Opinion of the Advisory Committee on restrictive agreements and dominant position given at its meeting of 3 November 2008 regarding a draft decision relating to Cases COMP/39.388 — German Electricity Wholesale Market and COMP/39.389 — German Electricity Balancing Market

Rapporteur: The Netherlands

(2009/C 36/06)

1. A majority of the members of the Advisory Committee share the Commission's concerns expressed in the preliminary assessment. A minority abstains.
 2. A majority of the members of the Advisory Committee agree with the Commission that the proceedings can be concluded by means of a decision pursuant to Article 9(1) of Council Regulation (EC) No 1/2003. A minority abstains and a minority disagrees.
 3. A majority of the members of the Advisory Committee agree with the Commission that, in light of the commitments offered by E.ON AG, there are no longer grounds for action by the Commission, without prejudice to Article 9(2) of Regulation (EC) No 1/2003. A minority abstains.
 4. A majority of the members of the Advisory Committee agree with the Commission that the commitments offered by E.ON AG are proportionate. A minority abstains and a minority disagrees.
 5. The members of the Advisory Committee recommend the publication of its Opinion in the *Official Journal of the European Union*.
 6. The members of the Advisory Committee ask the Commission to take into account all other points raised during the discussion.

Final report of the Hearing Officer in Cases COMP/39.388 — German Electricity Wholesale Market and COMP/39.389 — German Electricity Balancing Market ⁽¹⁾

(2009/C 36/07)

The draft Decision presented to the Commission under Article 9 of Regulation (EC) No 1/2003 relates to certain practices of E.ON. The allegations concern the withholding of capacity with a view to raising electricity prices and deterrence of investment in generation by third parties on the German electricity wholesale market and favouring of affiliated companies and passing on the costs to the final consumer on the German balancing market as well as preventing power producers from other Member States from selling balancing energy into the E.ON balancing markets.

The Commission opened proceedings with a view to taking a decision under Chapter III of Regulation (EC) No 1/2003 and adopted a preliminary assessment as referred to in Article 9(1) of Regulation (EC) No 1/2003 on 7 May 2008. Ensuing discussions with the Commission services led E.ON to submit commitments on 27 May 2008.

On 12 June 2008, the Commission published a notice in the *Official Journal of the European Union*, pursuant to Article 27(4) of Regulation (EC) No 1/2003, summarizing the concerns and the commitments and inviting interested third parties to transmit observations on this notification within one month of its publication. The comments received in response to this invitation mainly confirmed that the commitments were adequate to meet the concerns raised in the preliminary assessment.

The Commission has now come to the conclusion that, in view of the commitments proposed by E.ON, and without prejudice to Article 9(2) of Regulation (EC) No 1/2003, the proceedings should be brought to an end.

In a decision under Article 9 of Regulation (EC) No 1/2003, a breach of the competition rules is not established, but the undertaking concerned accepts to remedy the concerns expressed by the Commission in a preliminary assessment. There is in this process a willingness on both sides to simplify the administrative and legal requirements which are inherent in a full investigation of a suspected infringement. This is the reason why in several decisions taken already by the College ⁽²⁾, it has been accepted that due process is satisfied when the undertaking concerned informs the Commission that it has received sufficient access to the information it considered necessary to propose commitments in order to meet the concerns expressed by the Commission.

These cases have also been dealt with in the same manner, E.ON having submitted a declaration to the Commission to this effect on 29 October 2008.

In the light of the above, I consider that the rights to be heard have been respected in these cases.

Brussels, 10 November 2008.

Michael ALBERS

Summary of Commission Decision**of 26 November 2008****relating to a proceeding under Article 82 of the EC Treaty and Article 54 of the EEA Agreement****(Cases COMP/39.388 — German Electricity Wholesale Market and COMP/39.389 — German Electricity Balancing Market)***(notified under document number C(2008) 7367 final)***(Only the English text is authentic)****(Text with EEA relevance)**

(2009/C 36/08)

On 26 November 2008, the Commission adopted a decision relating to a proceeding under Article 82 of the EC Treaty. In accordance with the provisions of Article 30 of Council Regulation (EC) No 1/2003 ⁽¹⁾, the Commission herewith publishes the decision, having regard to the legitimate interest of undertakings in the protection of their business secrets. A non-confidential version of the decision is available on the Competition Directorate General website at the following address:

