

AZ EURÓPAI KÖZÖSSÉGEK BIZOTTSÁGA

Brüsszel, 28.6.2006
COM(2006) 332 végleges

**A BIZOTTSÁG KÖZLEMÉNYE A TANÁCSNAK ÉS AZ EURÓPAI
PARLAMENTNEK**

**A szabadsággal, a biztonsággal és a jog érvényesülésével kapcsolatos uniós politikák
értékelése**

{SEC(2006) 815}

A BIZOTTSÁG KÖZLEMÉNYE A TANÁCSNAK ÉS AZ EURÓPAI PARLAMENTNEK

A szabadsággal, a biztonsággal és a jog érvényesülésével kapcsolatos uniós politikák értékelése

1. BEVEZETÉS

1. A **hágai program** (2004)¹ megállapítja, hogy „az Európai Tanács véleménye szerint a valamennyi intézkedés végrehajtását, illetve hatásait kísérő értékelés kulcsfontosságú az uniós intézkedések hatékonysága szempontjából”. A hágai programot végrehajtó cselekvési terv (2005)², amely az elkövetkező öt évre létrehozza az Európai Unió szabadsággal, biztonsággal és a jog érvényesülésével kapcsolatos tevékenységeinek politikai keretét, arról rendelkezik, hogy 2006-ban a Bizottság **általános közleményt** fogad el arról, hogy e területen hogyan fejlesszenek ki uniós szintű értékelő mechanizmust³.
2. Az állam- és kormányfők megállapították, hogy a végrehajtás értékelése kulcsfontosságú eszköz annak biztosításához, hogy az Unió és tagállamai által a szabadságon, a biztonságon és a jog érvényesülésén alapuló térség kialakítása terén elért jelentős eredményeket megfelelően hajtsák végre és adott esetben folyamatosan felülvizsgálják ahhoz, hogy megfelelhessenek az **európai polgárok** tényleges **elvárásainak**.
3. Az értékelés fontosságának hangsúlyozásával a hágai program célja az volt, hogy (1) **továbbfejlessze a politikák, programok és eszközök létrehozásának módját** azáltal, hogy beazonosítja a végrehajtásuk során tapasztalt problémákat és akadályokat, (2) szisztematikusabb szabályokat állapítson meg **a pénzügyi elszámoltathatóságról és a politikák ellenőrzéséről**, (3) elősegítse a tanulást, valamint **a bevett gyakorlatok cseréjét**, (4) részt vegyen **egy értékelési kultúra kifejlesztésében** Unió-szerte.

A (1) hágai program, valamint annak cselekvési terve által a Bizottságnak adott **megbízatás**, (2) a meglévő monitoring és értékelő mechanizmusok **tagozódása**, valamint (3) annak szükségessége fényében, hogy a politikák végrehajtásáról és eredményeiről **kimerítő információkat** kell biztosítani valamennyi érdekelt fél számára, a Bizottság véleménye szerint itt az ideje, hogy a szabadsággal, a biztonsággal és a jog érvényesülésével kapcsolatos uniós politikák **következetes és átfogó értékelési mechanizmusát** hozzák létre, a tagállamokkal és az uniós intézményekkel kialakított **partnerség** szellemében.

¹ A brüsszeli Európai Tanács (2004. november) elnöki következtetéseinek 1. melléklete.

² A Tanács és a Bizottság cselekvési terve az Európai Unióban a szabadság, a biztonság és a jog érvényesülése megerősítéséről szóló hágai program végrehajtásáról (OJC 198, 12.8.2005, p.1).

³ A cselekvési terv ugyancsak szükségesnek tart egy, az igazságszolgáltatás területére vonatkozó uniós politikák végrehajtásának szisztematikus, objektív és pártatlan értékeléséről szóló közleményt azzal a céllal, hogy – a bíróságok függetlenségének tiszteletben tartásával – megerősítse a kölcsönös bizalmat. Ez év folyamán később a Bizottság egy további közleményt terjeszt elő, amely részletesen foglalkozik a kérdéssel, összhangban az e közleményben megállapított általános elvekkel.

Egy ilyen mechanizmus magában foglalja a **végrehajtás felügyeletét** (ahogyan az „A szabadság, a biztonság és a jog érvényesülésének erősítése az Európai Unióban: a hágai program 2005. évi végrehajtásáról” című közleményben (a továbbiakban: pótlólagos eredményjelző-tábla) szerepel, valamint a politikák eredményeinek értékelését.

2. AZ ÉRTÉKELES KONCEPCIÓJA

4. Különbséget kell tenni a végrehajtás felügyeletének elve és az értékelés elve között:
- A **végrehajtás felügyelete** a politikák végrehajtási folyamatának áttekintéséből áll.
 - A Bizottság **értékelésről** szóló, 2000-ben előterjesztett közleménye⁴ úgy határozza meg az értékelést, mint „a beavatkozások (nyilvános fellépések) megítélését eredményeik, hatásai és az általuk kielégíteni szándékozott szükségletek szempontjából”. Az értékelés főként inputot kíván biztosítani a politikaalakítóknak a tervezett és végrehajtott tevékenységek hatásáról és hatékonyságáról.
5. A Bizottság a cselekvési tervben említett mechanizmust eszközként tekinti a szabadsággal, a biztonsággal és a jog érvényesülésével kapcsolatos politikák végrehajtásának felügyeletéhez, valamint konkrét eredményeik értékeléséhez. Ebben az összefüggésben az értékelés túlmutat a politikák végrehajtásának felügyeletén, és azt alapul veszi azáltal, hogy az alább felvázoltak szerint tanulmányozza a végrehajtás hatásait. Ez megfelel a hágai programnak, mivel „a valamennyi intézkedés végrehajtását, illetve hatásait kísérő értékelés” magában foglalja mind magának a végrehajtásnak a felügyeletét, mind a meghozott intézkedések eredményeinek értékelését.
6. Ezt az érvet szem előtt tartva terjeszt elő a Bizottság egy két pillérre épített, következetes és átfogó csomagot: a pótlólagos eredményjelző-táblát a végrehajtás felügyeletére és az e közleményben javasolt **értékelési mechanizmusra**.
7. Az e közleményben előterjesztett mechanizmus alapja ezen átfogó meghatározás, amely – a Bizottság véleménye szerint – lehetővé teszi a szabadság, a biztonság és a jog érvényesülése tekintetében elért eredmények mennyiségének és minőségének teljes áttekintését. Egy ilyen mechanizmus a hágai programban megállapított elvek keretében működne, végül pedig fejlesztené a politikaalakítást azáltal, hogy előmozdítja az értékelési eredmények szisztematikus nyomon követésének figyelembe vételét a döntéshozatali folyamat során.

⁴

SEC(2000) 1051.

1. szövegmező: *Értékelés a döntéshozatali folyamatban*

3. AZ ÉRTÉKEKELÉS ALÁ VETT, A SZABADSÁGGAL, BIZTONSÁGGAL ÉS A JOG ÉRVÉNYESÜLÉSÉVEL KAPCSOLATOS UNIÓS POLITIKÁK – MEGVÁLASZOLANDÓ KIHÍVÁSOK

3.1. Összetett és ambiciózus politikai célok és rendelkezések

8. A szabadság, a biztonság és a jog érvényesülése az Európai Unió egyik **legváltozatosabb politikai területe**. A kitűzött célok felölelnek néhányat a legaktuálisabb kérdések közül: a személyek szabad mozgása, a terrorizmus és a szervezett bűnözés, rendőrségi és igazságügyi együttműködés, menekültügy és bevándorlási politika, ugyanakkor az alapvető jogok tiszteletben tartása, illetve az uniós polgárok jogainak előmozdítása. A nemzeti szuverenitással kapcsolatos megfontolások gyakran uniós szintű kompromisszumokat tesznek szükségessé, vagy megnehezítik a végrehajtást. Ezért bármilyen új értékelési mechanizmusnak figyelembe kell vennie e politikai összefüggést.
9. Az összetett és ambiciózus politikai célkitűzéseket tovább bonyolítja a döntéshozatali és megfelelőségi eljárások elegyből álló, olykor kissé zavaros jogi keret.

Ahhoz, hogy a javasolt értékelési mechanizmus alkalmazkodhasson ehhez az összetettséghez, progresszívnek kell lennie, és lehetővé kell tennie a **további fejlesztést, illetve egységes keretbe foglalást**.

3.2. Ütemezés

10. A Bizottság sajátos szerepéből, valamint a szabadság, a biztonság és a jog érvényesülése terén alkalmazott döntéshozatalból kifolyólag, a különféle politikák gyakran különböző **időbeli ütemezést** tesznek szükségessé, mielőtt kifejlesztenék azokat, illetve teljesen működőképpé válnának. Ezért **eseti megközelítést** kell alkalmazni **minden különálló politika** esetében az elemzés megfelelő szintjének beazonosításához. Míg valamennyi politika esetében figyelembe veszik a közvetlen és időközi eredményeket, a gyakorlati hatás elemzése egyes politikák (pl. a kábítószerrel és migrációval kapcsolatos politikák) esetében nehézségekbe ütközhet.

A javasolt értékelési mechanizmus **elegendő rugalmasságot** biztosít az egyes politikák megkülönböztetett mélyreható elemzéséhez, figyelembe véve fejlettségük és konszolidálásuk szintjét.

A közvetlen és időközi eredményekre történő összpontosítás ezért legalább az első fázisban megfelelőnek tűnik. Hosszú távon az értékelési mechanizmus végső célja a politikák átfogó hatásának beazonosítása.

3.3. Az intézmények és érdekelt felek bevonása

11. A szabadság, a biztonság és a jog érvényesülése területének másik sajátos szempontja a politika érdekelt felekre gyakorolt hatása. E téren bármilyen értékelési mechanizmusnak figyelembe kell vennie az **érdekelt felek elvárásait és prioritásait**, és különösen a **bizalmasság szükségességét** olyan politikai területeken, mint például a terrorizmus és a szervezett bűnözés.
12. Az értékelési jelentés elkészítésének ideje alatt, illetve azután a Bizottság a **partnerség** szellemében **tanácskozik és eszmecserét folytat** a tagállamokkal, valamint az uniós intézményekkel. E célból a tagállamokat és az uniós intézményeket arra szólítják fel, hogy a Bizottsággal folytatott párbeszéd megkönnyítése érdekében **kapcsolattartó pontokat** jelöljenek ki. Az értékelő jelentés⁵ **nyilvános** lesz, illetve a tagállamokhoz és az uniós intézményekhez intézik.
13. A Bizottság mellett a Tanács és a tagállamok lesznek a javasolt értékelési mechanizmus fő szereplői. Az Európai Parlament ehhez szorosan társul, az intézményi előfeltételeknek és kötelezettségeknek megfelelően. A nemzeti parlamenteket ugyancsak bevonják a rendszeres jelentések értékelésébe.
14. Az EK-Szerződés által felölelt területeken a Régiók Bizottságát és az Európai Gazdasági és Szociális Bizottságot bevonják az értékelési mechanizmus előkészítésébe és végrehajtásába. Az értékelő jelentéseket elfogadásuk után rutinszerűen továbbítják a bizottságoknak.

⁵

Vö. 30 bekezdés.

15. Az olyan ügynökségek, mint például az Európai Unió Alapjogi Ügynöksége, a Kábítószer és Kábítószer-függőség Európai Megfigyelőközpontja, az Europol, az Eurojust vagy az Európai Unió Tagállamai Külső Határain Való Operatív Együttműködési Igazgatásért Felelős Európai Ügynökség fontos szerepet játszanak e mechanizmusban: először is azért, hogy lehetőség szerint információkat és elemzéseket szolgáltatnak az értékeléshez, másodszor pedig azért, hogy a Bizottság konzultál velük az értékelő jelentésekről.
16. A civil társadalom hozzájárulása nagyon fontos ebben az összefüggésben. A Bizottság biztosítja, hogy a civil társadalom nézeteit figyelembe veszik, és megfelelő mechanizmusokat hoz létre, hogy biztosítsa a civil társadalom részvételét a szabadság, a biztonság és a jog érvényesülése területéhez tartozó valamennyi politika értékelésében.

A javasolt értékelési mechanizmus **átlátható konzultációs mechanizmusokat** is tartalmaz, amelyek ugyancsak felhasználhatók a vonatkozó információk összegyűjtéséhez és egyeztetéséhez.

3.4. A statisztikák hozzáférhetősége

17. A statisztikák⁶ és a szükséges elemzési kapacitás hozzáférhetősége az értékelési rendszer kifejlesztésének **kulcsfontosságú eleme**. Míg egyes tevékenységekre (pl. kábítószerrel kapcsolatos politika) jól kidolgozott statisztikák jellemzők, további teendők vannak egyéb területeken, mint például a bűnözés és a büntetőügyi igazságszolgáltatás⁷. A szabadsággal, a biztonsággal és a jog érvényesülésével kapcsolatos politikák által felvetett szükségletek alakulásával kapcsolatos statisztikákat használják fel alapadatként annak felméréséhez, hogy az idő múlásával a politika mérsékeli vagy súlyosbítja-e a meglévő szükségleteket, végső soron pedig a politikák hatásával kapcsolatos következtetések levonásához. Három területet kell fejleszteni: minőség, hozzáférhetőség és elemzés. Az ügynökségek, beleértve a Kábítószer és Kábítószer-függőség Európai Megfigyelőközpontját, az Europol, az Eurojustot, és a jövőbeni Alapjogi Ügynökséget, különleges szerepet játszanak ebben az összefüggésben. A kísérleti projektek és hálózatok ugyancsak hozzájárulnak e célkitűzéshez.

