-private joint undertaking to support the deployment of the ERTMS throughout the core network corridors, or at least along one corridor, using Union or EIB frameworks. The pilot project will assess the current regulatory, legal and financial feasibility of setting up such joint undertakings at corridor level, thus covering all Member States crossed by core network corridors. Moreover, the pilot project will assess the interest of private investors in particular for such a joint undertaking with Union backing, as well as the interest of ERTMS manufacturers, infrastructure managers and railway undertakings. Furthermore, this pilot project or a subsequent preparatory action could support the setting up of a joint undertaking responsible for supporting ERTMS deployment along one of the core network corridors. Should this prove successful, a new Union programme covering all corridors could be set up. The purpose of deploying along one corridor is to test the business case for a public-private joint undertaking which, while acting as a special-purpose vehicle, provides funding for infrastructure managers along the selected corridor to finance ERTMS deployment. Once deployment has been fully or mostly completed, railway undertakings will benefit from full interoperability along the corridor and could be charged a mark-up on their track access charges so as to repay the joint undertaking and its private shareholders. Railway undertakings are expected to pay the mark-up, since the commercial offer of faster transport for passengers and freight shippers could increase market appetite for rail services along the corridor. Rail services are expected to be faster and easier thanks to the full interoperability provided by the ERTMS.

*Remarks*

This preparatory action will demonstrate an AGS for RPAS (drones) flying below 150 metres (500 feet) above ground level. It will be set up by connecting the drone-controlling remote pilot station on the ground to a web-based platform. The web-based platform will display the position of the RPAS operation and will validate compliance with different national legislation, depending on the location of the operation. The platform can generate no-fly zones on the basis of aviation standards.

By connecting the web-based platform to the RPAS, users will not be able to operate RPAS in no-fly zones. No-fly zones can be generated, monitored and controlled by the authorities responsible. The information generated by the web-based platform can also be shared with all stakeholders in the European aviation network.

This action can provide a solution for the safe and secure integration of small drones into the existing aviation network, guaranteeing a level of safety equivalent to that in manned aviation and resulting in a win-win situation for all RPAS stakeholders. Privacy can be guaranteed by using no-fly zones for RPAS operations; and, more importantly, SMEs in the RPAS industries will be helped to create promising new job opportunities in Europe. The following RPAS services can be demonstrated by using a web-based platform: an AGS monitored and controlled by the authorities responsible, and a validation service checking the regulations applicable.

This platform could be accessible to various stakeholders, such as RPAS users, air navigation service providers, civil aviation authorities, police and emergency services, RPAS manufacturers and qualified entities. It will use existing aviation standards, be compliant with manned aviation rules and result in safer, more secure and standardised integration into the aviation network. In addition to those standards, the platform must be interoperable with all RPAS so as to open the European market for all RPAS manufacturers and all RPAS users. Finally, this RPAS air traffic management platform should be scalable for all Member States.

*Remarks*

The pilot project will assess new ways of sustainably financing public transport that are compatible, in particular, with eco-sustainability, digitisation and accessibility, in order to boost the economy and create new jobs. The Commission's objective is to encourage the use of public transport, thereby reducing congestion and environment- and health-harming emissions in urban areas, especially through alternative, cleaner fuels. Many studies show that ticket costs affect a small part of the total cost of services. Customers pay a lot of money in terms of taxes and ticketing. It is necessary to find new ways to finance public transport, evaluating new models that could significantly reduce or remove charges for the public, save public money and reduce atmospheric emissions. In addition, improved urban mobility would help to increase passenger numbers. More efficient mobility would also help businesses and would create more jobs. A good example of this is Tallinn in Estonia. The aim of the project is to identify and exchange best practices, assess new funding methods and look into the possibility of creating a European one-stop office to support municipalities that wish to implement the best sustainable financing systems and projects.

**CHAPTER 06 03 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO TRANSPORT** (*cont'd*)*Remarks*

These remarks are applicable to all the budget lines in this chapter.

These appropriations are intended to be used for Horizon 2020 — the framework programme for research and innovation, which covers the 2014 to 2020 period, and for the completion of the previous research programmes (seventh framework programme and preceding framework programmes).

Horizon 2020 will play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area. Horizon 2020 will contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. The programme will be carried out in order to pursue the general objectives described in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European research area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European research area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations are intended to be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget of the Union.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Revenue from States taking part in the European cooperation in the field of scientific and technical research will be entered in Item 6 0 1 6 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

CHAPTER 06 03 — HORIZON 2020 — RESEARCH AND INNOVATION RELATED TO TRANSPORT (*cont'd*)

Any revenue from the contribution by outside bodies to Union activities will be entered in Item 6 0 3 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be made available under Item 06 03 50 01.

Administrative appropriations of this chapter will be provided under Article 06 01 05.

**06 03 03 Societal challenges***Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

Funding will be focused on the following challenges:

- smart, green and integrated transport,
- innovation and research, particularly in the areas of behavioural change, modal shift, accessibility for all, integration (interconnectivity, intermodality, interoperability) and sustainability (climate change, gas and noise emission reduction), which are of crucial importance for the transport and tourism sectors.

*Remarks*

This appropriation is intended to cover research and innovation actions that should substantially contribute to shifting transport into a new era of smart mobility. Actions under this item should support the development and take-up of the necessary solutions for all transport modes, drastically reducing transport emissions that are harmful to the environment, lowering the dependence of transport on fossil fuels, and hence reducing transport impact on biodiversity and preserve natural resources. This is expected to be achieved by investing in specific activities, particularly in the form of large public-private partnerships, such as making aircraft, trains, vehicles and vessels cleaner and quieter, developing smart equipment, infrastructure and services and improving transport and mobility in urban areas.

Research and innovation carried under this item is expected to make important contributions to optimise performance and efficiency in the face of growing demands for mobility. Actions under this item will also focus on substantially reducing traffic congestion, substantially improving the mobility of people and freight, developing and applying new concepts of freight transport and logistics and reducing accident rates and fatal casualties and improving security. Actions under this item are indeed intended to contribute to making Europe the safest region for aviation and to move towards the target of zero fatalities in road transport by 2050.

06 03 03 (*cont'd*)

06 03 03 01 (*cont'd*)

Research and innovation is expected to play a significant role in achieving global leadership for the European transport industry and contributing to the development of small and medium-sized enterprises, staying ahead in new technologies and reducing the costs of existing manufacturing processes, therefore contributing to economic growth and highly skilled jobs in the European transport industry. In this context, actions to develop the next generation of transport means and explore entirely new transport concepts are expected to be developed and covered by this appropriation.

Socioeconomic research and forward-looking activities for policymaking will also be covered by this appropriation: actions to support policy analysis and development including on socioeconomic aspects of transport are necessary to promote innovation and meet the challenges raised by transport.

*Remarks*

This appropriation is intended to cover earlier commitments under the previous research framework programmes (prior to 2007).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

Regulation (EU) No 1293/2013 has four general objectives (Article 3) and three priority areas for the sub-programme for the environment (Article 9), of which the third one is Environment Governance and Information.

Specific objectives of this third priority area are set out in Article 12.

The measures financed by LIFE may be implemented through action grants, operating grants, financial instruments, procurement procedures or any other interventions that are needed (Articles 17, 18, 21 and 22).

At least 81 % of the budgetary resources for the LIFE programme shall be allocated to projects supported by the way of action grants or, where appropriate, financial instruments (Article 17(4)).

Costs of technical assistance for selecting projects and monitoring, evaluating and auditing projects under the LIFE and LIFE+ programme (including non-governmental organisations supported via operating grants) may also be financed by this appropriation.

*Remarks**Former Item 07 02 05 02*

This appropriation is intended to cover the Agency's staff, administrative and operational expenditure for the activities related to the implementation of legislation on the export and import of dangerous chemicals.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to the 'European Economic Area' Annex to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

The establishment plan of the European Chemicals Agency is set out in Annex 'Staff' to this section.

The Union contribution for 2016 amounts to a total of EUR 1 151 000. An amount of EUR 111 120 coming from the recovery of 2014 surplus is added to the amount of EUR 1 039 880 entered in the budget.

*Remarks*

This appropriation is intended to cover the Agency's staff, administrative and operational expenditure.

The mission of the Agency is to provide the Union and the Member States with objective, reliable and comparable information on the environment at Union level, thus enabling them to take the requisite measures to protect the environment, to assess the results of such measures and to inform the public.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation.

Any revenue from the Swiss Confederation's contribution to participation in Union programmes entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation.

The amounts repaid in accordance with Article 16 of Commission Regulation (EC, Euratom) No 2343/2002 constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

The establishment plan of the European Environment Agency is set out in Annex 'Staff' to this section.

The Union contribution for 2016 amounts to a total of EUR 36 309 240. An amount of EUR 752 386 coming from the recovery of 2014 surplus is added to the amount of EUR 35 556 854 entered in the budget.

*Remarks*

This will be the second year of this pilot project, whose aim is to initiate public dialogue on environmental protection in the context of the TTIP. Such dialogue should involve all stakeholders, including representatives of governments, environmental experts, and civil society. It should focus on the principles of state regulation of legitimate public policy objectives, helping to formulate a common approach to handling such policy objectives in the light of existing and future investment protection schemes. Such a dialogue is essential in order to enhance public understanding of both the need for state regulation in these areas and the need to ensure that all stakeholders are fairly treated and can expect proportionate and predictable legislative action to be taken. Part of the appropriation should be spent on objective SWOT analyses of the TTIP, on which basis public awareness of the real pros and cons could be increased.

The right (and duty) of a Member State and/or of the Union to regulate and implement public policy objectives in areas such as social security, the environment, national security, public health and safety and promotion and protection of cultural diversity is a crucial aspect of the social contract between citizens and any democratic government.

However, the exercise of this fundamental right must neither breach nor disregard the national and international obligations of Member States and/or the Union towards foreign investors entering the Union internal market with legitimate expectations such as non-discriminatory and equal treatment.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the pilot project.

This pilot project will contribute to further development of market-based instruments (MBI) in the field of environmental policy by making civil society organisations better able to participate in Union policy-making on green public procurement (GPP), the reduction of harmful subsidies and eco-taxation. Currently there is insufficient Union-level capacity in these fields and little coordination of reform efforts in Member States and at Union level. Greater involvement of civil society experts in the design and implementation of public procurement policies, the reduction of harmful subsidies and eco-taxation would improve the uptake of such policies in the Member States. Networking between civil society and public authorities interested in GPP, the reduction of harmful subsidies and eco-taxation would be a way of boosting Union civil society capacity and drawing on experience in Member States through the exchange of best practices and greater participation in the Union decision-making process.

