**PARTE I: ISTRUZIONI DI CARATTERE GENERALE**

1. Si presentano dati solo per le controparti con un'esposizione o un rating valido.
2. Si presentano dati solo per le esposizioni per le quali è stato approvato un modello interno.
3. Quanto segue si applica alla parte II:
  - a) per i valori assoluti si comunica la somma dei valori;
  - b) per i valori in percentuale si comunica la media ponderata applicando come fattore di ponderazione l'esposizione in caso di default ("EAD");
  - c) in deroga alla lettera b), per calcolare il fattore di conversione ("CCF") il fattore di ponderazione da usare è l'"esposizione originaria", ossia l'importo al quale si applica un fattore di conversione per determinare l'esposizione in caso di default, dopo aver tenuto conto delle tecniche di attenuazione del rischio di credito ("CRM") con gli effetti di sostituzione sull'esposizione (colonna 090 nei modelli 101, 102 e 103).

## C 101 — Dettagli sulle esposizioni nei Low default portfolios per controparte

Colonna	Intestazione	Riferimenti giuridici	Istruzioni
010	Codice della controparte	Colonna 010 del modello 101 dell'allegato I del presente regolamento di esecuzione	Si comunica il codice della controparte assegnato dall'ABE alla controparte compresa nei portafogli campioni di LDP. Il codice è un identificatore di riga ed è unico per ogni riga della tabella.
020	Classe di esposizione	Paragrafo 78 dell'allegato II del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Ogni portafoglio è classificato in una delle seguenti classi di esposizione: a) banche centrali e amministrazioni centrali; b) enti; c) categoria corporate: PMI; d) categoria corporate: finanziamenti specializzati; e) categoria corporate: altro; f) categoria dettaglio: PMI, garantito da beni immobili; g) categoria dettaglio: non PMI, garantito da beni immobili; h) categoria dettaglio: rotativo qualificato; i) categoria dettaglio: PMI, altro; j) categoria dettaglio: non PMI, altro; k) non applicabile <sup>(1)</sup> .
030	Metodo regolamentare		Il metodo usato per il calcolo dei requisiti di fondi propri da comunicare è, in alternativa: a) metodo IRB di base; b) metodo IRB avanzato; c) criteri di assegnazione dei finanziamenti specializzati; d) non applicabile. Se alle esposizioni di un dato portafoglio si applica più di un metodo, le esposizioni vanno suddivise e segnalate distintamente per ogni metodo usando il codice unico di controparte corretto che ne consente l'identificazione univoca.
040	Rating		Si comunica la posizione nella classe del rating interno applicato dall'ente (dal rischio minimo al rischio massimo escluse le posizioni in stato di default con una PD pari al 100 %). Si segue l'ordine numerico 1, 2, 3 ecc.
050	Data dell'ultimo rating della controparte		Si comunica la data dell'ultimo rating della controparte.

Colonna	Intestazione	Riferimenti giuridici	Istruzioni
060	PD	Colonna 010 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	<p>La probabilità di default (PD) assegnata alla classe o al pool di debitori da comunicare si basa sulle disposizioni di cui all'articolo 180 del regolamento (UE) n. 575/2013. Per ogni singola classe o pool di debitori si comunica la PD assegnata alla specifica classe o al pool di debitori. Per gli importi relativi a un'aggregazione di classi o pool di debitori (ad esempio le esposizioni totali) si riporta la media ponderata per l'esposizione delle PD assegnate alle classi o ai pool di debitori compresi nell'aggregazione considerata. Il valore dell'esposizione (colonna 120) va utilizzato per il calcolo della media della PD ponderata per l'esposizione. La PD è espressa da un valore compreso tra 0 e 1.</p> <p>Per ogni singola classe o pool di debitori si comunica la PD assegnata alla specifica classe o al pool di debitori. Tutti i parametri di rischio comunicati sono ricavati dai parametri di rischio utilizzati nel sistema di rating interno approvato dalla rispettiva autorità competente.</p> <p>Non è richiesto né auspicabile disporre di una scala tipo di vigilanza. Se l'ente segnalante applica un sistema di rating unico o è in grado di effettuare le segnalazioni in conformità a una scala tipo interna, si utilizza tale scala. Negli altri casi, i differenti sistemi di rating sono unificati e classificati secondo i seguenti criteri:</p> <ol style="list-style-type: none"> <li>le classi di debitori dei differenti sistemi di rating sono accorpate e ordinate dalla classe con la PD più bassa assegnata alla specifica classe di debitori alla classe più alta;</li> <li>se utilizza molte classi o molti pool, l'ente può concordare con le autorità competenti di ridurre il numero delle classi o pool da comunicare.</li> </ol> <p>L'ente contatta preventivamente la propria autorità competente se intende comunicare un numero di classi diverso da quello utilizzato al proprio interno.</p>
070	Status in relazione al default		<p>In relazione al default lo status è, in alternativa:</p> <ol style="list-style-type: none"> <li>in default: esposizioni attribuite alla o alle classi di rating con una PD pari al 100 %;</li> <li>non in default: esposizioni attribuite alle classi di rating con una PD inferiore al 100 %.</li> </ol>
080	Esposizione originaria prima dell'applicazione dei fattori di conversione	Colonna 020 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica il valore dell'esposizione originaria prima di tener conto di qualsiasi rettifica di valore, di accantonamenti, di effetti dovuti a tecniche di attenuazione del rischio di credito o dei fattori di conversione.
090	Esposizione dopo gli effetti di sostituzione dell'attenuazione del rischio di credito prima dell'applicazione dei fattori di conversione	Colonna 090 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica l'importo al quale si applica un fattore di conversione al fine di determinare l'esposizione in caso di default. L'importo da comunicare tiene presenti le tecniche di attenuazione del rischio di credito con effetti di sostituzione sull'esposizione.