Következésképpen, a javasolt értékelési rendszer létrehozásával párhuzamosan fejleszteni kell a szabadsággal, a biztonsággal és a jog érvényesülésével kapcsolatos statisztikák **minőségét, hozzáférhetőségét és elemzését**.

⁶ A közösségi statisztikák készítésére a közösségi statisztikákról szóló tanácsi rendeletben foglalt szabályok alkalmazandók, illetve a közösségi statisztikák létrehozásával kapcsolatos tevékenységeket a közösségi statisztikai program, valamint annak éves programjai szerint hajtják végre, az európai statisztikai eljárási szabályzatban megállapított elvek betartásával.

⁷ E célból a Bizottság tervei közt szerepel egy, a bűnözés és a büntetőügyi igazságszolgáltatás felmérésére alkalmazott átfogó és következetes uniós stratégia kifejlesztéséről szóló uniós terv elfogadása. A végső cél az, hogy összehangolt meghatározások, gyűjtési és jelentési mechanizmusokon alapuló közösségi statisztikák összeállítása.

4. A SZABADSÁGGAL, A BIZTONSÁGGAL ÉS A JOG ÉRVÉNYESÜLÉSÉVEL KAPCSOLATOS UNIÓS POLITIKÁK ÉRTÉKELÉSE – JAVASLAT EGY STRATÉGIAI ÉRTÉKELÉSI MECHANIZMUSRA

4.1. Az értékelési mechanizmus leírása

18. A szabadságra, a biztonságra és a jog érvényesülésére vonatkozó **javasolt stratégiai értékelési mechanizmus alapul használja fel** az uniós politika egyéb területein elért **egységesített eredményeket**. E mechanizmus alapul venné a 2. mellékletben leírt **jelenlegi gyakorlatokat**, valamint a támogatási programok sajátos esetében felhasználná a meglévő értékelési követelményekből származó információkat. Emellett, az olyan egyéb területeken, ahol már van elérhető információ, külön figyelmet fordítanak a meglévő adatok felhasználására, illetve a **duplán végzett munka elkerülésére**.

19. Egy háromlépcsős progresszív mechanizmust javasolnak:

- (1) Először is, az információ összegyűjtésére és megosztására alkalmazott rendszer felállítása.
- (2) Másodszor, **jelentéstételi mechanizmus**, amely egységes keretbe foglalja, felhasználja és elemzi ezeket az információkat.
- (3) Harmadszor pedig, kiegészítésként célzott **mélyreható stratégiai elemzések**.

2. szövegmező: A háromlépcsős mechanizmus

20. A mechanizmus átfogó lesz, és felöleli a szabadság, a biztonság és a jog érvényesülése területéhez kapcsolódó valamennyi politikát⁸.

21. Értékelő jelentéseket⁹ továbbítanak a Tanácsnak, az Európai Parlamentnek, illetve az Európai Gazdasági és Szociális Bizottságnak és a Régiók Bizottságának, valamint adott esetben széles körben, beleértve *ad-hoc* nyilvános eseményeken, terjesztenek.

⁸ A javasolt mechanizmus harmadik lépésében folytathatnák a 2. melléklet 2.3.2. pontjában említett szakértői értékelési mechanizmus végrehajtását. A jelenlegi intézményi keret alakulásától függően a Bizottság a későbbiekben irányíthatja e mechanizmust. Mindenesetre az EU-Szerződés VI. címéhez tartozó területeken a Bizottság saját mélyreható stratégiai értékeléseivel támogatja e mechanizmust

22. A jelentéstétel és az értékelési eredmények terjesztésének megerősítésével a mechanizmus végső célja, hogy előmozdítsa az eredmények tényleges felhasználását a döntéshozatal szintjén.
23. A mechanizmus a Bizottság jelenlegi értékelési iránymutatásával következetes, és ez utóbbi általános elveivel összhangban fog működni.

4.1.1. *Információgyűjtési és -megosztási rendszer*

24. Az információgyűjtési és -megosztási rendszer alapját a tagállamok illetékes hatóságai által kitöltendő **adatlapok** képezik (politikai területenként egy-egy). Az olyan területeken, ahol az információ már hasonló formátumban hozzáférhető, a Bizottság a lehető legteljesebben **előre kitölti** az adatlapokat. Ezzel párhuzamosan a kapcsolódó érdekelt felekkel¹⁰, valamint a civil társadalommal **konzultálnak** az adatlapokról. A konzultációk minden egyes politikára külön vonatkoznak, és alapul veszik a **meglévő hálózatokat** és konzultációs mechanizmusokat, az egyes politikai területek bizalmassági követelményeinek kellő tiszteletben tartásával.
25. Az adatlapokon minden egyes terület esetében feltüntetik az **általános politikai célkitűzést**, és felsorolják az e cél eléréséhez hozzájáruló **fő eszközöket** (jogalkotási, nem jogalkotási és pénzügyi). A mechanizmus világos áttekintést biztosít az **elért eredményekről**.
26. Az adatlapok minden egyes politikai területre vonatkozóan **jelölőket** biztosítanak, melyek egyértelműen kapcsolódnak a politikai terület átfogó célkitűzéséhez. Az adatlapok az e dokumentum közzétételét követő, és a tagállamokkal folytatott partnerségben véglegesített **konzultációs folyamat** szerves részét képezik. A javasolt adatlapok mintáit e közlemény 1. melléklete tartalmazza.
27. A Bizottság fel kívánja szólítani a tagállamokat arra, hogy nemzeti szinten **kapcsolattartó pontokat** jelöljenek ki. A kapcsolattartó pontok fontos szerepet töltenek be nemzeti szinten a válaszok koordinálásában, és a Bizottság osztályaival konzultálva tevékenykednek.
28. Az **EU-jogalkotás** tekintetében az adatlapokon szereplő mutatók és pontozási rendszer középpontjában a jogszabály gyakorlati alkalmazásának kézzelfogható eredményei állnak, és nem a nemzeti jogba történő átültetés szintje, sem pedig az EU jog hatása a nemzeti jogi rendszerekre. Ez utóbbiak a pótlólagos eredményjelző-tábla fő célkitűzései, amely inkább felméri az átültetést és végrehajtást, mintsem megítélje a célkitűzések elérésének fokát.
29. Az EU **finanszírozási programok tekintetében**, a tájékoztatók felhasználják a költségvetési rendeletben és egyéb vonatkozó jogalapokban meghatározott követelményeknek történő megfelelés érdekében készített, már meglévő **végrehajtási és értékelési jelentéseket**. A finanszírozási programokkal kapcsolatban a tájékoztató által előírt információk várhatóan már hozzáférhetők, ezért a tagállamoktól esetlegesen kért további hozzájárulás minimális.

⁹ Vö. 30 bekezdés.

¹⁰ Vö. 3.3. szakasz

4.1.2. Jelentéstételi eljárás

30. Az adatlapok kézhezvételét és az érdekelt felekkel folytatott konzultációt követően a Bizottság jóváhagyja a beérkezett információkat, és egy **„értékelési jelentést”** dolgoz ki, amelyben egységes keretbe foglalja és elemzi a benyújtott információkat. Ez az értékelési jelentés **politikai ajánlásokat** is tartalmaz a felölelt különféle politikai területekre vonatkozóan.
31. E gyakorlat célja, hogy értékelje a szabadság, a biztonság és a jog érvényesülése terén uniós szinten végrehajtott politikákat, és hogy beazonosítsa a **mélyreható stratégiai értékelésre** alkalmas területeket.

4.1.3. Stratégiai politikai értékelések

32. Az értékelő jelentés és további konzultáció után **mélyreható stratégiai politikai értékeléseket** végezhetnek **egyes területeken**. Ezen értékelések hasznos információkat igyekeznek összeállítani kellő időben ahhoz, hogy azokat – adott esetben – inputként használhassák fel minden egyes politikai területen a politikai döntésekhez.
33. A stratégiai értékelések hozzáadott értéket képviselnek a 2. mellékletben leírt jelenlegi gyakorlatok tekintetében, főként az alábbiak által:
- (a) a **politikákra** (vagy koherens alegységekre) koncentrálnak, az egyéni eszközök (például a közös bevándorlási politika értékelése helyett);
 - (b) egy adott politikán belül a különféle eszközök közötti **koherenciát** elemzik (például hogy a pénzügyi programok hogyan támogatják és könnyítik meg egy adott területen az EU jogszabályok végrehajtását);
 - (c) megvizsgálják, hogy egy bizonyos politika hogyan járul hozzá a szabadság, a biztonság és a jog érvényesülésén alapuló térség létrehozásának **átfogó célkitűzéséhez**;
 - (d) meghatározzák a fenti általános célkitűzés **megvalósításának átfogó mértékét**; valamint
 - (e) felméri a szabadság, a biztonság és a jog érvényesülése terén túlmutató célkitűzés megvalósítását (például az alapvető jogok védelme).

4.2. Gyakoriság és nyomon követés

34. A meghatározott gyakoriság lehetővé teszi az előrelépések rendszeres időközönként történő figyelemmel kísérését, valamint összehasonlítások elvégzését. Az időbeni ütemezés tekintetében, a javaslat szerint ilyen értékelésre („adatlapok” és „értékelő jelentés”) **ötévente kétszer** kerülne sor. A Bizottság a lehető leghamarabb felhasználja a rendelkezésre álló információkat.
35. A javaslat figyelembe veszi, hogy e mechanizmus megfelel az alábbiaknak:
- (a) **rendszeresen** végzik el,

- (b) nem túl nehézkes,
- (c) nem kell minden évben elvégezni, mivel lassan alakuló eredmények és középtávú adatok állnak a középpontjában,
- (d) össze kell hangolni a már **meglévő** stratégiai és többéves tervekkel.

36. A javasolt ütemterv ugyancsak lehetővé teszi, hogy a Tanács és a Bizottság inputként használja fel az értékelő jelentések eredményeit annak felméréséhez, hogy szükség van-e további stratégiai program előkészítésére 2009-ben, a hágai program lejáta után.
37. Az értékelő jelentés két- vagy három évente történő közzététele lehetővé teszi a mechanizmus összehangolását az ötéves ciklussal. Ez elősegíti az értékelési eredmények alaposabb és stratégiai felhasználását a döntéshozatalban. 2006-2007 átmeneti időszak lesz (lásd alábbi táblázat).
38. A pótlólagos eredményjelző-táblával történő koordinációhoz, a tervek szerint az adatlapokat 2006 végén küldik meg a tagállamoknak, az értékelő jelentést pedig a második pótlólagos eredményjelző-táblával együtt 2007 közepén teszik közzé.

Ütemterv	Pótlólagos eredményjelző- tábla (angol röv. SB)	Felülvizsgálati mechanizmus	Cselekvési terv
2005			A hágai cselekvési terv elfogadása
2006	SB+ 1		A végrehajtás időközi értékelése (2006 vége)
2007	SB+ 2	1. értékelő jelentés	Első politika-áttekintés
2008	SB+ 3		
2009	SB+ 4	2. értékelő jelentés	
2010	SB+ 5		A hágai program vége:
2011	SB+ 6		
2012	SB+ 7	3. értékelő jelentés	
2013	SB+ 8		
2014	SB+ 9	4. értékelő jelentés	

(Átmeneti időszak szürke háttérrel)

39. A mellékelt hatásvizsgálat tartalmazza a **tagállamokra háruló kiegészítő költségek** felmérését. A tagállamokat arra ösztönzik, hogy a Bizottság támogatásával, igyekezzenek **összehasonlítható és pontos adatokat** szolgáltatni. Számos

jogalkotási eszköz értékelésével kapcsolatos utóbbi tapasztalatok tanúsága szerint a politikákkal kapcsolatos adatok olykor nincsenek összhangban és nem is pontosak. A szabadsággal, a biztonsággal és a jog érvényesülésével kapcsolatos politikákról végzett *ad hoc* tanácsi vagy bizottsági értékelések további információforrást képeznek.

40. Ezzel a közleménnyel a **középtávú folyamat** kezdetét kívánják jelölni. A javasolt mechanizmust és az adatlapokat úgy terjesztik elő, hogy azokat e közlemény nyomán követéseként kommentálni és javítani lehessen. E célból széleskörű konzultációs folyamatot indítanak, beleértve egy őszi meghallgatás szervezését.
41. Öt év elteltével **értékelik** a mechanizmust, hogy döntést hozhassanak a rendszer esetleges kiigazításairól és fejlesztéseiről. A mérlegelendő eredményeket a 2. szövegmező tartalmazza. Az értékelést a (2) bekezdésben meghatározott célkitűzések tekintetében végzik.