CHAPTER 07 02 — ENVIRONMENTAL POLICY AT UNION AND INTERNATIONAL LEVEL (*cont'd*)07 02 77 (*cont'd*)07 02 77 30 (*cont'd*)*Remarks*

Moving towards a circular economy is at the heart of the resource efficiency agenda established under the Europe 2020 strategy for smart, sustainable and inclusive growth. The main ideas on how to do more with less are being taken further in the Union's Environment Action Programme to 2020. Resource efficiency and sustainability are crucial in order to achieve the Europe 2020 strategy targets, as well as to improve the Union's competitiveness and ensure energy security. This transboundary, transnational pilot project will cover all Member States. It is fully in line with the Commission communication entitled 'Towards a circular economy: A zero waste programme for Europe' (COM(2014) 398 final), as well as with the European Parliament resolution of 9 July 2015 on resource efficiency: moving towards a circular economy (2014/2208(INI)).

This pilot project has the following main objectives:

- to identify, analyse and foster all best innovative practices and existing networks for green solutions, thus facilitating knowledge transfer and exchanges of innovations in the circular economy,
- to develop capacity and innovation potential and provide in-depth analysis to empower researchers, industry, communities and individuals to tap into new and innovative opportunities in the green circular economy, thus meeting current and future societal challenges.

The project will last for 2 years and will focus on the following key activities:

- producing an analysis identifying all existing innovative practices and existing networks for solutions and setting up a unified European Green Circular Economy Network encompassing all potentially existing networks so as to facilitate knowledge transfer and exchange best practices and innovations, as well as more circular economic models. The network can also provide a platform for joint problem solving and direct access to vital resources, such as research, analytical tools, funding and technical expertise. It could serve as an e-learning facility for circular economy capacity development,
- capacity building, development of innovation potential and awareness raising with the aim of sharing challenges, opportunities and best innovative practices, organisation of at least two forums on the green circular economy per year, as well as one kick-off conference and one closing conference in Brussels. Structured around a series of training modules, the forums will encourage participants to actively reflect on how innovative solutions for switching to the circular economy can be adapted to their home countries. They will focus on sustainable consumption and more efficient and profitable production, using fewer raw materials, with less pollution and waste in the process, and more consumer needs fulfilled, with less energy, water or waste; better use of resources and less waste production of waste, circular economy solutions and green standards, as well as circular economy investments in innovation and research, and fiscal policy instruments,
- producing a study providing in-depth analysis and policy options for specific sectors, such as urban planning, sustainable buildings, waste and water management, trade, food sector, fiscal policy, etc., and identifying case studies that provide detailed information about innovative practices and approaches in promoting the green circular economy in the regions. It should suggest actions such as public investment in key areas, market-based instruments, and regulatory frameworks for Member States.

*Remarks*

Biodiversity loss is a major societal challenge. To preserve European biodiversity, the Union imposed the Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora (OJ L 206, 22.7.1992, p. 7) ('Habitats Directive'), the cornerstone of Europe's nature conservation policy. Annex IV to that directive lists 27 of 34 salamander species, which Member States are obliged to protect against factors threatening their survival. Very recently, a novel fungal pathogen, *Batrachochytrium salamandrivorans*, emerged in Europe, where it is currently causing massive declines in salamander populations across three Member States, threatening the survival of most European salamander species. This pilot project will assist Member States in meeting their obligations under the Habitats Directive. No opportunities are available under the Horizon 2020 programme to take such immediate action.

This pilot project will design sustainable mitigation measures to counteract the impact of the epidemic caused by the fungus *Batrachochytrium salamandrivorans*, in both the short and long terms, in a joint effort by the most relevant Member States (based on the current occurrence of the fungus and the most salamander-diverse countries, including but not limited to Belgium, the Netherlands, Germany, the United Kingdom, France, Spain, Portugal, Italy and Greece).

In the short term (first 2 years) the pilot project will determine the current distribution of the fungus in threatened salamander populations across Europe. To prevent the spread of the fungus, the pilot project will also be used to investigate different methods (protective value of barriers, dilution effect of temporary removal of part of the population during an outbreak) in- and ex-situ in a multi-Member-State collaborative effort. In the long term (3 years), proof of concepts for vaccination strategies (increasing the amphibians' resistance to the fungus) and bioaugmentation strategies (steering the environment towards conditions that limit the fungus' survival and impact on amphibians (e.g. Schmeller *et al.* 2014)) will be developed.

*Remarks*

There are a number of national and regional initiatives to enhance green infrastructure (GI) in the light of the Union's Green Infrastructure Strategy (May 2013) and in recognition of the role GI plays in implementing the EU's 2020 Biodiversity Strategy that requires restoration of at least 15 % of degraded ecosystems. One of the most effective ways of building urban GI is through urban planning, but planners require evidence-based assessment tools and best practices in GI to aid their decision-making. This pilot project will develop protocols for the establishment of dedicated region/city-specific GI assessment schemes to aid climate change mitigation in cities.

The aim of the project is therefore to develop protocols to promote the creation, management and governance of green infrastructure. A secondary aim is to examine GI's potential role as a catalyst for engagement in increasing urban resilience in a number of contexts (within communities and organisations) in different urban socio-economic, climatic and cultural settings.

The purpose of the pilot project is to compile existing data and if necessary carry out further studies on the environmental impact of wind turbines, in particular their impact on bat and bird populations and their migration routes. On the basis of the data gathered, guidelines will be drawn up for large-scale implementation and, possibly, to serve as the basis for legislative proposals, with a view to mitigating — and where appropriate offsetting — the impact identified.

*Remarks*

The Coordination of Information on the Environment (Corine) programme was set up by the Commission in 1991 with the principal aims of defining and protecting biotopes, combating environmental pollution, mapping the different types of land cover and preserving the natural environment. The database resulting from the programme was subsequently replaced by the European Union Nature Information System (EUNIS) database, which contains an inventory of European habitats (natural, near-natural, artificial, terrestrial and aquatic) and serves as the basis for Union nature legislation (Natura 2000).

However, that inventory does not include the species and habitats to be found in the French outermost regions (Martinique, Guadeloupe, French Guiana, Réunion and Mayotte), each of which has its own highly specific biological and ecological features and a very large proportion of endemic species.

The purpose of this pilot project is to use the same tools as the Corine Biotope and EUNIS programmes to compile an inventory of species and habitats and environmentally sensitive areas in these regions, which number among the world's biodiversity hotspots. A new common database of this kind is necessary in order to identify any gaps in knowledge and to take the action required in order to preserve the biotope of these regions, along the lines of that taken for the other Union regions.

This approach, which has already demonstrated its feasibility and value in other Union regions, is a first step on the road towards the adoption of legislation to preserve biodiversity in the French outermost regions. Advantage will be taken of any possible synergies with the work carried out under the BEST preparatory action.

TITLE 08 — RESEARCH AND INNOVATION

**TITLE 08****RESEARCH AND INNOVATION***Remarks*

These remarks apply to all the budget lines in this title.

Research and innovation activities under this title will contribute to three main research programmes, i.e. Horizon 2020, Euratom and the programme for the ITER project. It will also cover research programmes of the research fund for coal and steel.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively, and research and innovation capacities in the whole of Europe and ensuring optimum use thereof.

Particular account will be taken of the need to step up efforts to enhance the participation and role of women in science and research.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations are also intended to cover administrative expenditure, including expenditure on staff, whether covered by the Staff Regulations or not, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and initiatives necessary for preparation and monitoring of the Union's strategy on research, technological development and demonstration (RTD).

Revenue resulting from cooperation agreements between the European Atomic Energy Community and Switzerland or the multilateral European Fusion Development Agreement (EFDA) will be entered in Items 6 0 1 1 and 6 0 1 2 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from States taking part in the European cooperation in the field of scientific and technical research will be entered in Item 6 0 1 6 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

TITLE 08 — RESEARCH AND INNOVATION

**CHAPTER 08 02 — HORIZON 2020 — RESEARCH** (*cont'd*)*Remarks*

These budgetary remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the framework programme for research and innovation, which covers the 2014-2020 period and brings together all existing Union research and innovation funding, including the framework programme for research, the innovation related activities of the competitiveness and innovation framework programme and the European Institute of Innovation and Technology (EIT). The programme shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'A digital agenda for Europe' 'Resource-efficient Europe' and 'An industrial policy for the globalisation era', as well as in the development and functioning of the European Research Area (ERA). Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding. The appropriation will be used also for the completion of the previous research programmes (Seventh Framework Programme and preceding framework programmes).

This appropriation will be used in accordance with the Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

**08 02 01*****Excellent science****Remarks*

This priority of Horizon 2020 aims to reinforce and extend excellence in the Union's science base and ensure a steady stream of world-class research to secure the Union's long-term competitiveness. It will support the best ideas, develop talent within the Union, provide researchers with access to priority research infrastructure, and make the Union an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without pre-determined thematic priorities. Attention will be paid to supporting also careers of female researchers and encouraging them to advance their careers to the highest grades, while removing cultural and institutional barriers preventing them to advance. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

*Remarks*

The fundamental activity of the European Research Council (ERC) shall be to provide attractive long-term funding to support excellent investigators and their research teams to pursue ground-breaking, high-gain/high-risk research. Particular priority shall be given to assisting excellent starting researchers to make the transition to independence by providing adequate support at the critical stage, when they are setting up or consolidating their own research team or programme. The ERC shall also give support, as necessary, to emerging new ways of working in the scientific world with the potential to create breakthrough results and facilitate exploration of the commercial and social innovation potential of the research which it funds.

*Remarks*

Activities under the 'Future and emerging technologies' (FET) specific objective shall support fundamental science and technology research exploring new future technologies by challenging current paradigms and venturing into unknown areas. In addition, FET activities shall address a number of promising exploratory research themes with the potential to generate a critical mass of inter-related projects that, together, make up a broad and multifaceted exploration of the themes and build a European pool of knowledge. Finally, FET activities shall support ambitious large-scale, science-driven research aiming to achieve a scientific breakthrough. Such activities will benefit from the alignment of European and national agendas.

*Remarks*

Research infrastructures activity will ensure the implementation and operation of the ESFRI (European Strategy Forum for Research Infrastructure) and other world-class research infrastructures, including the development of regional partner facilities, for 2020 and beyond. In addition, the integration of and access to national research infrastructures and the development, deployment and operation of e-infrastructures will be ensured. The activity will also encourage research infrastructures to act as early adopters of technology, promote research and development (R & D) partnerships with industry, facilitate industrial use of research infrastructures and stimulate the creation of innovation clusters.