Colonna	Intestazione	Riferimenti giuridici	Istruzioni
100	CCF	Articolo 166, paragrafo 8, secondo comma, del regolamento (UE) n. 575/2013	Per le esposizioni alle quali sono applicate stime interne dei fattori di conversione si comunicano i fattori di conversione medi ponderati. I fattori di ponderazione da utilizzare sono gli importi ai quali sono applicati i fattori di conversione per determinare l'esposizione in caso di default.
110	EAD	Colonna 110 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	La casella del valore dell'esposizione va lasciata vuota se l'ente non ha un'esposizione secondo il metodo IRB per una data controparte.
120	Valore delle garanzie	Colonne da 150 a 210 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Va comunicato il valore di mercato delle garanzie.
130	LGD ipotetica di primo rango (senior) non garantita senza garanzia negativa	Articolo 161 del regolamento (UE) n. 575/2013	Si comunicano le stime interne ipotetiche della perdita in caso di default ("LGD") che sarebbe applicata dall'ente alla controparte per le esposizioni di primo rango (senior) non garantite senza clausola di garanzia negativa. Una clausola di garanzia negativa stipula che il debitore o emittente di debito non costituirà in pegno nessuna delle sue attività a favore di un terzo.
140	LGD ipotetica di primo rango (senior) non garantita con garanzia negativa	Articolo 161 del regolamento (UE) n. 575/2013	Si comunicano le stime interne ipotetiche della perdita in caso di default ("LGD") che sarebbe applicata dall'ente alla controparte per le esposizioni di primo rango (senior) non garantite recanti una clausola di garanzia negativa. Una clausola di garanzia negativa stipula che il debitore o emittente di debito non costituirà in pegno nessuna delle sue attività a favore di un terzo.
150	LGD	Colonna 230 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunicano le stime interne della LGD ponderate per l'esposizione oppure la LGD regolamentare ponderata per l'esposizione applicata dall'ente alle esposizioni verso ogni controparte.
160	Durata	Colonna 250 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica la durata ponderata per l'esposizione delle esposizioni verso ogni controparte. Il valore è espresso in numero di giorni.
170	RWA	Colonna 260 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica l'importo dell'esposizione ponderato per il rischio dopo l'applicazione del fattore di sostegno alle PMI.

(<sup>1</sup>) "Non applicabile" è da utilizzare quando nessuna delle risposte elencate è corretta (ad esempio per la colonna 020 significherà che la controparte è classificata in diverse classi di attività, nessuna delle quali è chiaramente prevalente).