5. KÖVETKEZTETÉSEK

42. A Bizottság szükségesnek tartja a szabadsággal, a biztonsággal és a jog érvényesülésével kapcsolatos uniós politikák **következetes és átfogó értékelési rendszerének** létrehozását, szem előtt tartva a jelenlegi helyzetet, valamint a hágai program által adott megbízatást. A fenti rendszernek **progresszívnek** kell lennie, és figyelembe kell vennie az **alakuló intézményi és jogi keretet**, azzal a céllal, hogy biztosítsa a szabadsággal, a biztonsággal és a jog érvényesülésével kapcsolatos politikák további erősítését.
43. Ez a mechanizmus eszközt biztosít az egyedi értékelési eredmények egységes keretben történő összefoglalásához, és ezáltal a megfelelő szintű politikai döntéshozatal tájékoztatásához. E tekintetben emellett a javasolt mechanizmus **a vonatkozó információkat időben bocsátja** a politikaalakítók rendelkezésére ahhoz, hogy ez utóbbiak átgondolhassák a hágai program megfelelő nyomon követését, annak 2009-es lejárta után.
44. A javasolt mechanizmust – intézményi előjogaikkal teljes megfelelésben – a Bizottság és a Tanács hajtja végre, az Európai Parlamenttel szoros együttműködésben. Az uniós intézmények és a tagállamok **összhangolt cselekvésére és teljes elkötelezettségére** van szükség az értékelési mechanizmus hatékony létrehozásához és végrehajtásához, és e tekintetben a nemzeti hatóságok és közigazgatások kulcsfontosságú szerepet töltenek be.
45. Végül pedig, az értékelési mechanizmus célja az Unió tevékenységének hatékonyabbá tétele, illetve az olyan stratégiai célkitűzésekhez történő hozzájárulás, mint a **jobb szabályozás** és az **EU tevékenységeinek átláthatósága**.

ANNEX 1

Factsheet of JLS policies

POLICY AREA: EXTERNAL BORDERS, VISA POLICY AND FREE MOVEMENT OF PERSONS

Factors influencing evaluation mechanism: well established policy area, 1st pillar activities, there is a strong consensus amongst stakeholders for EU level action; there is a mix of instruments (legislative activities, co-operation activities, programme funding, functioning Community Agency, IT systems); possible to construct evaluation indicators, but might be hard to measure outcomes and results and causal links in practice. Methods to evaluate controls at borders are improving, including available administrative information and statistics. Some constraints on fully independent evaluation. There are strong interlinkages between the instruments within the ABB activity and strong potential for ‘thematic’ evaluation examining instruments in parallel.

Policy sub-area 1: External borders

Objectives:

Develop an integrated external border management system

Ensure uniform high standards of border checks and border surveillance at EU external borders

Reduce number of illegal cross border movements of people

Further ‘burden sharing’ in management of external borders

Policy sub-area level indicators:

The numbers of illegal migrants apprehended that are known to have crossed the EU external border illegally as a proportion of all third country national border crossings into EU (*Source: Commission - Eurostat statistics on asylum and migration*)

The difference between the numbers of illegal migrants apprehended that are known to have crossed the EU external border illegally as a proportion of

all third country national border crossings into EU through the most permeable and least permeable border. Note that this indicator would require to define the most and least permeable EU border.

The numbers of illegal migrants apprehended that are known to have crossed the EU external border illegally (*Source: Commission - Eurostat statistics on asylum and migration*)

The proportion of all resource commitments to external border management originating in countries without EU external borders (*Source: MS*)

Main instruments	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Schengen Information System (SIS) II	Sharing of information among MS in order to refuse entry on the basis of uniform practices	Consistent input and further use of information among MS	Quality and Availability of SIS II information for competent national authorities <i>Measured by:</i> Number of records per category <i>(Source: MS and Commission)</i>	Success in using SIS information. <i>Measured by:</i> Number of correctly identified persons who should be refused entry and wanted goods discovered <i>(Source: MS)</i>	Reduced permeability of the external border. Increased confidence to promote ‘free movement’ policies.	Clear intervention logic. Evaluation methods – analysis of trends and process changes. Commission responsible for evaluation co-ordination and analysis, MS for information analysis. Most of the analysis will depend upon information from MS.

European Agency for the Management of Operational Co-operation at the External Borders (FRONTEX)	Improvement of operational cooperation between Member State authorities Increased competences of border guards	Co-operation with Agency and responses to good practice, training and other advice.	Operational cooperation <i>Measured by:</i> Number of joint operations and pilot projects carried out <i>(Source: Agency)</i> Development of risk analysis <i>Measured by:</i> Number of risk analyses carried out <i>(Source: Agency)</i> Increased training <i>Measured by:</i> Number of border guards trained Number of training courses and	Improvement of border control <i>Measured by:</i> Effective joint operations <i>(Source: Agency)</i> Increased intelligence <i>Measured by:</i> Use of risk analyses by national services <i>(Source: MS)</i> Better trained border guards <i>Measured by:</i> Use of newly acquired skills <i>(Source: MS)</i>	Improved resource deployment at external borders (due to better intelligence) Reduced permeability of external borders (due to better trained staff)	Difficult to assess causality of intervention. Evaluation methods – case studies, follow up surveys. EU leading the evaluation. (Other EU Agency evaluations have tended to be process rather than impact oriented)

			seminars offered <i>(Source: Agency)</i>			
Action Programme for administrative cooperation in the fields of external borders, visas, asylum and immigration (ARGO)	To promote cooperation between national administrations responsible for implementing Community rules and to ensure that proper account is taken of the Community dimension in their actions To promote the uniform application of Community law To encourage transparency of actions taken by the national authorities To improve the overall efficiency of national	Disbursement rate/amount spent per year	Successful implementation of programme measured by: Number of projects implemented per activity area Number of training actions implemented Number of staff exchanges implemented Number of actions promoting data exchange implemented Number of studies, conferences and seminars conducted <i>(Source: Commission)</i>	Increased cooperation between national administrations and with third countries <i>Measured by:</i> Number of common operative centres and joint teams set up Number of cooperation activities in third countries set up <i>(Source: Commission)</i>	Uniform application of Community law Improved transparency of actions taken by national authorities Improved efficiency of national administrations	Mid-term evaluation to be completed by July 2006.

	administrations in their tasks					
Teams of national experts	Further objectives of FRONTEX agency: Better deployment of resources in circumstances requiring special assistance Increased competences of border guards	Secondment of experts to teams.	Provision of technical and operational assistance. <i>Measured by:</i> number of assignments carried out by teams (Source: Agency)	Improved practice in border surveillance. <i>Measured by:</i> use of results of teams' work in border surveillance and efficiency of teams work (Source: Agency and MS)	Reduced permeability of external borders (due to assistance to staff) Facilitated legitimate travel	Evaluation methods – case studies, qualitative analysis.

Policy sub-area 2: Visa policy and free movement of persons

Objectives:

Prevent illegal immigration and threats to public order

Reduce time taken and costs of acquiring visas for legitimate travellers.

Reciprocation with third countries on visa waivers.

Reduce number of visas given to travellers who become overstayers and illegal migrants

Abolish controls at internal EU borders

Policy sub-area level indicators:

The average time taken from application to receipt of (a particular class of) visa (*Source: MS, VIS*)

The average costs (fees) for (a particular class of) visa (*Source: MS, VIS*)

The number of third countries where the visa requirements of nationals to enter the EU match those EU citizens visiting the country in question (*Source: Commission*)

The total population of third countries where the visa requirements of nationals to enter the EU match those EU citizens visiting the country in question (*Source: Commission*)

The number of EU internal border crossings that are subject to controls (*Source: MS*)

Main instruments	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Common application centres (for Schengen countries)	Render the reception of visa applications more efficient through a better allocation of resources. Reduce costs in relation to capturing of biometrics. Harmonisation of reciprocal	Commitment to the centres. Participation in setting up the centres.	Number of centres established and MS involved (<i>Source: MS</i>). Number of visas issued through the centres (<i>Source: MS</i>).	Increased efficiency of providing visa services. <i>Measured by:</i> time taken to issue visas (<i>Source: MS</i>) (<i>Source: MS</i>). Improved use of visa related	Reduced costs to visa applicants. Reduced costs to administrations. Increased bone fide travel.	Evaluation method – efficiency analysis. Potential evaluation leadership from the MS and use of peer review process.

	procedures by MS			information (Source: MS).		
Visa Information System	Improve the implementation of the common visa policy by the exchange of visa data between Member States, in order to prevent visa shopping, to facilitate the fight against fraud, checks on visas, to assist in the identification of illegal immigrants, to facilitate the application of the Dublin II Regulation and to contribute to the prevention of threats to internal security.	Implementation at the national level, including the development/adaptation of national systems.	Number of number of visas refused, annulled, revoked, processing times (Source: Commission). Availability rate (Source: Commission)	Retention and sharing of data from visa applications and related decisions. Measured by: number of entries in VIS (Source: Commission). Measured: number of analyses conducted using VIS data (Source: Commission).	Improvement of application procedures, of checks at the external borders and within the Schengen territory, of the application of the Dublin II Regulation, of the identification of illegal immigrants and of the detection of fraud. Facilitated legitimate travel.	Monitoring and evaluation, by the Commission at EU level.
The reciprocity mechanism (Council Regulation	To ensure EU citizens can travel without a visa to all third countries whose nationals	Co-operation with the Commission, information sharing on bilateral dialogue with	Number of third countries who have waived visa requirements for EU nationals	Improved reciprocity measured by percentage of decrease of non-	Facilitated legitimate travel for EU travelers	Diplomatic efforts on EU level vis-à-vis third countries concerned.

851/2005)	don't need a visa to travel to the EU.	third countries	<i>(Source: Commission)</i>	reciprocity cases Improved dialogue and diplomatic contacts with third countries		The first Report of the Commission on reciprocity in visa waivers was adopted on 10 January 2006
Council Regulation on a Border code	To implement common rules governing the movement of persons across borders, to include both rules on checks at external borders and rules on the removal of checks on persons at internal borders and the reintroduction of such checks in certain circumstances. To improve integrated border management	Application in MS that apply the Schengen acquis	Harmonisation of rules governing the movement of persons at internal and external borders <i>(Source: Commission)</i>	Improved border management and control	Improved control of external borders Facilitated travel within the Schengen acquis	This regulation was adopted recently – February 2006.

POLICY AREA: CITIZENSHIP AND FUNDAMENTAL RIGHTS

Factors influencing evaluation mechanism:

Relatively new policy area in JLS (although the citizenship policy as such is an established area in the EC/Commission activities), 1st pillar activities, a combination of instruments (legislation, funding programmes, new Community Agency). The nature of the instruments and their objectives leads to reliance on qualitative evaluation methods. However, there is scope for further improvements to the information base through surveys and the development of statistics. The objectives within the policy area are wide ranging and the sub policy areas as defined below are not distinct. There is some scope for evaluating sub sets of instruments in parallel.

Policy sub-area 1: Citizenship of the Union

Global objectives:

Increase awareness of Union citizens of their rights and of the ways these can be enforced

Decrease any obstacles for the enjoyment of their rights by Union citizens, in particular of the right to free movement and residence

Increase participation of EU citizens in democratic life in the Union

Facilitate the diplomatic and consular protection offered to the Union citizens in third countries

Policy sub-area level indicators:

Levels of citizens' awareness of their rights and mechanisms of redress (*Source: Surveys and Eurobarometer reports*)

Instances of right to free movement and residence hindered (*Source: complaints made to Commission*)

Rates of voting registration and participation – percentage of increase/decrease (*Source: Member States*)

Number of citizens standing for election to public office – percentage of increase/decrease (*Source: Member States*)

Instances of use and complaints from EU citizens over levels of consular protection (<i>Source: Member States</i>)						
Main instruments	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Directive 2004/38/EC on free movement and residence	Clarify and simplify existing Community law in field	Transposition into national legal systems	Relevant national laws adopted in line with Directive provisions and notified the Commission by 30.4.2006 together with a table of conformity. (<i>Source: Commission</i>)	Correct application of rules and provisions contained in the law <i>Measured by:</i> number of court cases/complaints resulting from the Directive (<i>Source: Commission</i>)	Facilitated free movement and residence	Evaluation leadership by the EU. Would benefit from strong involvement of MS in evaluation
Community legislation on the EP elections and on the right of non-national Union citizens' electoral rights in their country of residence	Ensure that the EP elections are conducted according to the basic principles of democratic elections Ensure the participation of non-national Union citizens to the EP elections and to the	Transposition into national legal systems	Relevant national laws adopted in line with provisions of Community law and notified to the Commission (<i>Source: Commission</i>)	Correct application of rules and provisions contained in the law <i>Measured by:</i> number of court cases/complaints resulting from the legislation (<i>Source: Commission</i>)	EP elections carried out democratically. Non-national Union citizens participate in the elections on the same conditions as nationals in EP elections and in municipal	

	municipal elections				elections.	
Fundamental Rights and Citizenship programme (part Citizenship)	Improve awareness of citizenship of the Union and related rights Encourage citizens to participate to actively to democratic life	Implementation of measures and projects.	Number of projects supported (studies conducted, activities undertaken) <i>(Source: programme monitoring system)</i> Number of 'beneficiaries' reached <i>(Source: programme monitoring system)</i>	Improved intelligence base <i>Measured by:</i> use of analytical results by policy makers <i>(Source: Commission and MS)</i> Dissemination of good practice in voter education and activation. <i>Measured by:</i> level of awareness of Programme's outputs <i>(Source: MS)</i>	Improved awareness of Union citizenship and related rights amongst EU citizens. Increased participation in democratic life.	Clear intervention logic. Evaluation would benefit from systematic surveys of public awareness.