**08 02 02** **Industrial leadership***Remarks*

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

The aim of this activity is to help companies and other types of organisation engaged in research and innovation (R & I) to gain easier access, via financial instruments, to loans, guarantees, counter-guarantees and hybrid, mezzanine and equity finance. Attention will be paid to access to finance for female entrepreneurs. Debt and equity facilities will be run in a demand-driven manner, though the priorities of particular sectors or of other Union programmes will be targeted if top-up funding is made available. The focus is on attracting private investments into R & I. The European Investment Bank (EIB) and the European Investment Fund (EIF) will play an important role, as entrusted entities, in implementing each financial instrument facility on behalf of and in partnership with the Commission. Part of this appropriation will be used to reinforce, in the form of paid-in capital, the EIF's capital base.

To support the participation of SMEs in Horizon 2020 a dedicated market-oriented instrument has been introduced, targeting all types of innovative SMEs that wish to develop, grow and internationalise. In addition, support will be provided to research intensive SMEs in transnational research projects and to women-led start-ups. Activities enhancing the innovation capacity of SMEs and improving the framework conditions for innovation will also be supported. European incubators with a proven track record in accelerating tech startups can make use of the part of this appropriation that focuses on early-stage tech startups.

In accordance with Regulation (EU) No 1291/2013, support will be provided to innovation in SMEs through the implementation of an SME instrument under a single management system and implemented in a bottom-up manner. In accordance with Annex II to that Regulation within the target of allocating a minimum of 20 % of the total combined budgets for the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' for SMEs, a minimum of 5 % of those combined budgets will be initially allocated to the dedicated SME instrument. A minimum of 7 % of the total budgets of the specific objective 'Leadership in enabling and industrial technologies' and the priority 'Societal challenges' will be allocated to the dedicated SME instrument averaged over the duration of Horizon 2020.

**08 02 03** ***Societal challenges****Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level and take a gender-sensitive approach while aiming for balanced participation of men and women.

*Remarks*

Lifelong health and well-being for all, high-quality and economically sustainable health and care systems, with health care becoming more personalised for more efficacy, and opportunities for new jobs and growth in the health sector and its related industries are the aims of this activity. To that respect activities will focus on effective health promotion and disease prevention (e.g. understanding the determinants of health, developing better preventive vaccines). Particular attention will be paid to gender- and age-related health specificities. In addition, emphasis will be placed on managing, treating and curing disease (notably via an increased personalisation of medicine), disability and reduced functionality (e.g. by transferring knowledge to clinical practice and scalable innovation actions, better use of health data, independent and assisted living). Furthermore, efforts will be made to improve decision-making in prevention and treatment provision, identify and support the dissemination of best practice in the health care sector, and support integrated care and the uptake of technological, organisational and social innovations empowering in particular older persons as well as disabled persons to remain active and independent. Finally, activities will be based on a gender-sensitive approach that recognises, amongst other things, the position of women in both the informal and the formal care sector.

*Remarks*

Efforts to ensure a secure, clean and efficient energy supply will focus on reducing the Union's energy consumption and carbon footprint (for example through affordable systems and components incorporating smart technologies) and securing a low-cost, low-carbon electricity supply (for example through research, development and full-scale demonstration of innovative renewables and carbon capture and storage technologies). There will be a special focus on alternative fuels and mobile energy sources and on developing a single, smart European electricity grid. Activities will also focus on multidisciplinary research for energy technologies and joint implementation of pan-European research programmes and world-class facilities. Furthermore, tools, methods and models for robust and transparent policy support will be developed and market uptake of energy innovation will be promoted. 85 % of the budget appropriations will be allocated to the renewable and end-use energy efficiency policy areas, including smart grids, energy storage and smart cities and communities from 2014 onwards.

*Remarks*

The aim of those activities is to fully exploit the potential of Europe's talent pool and to ensure that the benefits of an innovation-led economy are both maximised and widely distributed across the Union in accordance with the principle of excellence. By nurturing and connecting pools of excellence, the activities proposed will contribute to strengthening the European Research Area.

The activities will focus on teaming of excellent research institutions and low-performing RDI regions aiming at the creation of new (or significant upgrade of existing) centres of excellence in low performing RDI Member States and regions, twinning of research institutions, establishing 'ERA Chairs', a Policy Support Facility to improve the design, implementation, and evaluation of national/regional research and innovation policies, supporting access to international networks for excellent researchers and innovators who lack sufficient involvement in European and international networks and strengthening the administrative and operational capacity of transnational networks of national contact points, including through training.

## Remarks

The Fuel Cells and Hydrogen 2 (FCH2) Joint Undertaking (JU), a public private partnership between the Commission, the industry and the Research Grouping, will build up on the results of its predecessor, set up under the Seventh Framework Programme. FCH 2 JU's objective is to tackle a series of obstacles to the commercialisation of fuel cells and hydrogen technologies by reducing the cost of FCH systems, increasing their efficiency and demonstrating their feasibility, thus paving the way for a strong, sustainable and globally competitive fuel cells and hydrogen sector in the Union. This appropriation is intended to cover the operational costs of the FCH 2 JU.

FCH 2 JU shall contribute to the implementation of Horizon 2020 and, in particular, of the specific objectives 'Making the transition to a reliable, affordable, publicly accepted, sustainable and competitive energy system' and 'Achieving a European transport system that is resource-efficient, environmentally friendly, safe and seamless' of the priority 'Societal challenges'.

This appropriation is intended to cover payments in respect of commitments remaining to be settled from previous years.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The contributions from EFTA States relate exclusively to their participation in the non-nuclear activities of the framework programme.

**CHAPTER 08 02 — HORIZON 2020 — RESEARCH** (*cont'd*)**08 02 77** (*cont'd*)08 02 77 03 (*cont'd*)

Ongoing discussions on the post-2015 global development framework have viewed universal health coverage (UHC) as a fundamental enabler for ending extreme poverty by 2030 and a crucial factor in completing the unfinished agenda of the health-related Millennium Development Goals (MDGs) — notably MDGs 4, 5 and 6 on improving maternal health, reducing child mortality, and combating HIV and AIDS, malaria and tuberculosis respectively.

It is also important to include neglected tropical diseases (NTDs) in the new development framework, in addition to the MDG 6 diseases and in line with the corresponding roadmap from the WHO ([http://whqlibdoc.who.int/hq/2012/WHO\\_HTM\\_NTD\\_2012.1\\_eng.pdf](http://whqlibdoc.who.int/hq/2012/WHO_HTM_NTD_2012.1_eng.pdf)) and other prominent expert organisations.

*Objectives*

This project will produce a study that quantifies the role of poverty-related and neglected diseases (PRND) R & D in contributing to UHC and improving the health situation in low- and middle-income countries. The study will:

- track Union investment in PRND R & D and assess how corresponding technologies are being translated into a resource for UHC,
- examine how the correlation between PRND R & D and UHC can be improved with regard to the post-2015 global development framework and develop recommendations for R & D indicators that help advance the impact of UHC.

Developing essential medicines for PRNDs that are safe, effective, affordable, accessible and of assured quality contributes to achieving UHC, and adequately investing in UHC is an effective way of guaranteeing that available services and products are also accessible and of a suitable standard of quality. This correlation will play a crucial role in the post-2015 global development framework, not only for ensuring healthy lives, but also for helping to reduce poverty.

**CHAPTER 08 02 — HORIZON 2020 — RESEARCH** (*cont'd*)**08 02 77** (*cont'd*)**08 02 77 04** (*cont'd*)

The aim of this two-stage preparatory action is to identify the barriers that impede the development of a truly optimised single European transport system and to propose a set of actions which, collectively, can help to accelerate progress. The action fully supports Union and Commission initiatives. It will:

- inform future policy development and research and innovation programmes, at both Union and national level,
- address one of the seven challenges on which Horizon 2020 is based, namely ‘Smart, green and integrated transport’,
- contribute to implementation of Europe 2020 flagship initiatives such as ‘Increasing accessibility and clean transport’ and ‘Promoting innovation and excellence’.

The examination stage will:

- identify stakeholders (industry, research, administrations, regulators and civil society), and their opinions, needs and expectations,
- describe the current state of the system: public policy (at all levels); industry structures; market and regulatory conditions; mechanisms for stakeholder collaboration; transport programmes,
- look at similar issues in other world regions and identify lessons to be learned,
- identify opportunities to improve Europe’s transport system as a whole and barriers preventing this.

The roadmap stage will suggest actions, endorsed by a cross-section of stakeholders, which can accelerate progress towards an optimised transport system. It will examine:

- what, if any, new organisation(s) might help, without simply duplicating existing structures,
- how to develop a stronger ‘whole system’ mindset at all levels,
- ways to encourage existing initiatives to pay more attention to their interactions with the rest of the system,
- potential policy initiatives at Union, Member State and local levels.

The end result will be an in-depth analysis of the opportunities for and barriers to achieving a fully optimised transport system across Europe, plus committed stakeholders from all sectors.

Appropriations 2016		Appropriations 2015		Outturn 2014	
Commitments	Payments	Commitments	Payments	Commitments	Payments

*Remarks*

In the context of the unfinished MDG agenda, stepping up maternal immunisation for pregnant women and their babies, to protect them from diseases that cause substantial morbidity and mortality, such as malaria, HIV, tuberculosis, influenza and tetanus, represents a unique opportunity to effectively advance women's and children's health (MDG5 and MDG4) in a cost-effective and equitable fashion. Vaccines are among the most effective preventive tools available to date for reducing infectious diseases and their complications and sequelae. Most diseases that can be prevented with vaccines in pregnancy have the greatest and most serious impact on mothers and infants in low-income countries.

Maternal immunisation is a promising approach in which pregnant women are vaccinated in order to protect newborns who are too young to be vaccinated themselves. Neonatal mortality includes an estimated 600 000 infection-related deaths per year, a proportion of which may be addressed through maternal immunisation. In addition, maternal immunisation may address a proportion of the estimated 965 000 deaths from pre-term birth and prevent a proportion of the 10-50% of stillbirths estimated to be caused by infectious disease.

In contrast, the evidence currently available from the areas concerned on the burden of diseases that can be prevented through maternal immunisation and on the safety and efficacy of vaccines in pregnant women is incomplete and poor. The generation of good data and robust evidence on the burden of vaccine-preventable diseases in pregnancy and infancy in low-income countries is vital and is a prerequisite for the future definition of a road map for maternal immunisation policies in those areas.

Goal: to determine the burden of vaccine-preventable diseases in pregnant women and their infants in low-income countries and assess the impact of co-morbidities such as HIV, tuberculosis and Chagas disease on this burden.

