## **DOCUMENTO DI LAVORO DELLA COMMISSIONE**

### **Prima relazione sullo stato d'avanzamento della strategia per la semplificazione del contesto normativo**

#### ***Sintesi***

Il presente documento di lavoro della Commissione dà seguito diretto alla comunicazione COM(2005) 535 dell'ottobre 2005: Attuazione del programma comunitario di Lisbona: una strategia per la semplificazione del contesto normativo. Esso inoltre integra la comunicazione "Esame strategico del programma per legiferare meglio nell'Unione europea".

La semplificazione della legislazione UE può contribuire in modo significativo a migliorare il contesto normativo, ad aggiornare e modernizzare le norme e a ridurre gli oneri amministrativi, al fine di migliorare la situazione dell'economia europea, tenendo conto degli sviluppi tecnologici, dei mercati e del quadro internazionale. Per questo motivo, la Commissione ha fatto della semplificazione una delle sue priorità politiche, grazie al programma per una migliore regolamentazione.

In linea con quest'obiettivo, il documento di lavoro della Commissione fa il punto sui progressi conseguiti nell'attuazione della semplificazione varata nell'ottobre 2005, tratta dei lavori in corso e previsti e presenta iniziative nuove che rafforzeranno il programma modulato di semplificazione per il periodo 2006-2009. Uno dei risultati principali della semplificazione è la sua estensione progressiva a tutti i settori in cui la CE interviene con atti normativi. Il documento di lavoro della Commissione presenterà anche la situazione attuale per quanto riguarda la codificazione.

In parallelo, questa prima relazione sullo stato d'avanzamento tratta anche dei fattori di successo per il conseguimento degli obiettivi di semplificazione, in particolare la solida piattaforma di metodologie, migliorata grazie alla cooperazione istituzionale col Parlamento europeo e il Consiglio, volta ad accompagnare il lavoro fino alle sue fasi finali, il maggiore ricorso all'autoregolamentazione e alla coregolamentazione, nonché la semplificazione a livello nazionale per garantire che i benefici della semplificazione svolta a livello europeo non siano annullati dalle norme nazionali o da ostacoli di natura tecnica.

## INTRODUZIONE

In linea con le priorità della sua politica in materia di migliore regolamentazione delineata nel marzo 2005, la Commissione ha adottato una nuova strategia per la semplificazione del contesto normativo<sup>1</sup> nell'ottobre 2005. Scopo generale della strategia è migliorare la qualità e l'efficacia dell'*acquis* ed eliminare gli oneri superflui per gli operatori, contribuendo così all'obiettivo di rafforzare la concorrenzialità dell'economia europea.

Il Parlamento europeo<sup>2</sup> ha accolto con largo favore il programma della Commissione inteso a semplificare l'*acquis*, mentre il Consiglio europeo<sup>3</sup> ha invitato il Consiglio a dare priorità all'iter delle proposte di semplificazione nel sistema legislativo. La cooperazione con le altre istituzioni coleggiate è fondamentale per realizzare le proposte di semplificazione.

Il presente documento di lavoro della Commissione, che integra l'"Esame strategico del programma per legiferare meglio nell'Unione europea"<sup>4</sup>, rende conto per la prima volta dei risultati conseguiti in seguito al varo della strategia nell'ottobre 2005 e presenta i nuovi sviluppi nella realizzazione degli obiettivi della strategia di semplificazione. In particolare:

- presenta la situazione attuale per quanto riguarda l'attuazione della strategia di semplificazione e del processo di codificazione, concentrandosi su:
  - (1) le azioni completate nel quadro del programma modulato,
  - (2) le azioni in corso che richiedono ulteriori sforzi,
  - (3) le nuove azioni definite dalla Commissione;
- tratta dei fattori di successo cruciali nel perseguimento di un contesto normativo davvero semplificato, in particolare una solida piattaforma di metodologie, una stretta cooperazione tra le istituzioni dell'UE, un maggiore ricorso all'autoregolamentazione e alla coregolamentazione, nonché la semplificazione a livello nazionale.

Il programma modulato aggiornato relativo al periodo 2006-2009 fa sue le iniziative sulla semplificazione previste dal programma legislativo e di lavoro della Commissione per il 2007 e fornisce una visione d'insieme degli sforzi dell'istituzione volti a semplificare il contesto normativo attuale in una prospettiva pluriennale. Il fatto che, per la prima volta, le iniziative sulla semplificazione siano inserite nel programma legislativo e di lavoro della Commissione per il 2007 dimostra chiaramente la priorità politica riservata alla strategia per la semplificazione.

<sup>1</sup> Comunicazione COM(2005) 535: Attuazione del programma comunitario di Lisbona: Una strategia per la semplificazione del contesto normativo. La semplificazione riguarda un'ampia gamma di strumenti, comprese l'abrogazione, la codificazione la rifusione o la modifica dell'approccio normativo. La definizione di codificazione si trova nel presente documento al punto "1.2 Situazione attuale – codificazione". La rifusione è il procedimento attraverso il quale un nuovo atto legalmente vincolante, che abroga gli atti che sostituisce, combina modifiche alla sostanza della normativa e la codifica di quanto deve rimanere immutato.