Policy sub-area 2: Fundamental Rights

Global objectives:

Increase the awareness of fundamental rights amongst citizens. (This concerns the rights as protected on European Union and national level including the relevant regional and international instruments.)

Decrease instances of breaches of fundamental rights (including breaches of privacy, personal data protection and protection from violence against

children, women and youth) Reduce the instances of racism, anti-semitism and xenophobia Establish a Fundamental Rights Agency (from EUMC) Increase number of participants in and their commitments to civil society						
Policy sub-area level indicators: Levels of citizens' awareness of fundamental rights (<i>Source: Surveys and Eurobarometer reports</i>) Instances of breaches of fundamental rights, especially as a result of EU interventions (including breaches of privacy, personal data protection and protection from violence against children, women and youth) (<i>Source: Commission and FR Agency</i>) Instances of racism, anti-semitism and xenophobia (<i>Source: FR Agency</i>) Time commitments of population to participation in civil society (<i>Source: MS</i>) Number of civil society organisations in NMS since accession (<i>Source: MS</i>)						
Main instruments	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Relevant provisions of the Treaties on European Union and on European Community	Ensure that the EU institutions and the Member States fully respect fundamental rights	Compliance of the national legislation and practices with the fundamental rights	Community legislation as well as implementing national laws adopted in compliance with the Treaty	Correct application of rights and principles contained in the Treaty <i>Measured by:</i> number of court	Decreased level of breaches of FR Increased protection of rights of citizens	

				cases/complaints resulting from the legislation (<i>Source: Commission</i>)		
Fundamental Rights and Citizenship programme (part Fundamental Rights)	Improve awareness of FR as protected on European and national level Improve research base Improve intensity and quality of interfaith and intercultural dialogue in MS Improve tolerance in the EU Improve quality of civil society organisations Improve rule of law Decrease breaches	Implementation of measures and projects.	Number of projects supported (studies conducted, activities undertaken) (<i>Source: programme monitoring system</i>) Number of 'beneficiaries' reached (<i>Source: programme monitoring system</i>)	Improved intelligence base <i>Measured by:</i> use of analytical results by policy makers (<i>Source: Commission and MS</i>) Increased awareness of issues in focus under the action (<i>Source: public opinion surveys, Commission</i>)	Improved awareness of FR amongst EU citizens Stronger civil society in the MS	Clear intervention logic. Evaluation would benefit from systematic surveys of public awareness.

	of FR in MS					
Preparatory action to support civil society in the NMS in areas of rule of law, democracy, FR, media pluralism, fight against corruption.	Improve quality of civil society organisations in NMS Improved rule of law in NMS Improve democracy in NMS Decrease breaches of FR in NMS	Implementation of measures and projects.	Number of projects supported (studies conducted, activities undertaken) <i>(Source: programme monitoring system)</i> Number of beneficiaries reached <i>(Source: programme monitoring system)</i>	Increased awareness of issues in focus under the action <i>(Source: public opinion surveys, Commission)</i>	Stronger civil society in the NMS	Clear intervention logic but difficult to measure outcomes and impacts, in part because of the scale and scope of the underlying objectives. Strong involvement of MS in evaluation
Daphne II programme	Reduce violence against children, adolescents and women	Implementation of measures and projects.	Number of projects supported (studies conducted, activities undertaken) <i>(Source: programme monitoring system)</i> Number of good practices identified <i>(Source: programme monitoring system)</i>	Increased awareness of the issues in wider society <i>(Source: public opinion surveys, Commission)</i> Adoption of good practice in tackling violence <i>(Source: MS).</i> Better intelligence	Reduced violence against children, adolescents and women	Evaluation leadership by the EU. Major problems of data reliability at the level of impacts.

			Number of 'beneficiaries' and victims reached <i>(Source: programme monitoring system)</i>	base. <i>Measured by:</i> use of analytical results by policy makers <i>(Source: Commission and MS)</i> Number of knowledge and practitioner communities created <i>(Source: Commission).</i> Number of improved facilities for victims <i>(Source: programme monitoring system)</i>		
Fundamental Rights Agency	Improve the availability, quality, and comparability of information on respect and promotion of FR.	Participation in Agency's activities	Provision of data and analyses of FR. <i>Measured by: number of analytical outputs (Source: Agency)</i>	Better intelligence base. Measured by: use of analytical results by policy makers <i>(Source: Agency and Commission)</i>	Decreased level of breaches of FR	Evaluations of EU agencies have tended to focus on process issues. Whilst objectives are clear it will be difficult to assess

	Improve co-ordination between stakeholders Improve public awareness of their FR		Number of reporting activities (Source: Agency). Number of networks of stakeholders supported (Source: Agency).	Better co-ordination of activities. Increased public awareness (Source: public opinion surveys, Agency and Commission).		causality and measure the impacts of the agency.
Data Protection Directive	Facilitate the free movement of personal information within the EU Protect rights of individuals Conclude agreements with third countries	Transposition of Directive into national legal systems Establishment of National Data Protection Supervisory authorities	Relevant national laws adopted pursuant to the Directive provisions (Source: MS and Commission)	Application of rules and provisions contained in the law. Measured by: - Appropriate enforcement mechanisms and remedies available to ensure respect for the law and assistance to individuals through: a) Judicial remedies b) Intervention of data protection	Facilitated movement of personal information within the EU Harmonised protection of individuals at a high level (both inside the EU and in third countries for personal data transferred from the EU)	Evaluation leadership by the EU but in partnership with MS

				supervisory authority (ex officio or following complaints) <i>(Source: MS)</i>		
--	--	--	--	--	--	--

POLICY AREA: COORDINATION IN THE FIELD OF DRUGS

Factors influencing evaluation mechanism: Activities in this policy area are cross pillar and cover a variety of areas, including health, police cooperation, information, evaluation and coordination.

The EU Drug Action Plan and EU Drug Strategy are very important documents endorsed by the Council as the basic policy framework for all drugs issues within the EU and within the context of the EU's external relations. They cover all activities in this policy area and provide the guidelines for all Member States to implement the objectives and actions they contain into national policy. The Action Plan takes its lead from the objectives of the EU Drug Strategy and translates these objectives into 80 concrete actions. It concentrates on the two major aspects of drug policy, demand reduction and supply reduction, and also covers a number of cross-cutting themes: international cooperation, research, information and evaluation. It includes actions within EU competence (public health, precursor control, money laundering and development aid) as well as close cooperation between Member States and partnerships with international organisations.

The Action Plan furthermore covers monitoring and evaluation and includes assessment tools and indicators for each action. The actions covered by the Action Plan are subject to an annual progress review by the Commission's services. Evaluation in this area is already well-established through the methods and indicators developed during the evaluation of the previous EU Drugs Strategy and Action Plan. Reliable data is available from the European Monitoring Centre on Drugs and Drug Addiction, Europol and the Commission. As with other policies relating to complex, global socio-political issues, the evaluation of the impacts of EU drug policy is a problematical and sensitive matter due to the multiple factors that have to be taken into account and for which there may not be reliable data by their very nature (e.g. figures for trafficking in illicit drugs are always rough estimates; corruption caused by trade in drugs is hidden, etc.).

Objectives:

To significantly reduce the prevalence of drug use among the population and to reduce the social harm and health damage caused by the use of and trade in illicit drugs, and to strengthen international cooperation (EU Action Plan on Drugs 2005-2008)

Policy-level indicators:

The EU Action Plan contains the major legal instruments such as the Council Decision on the information exchange, risk assessment and control of new psychoactive substances, or the Framework Decision on penalties for drug trafficking. It also contains the assessment tools and indicators required for the evaluation process of these instruments and all other actions. These have been drawn up in cooperation with the

EMCDDA and Europol, who will help the Commission to keep track of implementation.

On this basis the Commission will publish an Annual Progress Review and if necessary propose adjustments. Responsibility for implementation of actions and deadlines are clearly indicated in the Plan. To keep implementation on track, targets whose deadlines have passed or are unlikely to be met will be subject to recommendations for their implementation or identification of failure to implement. The Commission will carry out an impact assessment in 2008 in view of proposing a second Action Plan for 2009-2012. A final evaluation of the Strategy and the Action Plans will be carried out by the Commission in 2012. These evaluations will go beyond the strict confines of the Action Plan and will include, on the basis of the work of the EMCDDA and Europol, a general view of the evolution of the drugs situation in Europe.

POLICY AREA: COMMON IMMIGRATION AND ASYLUM POLICIES
Factors influencing evaluation mechanism: New policy area. 1 st pillar activities. Interventions include legislation, programmes and cooperation activities. Good, comparable data is required and is planned. MS consensus about broad aims but not at individual instrument level. Impacts of these instruments on third-countries, and in particular development countries, to be considered.
Policy sub-area 1: Common European Asylum System
Objectives: To establish a common asylum procedure and uniform status, To facilitate practical and collaborative cooperation,

To address pressures on asylum systems and reception capacities.

Policy sub-area level indicators:

Number of asylum seekers applying for asylum in Member States other than the country of first entry (*Source: Eurodac*)

Instances of MS breaching minimum defined standards (*Source: Commission*)

Differences in standards of reception between Member States (*Source: Commission*)

Differences between Member States with regard to the average time taken to determine the outcome of an application for asylum (*Source: MS and Commission*)

Comparison of asylum acceptance rates among Member States¹¹ (*Source: Commission - Eurostat*)

Differences in the level of capacity per Member State (asylum systems and reception facilities) relative to needs (*Source: Member States*)

Main instrument (and type of instrument)	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Dublin Regulation (Council Regulation (EC) No 343/2003 of 18 February 2003 establishing the criteria and mechanisms for	To reduce 'asylum shopping' To increase responsibility sharing among	Adoption of measures implementing the Regulation at national level	Number of take back requests (<i>Source: Commission – Eurostat</i>) Number of applicants sent to another Member State (<i>Source:</i>	Decreased delay in the examination of claims and attribution of responsibility <i>Measured by:</i>	Increased sharing of responsibility Greater efficiency and effectiveness in implementing decisions on transfers	Numbers are available through Eurodac which allows for an assessment of trends. Evaluation of the 'Dublin

¹¹ Asylum acceptance rates can at the moment only be roughly estimated with the data currently available, as asylum decisions in one year often relate to applications made in earlier years.

Policy sub-area 2: Legal and illegal migration						
Objectives: To establish admission procedures capable of responding to fluctuating demands for migrant labour						
Policy sub-area level indicators: Skill shortages in vocations and professions (<i>Source: Commission - Eurostat, MS Labour Force Surveys, EEO</i>) Employment rates amongst migrant groups (<i>Source: Commission - Eurostat, MS Labour Force Surveys</i>) Estimation of the numbers of migrants overstaying the duration of their work permits (<i>Source: MS</i>)						
Main instrument (and type of instrument)	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Family reunification Directive (Council Directive 2003/86/EC of 22 September 2003 on the right to family reunification)	Determine conditions for the exercise of the right to family reunification by TCNs.	Transposition into national legal systems.	Reduction of disparities among Member States <i>Measured by:</i> Changes made to national legislation (<i>Source: MS and Commission</i>) Numbers of MS achieving minimum standards or above (<i>Source: Commission</i>)	Improved efficiency of procedures <i>Measured by:</i> Number of family members reunited (<i>Source: MS</i>) Reduced length of process: average delay before and after (<i>Source: MS</i>)	Facilitated procedures for family reunification Protection of right to family life	Common standards difficult to achieve as Directive allows scope for interpretation.