Objectives: capitalising on recent evidence, the pilot project will quantify the burden of vaccine-preventable diseases (with a primary focus on Guillain-Barré Syndrome, respiratory syncytial virus, pertussis, influenza, tetanus and rubella) in pregnant women and their infants and to study how this burden in pregnant women is modified by co-morbidities such as infection by HIV, tuberculosis or joint HIV-tuberculosis infection in representative sites in sub-Saharan Africa, Latin America and the Caribbean.

The pilot project may also help to foster evaluation of licensed vaccines and vaccines under development for pregnant women in low-income countries, where these vaccines are most needed (i.e. it can help build a maternal influenza immunisation platform including antenatal care in developing countries), address obstacles to maternal immunisation, and contribute to the definition of a roadmap on maternal immunisation policies and inform priority setting in these contexts. Moreover the project is timely, given the momentum among global health stakeholders as regards the impact of immunisation and the fact that, throughout the next decade, low- and middle-income countries will be introducing new life-saving vaccines into their routine immunisation programmes. The project may trigger public-private collaboration and North-South research cooperation.

*Remarks*

The proposed research is completely new in so far as it synchronously combines highly resolved acoustical (medium to far field) and optical (near field) imaging (low light, high frequencies) through a blending and calibration mechanism to translate the information from the near field into the far field and vice versa. This is to quantify fish abundance, biomass, and diversity in key areas as well as other MSFD indicators (through a further set of (environmental) instrumentation). Instead of snapshots (as generated like in regular surveys) 'videos' will be produced, where the assessment method will be following international (ICES) standards. The complete system is anticipated to work autonomously, continuously and non-invasively in an event based mode to save energy.

As a research platform an opto-acoustic lander hardware (underwater fish observatory, UFO) will be provided by the research institute at no cost for the project, for optimising the pattern recognition algorithms and related research.

The indicated amount covers inter alia the costs for biometrical measurements of fish, modelling of fish age-, length-, biomass-, volume-to-photo/video relationships, quantification of the reef effect through tagging experiments, calibration (integration) of biological results with those from acoustics and optics, optimisation of survey design from a biological perspective, migration and single fish separation (medium to far field fish tracing), event based control of the full instrumentation, distance estimation (near field stereo-metrics), fish separation (near field fish tracing) and calibration (integration) of optical results with those from acoustics and biology.

**CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS** (*cont'd*)*Remarks*

The Euratom research and training programme (2014-2018) ('Euratom Programme') complements Horizon 2020 in the field of nuclear research and training. Its general objective is to pursue nuclear research and training activities with an emphasis on continually improving nuclear safety and radiation protection, notably to contribute to the long-term decarbonisation of the energy system in a safe, efficient and secure way. By supporting this research, the Euratom Programme shall reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership, and societal challenges.

The indirect actions of the Euratom Programme are focused on two areas: nuclear fission, safety and radiation protection, and fusion research and development programme.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

**08 03 01 Operational expenditure for the Euratom Programme***Remarks*

The scope of the Euratom Programme for indirect actions includes nuclear fission safety and radiation protection as well as the fusion research and development which aim to ensure the success of the ITER project while enabling Europe to reap its benefits. It will reinforce outcomes under the three priorities of Horizon 2020: excellent science, industrial leadership and societal challenges.

*Remarks*

The Euratom activity in the field of fusion will support common research activities undertaken by the fusion stakeholders involved in the implementation of the tasks derived from the fusion roadmap. In addition, it will support joint activities to develop and qualify materials for a demonstration power plant as well as to address reactor operation issues and develop and demonstrate all relevant technologies for a fusion demonstration power plant. The activity will also implement or support knowledge management and technology transfer from the research co-funded by this programme to industry, exploiting all innovative aspects of the research. Furthermore, the activity will support the construction, refurbishment, use and continued availability of key research infrastructures under the Euratom Programme.

Remarks

The Euratom activity in the field of nuclear fission will provide support to joint research activities concerning the safe operation of reactor systems in use or which may be used in the future in the Union. It will also contribute to the development of solutions for the management of ultimate nuclear waste. In addition, the activity will support joint and/or coordinated research activities, placing emphasis on the risks from low doses from industrial, medical or environmental exposure. Furthermore, Euratom fission will promote joint training and mobility activities between research centres and industry as well as between different Member and Associated States while it will provide support for maintaining multidisciplinary nuclear competences.

**CHAPTER 08 03 — EURATOM PROGRAMME — INDIRECT ACTIONS** (*cont'd*)**08 03 51** (*cont'd*)

The programme covers two thematic areas:

Fusion research, which includes activities that range from basic research to technology development, construction of major projects and training and education activities. It offers the prospect of an almost limitless supply of clean energy, with ITER being the crucial next step in the progress towards this ultimate goal. The realisation of the ITER project therefore lies at the heart of the present Union strategy. It must be accompanied by a strong and focused European research and development programme on fusion to prepare for the exploitation of ITER and to develop the technologies and knowledge base that will be needed during ITER operation and beyond.

Fission research, which aims to establish a sound scientific and technical basis in order to accelerate practical developments for the safer management of long-lived radioactive waste, to promote safer, more resource-efficient and cost-effective nuclear energy and to ensure a robust and socially acceptable system of protection of man and the environment against the effects of radiation.

Remarks

The Research Fund for Coal and Steel funds every year innovative projects to enhance the safety, efficiency and competitive edge of the Union coal and steel industries. It was created in 2002 to build on the successes of the European Coal and Steel Community. The distribution of the budgets between coal (27,2 %) and steel (72,8 %) is defined in Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22).

**CHAPTER 08 05 — RESEARCH PROGRAMME OF THE RESEARCH FUND FOR COAL AND STEEL** (*cont'd*)**08 05 02** (*cont'd*)*Remarks*

The coal research programme activity aims to reduce the total costs of mining production, improve the quality of the products and reduce the costs of using coal. Research projects shall also aim to achieve scientific and technological progress with a view to gaining a better understanding of the behaviour and control of deposits in relation to rock pressure, gas emissions, the risk of explosion, ventilation and all other factors affecting mining operations. Research projects with these objectives shall present the prospect of results applicable in the short or medium term to a substantial part of Union production.

*Remarks**Former Articles 09 02 01 and 12 02 01 (in part)*

This appropriation is intended to cover expenditure on a set of measures designed to:

- coordinate a better regulatory framework for competition, investment and growth over the entire range of issues in the e-communications field: economic analysis, impact assessment, policy development, regulatory compliance,
- carry out and review the Union's policy on electronic communication networks and services with a view to launching initiatives designed to meet the challenges in this dynamically evolving sector (convergence of electronic communication with audiovisual and content delivery),
- facilitate the implementation of the digital single market, in actions related to broadband targets through regulation, policy and public financial assistance, including coordination with cohesion policy in the areas relevant to electronic communications networks and services,
- develop policies and coordination measures which will ensure that Member States implement their national broadband plans with reference to the fixed and mobile infrastructure and their possible convergence, including coherence and economic efficiency of public interventions at Union and Member State levels,
- develop policy and legislation with a particular focus on issues related to access and authorisation of e-communications networks and services, notably interoperability, interconnection, civil works, the independence of regulators and new measures to strengthen the single market,
- facilitate the monitoring and implementation of relevant legislation in all Member States,
- provide coordination of infringement proceedings, and input to relevant State aid matters,
- develop policy and legislation with a particular focus on issues related to retail and consumer issues notably net neutrality, switching, roaming, demand and use stimulation and universal service,
- develop and implement consistent market-based regulations to be applied by national regulatory authorities and to respond to individual notifications from those authorities, notably regarding relevant markets, competition and appropriate regulatory intervention, in particular for next generation access networks,
- develop policies across the board which will ensure that Member States manage all uses of spectrum, including the different internal market realms such as e-communications, broadband internet and innovation,

**CHAPTER 09 02 — DIGITAL SINGLE MARKET** (*cont'd*)**09 02 01** (*cont'd*)

- promote and monitor the implementation of the regulatory framework for communication services (including the mechanism provided for in Article 7 of Directive 2002/21/EC of the European Parliament and of the Council of 7 March 2002 on a common regulatory framework for electronic communications networks and services (Framework Directive) (OJ L 108, 24.4.2002, p. 33),
- enable third countries to pursue a policy of opening up their markets to the same extent as in the Union,
- promote and monitor the implementation of the radio spectrum policy programme (Decision No 243/2012/EU of the European Parliament and of the Council of 14 March 2012 establishing a multiannual radio spectrum policy programme (OJ L 81, 21.3.2012, p. 7)),
- develop policies on copyright at Union level, in particular on the online distribution of copyright protected content in the digital single market, including the assessment of legal and economic barriers stemming from the regulatory framework at Union or Member States level or from industry practices,
- develop, implement and monitor policies in the context of the digital single market, on e-commerce in the Union, in particular those related to Directive 2000/31/EC of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the internal market ('Directive on electronic commerce') (OJ L 178, 17.7.2000, p. 1), including the assessment of legal and economic barriers stemming from the internal market framework for electronic commerce or from related measures,
- support actions to safeguard the continued stability and security of the Internet governed by a genuine multi-stakeholder model to ensure that economic and social opportunities offered by electronic communications can be fully exploited,
- continue to implement the communication of the European Commission 'Internet Policy and Governance — Europe's role in shaping the future of Internet Governance' (COM(2014) 72 final), as well as to follow up on concrete calls expressed by the Member States in Council Conclusions on Internet Governance from 27 November 2014 and by European Parliament in the Resolution of 11 February 2015 on the renewal of the mandate of the Internet Governance Forum (2015/2526(RSP)),
- continue to ensure financial support for the Internet Governance Forum, as well as ensuring financial support for the pan-European dialogue on internet governance (EuroDIG) to secure their financial stability and therefore their operational viability; this also includes financial support for different initiatives related to raising the impact of both fora,
- promote the importance of ICTs in the development of the post-2015 sustainable development goals, including through capacity and confidence-building measures in the area of electronic communications addressed at third countries.

The specific objectives of these measures are:

- the formulation of a Union policy and strategy in the field of communication services and networks (including convergence between electronic communications and audiovisual environments, aspects related to the internet, etc.),
- the development of radio spectrum policy in the Union,
- the development of activities in the mobile and satellite communications sector, particularly as regards frequencies, and demand stimulation,

- an analysis of the situation and the legislation adopted in these areas, as well as State aid decisions,
- an analysis of the financial state of play and investment intensities in the sector,
- the coordination of these policies and initiatives as regards the international environment (e.g. WRC, CEPT, etc.),
- the development of activities and initiatives in relation to the digital single market,
- the development of activities and initiatives in relation to cohesion policy,
- the development and maintenance of the database in relation to the radio spectrum policy programme and other actions related to monitoring and the implementation of the programme,
- the promotion and further advancement of the Union's vision of the multi-stakeholder model of Internet governance.