<sup>2</sup> Risoluzione del Parlamento europeo su una strategia per la semplificazione del contesto normativo [Relatore: On. Giuseppe Gargani, rif. A6-0080/2006 – PA\_TA-PROV (2006)0205].

<sup>3</sup> Consiglio europeo del 15 e 16 dicembre 2005, conclusioni della Presidenza.

<sup>4</sup> COM(2006) 689 def.

Si sta verificando un cambiamento nella cultura normativa: per la prima volta infatti la Commissione ha adeguato metodi di lavoro, priorità e risorse agli obiettivi della semplificazione, e uno dei risultati principali è la loro estensione progressiva a tutti i settori d'intervento.

Nel futuro, tutto il lavoro attuale di riduzione degli oneri amministrativi confluirà nel processo di semplificazione il quale, a sua volta, contribuirà all'obiettivo, da raggiungere entro il 2012, consistente in una riduzione complessiva della legislazione UE e nazionale pari al 25%, come indicato nell'“Esame strategico del programma per legiferare meglio”.

In questa stessa ottica, i benefici delle approfondite consultazioni con le parti interessate e delle valutazioni d'impatto aiuteranno a migliorare la qualità delle nuove proposte della Commissione e consentiranno meglio al legislatore di costruire un contesto normativo pienamente conforme al principio di sussidiarietà e più capace di promuovere concorrenzialità, innovazione e crescita, il che dovrebbe anche alleviare il futuro carico di lavoro in materia di semplificazione.

Si procederà a relazioni periodiche sullo stato d'avanzamento dei lavori.

## **1. SITUAZIONE ATTUALE**

### **1.1. Situazione attuale – il programma modulato sulla semplificazione**

La strategia di semplificazione dell'ottobre 2005 tratta di una serie di metodi di semplificazione che formano un programma modulato triennale inizialmente comprendente, per il periodo 2005-2008, circa 100 iniziative, riguardanti 220 strumenti legislativi fondamentali che la Commissione ha scelto per semplificarli sulla base di approfondite consultazioni con gli Stati membri, le imprese e i cittadini.

Vista l'importanza del continuo riesame dell'*acquis*, la Commissione ha ora individuato altre 43 iniziative con un potenziale valore di semplificazione per il periodo 2006-2009. Tali iniziative sono inserite nel programma modulato aggiornato di cui all'allegato 1. Il programma conferma la determinazione della Commissione a conseguire la riduzione degli oneri amministrativi dovuti al contesto normativo e ad aggiornare e modernizzare le norme, tenendo conto degli sviluppi tecnologici, del mercato e del quadro internazionale.

#### *1.1.1. Progressi compiuti dalla Commissione*

Dodici delle 14<sup>5</sup> iniziative programmate per il 2005 sono state completate. Per quanto riguarda il 2006, la comunicazione dell'ottobre 2005 prevedeva ben 54 iniziative, cui se ne aggiungono tre nuove e una ripresa dal 2005, mentre un'altra è anticipata rispetto alla data prevista del 2008. Di queste iniziative, 15 sono già state adottate<sup>6</sup>. Sono inoltre state confermate 24 proposte di semplificazione, che dovranno essere adottate prima della fine dell'anno (cfr. allegato 1). Quindici iniziative saranno invece posposte al 2007/2008, mentre a cinque si è rinunciato in seguito a un loro riesame e alle consultazioni con le parti interessate.

---

<sup>5</sup> Le altre due – le proposte relative a radioprotezione e prodotti agricoli e al sistema computerizzato di prenotazione aerea – sono state posposte rispettivamente al 2006 e al 2007.

<sup>6</sup> Allo stato del 27 ottobre 2006.

Allo stato, la Commissione ha adottato 27 iniziative sulle 71 del periodo 2005-2006, per cui entro la fine del 2006 sarà stata adottata più della metà del programma. Il ritmo a cui avanzano i lavori del programma modulato di semplificazione nel 2006 varia a seconda della complessità del settore e, in alcuni casi, è rimasto indietro rispetto alla programmazione, anche se alcune iniziative sono state adottate prima del previsto. Le iniziative rimaste indietro comunque sono quasi tutte confermate per il 2007.

Va sottolineato che il programma in parola è di gran lunga il più ambizioso intervento di semplificazione mai intrapreso dalla Commissione. La semplificazione è un lavoro difficile laddove occorre bilanciare i benefici per i cittadini e le imprese con gli sforzi e i costi necessari per adattarsi a un nuovo contesto normativo. La semplificazione fra l'altro può comportare la riforma di alcuni settori. Spesso per superare la resistenza al cambiamento risvegliata dai piani di riforma occorre tempo, che viene speso dimostrando i benefici netti dei cambiamenti proposti a livello macroeconomico.

Inoltre, le valutazioni d'impatto possono portare alla luce nuovi elementi che sono importanti per la formulazione delle politiche al momento di scegliere l'opzione politica migliore<sup>7</sup>. Il programma di semplificazione è attuato tenendo conto dei risultati di tali valutazioni d'impatto.