Directive on status of TCNs as long-term residents	Approximate national laws by creating a single status. Ensure equal treatment of TCNs throughout the EU.	Transposition into national legal systems.	Reduction of disparities among Member States <i>Measured by:</i> Changes made to national legislation (Source: MS and Commission) Numbers of MS achieving minimum standards or above (Source: Commission)	Equal treatment of TCNs <i>Measured by:</i> Numbers granted/refused status (Source: MS) Increased number of TCNs accessing employment, education and training (rate of increase) (Source: MS) Increased mobility of TCNs <i>Measured by:</i> Number of TCNs moving from one MS to another (Source: Commission)	Approximation of national laws Equal treatment and application of uniform rights for TCNs across the EU Improved mobility of TCNs Improved integration of TCNs	Common standards difficult to achieve as Directive allows for scope for interpretation
--	--	--	---	---	--	--

Directive on the admission of TCNs for the purposes of studies, pupil exchange, unremunerated training or voluntary service	To promote Europe as a world centre of excellence for studies and vocational training by promoting the mobility of TCNs to the Community for the purpose of studies The approximation of the Member States' national legislation on conditions of entry and residence	Transposition into national legal systems.	Approximation of national legislation <i>Measured by:</i> Changes made to national legislation (Source: MS and Commission) Numbers of MS achieving minimum standards or above (Source: Commission)	Increased mobility of TCNs to the Community for the purposes of study/vocational training <i>Measured by:</i> Numbers granted entry for study/vocational training/voluntary service (Source: MS)	Approximation of national laws Improved mobility of TCNs for study, vocational and volunteer purposes	Common standards difficult to achieve as Directive allows for scope for interpretation
Policy sub-area 3: Integration of third-country nationals						
Objectives: To prevent the isolation of certain groups and achieve successful integration of Third Country Nationals and their descendents To fight discrimination against legally residing Third Country Nationals						

To promote the exchange of experience and information

Policy sub-area level indicators:

Instances of discrimination (*Source: FR Agency, MS*)

Employment rates of third country nationals (*Source: Commission - Eurostat, MS*)

Employment rates of second generation migrants (*Source: SOPEMI Report, MS*)

Relative income levels of third country nationals (*Source: Commission - Eurostat, MS*)

Proportion of third country nationals living in poverty (*Source: Commission - Eurostat, MS*)

Main instrument (and type of instrument)	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
INTI preparatory actions (integration of TCNs)	Promote new and innovative ways of integrating immigrants. To encourage co-operation between MS and the creation of transnational partnerships and networks.	Disbursement rate/amount spent per year	Successful implementation REFINE	Identification of new and innovative practices	Increased cooperation among MS through networks and cooperation activities	Integration policies are implemented mainly at regional and local levels in MS. Differences exist among MS in terms of numbers of migrants and integration
			<i>Measured by:</i> Numbers of projects and activities implemented and average sums of money involved (<i>Source: MS + Commission</i>)	Exchange of information and best practices promoted among EU MS	Increased dialogue with civil society Enhanced integration of TCNs	
			Number of TCNs	Transnational networks and dialogue between	Development and promotion of a European framework	

	Enhance empowerment of migrants. Promote dialogue with civil society.		benefiting from projects Increased cooperation <i>Measured by:</i> Number of transnational networks set up (<i>Source: MS + Commission</i>) Number of new integration models identified and exchanged among MS	stakeholders supported among MS	approach on integration of TCNs	experience. Potential impacts may not be significant considering that this is a small fund with very diverse projects. Final evaluation is planned for 2007.

Policy sub-area 4: External dimension of asylum and migration

Objectives: Assist third countries in migration management, intensify MS cooperation to manage migration flows and prevent humanitarian crises, integrate migration into third country relations, develop policies that link migration, development cooperation and humanitarian assistance, intensify cooperation with third countries on southern and eastern border of EU

Policy sub-area level indicators:

Increase/decrease over a 5-year period of:

Numbers of legal migrants by third country (*Source: Commission - Eurostat*)

Numbers of illegal migrants by third country intercepted crossing an external border (*Source: Commission – Eurostat*)

Numbers of visa overstayers by third country intercepted (*Source: MS*)

Numbers of asylum applications by third country (*Source: Commission - Eurostat*)

Numbers of failed asylum applications by third country (*Source: Commission - Eurostat*)

Numbers of failed asylum seekers returning to country of origin /other third country (*Source: MS*)

Number of victims of trafficking from third countries (*Source: MS*)

Main instrument (and type of instrument)	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Programme for financial and technical assistance to third countries (AENEAS)	Give specific and complementary financial and technical aid to third countries in order to support their efforts to improve the management of migratory flows Develop legislation in third countries on legal immigration and international protection	Not applicable (action is at Community level)	Successful implementation <i>Measured by;</i> Number of information campaigns organised on advantages of legal migration/consequences of illegal migration in third countries (<i>Source: Commission</i>) Number of returnees benefiting from reintegration programmes (<i>Source: Commission</i>)	Development of legislation in third countries <i>Measured by:</i> New legislation passed in third countries on legal and illegal migration (<i>Source: Commission</i>) Decreased number of illegal migrants entering the EU <i>Measured by:</i>	Improved management of migration flows Decrease in illegal migration and trafficking Increased awareness in third countries on advantages of legal migration/consequences of illegal migration Successful reintegration of returnees	High number of external factors to the programme influence impact indicators. Causality links difficult to establish. As action is at Community level, MS will not contribute to evaluation. May be difficult to evaluate as this is a new area which is also

	Raise public awareness in third countries on advantages of legal migration and consequences of illegal migration Establishment in third countries of preventive policy in the fight against illegal migration Readmission and durable reintegration of returnees			rate of decrease (Source: Commission)		highly political. A Communication on the future of the AENEAS fund was adopted in January 2006.
Policy sub-area 5: Return and re-admission						
Objectives: To establish an effective removal and repatriation policy based on common standards for persons to be returned in a humane manner and with full respect for their human rights and dignity.						
Policy sub-area level indicators: Increase/decrease over a 5-year period of: Proportion of failed asylum seekers (and illegal migrants) who are repatriated (Source: MS)						

Numbers returned to countries subsequently deemed unsafe within a period of two years (*Source: MS*)

Numbers (of labour market age) in employment in country of origin 12 months after being subject to return

Main instrument (and type of instrument)	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Preparatory actions for Return Management	To support efforts made by MS to improve the organisation and implementation of integrated return management and specific measures in the area of return management	Disbursement rate/amount spent per year	Number of actions implemented relating to the introduction and improvement of the organisation and implementation of integrated return management (<i>Source: Commission</i>)	Increased number of returnees <i>Measured by:</i> rate of increase (<i>Source: MS and Commission</i>)	The strengthening of efforts made by Member States at improving the organisation and implementation of integrated return management	
	To increase knowledge and capabilities in the area of return management		Number of actions implemented relating to the introduction and improvement of specific measures in the area of return management (<i>Source: Commission</i>)	Reduction in cost of detaining illegal migrants <i>Measured by:</i> rate of reduction (<i>Source: MS and Commission</i>)	Improved organisation and implementation of integrated return management Increased knowledge and capabilities in return management	
	To develop co- operation between MS with respect to		Number of actions implemented relating to the increase of knowledge and capabilities in the area of return management		Increased cooperation between MS and countries of return with respect to return management	

	return management as well as co-operation with countries of return To promote sustainable return, thereby avoiding secondary movements		(Source: Commission)		Reduction in illegal migrants living in the Member States (overstayers) Increased removal of illegal third country nationals Decrease secondary movements Improved return conditions	
Re-admission agreements	To facilitate the readmission to their own country of persons residing without authorisation in a Member State. To combat illegal immigration To improve the effectiveness of return	(These are reciprocal agreements between the EU and third countries.)	Successful implementation of the agreements <i>Measured by:</i> Number of persons readmitted to third countries covered by the agreements	Increased number of returnees <i>Measured by:</i> rate of increase (Source: Commission and MS) Reduction in cost for detaining illegal migrants <i>Measured by:</i> rate of reduction (Source: MS)	Decrease in illegal immigration Improved effectiveness of return procedures	Agreements have been signed with Hong Kong, Macao, Albania, Sri Lanka and Russia. Others are currently being negotiated.

	procedures					
Policy sub-area 6: Horizontal issues						
Main instrument (and type of instrument)	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Proposed mutual information procedure on planned national asylum and immigration measures	Enhance mutual information of national immigration and asylum policies between MS policy-makers	Cooperation by MS	Successful implementation of procedure <i>Measured by:</i> Number of national measures submitted through the system Number of responses generated to requests for information (Source: MS + Commission) Meetings organised (Source: MS + Commission)	Increased knowledge of other Member State policies and measures	Anticipation of effects of changes to other national policies Better understanding of other national contexts could lead to an enhancement of the possibilities for harmonisation	Procedure yet to be implemented. Implementation could start in 2007.
European Migration Network	Provide the Community and MS with objective,	Organisation of activities at national level by national contact	Successful implementation of network	Better and faster access to information on migration and	Increased knowledge and understanding of the migration phenomenon at	Proposal and impact assessment due by September

	reliable and comparable information on migration and asylum.	points	<i>Measured by:</i> Number of products produced (<i>Source: MS + Commission</i>) Number of meetings and conferences held (<i>Source: MS + Commission</i>) Number of networks set up at national level (<i>Source: MS</i>)	asylum Increased knowledge of issues at national level Increased information sharing between actors	Member State and EU level Increased capacity to “anticipate” migratory developments	2006 for a Council Decision on the future EMN.
Proposed Regulation on Community statistics on migration and international protection	Improve the statistical knowledge of migration-related phenomena by specifying the data to be collected, the timetables to be applied, the definitions and the quality standards.	Adoption of measures at national level	Successful implementation of Regulation <i>Measured by:</i> Increased proportion of statistical data items supplied according to the harmonised definitions as opposed to national definitions (<i>Source: MS</i>) Increased proportion of statistical data items directly based on	Increased availability of data Improvement to quality and comparability of data between Member States <i>Measured by:</i> Improvements in the completeness, timeliness and degree of harmonization of	Improved analyses of data Improved statistical knowledge	Regulation will probably be adopted in 2006. First reference year for the statistics will be 2008.

	authorities To improve the overall efficiency of national administrations in their tasks		<i>(Source: Commission)</i>			
--	--	--	------------------------------------	--	--	--

POLICY AREA: ESTABLISHING A GENUINE EUROPEAN AREA OF JUSTICE IN CRIMINAL AND CIVIL MATTERS

Factors influencing evaluation mechanism:

The policy area includes both first pillar (civil justice) and third pillar (criminal justice) matters. The main instruments are legislation including the introduction of new legal instruments and activities to stimulate judicial cooperation. Evaluation should cover the implementation of mutual recognition instruments and the various flanking (confidence building) measures that make mutual recognition possible. The potential to identify the causal links between the interventions and the achievement of objectives is greater within civil matters than criminal matters. Information on the scale and nature of the relevant (cross border) civil and criminal matters is however poor. The instruments in both sub policy areas are potentially reinforcing. The classification of the instruments within the civil matters sub policy area relate to both process (cooperation and procedures) and to substantive problems addressed by the instruments (cross border disputes and breakdown of international marriages). There is also a miscellaneous sub category. The achievement of a European area of justice in criminal matters may be constrained by continued variations in definitions of crimes and penalties. Several of the instruments mentioned under civil matters are 'forthcoming'. They are included however because they illustrate aspects of the evaluation challenges in this policy area. The Judicial training instrument is relevant to both sub policy areas. There are close links between the instruments and objectives of the policy sub area 2 Criminal matters, and the objectives and activities in the policy area: law enforcement cooperation, prevention and fight against organised crime. Also, it should be noted that adjustments to the indicators put forward in criminal matters may take place in light of the implementation of the forthcoming Action Plan on statistics in the field of crime and criminal justice (see more expanded reference on page 49).

Policy sub-area 1: Civil matters

Objectives:

To increase mutual recognition and enforcement of judicial decisions

To establish clear rules on jurisdiction and applicable law

To reduce the costs of resolving cross border disputes

To increase the likelihood that cross border disputes are resolved

To reduce the likelihood of cross border disputes arising

To reduce the negative consequences of breakdowns in ‘international’ marriages and prevent child abduction

Policy sub-area level indicators:

Number of mutually recognised judicial decisions

Average costs (of different types) of cross-border disputes

Number of cross-border cases not resolved

Spouses’ (perceptions of) costs of international divorces

The number and amount of cross-border maintenance claims not paid

Source: MS

Main instrument	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Horizontal cooperation activities						
Specific programme ‘Civil justice’ (Framework Programme 2007-2013 Fundamental Rights and Justice)	To increase mutual confidence of judicial actors. To increase instances of mutual recognition. To reduce application of	Participation in and support for cooperation programme.	Number of meetings, workshops. Numbers of legal, judicial and administrative authorities involved in cooperation.	Increased knowledge of Member States legal and judicial systems in civil matters. Measured by: Levels of knowledge	Mutually recognised decisions acted upon/ enforced. Increased legal certainty. Improved access to justice.	Establishing causal links between the interventions and outcomes and impacts will be problematic

	intermediate procedures.		<i>Source: programme monitoring system</i>	amongst relevant authorities (<i>Source: MS surveys</i>)	Decreased costs and time spent in accessing justice due to disparities in civil law and civil procedures.	
European judicial network in civil and commercial matters	To improve and facilitate co-operation in civil justice matters To facilitate access to justice and information To reduce costs of access to information on international and European law and national judicial systems by EU nationals (and therefore increase access).	Participation in and support for cooperation programme.	Meetings, publications website. Numbers of legal actors involved in cooperation. <i>Source: Network management reports (Source: Commission)</i>	Hits and usage of website (<i>Source: Commission</i>)	Improved access to justice and quality of advice on cross (internal) border issues. Improvement of judicial cooperation between MS and courts	Establishing causal links between the interventions and outcomes and impacts will be problematic
<i>Rules on procedures</i>						
Regulation on jurisdiction and the recognition	To harmonise national rules of conflict of	Implementation	Harmonised Community rules	Simpler and quicker procedures to recognise and	Better and quicker access to justice	Clear intervention logic

and enforcement of judgements in civil and commercial matters (Brussels I 44/2001)	jurisdiction To simplify procedures for recognition and enforcement of judgements from MS		<i>(Source: MS reporting to Commission)</i>	enforce the judgements Measured by: Length of time taken to recognise and enforce the judgements <i>(Source: MS)</i>	Prevent conflict of jurisdiction	
Regulation on taking evidence in civil and commercial matters (1206/2001)	To improve, simplify and speed up procedures for taking evidence between the courts of different MS	Implementation	Establishment of facilitated cross-border procedures between courts in different MS for taking evidence <i>(Source: MS reporting to Commission)</i>	Quicker and more efficient judicial procedures Measured by: Length of time taken to take evidence between courts <i>(Source: MS)</i>	Better and quicker access to justice	Clear intervention logic.
Regulation on the service of documents in civil and commercial matters (Regulation 1348/2000)	To increase efficiency and speed in judicial procedures To improve and expedite the transmission of	Implementation	Establishment of common rules on transmission of judicial and extrajudicial documents between	Quicker and more efficient judicial procedures Measured by: Length of time taken to transmit	Better and quicker access to justice Quicker judicial procedures	Clear intervention logic.

	documents between MS		MS(<i>Source: MS reporting to Commission</i>)	the documents and enforce judgements (<i>Source: MS</i>)		
Directive on legal aid in cross-border disputes (Council Directive 2003/8/EC)	To guarantee adequate level of legal aid in cross-border disputes through establishing minimum common standards between MS	Implementation	Minimum common standards relating to legal aid in cross-border disputes (<i>Source: MS reporting to Commission</i>)	Adequate levels of legal aid in cross-border disputes (<i>Source: MS</i>)	Improved access to justice, especially of vulnerable groups	Clear intervention logic.
<i>Resolution of cross border disputes</i>						
European payment order (forthcoming)	To reduce the costs and time taken to make payments. To increase the number of cross-border orders for payment	Implementation	Numbers of cross-border orders for payment made	Reduction of intermediate procedures	Reduced costs and time of litigation in cross-border cases concerning uncontested pecuniary claims. Improved access to justice. Facilitated recovery of cross-border debts	Establishing causal links between the interventions and outcomes and impacts will be problematic. Proposal yet to be adopted.