These measures consist, inter alia, in preparing analyses and progress reports, consulting stakeholders and the public, preparing communications, legislative proposals and monitoring the application of legislation, and translations of notifications and consultations under Article 7 of Directive 2002/21/EC.

This appropriation is intended to cover, in particular, contracts for analysis and expert reports, specific studies, evaluation reports, coordination activities, grants and the part-financing of certain measures.

In addition, this appropriation is also intended to cover expenditure on meetings of experts, communication events, membership fees, information and publications directly linked to the achievement of the objectives of the policy or measures coming under this article, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

This appropriation is intended to cover the Agency's staff and administrative expenditure (Titles 1 and 2) and operational expenditure relating to the work programme only (Title 3).

The Agency was set up to enhance the capability of the Union, the Member States and, as a consequence, the business community to prevent, address and respond to network and information security problems. In order to achieve this goal, the Agency will be developing a high level of expertise and stimulating broad cooperation between actors from the public and private sectors.

The Agency's aim is to provide assistance and to deliver advice to the Commission and the Member States on issues related to network and information security falling within its competencies and to assist the Commission, where called upon, in the technical preparatory work for updating and developing Union legislation in the field of network and information security.

The Agency must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The amounts repaid in accordance with Article 16 of Commission Regulation (EC, Euratom) No 2343/2002 constitute assigned revenue (point (c) of Article 21(3) of the Financial Regulation) to be charged to Item 6 6 0 0 of the general statement of revenue.

Pursuant to Article 208 of the Financial Regulation and the corresponding Articles of the framework Financial Regulation for each of the bodies set up by the Communities, the role of the European Parliament and the Council has been strengthened.

The establishment plan of the Agency is set out in the Annex 'Staff' to this section.

The Union contribution for 2016 amounts to a total of EUR 10 120 000. An amount of EUR 50 000 coming from the recovery of surplus is added to the amount of EUR 10 070 000 entered in the budget.

*Remarks*

This appropriation is intended to cover the Office's staff and administrative expenditure (Titles 1 and 2), and operational expenditure relating to the work programme only (Title 3).

BEREC acts as a specialised and independent expert advisory body assisting the Commission and the national regulatory authorities in the implementation of the Union regulatory framework for electronic communications in order to promote a consistent regulatory approach across the Union. BEREC is neither a Union body nor does it have legal personality.

The Office is established as a Union body with legal personality, providing BEREC with professional and administrative support in carrying out the tasks conferred on it by Regulation (EC) No 1211/2009.

The Office must inform the European Parliament and the Council about transfers of appropriations between operational and administrative expenditure.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The proposed European Centre for Press and Media Freedom follows on from the Charter of Fundamental Rights of the European Union and the European Charter on Freedom of the Press by acting as a single European-level 'drop-in centre' for journalistic organisations or individuals and media actors alleging violations of those charters. It will be the sole centre in Europe that monitors and documents any such violations. It will sound the alarm in acute cases, for instance by organising support from foreign colleagues for journalists who need help. The centre will benefit from input from a wide range of sources, including academic centres, regional partners all over Europe and various journalistic organisations. The centre will cover the 28 Member States and the candidate countries.

This preparatory action will complement to existing actions supported by the Union budget. More specifically, the centre will be the practical hands-on counterpart of the academic Centre for Media Pluralism and Media Freedom based at the European University Institute in Florence. It will, furthermore, benefit from the momentum created by the High-Level Group on Media Freedom and Pluralism set up by the Commission and by the European Parliament resolution of 21 May 2013 on 'Standard settings for media freedom across the EU'.

*Remarks*

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action follows on from the pilot project financed in 2013 and 2014 by the European Parliament, the main purpose of which was to test and apply the media pluralism monitor (MPM) developed in 2009 at the request of the Commission by a consortium of European universities.

The MPM pilot project is currently being carried out by the Centre for Media Pluralism and Media Freedom (CMPF) at the Robert Schuman Centre for Advanced Studies/European University Institute, an academic centre established in 2011 by the Commission as part of the Union's ongoing efforts to improve the protection of media pluralism and media freedom in Europe, and to assess what action needs to be taken at European or national level to further those objectives. Under the pilot project, the CMPF is testing a streamlined version of the 2009 MPM on a representative sample of nine Member States: Belgium, Bulgaria, Denmark, Estonia, France, Greece, Hungary, Italy and the United Kingdom. Those countries were selected on the basis of objective criteria so as to ensure the highest degree of neutrality and to allow broad implementation in different circumstances.

## Remarks

Actions under this article shall contribute to the objectives of the Connecting Europe Facility laid out in Article 3 of Regulation (EU) No 283/2014.

**CHAPTER 09 03 — CONNECTING EUROPE FACILITY (CEF) — TELECOMMUNICATION NETWORKS** (*cont'd*)**09 03 01** (*cont'd*)

Actions under this article shall contribute to the broadband-related objectives of the Connecting Europe Facility through studies and programme support actions, in particular technical assistance, as defined in Article 2 of Regulation (EU) No 1316/2013.

Actions under this article shall typically be carried out through grants or procurement, either under direct management in the meaning of point (a) of Article 58(1) of the Financial Regulation or indirect management in the meaning of point (c) of Article 58(1) of the same Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Actions under this article shall contribute to the objectives of the Connecting Europe Facility laid out in Article 3 of Regulation (EU) No 283/2014.

They shall support projects of common interest in the field of broadband networks.

Actions under this article shall contribute to the above objectives through financial instruments in accordance with Article 7(4) of Regulation (EU) No 1316/2013.

The expenses shall cover financial assistance to broadband networks, as defined in Article 2 of Regulation (EU) No 283/2014.

## COMMISSION

## TITLE 09 — COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY

CHAPTER 09 03 — CONNECTING EUROPE FACILITY (CEF) — TELECOMMUNICATION NETWORKS (*cont'd*)09 03 02 (*cont'd*)

Any repayment from financial instruments, including capital repayments, guarantees released, and repayment of the principal of loans, paid back to the Commission and entered in Item 6 3 4 1 of the statement of revenues in accordance with Article 21(3) of the Financial Regulation may be used for the same financial instrument pursuant to Article 140(6) of the Financial Regulation.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

Actions under this article shall contribute to the objectives laid out in Article 3 of Regulation (EU) No 283/2014.

They shall support projects of common interest in the field of digital service infrastructures.

Actions under this article shall typically contribute to the above objectives through the instrument of grants and procurement:

- core service platforms will typically be financed through procurement, with the exception of Europeana,
- generic services will typically be financed through grants,
- digital platforms, such as Europeana, to help the creative industries and to facilitate economic activity based on digitised cultural resources.

*Remarks*

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the framework programme for research and innovation, which covers the 2014-2020 period, and for the completion of the previous research programmes (seventh framework programme and preceding framework programmes) and previous information and communication technologies programmes (ICT PSP (2007-2013) and programmes prior to 2007).

Horizon 2020 shall play a central role in the implementation of the Europe 2020 flagship initiative 'Innovation Union' and other flagship initiatives, notably 'Resource-efficient Europe', 'An industrial policy for the globalisation era', and 'A digital agenda for Europe', as well as in the development and functioning of the European Research Area. Horizon 2020 shall contribute to building an economy based on knowledge and innovation across the whole Union by leveraging sufficient additional research, development and innovation funding.

It will be carried out in order to pursue the general objectives set out in Article 179 of the Treaty on the Functioning of the European Union, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all levels throughout the Union, taking the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening human resources for research and for technology in Europe, quantitatively and qualitatively, and research and innovation capacities in the whole of the Union and ensuring optimum use thereof.

## COMMISSION

## TITLE 09 — COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY

CHAPTER 09 04 — HORIZON 2020 (*cont'd*)

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Union to investigate new areas of research suitable for Union action, inter alia, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for the participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

The possibility of third countries or institutes from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution entered in Items 6 0 1 3 and 6 0 1 5 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from states taking part in European cooperation in the field of scientific and technical research will be entered in Item 6 0 1 6 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contributions by outside bodies to Union activities entered in Item 6 0 3 3 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

Additional appropriations will be provided under Item 09 04 50 01.

Administrative appropriations of this chapter will be provided under Article 09 01 05.

## 09 04 01

***Excellent science****Remarks*

This priority of Horizon 2020 aims to reinforce and extend excellence in the Union's science base and ensure a steady stream of world-class research to secure the Union's long-term competitiveness. It will support the best ideas, develop talent within the Union, provide researchers with access to priority research infrastructure, and make the Union an attractive location for the world's best researchers. Research actions to be funded will be determined according to the need and opportunities of science, without predetermined thematic priorities. The research agenda will be set in close liaison with the scientific community and research will be funded on the basis of excellence.

*Remarks*

The specific objective is to foster radically new technologies by exploring novel and high-risk ideas building on scientific foundations. By providing flexible support to goal-oriented and interdisciplinary collaborative research on various scales and by adopting innovative research practices, the aim is to identify and seize opportunities of long-term benefit for citizens, the economy and society.

Activities under the 'Future and emerging technologies' specific objective shall address the entire spectrum of science-driven innovation: from bottom-up, small-scale early explorations of embryonic and fragile ideas to building new research and innovation communities around transformative emerging research areas and large and federated research initiatives built around a research agenda aiming to achieve ambitious and visionary goals.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

CHAPTER 09 04 — HORIZON 2020 (*cont'd*)09 04 01 (*cont'd*)09 04 01 02 (*cont'd*)*Remarks*

The specific objective is to endow Europe with world-class research infrastructure which is accessible to all researchers in Europe and beyond and fully exploit their potential for scientific advance and innovation.

Activities will focus on development, deployment and operation of e-infrastructure. In addition, activities for innovation, strengthening human resources for research infrastructure, policy development and international cooperation are foreseen.

An integrated and service-driven approach will be taken to deliver e-infrastructures that respond to the needs of European science, industry and society in terms of development and deployment of integrated e-infrastructure services for a wide range of research communities ('de-siloing'). Maximising coordination and synergies with e-infrastructure development at national level and expanding e-infrastructure beyond science as such, to the science-industry-society triangle.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

09 04 02 ***Industrial leadership****Remarks*

This priority of Horizon 2020 aims to make the Union a more attractive location to invest in research and innovation, by promoting activities where businesses set the agenda as well as at accelerating the development of new technologies which will underpin future businesses and economic growth. It will provide major investment in key industrial technologies, maximise the growth potential of Union companies by providing them with adequate levels of finance and help innovative SMEs to grow into world-leading companies.