010	ID del portafoglio	Colonna 010 del modello 103 dell'allegato I del presente regolamento di esecuzione	Si comunica il codice univoco assegnato dall'ABE a ogni portafoglio. Tale codice è un identificatore di riga ed è unico per ogni riga della tabella.
020	Classe di esposizione	Paragrafo 78 dell'allegato II del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Ogni portafoglio è classificato in una delle seguenti classi di esposizione: <ul style="list-style-type: none"> <li>a) categoria corporate: PMI;</li> <li>b) categoria corporate: finanziamenti specializzati;</li> <li>c) categoria corporate: altre;</li> <li>d) categoria dettaglio: PMI, garantito da beni immobili;</li> <li>e) categoria dettaglio: non PMI, garantito da beni immobili;</li> <li>f) categoria dettaglio: rotativo qualificato;</li> <li>g) categoria dettaglio: PMI, altro;</li> <li>g) categoria dettaglio: non PMI, altro;</li> <li>i) non applicabile.</li> </ul>
030	Metodo regolamentare		Il metodo regolamentare usato per il calcolo dei requisiti di fondi propri da comunicare è, in alternativa: <ul style="list-style-type: none"> <li>a) metodo IRB di base;</li> <li>b) metodo IRB avanzato;</li> <li>c) criteri di assegnazione dei finanziamenti specializzati;</li> <li>d) non applicabile.</li> </ul> <p>Se alle esposizioni di un dato portafoglio si applica più di un metodo, le esposizioni vanno suddivise e segnalate distintamente per ogni metodo usando il codice unico di portafoglio corretto che ne consente l'identificazione univoca.</p>
040	Numero di debitori	Colonna 300 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica il numero di debitori.

Colonna	Intestazione	Riferimenti giuridici	Istruzioni
050	Rating		Si comunica la classe del rating interno applicato dall'ente (dal rischio minimo al rischio massimo, escluse le posizioni in stato di default con una PD pari a 100 %). Si segue l'ordine numerico 1, 2, 3 ecc. Tali informazioni vanno comunicate solo per i portafogli definiti nell'allegato I del presente regolamento di esecuzione, che sono composti da esposizioni della stessa classe di rating; in caso contrario, la casella va lasciata vuota.
060	PD	Colonna 010 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	<p>La probabilità di default (PD) assegnata alla classe o al pool di debitori da comunicare si basa sulle disposizioni di cui all'articolo 180 del regolamento (UE) n. 575/2013. Per ogni singola classe o pool di debitori si comunica la PD assegnata alla specifica classe o pool di debitori. Per gli importi relativi a un'aggregazione di classi o pool di debitori (ad esempio le esposizioni totali) si riporta la media ponderata per l'esposizione delle PD assegnate alle classi o ai pool di debitori compresi nell'aggregazione considerata. Il valore dell'esposizione (colonna 110) è utilizzato per il calcolo della media ponderata per l'esposizione della PD. La PD è espressa da un valore compreso tra 0 e 1.</p> <p>Per ogni singola classe o pool di debitori si comunica la PD assegnata alla specifica classe o al pool di debitori. Tutti i parametri di rischio segnalati sono ricavati dai parametri di rischio utilizzati nel sistema di rating interno approvato dalla rispettiva autorità competente.</p> <p>Non è richiesto né auspicabile disporre di una scala tipo di vigilanza. Se l'ente segnalante applica un sistema di rating unico o è in grado di effettuare le segnalazioni in conformità a una scala tipo interna, si utilizza tale scala. Negli altri casi, i differenti sistemi di rating sono unificati e ordinati secondo i seguenti criteri:</p> <ul style="list-style-type: none"> <li>a) le classi di debitori dei differenti sistemi di rating sono accorpate e ordinate dalla classe con la PD più bassa assegnata alla specifica classe di debitori alla classe più alta;</li> <li>b) se utilizza molte classi o molti pool, l'ente può concordare con le autorità competenti di ridurre il numero delle classi o dei pool da segnalare.</li> </ul> <p>L'ente contatta preventivamente la propria autorità competente se intende comunicare un numero di classi diverso da quello utilizzato al proprio interno.</p>
070	Status in relazione al default		<p>In relazione al default lo status è, in alternativa:</p> <ul style="list-style-type: none"> <li>a) in default: sono le esposizioni assegnate alla o alle classi di rating con una PD pari al 100 %.</li> <li>b) non di default: sono le esposizioni assegnate alle classi di rating con una PD inferiore al 100 %.</li> </ul>
080	Esposizione originaria prima dell'applicazione dei fattori di conversione	Colonna 020 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica il valore dell'esposizione originaria prima di tener conto di qualsiasi rettifica di valore, di accantonamenti, di effetti dovuti a tecniche di attenuazione del rischio di credito o dei fattori di conversione.
090	Esposizione dopo gli effetti di sostituzione CRM prima dell'applicazione dei fattori di conversione	Colonna 090 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica l'importo al quale si applica un fattore di conversione al fine di determinare l'esposizione in caso di default. Le informazioni da comunicare tengono presenti le tecniche di attenuazione del rischio di credito con effetti di sostituzione sull'esposizione.