European enforcement order for uncontested claims (Regulation 805/2004)	To enable quick and efficient enforcement of an uncontested claim between MS	Implementation	Number of applications of European enforcement order in EU MS (Source: MS)	Quicker and more efficient enforcement of uncontested claims in another MS Measured by: Length of time needed to enforce such a claim (Source: MS)	Reduced costs and time in such cross-border cases Improved access to justice	Establishing causal links between the interventions and outcomes and impacts will be problematic
Instrument on Alternative Dispute Resolution (ADR)	To reduce the costs of dispute resolution To facilitate recourse to mediation by improving legal certainty	Implementation	More possibilities and better awareness of possibilities for ADR	More attempts to use ADR	Reduced costs of dispute resolution More disputes resolved without going to court	Establishing causal links between the interventions and outcomes and impacts will be problematic
Instrument on small claims	To facilitate cross-border access to justice for small claims To reduce the costs and time taken to resolve	Implementation	Application of Small Claims Procedure in the 25 EU MS (Source: MS)	Increased number of small claims pursued. (Source: MS)	More small claims resolved. Increased legal certainty. Increased access to justice.	Proposal yet to be adopted.

	small claims. To increase the number of legitimate small claims made.					
<i>Marriage and divorce law</i>						
Instrument on maintenance obligations	To improve and simplify enforcement procedures of maintenance obligations. To enhance cooperation. To clarify what is applicable (non-conflicting) law	Implementation	Application of Regulation in maintenance obligations proceedings in 25 EU MS (Source: MS)	Reduction of intermediate procedures. Reduced cases of forum shopping Increased cooperation between legal professionals / competent authorities in the Member States (Source: MS)	Increased legal certainty Better informed decisions Mutually recognised decisions acted upon/ enforced. Facilitated recovery of debts (maintenance for creditors)	Instrument is at the Council discussion stage. Establishing causal links between the interventions and outcomes and impacts will be problematic. Evaluation requires good data from the Member States.
Regulation on jurisdiction and recognition and enforcement of judgements in matrimonial	To harmonise rules of jurisdiction To enable automatic	Implementation	Establishment of harmonised rules on jurisdiction (Source: MS)	Quicker and more efficient recognition and enforcement of judgements	Better access to justice Better protection of citizens in case of divorce	Evaluation requires good data from the Member States.

matters and parental responsibility (Brussels II, 2201/2003)	recognition and enforcement of judgements between MS			Measured by: Length of time taken to recognise and enforce a judgement (Source: MS)	Facilitated visiting rights for parents Better protection of children's rights	
<i>Various</i>						
Instrument on the conflict of laws in the area of contractual obligations (Rome I).	To reduce costs associated with differences regarding non-contractual obligations To increase party autonomy and flexibility To increase legal certainty for consumers and internal market	Implementation	Numbers of cross-border disputes settled Application of conflict of law rules in the MS (Source: MS)	Improved mutual trust between judicial authorities Faster procedures. (Source: MS)	Reduced uncertainty. Reduced costs. Facilitated mutual recognition of international contracts	Proposal in discussion stage.
Proposal for a regulation on the law applicable to non-contractual obligations (Rome	To harmonise rules on non-contractual obligations	Implementation	Provision of a set of community rules Application of	Improved mutual trust between judicial authorities Faster procedures.	Reduced legal uncertainty. Better access to justice	Establishing causal links between the interventions and outcomes and impacts

II, COM(2003) final)	To increase legal certainty		rules in the MS (Source: MS)	(Source: MS) Increased legal certainty for victims of damages and perpetrators of torts	Reduced costs of accessing justice	will be problematic
Regulation on insolvency proceedings (1346/2000)	To improve efficiency and effectiveness of cross-border insolvency proceedings To prevent shopping for a more favourable legal position	Implementation	Provision of a set of community rules Application of rules in the MS (Source: MS)	More efficient and effective cross-border insolvency proceedings Prevention of shopping for a more favourable legal position Measured by: Time taken for proceedings Perceptions of shopping amongst legal professionals (Source: MS, surveys)	Better access to justice Reduced costs of accessing justice Better resolution of cross border insolvencies Better cooperation between courts and administrators of insolvency	Clear intervention logic
Directive on	To facilitate better	Implementation	Co-operation	Better access to	Better access to	Clear intervention logic

compensation to crime victims (2004/80/EC)	access for victims to compensations where crime was committed in another MS To establish a compensation mechanism in such cases		mechanism between MS set up (Source: MS)	compensation to victims of crimes in cross-border situations (Source: MS)	justice Better compensation for victims of cross-border crime in Europe	
Policy sub-area 2: Criminal matters (Justice)						
Objectives: To promote mutual recognition To increase confidence and other conditions leading to mutual recognition To reduce differences in the definition of crimes. In particular, to explore common definitions and procedures for human trafficking and cross border crimes To reduce differences in detention and trial procedures To improve taking of evidence To reduce differences in penalties To speed up cross border arrest and surrender procedures To facilitate cross border management, freezing and confiscation of criminal assets To protect victims of crime						

Policy sub-area level indicators:

Number of mutually recognised judicial decisions

Extent of mutual confidence: proportion of officials in national administrations who have high confidence in other MS systems (measured by surveys of national authorities)

Level of awareness of judicial actors of other MS systems

Number of definitions of crimes approximated

Number of reduced differences in detention and trial procedures and definition of penalties

Length of cross-border arrest and surrender procedures

Size of criminal assets frozen and confiscated in cross-border cases

Source: MS

Main instrument (and type of instrument)	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
European arrest warrant and the surrender procedures between Member States (Council Framework Decision of 13 June 2002 on the	To facilitate and expedite surrender procedures in respect of persons wanted for trial and sentenced persons between Member States	Transposition	Numbers of arrest warrants issued, executed and refused Numbers of persons surrendered and of persons received from other Member	Faster and simpler surrender procedures <i>Measured by:</i> Average duration of surrender procedures (<i>Source: MS</i>)	Increased visibility of mutual recognition, better knowledge of each other's judicial systems and increased mutual confidence	Requires good data from MS. MS must actively participate in evaluation.

European arrest warrant and the surrender procedures between Member States (2002/584/JHA))			States and numbers of persons consenting to surrender. (Source: MS)		between judicial authorities. Increased security and safety within the EU	
Instrument on the execution of orders freezing property or evidence (Council Framework Decision 2003/577/JHA of 22 July 2003)	To facilitate recognition and execution of freezing orders issued by a judicial authority of another Member State	Transposition	Number of freezing requests issued and executed (Source: MS)	Increased efficiency and effectiveness of freezing orders <i>Measured by:</i> Faster procedures to freeze assets Increased use of procedures to freeze assets Increased speed of national procedures as a consequence of freezing order Improved access to evidence obtained/ Improved recovery of assets	Increased efficiency of procedures; increased mutual confidence between judicial authorities. Decreased levels of organised crime (<i>Source: Europol reports</i>)	Requires good data from MS.

				(Source: MS)		
Instrument on the application of the principle of mutual recognition to financial penalties (Council Framework Decision 2005/214/JHA of 24 February 2005)	To facilitate the enforcement of financial penalties imposed by judicial or administrative authorities in a Member State other than the State in which the penalties were imposed.	Transposition	Number of decisions and issued and executed (Source: MS)	Faster and more effective procedures to ensure enforcement of financial penalties Measured by: Average length of procedures (Source: MS)	Dissuasive effect to potential criminals and decreased level of financial crime Increased visibility of mutual recognition, better knowledge of each other's judicial systems and increased mutual confidence between judicial authorities.	Requires good data from MS. Difficult to measure causal links between outcomes and impacts
Instrument on the exchange of information extracted from the criminal record (Council Decision 2005/876/JHA of 21 November 2005)	To improve exchanges of information on criminal records between Member States	Voluntary compliance	Number of requests sent , number of replies sent -for the purpose of criminal proceedings, and - for other purposes Respect of	Improved knowledge available to sentencing authorities about the convicted person's full European criminal record. Improved circulation of information on criminal records for other purposes (e.g.	Dissuasive effect to potential criminals and hence decreased levels of crime Increased visibility of mutual recognition, better knowledge of each other's	Requires good data from MS. Difficult to measure causal links between outcomes and impacts

			deadlines <i>(Source: MS)</i>	employment) Improved quality of information on criminal records from abroad in the Member State of nationality <i>(Source: MS)</i>	judicial systems and increased mutual confidence between judicial authorities. More appropriate and better informed sentencing decisions	
Instrument on the standing of victims in criminal proceedings (Council Framework Decision of 15 March 2001)	To assist victims before or after criminal proceedings	Transposition	Application of rules the instrument <i>(Source: MS)</i>	Better information for victims on legal advice and on their rights, protection for vulnerable victims and more appropriate methods of obtaining evidence Improved situation for victims in relation to criminal proceedings <i>(Source: MS)</i>	Raised awareness of victims' rights amongst practitioners <i>Measured by MS surveys</i> Better access to justice	Requires good data from MS.

5.1. POLICY AREA: LAW ENFORCEMENT COOPERATION AND PREVENTION OF AND FIGHT AGAINST GENERAL ORGANISED CRIME

Factors influencing evaluation mechanism: Policy based on the TEU Title VI (third pillar). Activities include legislation, including the approximation of crimes and penalties and cooperation measure. Establishing causal links between the EU interventions and the ultimate objective of reducing crime is always likely to be problematic. The current factsheet intends to facilitate the assessment of the implementation of EU instruments in this area. Full fledged evaluation will require substantial improvements in the quality and availability of statistical information in the field of crime and criminal justice. The forthcoming Action Plan in this field (to be adopted by the Commission in July 2006) will address these issues and put forward concrete proposals, including carrying out an inventory and setting-up an expert group. In this context, this factsheet and the indicators included therein will necessarily be adjusted and improved in the light of the implementation of the Action Plan, and could be used as a starting point for discussions in this field.

Policy sub-area 1: Crimes and Sanctions (i.e. legislation to fight organised (cross border) crime and terrorism)

Objectives:

To combat:

- Terrorism
- Smuggling and trafficking of human beings,
- Sexual exploitation, racism and xenophobia,
- Financial and economic crime,
- Environmental crime,
- Illicit trafficking in goods,
- Organised crime and cyber crime.