Remarks

The specific objective is to maintain and build global leadership in enabling technologies, which underpin competitiveness across a range of existing and emerging industries and sectors. In line with the digital single market, the specific objective of ICT research and innovation is to enable Europe to develop and exploit the opportunities brought by ICT progress for the benefits of its citizens, businesses and scientific communities.

ICT underpins innovation and competitiveness across a broad range of private and public markets and sectors, and enables scientific progress in all disciplines. Over the next decade, the transformative impact of digital technologies, ICT components, infrastructures and services will be increasingly visible in all areas of life.

Activities will strengthen the Union's scientific and technology base and insure its global leadership in ICTs, help drive and stimulate innovation through ICT use and ensure that ICT progress is rapidly transformed into benefits for Europe's citizens, businesses, industry and governments. The activities under the 'Leadership in information and communications technology' specific objective will be primarily based on research and innovation agendas defined by industry and business, together with the research community and will have a strong focus on leveraging private sector investment.

Activities cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

CHAPTER 09 04 — HORIZON 2020 (*cont'd*)09 04 03 *Societal challenges**Remarks*

This priority of Horizon 2020 responds directly to the policy priorities and societal challenges identified in the Europe 2020 strategy. Those activities will be implemented using a challenge-based approach which brings together resources and knowledge across different fields, technologies and disciplines. The activities will cover the full cycle from research to market, with a new focus on innovation-related activities such as piloting, demonstration, test beds, support for public procurement, design, end-user driven innovation, social innovation and market take-up of innovations. The activities will support directly the corresponding sectoral policy competences at Union level.

## 09 04 03 01 Improving lifelong health and well-being

*Remarks*

The vision of the eHealth action plan 2012-2020 is to utilise and develop e-health to address several of the most pressing health and health systems challenges of the first half of the twenty-first century, namely:

- to improve chronic disease and multi-morbidity (multiple concurrent disease) management and to strengthen effective prevention and health promotion practices,
- to increase the sustainability and efficiency of health systems by unlocking innovation, enhancing patient-/citizen-centric care and citizen empowerment and encouraging organisational changes,
- to foster cross-border healthcare, health security, solidarity, universality and equity,
- to improve legal and market conditions for developing e-health products and services.

ICT-based products and services have demonstrated their capacity to help address these major challenges in the form of personalised health, telehealth and telecare solutions, service robotics for health and care, support for prolonged active and independent living and home-based care. It is also a major new growth opportunity as large new markets for ICT-based products and services emerge to address health, demographic change and well-being.

Activities will cover development and exploitation of ICT for health, well-being and 'ageing well' solutions. This will build on the emergence of underpinning technologies arising out of ICT in LEIT such as micro-nano systems, embedded systems, robotics, internet of the future and cloud technologies. It will also build on further development of security- and privacy-enhancing technologies.

The ambient assisted living research and development joint programme will also be supported to contribute to market availability and exploitation of ICT-based products and services and the ICT innovation and pilot projects will be further supported in response to the European Innovation Partnership on Active and Health Ageing and the eHealth 2020 action plan.

*Remarks*

The specific objective is to foster inclusive, innovative and reflective European societies in a context of unprecedented transformations and growing global interdependencies.

Activities will cover four main areas: ICT-enabled public sector innovation, understanding and preserving Europe's intellectual basis, learning and inclusion.

ICT-enabled public sector innovation refers to the use of ICT for the creation and implementation of new processes, products, services and methods of delivery which result in significant improvements in the efficiency, effectiveness and quality of public services. The future public administrations should be digital and cross-border by default. Activities will cover fostering efficient, open and citizen-centric public services, involving the public sector as an agent for innovation and change as well as cross-border innovation measures or seamless delivery of public services.

The aim of the second challenge is 'to contribute to an understanding of Europe's intellectual basis: its history and the many European and non-European influences; as an inspiration for our lives today'.

The aim of the third challenge is to support the widespread adoption of ICT in schools and for training in Europe.

The fourth challenge is to get the elderly (aged 65 and above), the unemployed and low-educated, migrants, people in need of care, people living in remote or poorer areas, persons with disabilities, and the homeless to fully participate in society. Activities will focus on empowering them with the necessary digital skills and providing them with access to digital technologies. Activities aiming at fostering a better consideration for inclusiveness and responsibility aspects in ICT-related innovations will also be supported.

Activities will cover collaboration, networking actions and national programme coordination initiatives. Also entered in this item are the costs of independent experts assisting in proposal evaluations and project reviews, the costs of events, meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, analyses and evaluations, the costs of monitoring and evaluation of the specific programme and of the framework programmes and the costs of measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

*Remarks*

The specific objective is to secure societies, protecting freedom and security of the Union and its citizens.

The integrated portfolio of activities will develop solutions to protect our society and economy against accidental or man-made disruptions of the information and communication technologies our society and economy depends on; providing solutions for end-to-end secure ICT systems, services and applications; safeguarding the human right of privacy in the digital society; providing the incentives for the industry to supply secure ICT; stimulating the uptake of secure ICT. The aim is to ensure cyber security, trust and privacy in the Digital Single Market, whilst at the same time improving the competitiveness of the Union's security, ICT and service industries. Another objective is to increase users' trust in their participation in the digital society, and overcome citizens' concern with the disclosure of their personal information online because of security issues (e.g. internet usage for banking or purchases).

*Remarks*

For decades, thousands of entrepreneurs have been drawn to Silicon Valley, a region with a unique innovation ecosystem. Many European entrepreneurs have also established their own successful companies there, generating knowledge and investing worldwide. Silicon Valley is also the birthplace of many digital start-ups and digital innovations. In the context of the Commission's new digital strategy, especially the digital single market, a platform is needed to engage with Silicon Valley on the digital agenda, as well as to stay in touch with the Union expatriate community in Silicon Valley and build bridges between digital ecosystems in Europe and Silicon Valley. That will create synergies and raise awareness about Europe's digital agenda and its support for start-ups (e.g. the Startup Europe initiative). It will also be a channel for sharing knowledge and experience acquired in the Valley. It will also allow Europe to bring its digital agenda closer to the Union expatriate community in Silicon Valley, in the line with new reforms such as the digital single market and the capital markets union. Other countries are already engaged in such activities. India regularly organises the TiECon Conference in Silicon Valley, for example, in order to build a stronger bridge between Indian experts based in Silicon Valley and their homeland. Thousands of Indian entrepreneurs and CEOs of important Indian players regularly visit TiECon. In the context of the Welcome project, the Commission supported an event on start-ups in Silicon Valley in 2015 entitled 'Startup Europe comes to Silicon Valley' (SEC2SV). The pilot project will provide for a 'Digital Europe' conference in Silicon Valley with side events and meetings connecting with Union expatriates, with a particular focus on the digital economy, digital innovation and digitisation. This will also benefit from experience gained from the 2015 initiative.

Remarks

Higher education and research are rapidly evolving. Creating new knowledge technologies means training teachers, students and researchers, as well as any individual who needs to adapt to new market demands. Many endeavours, such as citizen science, scientific discovery games and MOOCs (massive open online courses), show that — like many other sectors — education and research are rapidly evolving. In order to fully exploit the potential of this new type of learning system for the labour market, methods are needed to validate the quality of learning. Consequently, a mechanism has to be found that allows individuals to assess their competencies (creating their individual knowledge maps), the knowledge required on the labour market and the learning path that can link the two, hence providing the right content for each individual. Only by doing so can it be ensured that the right content is available to the right target group of individuals. To track the learning path, it must be possible to validate the knowledge acquired (through online certificates or badges).

Social and technological innovations of this kind can benefit all citizens regardless of their level of resources, the languages they speak, their age, their health or their cultural capital. Such an action will thus help to bridge the knowledge gap and reduce unemployment by helping unemployed young people in particular to maximise their learning and find new career opportunities.

The overall objective of this preparatory action is to demonstrate a Europe-wide ICT-based system shortening the up- and re-skilling time for European citizens, in particular the unemployed, by maximising the use of online courses and open education resources. The action will develop and deploy a technological platform integrating online services including the following modules:

- skill/competence mapping,
- tailored learning roadmaps (via educational services, including specific open educational resources),
- mechanisms for the validation of knowledge acquired.

*Remarks*

This pilot project will prepare the European economy, the job market and educational frameworks for new digital skills by encouraging the recognition of new digital professions and by creating a common methodology that will enable Member States to be in the forefront of the new digital revolution. This will involve setting up several working groups of experts from Member States to exchange ideas and propose solutions on how the education system could prepare people for new digital skills, on defining and recognising new digital professions and on the new requirements, demands and social status associated with new digital jobs. The goal is to produce materials and proposals that will enable the Union and the Member States to prepare for this new shift in the European economy. Specific activities carried out under this pilot project will result in a consultation process among Member States and education, social services and job market stakeholders.

Remarks

REsearch seeks to accelerate full use of Europe's intellectual capital to the benefit of citizens, entrepreneurs and scientists through new media tools. Growing from a successful pilot project, this preparatory action will expand the work of the platform.

The preparatory action involves expansion of an e-infrastructure platform developed around the concept of social networks which facilitates direct communication between researchers, policy makers and citizens, with the involvement of media, across the European Research Area (ERA).

Inspired by the 'societal challenges' outlined in Horizon 2020, REsearch supports the creation of virtual clusters around key topics, creating a direct path for open dialogue between science and society.

The action promotes active interaction between science, citizens and policy makers through the involvement of European media and social networks, in order to support participation of citizens in research agenda-setting, ongoing research processes and discussions on the results and impacts of research for society, policy and further research. It supports the use of evidence-based policymaking in all Union actions, in line with the drive for better regulation. REsearch supports science-based policymaking by affording access to scientific information across the spectrum and providing a critical mass of knowledge to inspire confidence in any users of the platform. It is a neutral platform with no bias as to national origin or disciplinary background. Discussions are linked to the scientific evidence they are based on.

Building on the successful 14-month pilot project, REsearch will expand and grow to cover the full range of societal challenges, enabling users to engage with the issues of their choice and self-determine the clusters and direction of discussions. Alongside the platform itself, REsearch will integrate a range of tools such as big data/social media data-mining, applications of new artificial intelligence and semantic web applications to extract information about the trends and flows of the scientific consensus and discussions.

The objectives of the preparatory action are:

- to expand and fortify the reliable, non-profit e-infrastructure (similar to social networks) launched as a beta in 2015 to promote stronger communication and dialogue across disciplines, sectors and borders,
- to analyse and assess the results of the beta launch and develop the search algorithms and data-mining mechanisms underpinning the trend-mapping capabilities,

**CHAPTER 09 04 — HORIZON 2020** (*cont'd*)**09 04 77** (*cont'd*)**09 04 77 08** (*cont'd*)

- to further promote interoperability with existing research databases and platforms, with a single access point to research results from all countries and disciplines (interoperability) and with linkage to existing European initiatives,
- to expand the number of virtual clusters to include all the 'societal challenges' that bring together researchers, industry, citizens and policy makers to enhance collaboration on these key themes,
- to create a direct dialogue between these clusters (see previous indent) and citizens by linking in with leading European media.