100	CCF	Articolo 166, paragrafo 8, lettera e), del regolamento (UE) n. 575/2013	Per le esposizioni alle quali sono applicate stime interne dei CCF si comunicano i CCF medi ponderati. I fattori di ponderazione da utilizzare sono gli importi ai quali sono applicati i CCF per determinare l'esposizione in caso di default.
110	EAD	Colonna 110 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica il valore dell'esposizione.
120	Valore delle garanzie	Colonne da 150 a 210 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica il valore di mercato delle garanzie.
130	LGD	Colonna 230 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunicano le stime interne della LGD ponderate per l'esposizione oppure la LGD regolamentare ponderata per l'esposizione applicata dall'ente alle esposizioni in ogni portafoglio.
140	Durata	Colonna 250 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica la durata ponderata per l'esposizione. Il valore è espresso in numero di giorni.
150	Perdite attese	Colonna 280 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica l'importo delle perdite attese.
160	Accantonamenti per esposizioni deteriorate	Colonne 050, 055 e 060 del modello 9.2 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunicano gli accantonamenti per esposizioni deteriorate. Sono comprese le rettifiche di valore su crediti generiche e specifiche per attività in default, di cui all'articolo 110 del regolamento (UE) n. 575/2013.
170	RWA	Colonna 260 del modello 8.1 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica l'importo dell'esposizione ponderato per il rischio dopo l'applicazione del fattore di sostegno alle PMI.
180	RWA secondo il metodo standardizzato	Riga 900 del modello 4 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica l'importo dell'esposizione ponderato per il rischio calcolato applicando il metodo standardizzato per il rischio di credito alle esposizioni.

190	Tasso di default dell'ultimo anno	Colonne 010, 030 e 040 del modello 9.2 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica il tasso di default dell'ultimo anno. Per tasso di default si intendono i nuovi default osservati nell'ultimo anno [colonna 040 del modello 9.2 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione] divisi per l'importo delle attività non in stato di default in essere un anno prima della data di riferimento [differenza tra la colonna 010 e la colonna 030 del modello 9.2 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione].
200	Tasso di default degli ultimi 5 anni	Colonne 010, 030 e 040 del modello 9.2 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica la media ponderata per l'esposizione dei tassi di default osservati negli ultimi 5 anni. Per la definizione del tasso di default cfr. colonna 190. Se l'ente non può calcolare il tasso di default degli ultimi 5 anni, elabora una variabile proxy utilizzando la serie più lunga di dati storici fino a 5 anni e fornisce alla propria autorità competente la documentazione che espone i calcoli in dettaglio.
210	Tasso di perdita dell'ultimo anno	Colonne 040 e 070 del modello 9.2 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione e regolamento delegato (UE) n. 183/2014 della Commissione	Si comunica il tasso di perdita osservato nell'ultimo anno. Per tasso di perdita si intende la somma delle rettifiche di valore su crediti e delle cancellazioni per le esposizioni che erano classificate come "esposizioni in stato di default" nell'ultimo anno [colonna 070 del modello 9.2 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione] divisa per l'importo dei nuovi default osservati nell'ultimo anno [colonna 040 del modello 9.2 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione].
220	Tasso di perdita degli ultimi 5 anni	Colonne 040 e 070 del modello 9.2 dell'allegato I del regolamento di esecuzione (UE) n. 680/2014 della Commissione	Si comunica la media ponderata per l'esposizione dei tassi di perdita osservati negli ultimi 5 anni. Per la definizione del tasso di perdita cfr. riga 210. Se l'ente non può calcolare il tasso di perdita degli ultimi 5 anni, elabora una variabile proxy utilizzando la serie più lunga di dati storici fino a 5 anni e fornisce alla propria autorità competente la documentazione che espone i calcoli in dettaglio.

## ISTRUZIONI COMUNI

Gli enti applicano le istruzioni seguenti.