To reduce the financial resources available to those involved in organised crime

To criminalise active and passive corruption

Policy sub-area level indicators:

Numbers and trends of successful prosecutions for (Source: *UN crime and criminal justice trends surveys, European sourcebook of criminal justice statistics, Commission crime and criminal justice statistics*):

- Smuggling and trafficking of human beings,
- Sexual exploitation,
- Financial and economic crime,
- Environmental crime,
- Illicit trafficking in goods (including firearms),

Numbers of successful prosecutions for organised crime (Source: *UN crime justice and crime trends surveys, European sourcebook of criminal justice statistics, Commission crime and criminal justice statistics*)

Numbers of prosecutions for active and passive corruption (Source: *UN crime justice and crime trends surveys, European sourcebook of criminal justice statistics, Commission crime and criminal justice statistics*)

Perception of levels of active and passive corruption (Source: *Transparency International survey*)

Numbers of crimes subject to EU interventions and instruments (Source: *UN crime justice and crime trends surveys, European sourcebook of criminal justice statistics, Commission crime and criminal justice statistics*)

Financial and economic crime						
Council Framework Decision (FD) of 22 July 2003 criminalising corruption in private sector	Criminalise active and passive corruption	Implementation of FD	Application of FD provisions. <i>Measured by:</i> New crimes detected as a result of FD Number of detentions resulting from FD <i>Source: MS)</i>	Successful prosecutions resulting from FD <i>(Source: MS)</i>	Reduced corruption in private sector. <i>(Source: Transparency International surveys)</i>	
FD on money laundering and counterfeiting of	Criminalise fraud involving any form of non-	Implementation of FD	Application of FD provisions.	Successful prosecutions resulting from FD	Reduced money laundering and counterfeiting of	

non-cash payments	cash means of payment in all MS		<i>Measured by:</i> New crimes detected as a result of FD Number of detentions resulting from FD <i>Source: MS)</i>	(<i>Source: MS</i>)	non-cash payments (<i>Source: national criminal justice statistics</i>)	
Illicit trafficking in goods						
Proposal for a regulation on import/export licensing system for firearms	Reduce firearms trafficking. Harmonize the regime for import and export of firearms.	Establishment of the system	Application of the regulation <i>Measured by:</i> Numbers of arms licensed (<i>Source: MS</i>)	Increased control over imports and exports of firearms <i>Measured by:</i> perceptions of law enforcement agencies (<i>Source: MS</i>)	Reduced firearms trafficking Reduced use of illicit firearms	Clear intervention logic (forthcoming) The instrument is relevant to borders policy area.
Organised crime						
Council Framework Decision 2001/500/JHA	Approximate definitions, incriminations and sanctions	Implementation of FD	Application of rules and provisions contained in FD	Assets frozen and confiscated. <i>Measured by:</i>	Reduced money laundering Reduced crime	Regular monitoring reports from the Commission

of 26 June 2001 relating to money laundering, identification, tracing, freezing or seizing and confiscation of the instrumentalities and proceeds from crime	Improve mutual legal assistance in the investigation and prosecution of this type of crime		<i>Measured by:</i> Instances of suspicious transactions reported to entities subject to reporting obligations Penalties resulting from FD Prosecutions resulting from FD Reduction of the differences in maximum penalties among MS <i>(Source: MS, Commission)</i>	Effective judgments pronounced Amounts frozen and confiscated <i>(Source: MS)</i>	<i>Measured by:</i> Perceptions of law enforcement agencies.	Identifying cases specifically linked to the FD may be problematic (This instrument might fit better under financial crime although it is about enacting penalties and might better fit under Justice criminal matters. Evaluation need to be done in combination with the third money laundering directive).
Proposal for a FD on fight against organised crime (2005)	Harmonise the definition of offences and penalties Facilitate	Implementation of FD	Application of rules and provisions contained in FD. <i>Measured by:</i> Better harmonised	Increased judicial co-operation <i>Measured by:</i> Trials and successful	Reduced organised crime <i>Measured by:</i> Perceptions of law enforcement	Difficult to measure impacts Identifying cases specifically

	cooperation between judicial authorities and coordinate their activities.		definition of offences and penalties. Instances of judicial cooperation <i>(Source: MS, Commission)</i>	prosecutions resulting from FD <i>(Source: MS)</i>	agencies.	linked to the FD may be problematic (This too might better fit under Justice criminal matters policy area)
Directive on the residence permit issued to third-country nationals who are victims of trafficking in human beings or who have been the subject of an action to facilitate illegal immigration, who cooperate with the competent authorities. (April 2004)	Reduce organised crime participation in illegal migration and human trafficking Facilitate victims giving evidence against suspected criminals	Implementation of Directive	Application of rules and provisions contained in Directive <i>Measured by</i> Instances of residence permits issued <i>(Source: MS)</i>	More victims testifying against suspected criminals Successful prosecution of suspected criminals <i>(Source: MS)</i>	Reduced organised crime participation in illegal migration and human trafficking <i>Measured by:</i> Perceptions of migration and law enforcement agencies.	This instrument is relevant to borders policy area. (It does not fit easily in this sub category.)

Policy sub area 2: Cooperation and exchange of information to enforce the law.

(The architecture of the instruments in this sub policy area is such that the instruments should be reinforcing. Capturing these synergies in evaluation work would be of value)

Objectives:

To increase cooperation between police and customs authorities of MS

To increase cooperation of MS police and customs authorities with Europol

To develop and improve use of ‘intelligence led law enforcement’ and Joint Investigation Teams

To encourage exchange of experiences on best practice on investigative techniques

To improve the quality of Member States law enforcement data with the assistance of Europol

Policy sub-area level indicators:

Number of formal joint investigations

Number of informal joint investigations

Number of successful prosecutions resulting from joint investigations (formal and informal)

Number of successful prosecutions resulting from the adoption of best practice investigative techniques

Extent of mutual confidence: proportion of officials in national administrations/law enforcement authorities who have confidence in other MS systems (measured by surveys of national authorities)

Periods of time (person days) on (trans-national) exchanges of staff

Source: MS

Main instrument	Objectives	Implementation at national level	Indicators/evaluation questions			Specific issues /comments
			Immediate results	Outcomes	Impacts	
Schengen Information System (SIS) II	Sharing of information among MS in order to refuse entry on the basis of uniform practices	Consistent input and further use of information among MS	Quality and a Availability of SIS II information for competent national authorities <i>Measured by:</i> Number of records per category <i>(Source: MS and Commission)</i>	Success in using SIS information. <i>Measured by:</i> Number of correctly identified persons who should be refused entry and wanted goods discovered <i>(Source: MS)</i>	Reduced permeability of the external border. Increased confidence to promote ‘free movement’ policies.	Clear intervention logic. Evaluation methods – analysis of trends and process changes. Commission responsible for evaluation co-ordination and analysis, MS for information analysis. Most of the analysis will depend upon information from MS. Evaluation will be very difficult.
Common position on the	To prevent and combat serious	Exchange of data with Interpol	Number of data records forwarded to	Enhanced cooperation	Decreased illicit

Impacts may only be assessed sometime following emergencies. Some scope for peer review

ANNEX 2

Current practice for monitoring and evaluating EU policies on freedom, security and justice

1. MONITORING

1.1. The Tampere scoreboard

The Tampere European Council in 1999 invited the Commission to compile a **scoreboard** to keep implementation of policies on freedom, security and justice under continuous review. The scoreboard would specifically keep track of progress made with implementation of the measures and compliance with the deadlines set in the Amsterdam Treaty, the Vienna Action Plan and the Tampere programme. In response, the Commission produced its first scoreboard in March 2000, followed by regular updates every six months taking into account the objectives set by the European Councils in Laeken (2001), Seville (2002) and Thessaloniki (June 2003). The last Tampere scoreboard was presented in June 2004, marking the end of the first five-year period (1999-2004).

The scoreboards indicated the objectives and deadlines set at Tampere and in each case the responsibilities assigned to launch, advance and complete the process. To provide a clear view of the progress made in each area, the scoreboard showed the outstanding proposals and initiatives presented, progress in Council and European Parliament proceedings and the work planned. A specific section of the scoreboard focused on transposition of the instruments adopted.

1.2. Reviewing implementation of EU legislation

1.2.1. Instruments adopted under the EC Treaty

Implementation by the Member States of Community legislation concerning free movement of persons, visas, asylum, immigration, judicial cooperation in civil matters and citizens' rights adopted under the European Community Treaty is monitored by the Commission. If a Member State fails to comply with its legislative obligations, the Commission can then initiate infringement proceedings under Article 226 of the EC Treaty and may bring the matter before the Court of Justice.

Apart from normal application of the monitoring mechanism under Articles 226 of the EC Treaty, monitoring implementation of the instruments adopted under Title IV of the EC Treaty is not systematic, although it is usual practice. For example, none of the four directives adopted on illegal migration provides for a monitoring report by the Commission.

Some reports, such as the evaluation of the derogation for issuing visas to members of the Olympic family¹³, go beyond mere analysis of implementation and contain information on

¹³ Report on the functioning of the derogation system introduced by Regulation 1295/2003 regarding measures envisaged to facilitate the procedures for applying for and issuing visas for members of the Olympic family taking part in the 2004 Olympic or Paralympic Games in Athens (SEC(2005) 1051). This report was written by the Commission on the basis of information provided by the Greek authorities.

results. There are other examples concerning instruments adopted under Title II of the Treaty, such as reports¹⁴ relating to free movement of Union citizens or reports¹⁵ on their electoral rights in municipal and European Parliament elections.

1.2.2. Instruments adopted under Title VI of the Treaty on European Union

In the case of instruments adopted under Title VI of the EU Treaty concerning police and judicial cooperation in criminal matters, there is **no equivalent compliance mechanism** allowing the Commission to exercise its institutional powers as guardian of the Treaties.

For all Framework Decisions adopted by the Council, it is compulsory for Member States to transmit a detailed set of national implementing measures to the Commission and to the Council. Based on this information, the Commission then issues a report (e.g. 2002 Framework Decision on combating terrorism¹⁶). allowing the Council to debate the need for further measures in the field concerned. The Council generally expresses its position in a final report.

For some Framework Decisions, the Commission repeats or updates its monitoring exercise (e.g. “Victims” Framework Decision¹⁷).

Similarly, the Commission systematically monitors common positions and issues a monitoring report on national implementing measures. The Commission has also taken the initiative to issue specific reports on certain Council Decisions imposing no monitoring obligation such as those relating to Eurojust¹⁸

This monitoring exercise deals only with the **legal transposition** aspect and rarely includes details on the **practical implementation of instruments**. Such assessments of legal transposition answer the following questions: are the implementing measures effective, correct and in line with the Framework Decision? Are they clear and do they provide legal certainty? Do they fully apply the instrument and comply with the time limit for transposition?

In some cases this exercise has been backed up by an initial assessment of practical implementation in the Member States and of the tangible results of the national legislation. For example, in the case of the Framework Decision on the European Arrest Warrant¹⁹, some

¹⁴ Reports from the Commission to the Council and the European Parliament on the implementation of Directives 90/364, 90/365 and 93/96 (Right of residence), COM(1999) 127 final and COM(2003) 101 final.

¹⁵ Reports on the application of Directive 93/109/EC: Right of EU citizens residing in a Member State of which they are not nationals to vote in European Parliament elections, COM(97) 731 final and COM(2000) 843, or Report from the Commission to the European Parliament and the Council on the application of Directive 94/80/EC on the right to vote and to stand as a candidate in municipal elections, COM(2002) 260 final.

¹⁶ Report from the Commission based on Article 11 of the Council Framework Decision of 13 June 2002 on combating terrorism, COM(2004) 409 final, 8.6.2004.

¹⁷ Council Framework Decision of 15 March 2001 on the standing of victims in criminal proceedings.

¹⁸ Report from the Commission on the legal transposition of the Council Decision of 28 February 2002 setting up Eurojust with a view to reinforcing the fight against serious crime, COM(2004) 457 final, 6.7.2004.

¹⁹ Report from the Commission based on Article 34 of the Council Framework Decision of 13 June 2002 on the European Arrest Warrant and the surrender procedures between Member States (COM(2005) 63 final), p.2, paragraph 2: “The evaluation criteria adopted by the Commission for this report are, firstly,

of the practical results of the implementing measures were included in the monitoring report, such as the question of effectiveness and rapidity of surrender. The Commission's report also included some preliminary figures, such as the number of warrants issued or the average time taken to execute a warrant, which mainly illustrated the difficulty of obtaining adequate statistics in this field.

1.3. Information-gathering mechanisms on policy implementation

1.3.1. Existing mechanisms

Following the call by the 2001 Laeken European Council to set up an enhanced exchange of information in the field of immigration and asylum, the Commission launched an information and consultation procedure with a **"Committee on Immigration and Asylum"** (CIA) at its heart. The CIA is made up of experts from the Member States but also frequently provides a forum for representatives of civil society, such as European social partners and the UNHCR, to present their views on pertinent immigration and asylum issues.

In the field of integration, the **"National Contact Points on Integration"** (NCP) play an important role in monitoring progress across policy fields and in ensuring that integration efforts at national and EU level support each other. They convey key results to the CIA.

A **European Migration Network** (EMN) was set up in 2002 as a preparatory measure in response to the need to improve exchanges of information on all aspects of migration and asylum. Its primary objective is to provide the Community and the Member States with objective, reliable and comparable information in these fields by systematically collecting and storing existing data and information from Member States and carrying out national and European level analysis. At present, the EMN consists of national contact points designated by the Member States.

1.3.2. Mechanisms in preparation

In the field of asylum, a Communication²⁰ on strengthened practical cooperation proposed bringing into operation a **system for sharing expertise**, resources and knowledge between key stakeholders, as a tool for strengthening common approaches to implementation of the first-stage legislative instruments of the European asylum system, building - amongst others - on existing mechanisms, such as the EURASIL group.

In September 2005 the Commission tabled a proposal for a **Regulation on Community statistics on migration and international protection**. The Regulation will improve statistical knowledge of migration-related phenomena by specifying the data to be collected, the timetables to be applied, the definitions and the quality standards.

In October 2005 the Commission tabled a proposal for a Council Decision on the establishment of a **mutual information procedure on national measures** taken in the areas of asylum and immigration which could affect other Member States. The proposal is based on

the general criteria normally used nowadays to evaluate the implementation of framework decisions (practical effectiveness, clarity and legal certainty, full application and compliance with the time limit for transposal), and, secondly, criteria specific to the arrest warrant, principally the fact that it is a judicial instrument, its effectiveness and its rapidity."