The preparatory action seeks to respond to some of the needs and concerns outlined in the digital agenda and Horizon 2020. It also supports the underlying infrastructures of the European Research Area, which serves as a vital engine in unlocking Europe's potential for innovations that could lead to jobs and economic growth.

Current issues addressed by the action: recent ICT developments have shown how the power of social networks and e-infrastructures can help harness the potential of networks.

The problems of the existing online environment for research e-infrastructures are:

- size: the majority of existing networks are too small to go beyond a specific field and research group (according to Commission statistics the average size of an online network of researchers is around 100 users). There is a need for a large interoperable network that allows researchers and other stakeholders to find the information they are looking for across sectors and disciplines, using a familiar tool,
- reach: traditionally, networks bring together users within the same field and sector. In order to unlock Europe's innovation capacity, transdisciplinary (intersectoral and interdisciplinary) connections need to be made easier,
- reliability: one of the major reasons why big research networks have not been successful is that existing relations are still based on personal connections and online identities are not trusted. In order to really foster transdisciplinary connections, a system is needed in which identity verification creates a secure environment for all users,
- trust: this is a pivotal aspect for any network. Market studies suggest that a European social network/e-infrastructure would need to be developed in collaboration with stakeholders, be non-profit and have a clear intellectual property policy developed together with researchers.

*Remarks*

The preparatory action will seek to ensure a coherent, coordinated and sustainable approach, to secure, develop and enhance engagement of all relevant stakeholders from Eastern Europe (business, academia, research organisations and civil society) and to inform, prepare and help regional entities from this part of Europe as regards developing projects under the Commission's smart factories scheme. The action will cover those regions in Eastern Europe hard hit by deindustrialisation where no smart factories have been planned or brought into operation and those whose industrial capacity needs to be improved.

The preparatory action will also seek to identify, assess and support exploitation of the industrial potential in a selected region, and to explore its innovation potential and the scope for its expansion. It will clearly target identification of industrial competitive advantages and the potential for specialisation at regional level based on an entrepreneurship discovery process, establishing a governance structure and framework for continuous collaboration between businesses and researchers, and support for preparation of the relevant policy documents.

TITLE 09 — COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY

CHAPTER 09 05 — CREATIVE EUROPE (*cont'd*)09 05 01 (*cont'd*)*Remarks**Former Article 15 04 03*

This appropriation is intended to cover the following measures relating to MEDIA subprogramme of the 'Creative Europe' programme:

- facilitating the acquisition and improvement of skills and competences of audiovisual professionals and the development of networks, including the use of digital technologies to ensure adaptation to market development, testing new approaches to audience development and testing new business models,
- increasing the capacity of audiovisual operators to develop European audiovisual works with a potential to circulate in the Union and beyond and to facilitate European and international co-production, including with television broadcasters,
- encouraging business-to-business exchanges by facilitating access to markets and business tools enabling audiovisual operators to increase the visibility of their projects on Union and international markets,
- supporting theatrical distribution through transnational marketing, branding, distribution and exhibition of audiovisual works,
- promoting transnational marketing, branding and distribution of audiovisual works on all other non-theatrical platforms,
- supporting audience development as a means of stimulating interest in, and improving access to, European audiovisual works, in particular through promotion, events, film literacy and festivals,
- promoting new distribution modes in order to allow the emergence of new business models.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this article. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation.

Any revenue from the contributions from the countries of the European neighbourhood area in accordance with the procedures defined with those countries following the framework Agreements providing for their participation in Union programmes as entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, in accordance with points (e) to (g) of Article 21(2) of the Financial Regulation.

*Remarks**Former Item 16 03 01 01 (in part)*

This appropriation is intended to fund general information to citizens on operations concerning the Union, for the purpose of increasing the visibility of the work of the Union institutions, the decisions taken and the stages in the building of Europe, so as to allow citizens to make full use of their right to be informed about and involved in European policies. It concerns essentially the funding or co-funding of the production and/or dissemination of multimedia (radio, TV, internet, etc.), information products, including existing pan-European networks made up of local and national media delivering daily news on European affairs, such as Euranet Plus, as well as the tools necessary to develop such a policy. Most of this appropriation covers evaluation expenditure. Part of this appropriation will be used to ensure continuity for those actions and a stable financing framework for the future of existing pan-European networks of local and national media moving into the digital age (radio, television, internet, etc.).

This appropriation also covers support expenditure such as studies, meetings, *ex post* controls, expert technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts, evaluation and audit on current or future activities, feasibility studies, publications, and the repayment of travel and related expenses of experts.

The amount of assigned revenue pursuant to Article 21(3) of the Financial Regulation is estimated at EUR 50 000.

The Commission, when implementing this item, should take duly into account the outcome of the meetings of the Interinstitutional Group of Information (IGI).

*Remarks*

This preparatory action is a continuation of the preparatory action entitled 'Crowdsourcing subtitling to increase circulation of European works' under a different title.

In spite of existing MEDIA support for subtitling, many European works (TV drama, documentaries, films, etc.) are often not made available, especially in relatively small countries in the European Union which do not share an official language with another country. One of the reasons for that is their relatively low commercial potential and the costs involved, in particular subtitling costs. In this context, the current action will support any innovative solution, e.g. crowdsourcing, which has the effect of decreasing the cost of subtitling. It will allow wider exposure, and potentially a wider audience, for European films, especially online.

The aims of this preparatory action are:

- testing and developing innovative subtitling solutions/processes/models that are more cost-effective than those currently available on the market,
- applying this approach to a well-designed catalogue of European works with a clear editorial line,
- supporting the online availability of the works.

**CHAPTER 09 05 — CREATIVE EUROPE** (*cont'd*)**09 05 77** (*cont'd*)09 05 77 03 (*cont'd*)

The outcomes sought for this preparatory action are:

- lowering the cost of making European films available by stimulating the development of cost-effective subtitling solutions,
- increasing the supply and raising the profile of European audiovisual works online and enriching the catalogues of video-on-demand services in the Union,
- improving the circulation of European audiovisual works within the Union and strengthening the competitiveness of the European audiovisual industry.

*Remarks*

The main goal of the pilot project is to transform people into critical media citizens and committed media fairness advocates who can deconstruct media communication and information media policy. It will furthermore focus on improving citizens' abilities to create media works that reflect their lived experience. Conferences, workshops and training programmes will be organised and particular attention will be paid to activities to enhance the ability to distinguish information from propaganda; improve creativity for media works production; design programmes for the integration of minorities; promote the sharing of best practices among stakeholders and countries; and deliver tools to experience direct democracy. The pilot project as a whole will be focused on all kinds of media tools (radio, internet, broadcasting, newspapers), used in all kinds of environments and targeted at all age groups. Priority will be given to low-skilled people and people at risk of social marginalisation. The pilot project will be the subject of a Commission call for proposals.

The existing pilot project under Item 15 04 77 07, 'Fostering European integration through culture by providing new subtitled versions of selected European TV programmes across all Europe', has been converted into a preparatory action under Item 09 05 77 05, 'Subtitling European cultural television content throughout Europe'.

This preparatory action follows on from that pilot project, financed in 2014 and 2015 by Parliament, the aim of which was to ascertain whether there is a European audience for cultural programmes by providing a range of subtitled versions of selected TV programmes across Europe.

The pilot project financed in 2014 is currently being carried out by ARTE, the European arts TV channel, which will provide 600 hours of programming in four languages (French, German, English and Spanish) from October 2015 onwards.

**TITLE 10****DIRECT RESEARCH***Remarks*

These remarks apply to all the budget lines in the 'Direct research' policy area (with the exception of Chapter 10 05).

These appropriations are intended to cover expenditure relating to:

- staff occupying posts on the authorised establishment plan of the Joint Research Centre (JRC) and external personnel implementing the research and innovation programmes,
- staff-related costs such as missions, training, medical services and recruitment,
- operation and functioning of the JRC institutes, administrative support, safety and security of the sites, IT related expenditure, non-recurrent costs and major research infrastructures,
- research and support activities including exploratory research, scientific and technical equipment, subcontracting of services, etc.,
- research and scientific support tasks relating to activities entrusted to the JRC within the framework of its participation on a competitive basis in support of the Union's policies and on behalf of outside bodies.

In accordance with Article 21 of the Financial Regulation, any revenue entered in Items 6 2 2 4 and 6 2 2 5 of the statement of revenue may give rise to the provision of additional appropriations.

Miscellaneous revenue may give rise to the provision of additional appropriations to be used in Chapters 10 02, 10 03 or 10 04 or Article 10 01 05, depending on their purpose.

Any revenue from the contributions from candidate countries and, if applicable, the Western Balkan potential candidates for participating in Union programmes entered in Item 6 0 3 1 of the statement of revenue may give rise to the provision of additional appropriations in accordance with Article 21(2)(e) to (g) of the Financial Regulation.

The possibility of third countries or organisations from third countries taking part in European cooperation in the field of scientific and technical research is envisaged for some of these projects. Any financial contribution will be entered in Item 6 0 1 3 of the statement of revenue and may give rise to the provision of additional appropriations in accordance with Article 21 of the Financial Regulation.

The additional appropriations will be provided under Items 10 02 50 01 and 10 03 50 01.

*Remarks*

This appropriation is intended to cover expenditure relating to officials and temporary staff occupying posts on the authorised establishment plan of the Joint Research Centre implementing research and innovation programmes — Horizon 2020, and in particular:

- direct action, consisting of research activities, scientific and technical support activities, and exploratory research activities undertaken in the establishments of the Joint Research Centre,
- indirect action, consisting of programmes implemented as part of the Joint Research Centre's activities conducted on a competitive basis.

Staff costs comprise the basic salary, allowances, miscellaneous indemnities and contributions based on the statutory provisions, including expenses related to the entry into service, change in the place of employment and termination of service.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

  - expenses related to the operation and functioning of JRC institutes: regular maintenance of buildings, technical infrastructure and scientific equipment; utilities and fluids; heating, cooling and ventilation; workshop materials and equipment; cleaning of sites, roads and buildings; waste management, etc.,
  - expenses related to the administrative support of JRC institutes: furniture; stationery; telecommunications; documentation and publications; transport; miscellaneous supplies; general insurance, etc.,
  - expenses related to the safety and security of the sites: health and safety at work; radioprotection; fire-brigade, etc.,
  - IT related expenditure: computer rooms; hardware and software; networking services; information systems; help-desk and assistance to users, etc.,
  - non-recurrent costs: this appropriation covers renovation, rehabilitation and construction works on the JRC sites. It addresses expenses such as exceptional maintenance costs, renovation works, adaptation to new standards, etc. It may also finance research infrastructures not covered by Item 10 01 05 04.