<http://ec.europa.eu/comm/competition/antitrust/cases/index/>

- (1) The Decision is addressed to E.ON AG, Düsseldorf (hereafter 'E.ON') and concerns two cases, one on the German electricity wholesale market and one on the German balancing market. It makes commitments offered by E.ON to bring the two cases to an end binding. In the light of the commitments offered, the Commission considers that there are no longer grounds for action on its part.
- (2) As regards the case on the German wholesale market, the concern of the Commission was that E.ON may have designed a strategy to withdraw available generation capacity (limiting the supply of electricity from certain plants on the short term market — the power exchange EEX) with a view to raising electricity prices to the detriment of consumers thereby abusing its dominant position on the German electricity wholesale market. In addition the Commission had concerns that this may have been complemented by a medium and long-term strategy by E.ON of deterring actual or potential competitors from entering the generation market and thereby limiting the market volume in electricity generation.
- (3) As regards the case on the German electricity balancing market, the concern was that E.ON may have abused its dominant position on the market for the demand of secondary balancing reserves in the E.ON network area according to Article 82 of the EC Treaty first by increasing its own costs with a view to favouring its production affiliate and passing the costs on to the final consumer; and second by preventing power producers from other Member States from exporting balancing energy into the E.ON balancing market.
- (4) The Commission considers that the commitments offered following the preliminary assessment and the observations submitted by interested third parties are sufficient to address the identified competition concerns. First, the divestiture of about 5 000 MW of E.ON's generation capacity addresses the concerns on the wholesale market. This divestiture removes the ability and the incentive to withdraw generation capacity profitably, which was possible particularly due to the structure of E.ON's power plant portfolio. The divested plants will also help actual and potential competitors to get access to new plants and plants with technologies that they do not possess. In addition, competitors will get access to new sites which will help them to build up (or rebuild) even more generation capacity with new power plants. Second, the divestiture of E.ON's transmission system business, consisting of its 380/220 kV-line network, the system operation of the E.ON control area and related activities addresses the concern on the balancing market arising from the vertically integrated structure of E.ON which is active in production/supply and transmission.
- (5) The decision finds that in view of the commitments, there are no longer grounds for action by the Commission.
- (6) The Advisory Committee on Restrictive Practices and Dominant Positions issued a favourable opinion on 3 November 2008.

Commission notice pursuant to Article 18a(3)(a) of Directive 2003/87/EC
Preliminary list of aircraft operators and their administering Member States

(Text with EEA relevance)

(2009/C 36/10)

Pursuant to Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003 establishing a scheme for greenhouse gas emission allowance trading within the Community ⁽¹⁾, as amended by Directive 2008/101/EC ⁽²⁾, aviation activities of aircraft operators that operate flights arriving at and departing from Community aerodromes are included in the scheme for greenhouse gas emission allowance trading within the Community as of 1 January 2012.

Member States are obliged to ensure compliance of aircraft operators with the requirements of Directive 2003/87/EC. In order to reduce the administrative burden on aircraft operators, the Directive provides for one Member State to be responsible for each aircraft operator. Article 18a(1) and (2) of the Directive provides for the rules governing the assignment of each aircraft operator to its administering Member State. In accordance with those provisions, Member States are responsible for aircraft operators which were issued with an operating licence in accordance with the provisions of Council Regulation (EEC) No 2407/92 in that Member State, or aircraft operators without an operating licence or from third countries whose emissions in the base year are mostly attributable to that Member State.

Article 18a(3)(a) of the Directive requires the Commission to publish a list of aircraft operators which performed an aviation activity listed in Annex I of the Directive on or after 1 January 2006 specifying the administering Member State for each aircraft operator. The purpose of this list is therefore to specify which Member State will be the administering Member State for each aircraft operator in accordance with Article 18a(1) and (2) of Directive 2003/87/EC. This list of aircraft operators is contained in this notice.

The Commission can publish an updated list at any time if it becomes aware of the need to modify the list. To ensure the accuracy of this list, the Commission invites feedback from Member States and other relevant stakeholders by 31 March 2009. On the basis of this feedback, the Commission will consider publishing a revised list shortly afterwards.

The list is based on the latest data provided by Eurocontrol based on records of flight plans. Details of the methodology used for establishing this list, along with contact details for competent authorities where these have been notified by Member States, will be made available on the Commission website.

The list includes all aircraft operators that have undertaken a relevant aviation activity on or after 1 January 2006. As such, aircraft operators that have permanently or temporarily ceased to perform their aviation activities might appear on this list, as might operators that have since changed name or been subject to merger or acquisition. It also does not take into consideration whether aircraft operators are included on the Community list of air carriers which, for safety reasons, are subject to an operating ban, within the Community in accordance with Regulation (EC) No 2111/2005. Any inclusion of aircraft operators that are currently subject to an operating ban on the list contained in this notice is therefore without prejudice to decisions made by the Commission and Member States in accordance with Regulation (EC) No 2111/2005.

In accordance with Article 18a(3)(b), the Commission will update the list before 1 February of each year to include aircraft operators that have subsequently performed an aviation activity listed in Annex I to the Directive.

⁽¹⁾ OJ L 275, 25.10.2003, p. 32.

⁽²⁾ OJ L 8, 13.1.2009, p. 3.

The allocation of an aircraft operator to its administering Member State is effective for the total of each trading period referred to in Article 3c of Directive 2003/87/EC. Before the start of each trading period, the Commission will publish an updated list taking into account transfers of aircraft operators to another administering Member State in accordance with Article 18a(2) of the Directive.

When ensuring that Directive 2003/87/EC is correctly implemented by Member States, the Commission will base its action upon the latest published version of the list.

The Annex contains a list of aircraft operators to be administered by each Member State.