²⁰

COM(2006) 67 final.

the recognition that the absence of border checks in the Schengen area and the gradual development of common EU immigration and asylum policies require timely exchanges of information and discussion of national measures taken on asylum and immigration.

1.4. Monitoring implementation of The Hague Programme

The Hague Multi-Annual Programme (2005-2009) and the Action Plan implementing it invited the Commission to present an **annual report on implementation** of these two instruments to the Council (the "Scoreboard plus").

The "Scoreboard plus" will aim predominantly at assessing proper and adequate transposition of the legislative acts adopted and effective implementation of the measures agreed. In concrete terms, "Scoreboard plus" will assess the outcome of both (a) the **significant political progress** achieved at the point of adoption at EU level and (b) **implementation at national level of measures** related to freedom, security and justice.

This structure will bring visibility to monitoring and provide a comprehensive overview of implementation of the Action Plan, meeting the requirements of the European Council in The Hague Programme. It will increase transparency and visibility and improve and facilitate implementation. The **first "Scoreboard plus"** is presented **in parallel** to this Communication, one year after adoption of the Action Plan implementing The Hague Programme.

2. EVALUATION

This section briefly describes the state of play with evaluation in the field of freedom, security and justice, depending on the subject-matter: (1) **programmes**, (2) **legislation** or (3) **policies**²¹. Evaluations on freedom, security and justice mainly focus on **individual policy instruments**, be they legislative or financial. As in other areas, evaluation of policies (defined as a coherent set of instruments serving the same coherent objective) is **still developing**. As a consequence, evaluation activities are currently very diverse (internal or external evaluations, annual progress reports, peer reviews, etc.) and very different in scope. This results in a **lack of comparable evaluation** results across policies and of a true overview of the results achieved in establishing an Area of Freedom, Security and Justice.

The evaluation mechanism put forward in this Communication aims at tackling this issue. It provides a **platform** for exhaustive presentation and comparability of existing evaluation results, and identification of any information gaps. Whilst taking into account the fact that evaluation is more advanced for some activities than others, it will allow the establishment of a **common set of minimum evaluation requirements** across the different policies.

2.1. Evaluation of Community programmes

Evaluation of **programmes** is **well developed** within the Commission, including in the area of freedom, security and justice, where major programmes such as the European Refugee

²¹ Evaluations of agencies and external bodies have not been included, for example the evaluation of the draft Council Decision transforming the European Police College (CEPOL) into an EU body, the evaluation of the European Monitoring Centre for Drugs and Drug Addiction and the evaluation of the functioning of the European Judicial Network (EJN) in civil and commercial matters.

Fund, AGIS and DAPHNE are regularly evaluated²². Available evaluation results demonstrate that whilst the immediate results of funding programmes are easily identified and measured, their longer-term effects are sometimes more difficult to grasp. In this context, the Commission proposals for the 2007-2013 programmes on freedom, security and justice establish a better link between the programmes' specific objectives and the overall political objectives. This will have an impact on the evaluation framework for these programmes, in particular through assessment of their consistency with other instruments (legislative or other) in the same field.

2.2. Evaluation of legislation

Contrary to the evaluation of programmes, evaluation of **legislation** is a **more recent** development in the case of freedom, security and justice. Recent examples include the evaluation of the European Arrest Warrant²³ (2005), the economic evaluation of the Data Protection Directive²⁴ (2005) and the on-going evaluations of the Directive on minimum standards for the reception of asylum-seekers²⁵ and of the Brussels I Regulation²⁶. Also, the introduction of impact assessments of EU legislation has led to systematic *ex-ante* appraisal, which should greatly facilitate further interim and/or *ex-post* evaluation. In this context, systematic scrutiny of legislative proposals and other draft instruments to ensure that they are compatible with the Charter of Fundamental Rights should serve the same purpose²⁷.

2.3. Evaluation of policies

2.3.1. Mechanism for Schengen evaluation

The Schengen evaluation system, first established in the intergovernmental Schengen framework and then integrated into the European Union framework²⁸, assesses correct implementation of the Schengen *acquis* by participating Member States through a peer review mechanism, including visits to Member States. It has issued restricted reports, given details of cases of non-compliance with existing rules and practices and made further recommendations. This mechanism applies to both Community and third pillar measures.

When internal border controls with and between new EU Member States are lifted, the Commission will submit a “*proposal to supplement the existing Schengen evaluation mechanism with a supervisory mechanism*”, as requested by The Hague Programme.

²² The results of these evaluations are available online at: http://europa.eu.int/comm/dgs/justice_home/evaluation/dg_coordination_evaluation_annexe_en.htm.

²³ Council Framework Decision 2002/584/JHA of 13 June 2002 on the European Arrest Warrant and the surrender procedures between Member States.

²⁴ Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data.

²⁵ Council Directive 2003/9/EC of 27 January 2003 laying down minimum standards for the reception of asylum-seekers.

²⁶ Council Regulation (EC) No 44/2001 of 22 December 2000 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters

²⁷ SEC(2001) 380/3, COM(2005) 172.

²⁸ Decision 26 DEF 1998 of the Schengen Executive Committee.

2.3.2. *Mechanism for the fight against organised crime*

Joint Action 97/827/JHA, adopted by the Council on 5 December 1997, established a mechanism for evaluating the application and implementation at national level of international undertakings in the **fight against organised crime**²⁹. Two rounds of evaluation have already been completed and two others are ongoing. The first round focused on mutual legal assistance in criminal matters, on which a report was subsequently released on 1 August 2001³⁰. The second assessed instruments dealing with law enforcement and drug trafficking. Finally, the third and fourth rounds, not yet completed, are evaluating exchanges of information and intelligence between the Member States and Europol and the European Arrest Warrant respectively. The 1997 mechanism is operated by teams of experts designated by Member States, assisted by the General-Secretariat of the Council, with the involvement of the Commission. It is based on **study visits** and allows an in-depth examination of how instruments or policies are working in practice.

The Commission believes that although this mechanism has proved **useful and effective**, it nevertheless has some **shortcomings**, in particular the total duration of the process, the scope limited to only matters related to organised crime and the limited dissemination of the evaluation results.

2.3.3. *Mechanism for the fight against terrorism*³¹

Following the conclusions of the extraordinary meeting of the Justice and Home Affairs Council on 20 September 2001, the Council set up a procedure for peer assessment of national anti-terrorist arrangements in the framework of international cooperation between Member States. The first round of evaluations started in 2003 and focused on exchanges of information. Evaluation teams are made up of national experts and their reports are confidential.

2.3.4. *Evaluation of the EU Action Plan on Drugs*

In 2004 the Commission carried out the final evaluation of the EU Drugs Strategy and Action Plan on Drugs for 2000-2004³², in cooperation with the European Monitoring Centre for Drugs and Drug Addiction (EMCDDA) and Europol. The evaluation exercise provided an **overview of the drugs situation in the European Union** over the reference period. The Strategy and the Action Plan included a wide range of drug-related measures, mainly within the competence of the Member States. Their impact on the drug situation in the European Union could not be considered, mainly because the EU Strategy and Action Plan failed to establish impact indicators.

The EU Action Plan on Drugs for 2005-2008 takes into account the evaluation of the preceding Action Plan and has been designed from the outset to facilitate full evaluation. Accordingly, it clearly allocates responsibilities for each action and includes specific assessment tools, indicators and schedules for implementation. The Action Plan provides for

²⁹ For further information see: <http://europa.eu.int/scadplus/leg/en/lvb/l33053.htm>.

³⁰ Final report on the first evaluation exercise - mutual legal assistance in criminal matters (2001/C 216/02).

³¹ Council Decision 2002/996/JHA of 28 November 2002 establishing a mechanism for evaluating the legal systems and their implementation at national level in the fight against terrorism.

³² COM(2004) 707.

the Commission to present annual reviews of implementation of the Plan plus a final evaluation in 2008, with a view to preparing the next Plan. The **first annual progress** review will be presented in **autumn 2006**.

2.3.5. Mechanism for evaluating respect of fundamental rights

The **European Monitoring Centre on Racism and Xenophobia** studies the extent and development of the phenomena of racism, xenophobia and anti-Semitism and analyses their consequences and effects. Its findings are presented in annual reports. Once established, the Agency on Fundamental Rights, with its wider mandate, is expected to play a key role in evaluating respect of fundamental rights.

The **network of fundamental rights experts** was created by the European Commission in 2002 in response to a recommendation in the European Parliament's report³³ on the state of fundamental rights in the European Union. The network assesses the fundamental rights situation through an annual report, on the basis of an **analysis of the legislation, the case-law and the administrative practice** of the national authorities of the Member States and in the institutions of the Union. The reference points for the evaluation are the rights set out in the European Union's Charter of Fundamental Rights. The results are published annually (so far, in 2003, 2004 and 2005).

³³ 2000/2231(INI).

ANNEX 3

Glossary

Activity: A coherent area of action with objectives and resources. In other words, "Activities" consist of well-defined and delimited measures to which inputs are allocated and converted into outputs.

The policy for the development of an Area of Freedom, Security and Justice has been divided into different Activity-Based Management (ABB) activities such as:

- Activity 1802 “External borders, visa policy and free movement of persons”,
- Activity 1803 “Common immigration and asylum policies”,
- Activity 1804 “Citizenship and fundamental rights”,
- Activity 1805 “Law enforcement cooperation and prevention of and fight against general organised crime”,
- Activity 1806 “Establishing a genuine European area of justice in criminal and civil matters”,
- Activity 1807 “Coordination in the field of drugs”.

Evaluation: “Judgement of interventions according to their results, impacts and the needs they aim to satisfy”³⁴. It is a process undertaken by the Commission in order to identify what can be learned for policy and planning.

Ex ante/ex post evaluation

Ex ante evaluation: Evaluation performed before implementation of a measure. For the purposes of the Commission, *ex ante* evaluation is defined as a process that supports the preparation of proposals for new or renewed Community activities. Its purpose is to gather information and carry out analyses that help to define objectives and to ensure that these objectives can be met, that the instruments used are cost-effective and that reliable subsequent evaluation will be possible.

Intermediate (or mid-term) evaluation: Evaluation performed during implementation of a measure. If the evaluation extends throughout the period of implementation, this is also called "on-going evaluation". This type of evaluation critically appraises the first outputs and results, in order to assess the quality of monitoring and implementation of the measure. The main focus is to help to prepare adjustments and reprogramming and to provide input for the preliminary deliberations on the future of the measures.

Ex post evaluation: Evaluation conducted either on or after completion of a measure. The main interest is overall assessment of the measure, in particular by analysing the impact

³⁴ Communication on Evaluation (SEC(2000) 1051):
http://europa.eu.int/comm/budget/evaluation/keydocuments_en.htm.

achieved and examining its efficiency. The objective is to understand the reasons for success or failure and the sustainability of the results and impact. It also tries to draw conclusions that can be applied generally to other measures.

Impact: A general term used to describe the effects of a measure on society. Impact can be either positive or negative and foreseen or unforeseen. Initial effects are called outcomes/results, whilst impact is usually longer-term.

Impact assessment: Impact assessment is about examining the likely economic, social and environmental impact of the Commission's proposals. It identifies and assesses the issue at stake and the objectives pursued. It identifies the main options for achieving the objectives and analyses their likely impact. It outlines the advantages and disadvantages of each option as well as synergies and trade-offs.

Indicators: A characteristic or attribute which can be measured to assess an activity in terms of its outputs or impacts. Output indicators are normally straightforward. Impact indicators may be more difficult to obtain, and it is often appropriate to rely on indirect indicators as proxies. Indicators can be either quantitative or qualitative.

Monitoring: A continuous process of examining delivery in terms of adoption and implementation of different measures, especially legislation. It is not to be confused with programme monitoring, which consists of examining the delivery of programme outputs to the intended beneficiaries. Evaluation, on the other hand, is carried out at a discrete point in time, and consists of an in-depth study. Monitoring generates data which can be used in evaluations.

Outcomes/results: The intermediate effects of a measure.

Policy: A set of activities, which may differ in type (programmes, measures, procedures, laws or rules) and beneficiaries or target groups, directed towards common general objectives or goals. Unlike projects and programmes, a policy is not usually delimited in terms of time or budget.

Policy area: Within the EU the concept *policy* may designate various scope and levels of complexity, ranging from an overall Commission strategy or objective over a policy area to an ABB-activity. In this context, a policy will normally embrace a range of instruments. At Commission level, the ABB-activities (215 altogether) have been grouped into some 30 policy areas, closely identifiable with Directorates-General. This Communication deals with policy area 18: Freedom, security and justice.

Policy instruments: A set of techniques by which public authorities attempt to ensure support and to effect or prevent social change. In this sense, there is a strong emphasis on the dynamic evolving nature of policies, with individual policy instruments being added, withdrawn or redesigned over time. The variety of available policy instruments includes, for example, legislation such as regulations or directives and may involve resource commitments, for example in the form of operational programmes; they also include Communications, action plans, etc. However, policy instruments differ significantly in the way in which they bring about results and impacts and the timescales over which these can be expected.

Programme: A set of organised but often varied actions (a programme may encompass several different projects, measures and processes) directed towards achieving specific objectives, often with a definite time schedule and budget.