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this item. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

## TITLE 10 — DIRECT RESEARCH

**CHAPTER 10 02 — HORIZON 2020 — DIRECT ACTIONS OF THE JOINT RESEARCH CENTRE (JRC) IN SUPPORT OF UNION POLICIES**  
(cont'd)*Remarks*

These remarks are applicable to all the budget lines in this chapter.

This appropriation will be used for Horizon 2020 — the Framework Programme for Research and Innovation which covers the 2014-2020 period.

Horizon 2020 shall play a central role in the delivery of the Europe 2020 strategy for smart, sustainable and inclusive growth ('Europe 2020 strategy') by providing a common strategic framework for the Union's funding of excellent research and innovation, thus acting as a vehicle for leveraging private and public investment, creating new job opportunities and ensuring Europe's long-term sustainability, growth, economic development, social inclusion and industrial competitiveness, as well as addressing societal challenges across the Union.

This appropriation is intended to be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

The contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto, must be added to the appropriations entered in this chapter. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 21(2)(e) to (g) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under the 'European Economic Area' Annex to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

*Remarks*

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre in accordance with Part VI of the Specific Programme Implementing Horizon 2020 'Non-nuclear direct actions of the Joint Research Centre (JRC)', in order to provide customer-driven scientific and technical support to Union policies. The JRC shall focus on:

- excellent science: the JRC will carry out research to enhance the scientific evidence base for policy making and to examine emerging fields of science and technology, including through an exploratory research programme,
- industrial leadership: the JRC will contribute to competitiveness in the Union through support to the standardisation process and standards with pre-normative research, development of reference materials and measurements, and harmonisation of methodologies in five focal areas (energy; transport; the flagship initiative 'Digital Agenda for Europe'; security and safety; consumer protection). It will carry out safety assessments of new technologies in areas such as energy and transport and health and consumer protection. It will contribute to facilitating the use, standardisation and validation of space technologies and data, in particular to tackle societal challenges,

**CHAPTER 10 02 — HORIZON 2020 — DIRECT ACTIONS OF THE JOINT RESEARCH CENTRE (JRC) IN SUPPORT OF UNION POLICIES**  
(cont'd)

**10 02 01** (cont'd)

— societal challenges: the JRC will carry out research on the following themes: health, demographic change and well-being; food security, sustainable agriculture and forestry, marine, maritime and inland water research and the bio-economy; secure, clean and efficient energy; smart, green and integrated transport; climate action, environment, resource efficiency and raw materials; Europe in a changing world — inclusive, innovative and reflective societies; secure societies — protecting freedom and security of Europe and its citizens.

This appropriation covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information, acquisition of consumables, etc. This includes expenditure on scientific infrastructure directly incurred for the projects concerned.

It also covers expenditure of any type concerning research and scientific support tasks relating to activities under this article entrusted to the Joint Research Centre within the framework of its participation on a competitive basis in support of the Union policies and on behalf of outside bodies.

In accordance with Article 21 and Article 183(2) of the Financial Regulation, any revenue entered in Items 6 2 2 3 and 6 2 2 6 of the statement of revenue may give rise to the provision of additional appropriations.

*Remarks*

A growing number of Member States have recognised the value of taking the design and innovation process approach to developing new policies and public services. Several initiatives have already started to demonstrate how integrating user-centred design and prototyping activities into the policy-making process can save money, have a greater impact and provide policies that are more citizen-centred. The establishment of such a policy lab is under discussion within the Joint Research Centre and the pilot project will accelerate the establishment of the lab.

The Commission's 2013 Action Plan for Design-Driven Innovation and the Commission's Expert Group on Public Sector Innovation have highlighted the positive impact mainstreaming innovation in the public sector can have on growth.

This is why the establishment of a European Commission Public Sector Innovation Lab, as recommended by the expert group, would be beneficial.

One main objective of the pilot project is cooperation with national, regional and local actors to enhance their ability to implement EU policies by working with similar structures on the ground or supporting the establishment of new ones. The lab will feed into efforts to improve the spending of EU funds and the implementation of EU legislation.

Acting as the Commission's own in-house innovation team, the lab will also support the European institutions in re-designing old regulations or taking a more iterative and cost-effective approach to policy design from the idea generation phase through to implementation. This will include using techniques such as randomised control trials, behavioural economics, user-led trials, systems thinking, for example when designing new EU funding programmes for SMEs, and finding new ways of cutting red tape.

## Remarks

The Research and Training Programme on European Atomic Energy Community (2014-2018) (Euratom Programme) is an integral part of Horizon 2020, the Framework Programme for Research and Innovation. The Euratom Programme will strengthen the research and innovation framework in the nuclear field and coordinate Member States' research efforts, thereby avoiding duplication, retaining critical mass in key areas, and ensuring public funding is used in an optimal way.

This appropriation will be used in accordance with Regulation (EU) No 1290/2013 of the European Parliament and of the Council of 11 December 2013 laying down the rules for participation and dissemination in 'Horizon 2020 — the Framework Programme for Research and Innovation (2014-2020)' and repealing Regulation (EC) No 1906/2006 (OJ L 347, 20.12.2013, p. 81).

**CHAPTER 10 03 — EURATOM PROGRAMME — DIRECT ACTIONS** (*cont'd*)

The general objective of the Euratom Programme is to pursue nuclear research and training activities with an emphasis on continuous improvement of nuclear safety, security and radiation protection, in particular to potentially contribute to the long-term decarbonisation of the energy system in a safe, efficient and secure way. It will cover both RTD indirect actions on the fusion research and development, nuclear fission, safety and radiation protection research activities, as well as the JRC direct actions in nuclear security and safety. The JRC will provide independent customer-driven scientific and technological support for the implementation and monitoring of Community policies, in particular in the field of nuclear safety and security research and training. By achieving these objectives, the Euratom Programme will reinforce outcomes under the three priorities of the Horizon 2020 Framework Programme: excellent science, industrial leadership and societal challenges. These objectives are clearly linked to those of the Europe 2020 and Energy 2020 strategies and the creation and operation of the European Research Area.

*Remarks*

This appropriation is intended to cover the scientific and technical support and research activities carried out by the Joint Research Centre to implement the Research and Training Programme of the European Atomic Energy Community (2014-2018). Direct actions under the Euratom Programme shall have the following specific objectives:

- to improve nuclear safety including: nuclear reactor and fuel safety, waste management, including final geological disposal as well as partitioning and transmutation; decommissioning, and emergency preparedness,
- to improve nuclear security including: nuclear safeguards, non-proliferation, combating illicit trafficking, and nuclear forensics,
- to increase excellence in the nuclear science base for standardisation,
- to foster knowledge management, education and training,
- to support the policy of the Union on nuclear safety and security.

This appropriation also addresses the activities necessary for implementing safeguards pursuant to Chapter 7 of Title II of the Euratom Treaty and the obligations arising from the Non-Proliferation Treaty and implementation of the Commission's programme to support the International Atomic Energy Agency (IAEA).

It covers specific expenditure relating to research and support activities, including the purchase of scientific and technical equipment, subcontracting of scientific and technical services, access to information, acquisition of consumables, etc. This includes expenditure on scientific infrastructure directly incurred for the projects concerned.

This appropriation also covers expenditure of any type concerning research and scientific support tasks relating to activities under this article entrusted to the Joint Research Centre within the framework of its participation on a competitive basis in support of Union policies and on behalf of outside bodies.

In accordance with Article 21 and Article 183(2) of the Financial Regulation, any revenue entered in Items 6 2 2 3 and 6 2 2 6 of the statement of revenue may give rise to the provision of additional appropriations.

This article is intended to receive the appropriations required for expenditure specific to the various tasks performed on behalf of outside bodies. It includes research and supply of services under contract to third parties, such as industry, national or regional authorities, as well as contracts in the context of Member States' research programmes. This may cover the following:

- the provision of supplies, services and work carried out in general against payment, including certified reference materials,
- the operation of facilities for the benefit of Member States, including the irradiation for outside bodies in the high-flux reactor (HFR) at the Petten establishment of the Joint Research Centre,
- the performance of research activities and the provision of services additional to the specific research programmes, including the industrial clubs for which the partners from industry must pay an enrolment fee and annual subscriptions,

*Remarks*

Article 80 of the Financial Regulation provides for financial corrections in the event of expenditure incurred in breach of applicable law.

Article 39 of Regulation (EC) No 1260/1999 provides for financial corrections, any revenue from which is entered in Article 6 5 2 of the statement of revenue.

Articles 97, 98 and 99 of Regulation (EC) No 1198/2006 provide for financial corrections, any revenue from which is entered in Article 6 5 3 of the statement of revenue.

Articles 85, 144 and 145 of Regulation (EU) No 1303/2013 provide for financial corrections, any revenue from which is entered in Article 6 5 4 of the statement of revenue.

That revenue may give rise to the provision of additional appropriations, in accordance with Article 21 of the Financial Regulation, in specific instances where they are necessary to cover risks of cancellation or of reductions in corrections previously decided upon.

Article 177 of the Financial Regulation lays down the conditions for the repayment in full, or in part, of pre-financing payments in respect of a given operation.

Pre-financing amounts repaid shall constitute internal assigned revenue in accordance with Article 21(4) of the Financial Regulation and shall be entered in Item 6 1 5 0 or 6 1 5 7.

Measures to combat fraud are funded under Article 24 02 01.

*Remarks*

This appropriation is intended to cover the financing of the commitments remaining to be settled from earlier programming periods relating to EFF technical assistance measures as provided for in Article 46 of Regulation (EC) No 1198/2006. The technical assistance measures include studies, evaluations, measures aimed at the partners, measures to disseminate information, installation, operation and interconnection of computerised systems for the management, monitoring, audit, inspection and evaluation, improvements in evaluation methods and the exchange of information on practices in this field and the establishment of trans-national and Union networks of actors in the sustainable development of coastal fishing zones.

Technical assistance covers preparatory, monitoring, audit, evaluation, supervision and management measures required to implement the EFF.

This appropriation may, in particular, be used to cover:

- support expenditure (representation expenses, training, meetings, missions),
- information and publishing expenditure,
- expenditure on information technology and telecommunications,
- contracts for the provision of services,
- support for networking and exchange of best practices.