- a) Salvo diversa istruzione esplicita nella descrizione del portafoglio, tutte le posizioni sono inserite nel portafoglio di negoziazione al 13 ottobre 2016. Dopo la registrazione delle posizioni ogni portafoglio matura per la durata dell'esercizio di analisi comparata. I calcoli sono inoltre eseguiti partendo dal presupposto che l'ente non intraprenderà alcuna azione di gestione del portafoglio durante l'intera durata dell'esercizio di analisi comparata. Salvo diversa indicazione esplicita nelle specifiche di un particolare portafoglio, i prezzi di esercizio delle posizioni in opzioni sono determinati in relazione ai prezzi del sottostante osservati alla chiusura del mercato il 13 ottobre 2016;
- b) ai fini della convalida dell'esercizio preliminare di analisi comparata, la valutazione di ogni portafoglio viene comunicata all'autorità competente per l'ente entro [data dell'entrata in vigore]. L'espressione "valutazione iniziale di mercato" ("IMV") indica la somma del valore di mercato alla data di inserimento nel portafoglio di negoziazione e del saldo non realizzato [ossia i profitti o le perdite intervenuti ma non ancora realizzati o che si realizzerrebbero se si chiudesse (o si liquidasse) la posizione] tra la data di inserimento nel portafoglio e la data e l'ora di valutazione. IMV indica pertanto il valore a prezzi di mercato alla data e all'ora della valutazione. La valutazione si effettua ai valori del 27 ottobre 2016, ore 17.30 CET (16.30 GMT);
- c) i rischi delle posizioni sono calcolati senza tenere conto dei costi di finanziamento;
- d) nella misura del possibile, quando si valutano i rischi dei portafogli il rischio di controparte non è incluso;
- e) il VaR (valore a rischio) a 10 giorni al 99 % è calcolato quotidianamente. Il valore a rischio in condizioni di stress ("sVaR") e la copertura patrimoniale per il rischio incrementale ("IRC") possono essere calcolati con cadenza settimanale. Lo sVaR e l'IRC si basano sui prezzi di fine giornata di ogni venerdì nella finestra temporale dell'esercizio di analisi comparata;
- f) per ogni portafoglio i risultati vanno comunicati nella valuta di base del portafoglio come previsto dalle tabelle seguenti;
- g) per le transazioni che comprendono posizioni lunghe in Credit Default Swap ("CDS"), va ipotizzato che una commissione iniziale sia pagata immediatamente per aprire la posizione, secondo le convenzioni di mercato. Si ipotizza che le date di scadenza di tutte le posizioni in CDS dell'esercizio corrispondano alle date convenzionali di fine trimestre;
- h) le ulteriori specifiche necessarie per il calcolo dei prezzi obbligatorio per le posizioni in CDS sono effettuate in coerenza con gli standard e le convenzioni di mercato utilizzati abitualmente;
- i) va utilizzata la data di scadenza grazie alla quale la transazione si approssima il più possibile alla durata residua specificata;
- j) per quanto riguarda i dettagli importanti della specifica del prodotto che non sono esplicitati nel presente allegato, vanno precisate insieme ai risultati le ipotesi applicate, tra cui la convenzione sul conteggio dei giorni, e la scelta di uno strumento commerciabile e liquido ove consentito;

