ANNEX

INDICATIONS FOR THE IMPLEMENTATION OF THE PROGRAMME**1. Action strands**

Unchanged

With a view to achieving the objectives set out in Article 3 and implementing the Community actions set out in Article 4 the following measures may be implemented within a transnational framework:

Strand 1: Analysis of characteristics, processes, causes and trends in social exclusion

The importance of this strand is linked to the conclusion of the Lisbon European Council to develop national action plans and a new open method of coordination to combat social exclusion and the need in this context to identify appropriate quantitative and qualitative indicators and benchmarks which will make it possible to promote periodic monitoring, evaluation and peer review. This requires special cooperation efforts to improve statistics, methodologies and understanding of social exclusion as well as of policies which can help to prevent and combat exclusion. Particular effort is proposed with regard to statistical work in cooperation with national statistical offices.

It is important to reflect experience on the ground of people experiencing poverty and social exclusion, and to make use of all relevant information sources on poverty and social exclusion, including from non-governmental organisations.

When analysing social exclusion and poverty, particular attention will go to its multiple dimensions, and to the variety of situations of social groups, including child poverty, as well as of territories which are exposed to risks of social exclusion.

In order to promote this, the following measures may be supported:

Unchanged

1.1. Studies and meetings on the development of common methodologies to measure poverty and social exclusion, their extent, characteristics, processes, causes and trends

1.1. Studies and meetings on the development of common methodologies to measure and understand poverty and social exclusion, their extent, characteristics, processes, causes and trends, and on the establishment of indicators;

INITIAL PROPOSAL

AMENDED PROPOSAL

1.2. The collection and dissemination of comparable statistics in Member States and at Community level. This measure should support cooperation between national statistical offices and the Commission and improve the statistical reference sources at Community level and their contribution to the analysis of poverty and social exclusion;

Unchanged

1.3. The development of thematic studies to contribute to the understanding of social exclusion, to address common issues in connection with policy developments in Member States, including emerging issues in relation to the knowledge-based society.

Strand 2: Policy cooperation and exchange of information and best practices

In order to promote policy cooperation and mutual learning in the context of the national action plan, the following transnational activities may be supported:

2.1. Transnational exchange actions aimed at transferring information and good practices and developing peer review in the context of the national action plans, by means of policy meetings/workshops/seminars on benchmarks or on policies and practices, or other forms of exchange such as joint development of strategies and common dissemination of information etc., organised at the initiative of European organisations of Member States and/or of other key actors with the active involvement of Member States.

2.1. Transnational exchange actions aimed at transferring information and good practices and developing peer review in the context of the national action plans, by means of policy meetings/workshops/seminars on benchmarks or on policies and practices, or other forms of exchange such as joint development of strategies, common dissemination of information, field visits and exchange of staff, etc., organised at the initiative of European organisations, of Member States and/or of other key actors with the active involvement of Member States. Transnational exchange between national observatories or similar recognised bodies may be supported under this strand.

2.2. Expert work and specific studies in connection with the development of indicators and benchmarks, including in relation to the knowledge-based society.

Unchanged

2.3. Annual EU Report on social exclusion, which would present the state of play on the different national action plans as well as actions conducted at European level in the main policies and fields where the fight against poverty and social exclusion is at stake.

Keeping in mind that social exclusion is a multidimensional phenomenon, particular attention shall be paid to relevant policy developments on social protection, employment, education and training, health and housing policies.

Strand 3: Participation of the various stakeholders and support to networking at EU level

In order to actively involve public authorities as well as the social partners and the civil society, the following measures may be supported:

3.1. Core funding for relevant key European networks involved in the fight against poverty and social exclusion.

3.1. Core funding for relevant European networks involved in the fight against poverty and social exclusion.

INITIAL PROPOSAL

3.2. An annual EU Round Table Conference on social exclusion. The conference would be organised in close collaboration with the EU Presidency.

2. General considerations

The programme shall take into account the results of preparatory actions and activities under other Community policies, instruments and actions.

In designing, implementing and following up the activities under the programme account will be taken of the experience of people exposed to poverty and social exclusion, as well as social partners, non-governmental organisations and other actors of the society involved in the fight against poverty and social exclusion. In all its activities, the programme will respect the principle of gender mainstreaming. The programme activities can be adapted or supplemented in accordance with the procedure established under Article 7, on the basis of an annual review.

The implementation of the programme may require technical and administrative assistance to the mutual benefit of the Commission and of the beneficiaries and/or support expenditure.

3. Method of presenting applications for support

Strand 1: This strand will be mainly implemented through calls for tenders. For cooperation with national statistical offices the Eurostat procedures will apply.

Strand 2: Action 2.1 will be mainly implemented in response to annual calls for proposals (some policy meetings/seminars might be organised directly by the Commission). Proposals will have to involve actors from at least 4 Member States and may be submitted to the Commission by European organisations and by Member States (or by organisations with the involvement of Member States). Actions 2.2 and 2.3 will require specific call for tenders.

Strand 3: Under action 3.1 support may be provided to European networks satisfying criteria established by the Commission in consultation with the Committee in accordance with Article 7. Action 3.2 may be supported in response to requests for subsidies from Member States.

4. Carrying out the actions

The actions to be taken may be funded by service contracts following calls for tender or by subsidies for joint financing with other sources. In the latter case, the level of financial assistance by the Commission may not exceed, as a general rule, 80 % of the expenditure actually incurred by the recipient.

AMENDED PROPOSAL

3.2. An annual EU Round Table Conference on social exclusion. The conference would be organised in close collaboration with the EU Presidency and prepared in consultation with all relevant actors.

Unchanged

In designing, implementing, following up and evaluating the activities under the programme account will be taken of the experience of people exposed to poverty and social exclusion, as well as social partners, non-governmental organisations and other actors of the society involved in the fight against poverty and social exclusion. In all its activities, the programme will respect the principle of gender mainstreaming. The programme activities can be adapted or supplemented in accordance with the procedure established under Article 7, on the basis of an annual review.

Unchanged

The actions to be taken may be funded by service contracts following calls for tender or by subsidies for joint financing with other sources. In the latter case, the level of financial assistance by the Commission may not exceed, as a general rule, 80 % of the expenditure actually incurred by the recipient. However, core funding for European networks under Strand 3.1 may exceptionally, when justified by their financial situation, amount to 90 % of their running costs.

INITIAL PROPOSAL

In carrying out the programme, the Commission may require additional resources, including recourse to experts. These requirements will be decided in the context of the Commission's ongoing assessment of resource allocation.

In carrying out the programme, the Commission may have recourse to technical and/or administrative assistance, to the mutual benefit of the Commission and of the beneficiaries, related to identification, preparation, management, monitoring, audit and control.

The Commission may also undertake information, publication and dissemination actions. It may also undertake evaluation studies and organise seminars, colloquia or other meetings of experts.

The Commission will prepare annual work plans setting out the priorities and actions to be undertaken. Moreover, it will also specify the arrangements and criteria to be applied in selecting and financing actions under this programme. In so doing, it will seek the opinion of the Committee mentioned in Article 7.

Actions undertaken will fully respect the principles of data protection.