- k) le abbreviazioni “ATM”, “OTM” e “ITM” si riferiscono alla posizione relativa del prezzo corrente o futuro del sottostante di un derivato rispetto al prezzo di esercizio del derivato corrispondente (“carattere monetario”). ATM significa “at the money” (a valore intrinseco nullo), OTM significa “out of the money” (a valore intrinseco negativo) e ITM significa “in the money” (a valore intrinseco positivo);
- l) tutte le opzioni vanno trattate come commercializzate fuori borsa (“OTC”), salvo diversa indicazione esplicita nel portafoglio;
- m) vanno seguite le convenzioni standard di determinazione dell'orario per gli strumenti OTC (vale a dire che le date di scadenza cadono al giorno lavorativo successivo a un giorno non lavorativo). La convenzione di determinazione dell'orario per le opzioni è illustrata di seguito: la vita residua di un'opzione a  $n$  mesi è di  $n$  mesi. Se le opzioni scadono in un giorno non lavorativo, gli enti riparametrano la data di scadenza su un giorno lavorativo seguendo le comuni prassi di mercato;
- n) tutte le opzioni OTC vanno trattate come se fossero:
- americane, se riguardano strumenti di capitale “single-name” e merci;
  - europee, se sono indici di azioni, opzioni su valute e swaptions;
- o) per tutte le opzioni il premio va escluso dai calcoli del valore iniziale di mercato di modo che le opzioni siano considerate “senza premio”;
- p) in merito al portafoglio di negoziazione di correlazione (“CTP”), “IM” indica le misure dei rischi ottenute utilizzando i calcoli del modello interno per i CTP come prescritto dall'articolo 377 del regolamento (UE) n. 575/2013. È indicato come “tutti i rischi di prezzo” (APR) nell'allegato VI del presente regolamento di esecuzione;
- q) per le posizioni denominate in una valuta di base comune, ma composte da uno o più strumenti denominati in una valuta diversa, la valutazione iniziale di mercato (“IMV”) va convertita nella valuta di base comune del portafoglio applicando l'opportuno tasso di cambio (“FX”) a pronti per i cambi alla fine della data di inserimento in portafoglio (13 ottobre 2016). La stessa valuta di base comune del portafoglio che è stata utilizzata per convertire l'IMV è utilizzata per i risultati di profitti e perdite (“P&L”) e le misure di rischio anche in condizioni di stress (VaR, sVaR, IRC, APR), applicando il tasso FX corrispondente e opportuno;
- r) nell'inserire in portafoglio tutte le posizioni, gli enti seguiranno le opportune convenzioni di mercato salvo diversa istruzione. Nelle sezioni a seguire, “lungo” indica “comprare” e “corto” indica “vendere”. Per le posizioni in CDS, “lungo” significa “comprare protezione” e “corto” significa “vendere protezione” come nell'abituale prassi di mercato;
- s) se uno strumento è soggetto ad un evento societario, tra cui un richiamo dell'emittente, un default o altro evento simile, gli enti lo escludono dal portafoglio unitamente a qualsiasi CDS o opzione correlati;
- t) “on the run” in riferimento ad una serie di indici significa la serie più liquida e commerciabile disponibile sul mercato di tale indice specifico. Gli enti comunicano la propria scelta della serie dell'indice unitamente ai relativi risultati nelle apposite celle di testo nei modelli;
- u) il tasso interbancario in euro (“EURIBOR”) è il tasso calcolato dallo European Money Markets Institute a diverse scadenze per i depositi a termine interbancari in euro;
- v) il tasso interbancario di Londra (“LIBOR”) è il tasso calcolato dall'Intercontinental Exchange a diverse scadenze per i depositi a termine interbancari in diverse valute.

**Sezione 3: Portafogli di negoziazione di correlazione (CTP)**

Numero del portafoglio Fattore di rischio	Portafogli	Valuta	Metriche di rischio prescritte
35 CTP	Posizione lunga nella equity tranche con copertura del rischio di spread (spread hedging) sull'indice iTraxx Europe, serie on the run (punto di attacco o attachment point: 0 %, punto di distacco o detachment point: 3 %)	EUR	VaR, sVaR e IM per il CTP
36 CTP	Posizione lunga nella mezzanine tranche con copertura del rischio di spread (spread hedging) sull'indice iTraxx Europe, serie on the run (punto di attacco o attachment point: 7 %, punto di distacco o detachment point: 10 %)	EUR	VaR, sVaR e IM per il CTP
37 CTP	Posizione corta nella super senior tranche con copertura del rischio di spread (spread hedging) sull'indice iTraxx Europe, serie on the run (punto di attacco o attachment point: 30 %, punto di distacco o detachment point: 100 %)	EUR	VaR, sVaR e IM per il CTP

I portafogli di negoziazione di correlazione contengono posizioni in tranche dell'indice iTraxx Europe (serie on the run) di cui alla tabella soprastante.

- Il nozionale è 10 milioni di EUR per ogni tranche.
- La scadenza contrattuale è di 5 anni. Valutazione alle 17.00 ora di New York ad ogni data di valutazione.
- Lo spread prefissato corrente da utilizzare è 500 punti base per le tranche nei portafogli 1 e 2; 100 punti base per il portafoglio 3.

I portafogli sono costruiti effettuando la copertura di ogni tranche dell'indice con l'indice iTraxx Europe (serie on the run) per conseguire un valore nullo di CS01 alla data di valutazione iniziale ("copertura del rischio di spread"). Non è necessaria ulteriore ricopertura.»