Al momento, quasi tutte le proposte di semplificazione presentate dalla Commissione sono in attesa di essere esaminate dal Consiglio e dal Parlamento europeo (cfr. allegato 3).

Qui di seguito sono presentati alcuni esempi dei risultati conseguiti, che mostrano che i settori più importanti per le aziende e per i cittadini sono già stati affrontati dal programma di semplificazione della Commissione.

Ecco alcuni esempi di proposte adottate dalla Commissione:

- **Codice doganale modernizzato e dogana elettronica**<sup>8</sup>: rifusione della legislazione doganale della Comunità e creazione di sistemi elettronici paneuropei per lo scambio dei dati tra pubbliche autorità e società. Il commercio internazionale sarà agevolato da procedure e norme doganali razionalizzate e semplificate, da sistemi doganali automatizzati e interconnessi nonché dalla stretta cooperazione tra tutte le autorità e le parti che intervengono nella circolazione delle merci attraverso le frontiere della Comunità.

---

<sup>7</sup> Fra gli esempi di ritardi nella strategia di semplificazione troviamo: a) L'abrogazione inizialmente prevista delle norme sui sistemi computerizzati di prenotazione nel settore aereo è ora sottoposta a riesame, con conseguente posticipazione degli interventi, in quanto le reazioni delle parti interessate e del Parlamento europeo hanno fatto emergere la necessità di procedere a un'analisi ulteriore. La Commissione ha deciso, in piena sintonia coi principi relativi a una migliore regolamentazione, di lanciare una valutazione d'impatto estesa per esaminare ulteriormente le diverse opzioni, compresa l'abrogazione o la parziale liberalizzazione delle norme in vigore, e di riascoltare le parti interessate. b) I recenti sviluppi internazionali del settore dell'energia e il conseguente dibattito sulla sicurezza energetica hanno indotto la Commissione a posporre, probabilmente fino al 2008, il suo riesame della normativa sulle scorte petrolifere. La futura politica dell'istituzione in questo settore dipenderà in larga misura dai risultati della consultazione sul Libro verde sulla politica energetica presentato dalla Commissione nel marzo 2006.

<sup>8</sup> COM(2005) 608.

- **Ambiente**<sup>9</sup>: modernizzazione della direttiva quadro sui rifiuti:
  - semplificazione della normativa sui rifiuti chiarendo le definizioni, snellendo le disposizioni e integrando le direttive sui rifiuti pericolosi e gli oli usati;
  - miglioramento del mercato del riciclaggio grazie a standard ambientali che specifichino le circostanze in cui determinati rifiuti riciclati non sono più considerati rifiuti.
- **Libera circolazione dei lavoratori**<sup>10</sup>
  - modernizzazione delle attuali disposizioni relative al coordinamento dei sistemi nazionali di sicurezza sociale;
  - semplificazione delle procedure per gli assicurati e riduzione del tempo necessario affinché gli istituti dei diversi settori della sicurezza sociale (malattia, infortuni sul lavoro, malattie professionali, invalidità, vecchiaia, disoccupazione, prestazioni familiari) rispondano e trattino i casi transfrontalieri.
- **Additivi alimentari e sostanze aromatizzanti**<sup>11</sup>
  - semplificazione della normativa sugli additivi alimentari mediante un unico strumento relativo a principi, procedure e autorizzazioni;
  - miglioramento della procedura di aggiornamento dell'elenco comunitario degli additivi alimentari autorizzati.
- **Piccole e medie imprese del settore farmaceutico**<sup>12</sup>: istituzione di un contesto normativo semplificato per le micro-PMI, con riduzione delle tasse, possibilità di un loro pagamento differenziato, assistenza amministrativa e normativa per la presentazione delle richieste all'Agenzia europea dei medicinali.
- **Servizi di pagamento**<sup>13</sup>: istituzione di un contesto normativo semplificato relativo ai servizi di pagamento per i consumatori e le aziende. La proposta prevede la semplificazione di normativa (sostituzione di tre direttive e tre raccomandazioni con una serie coerente di norme), procedure amministrative per le pubbliche autorità (CE o nazionali) e procedure amministrative per i privati. La proposta introduce una maggiore trasparenza e obblighi d'informazione più chiari e concisi per gli utenti dei servizi di pagamento e i consumatori.

<sup>12</sup> Regolamento (CE) n. 2049/2005 della Commissione.

<sup>13</sup> COM(2005) 603.

- **Norme contabili**<sup>14</sup>: modifica delle norme attuali, dando più libertà agli Stati membri di esentare le aziende da alcuni obblighi in materia di divulgazione (saranno previste soglie più alte), con conseguente semplificazione amministrativa per le aziende più piccole.
- **Statistiche strutturali sulle imprese**<sup>15</sup>: la proposta semplifica la produzione di dati in questo settore, cancellando circa 15 variabili obbligatorie (in materia di ricerca e sviluppo, occupazione, energia e *leasing* finanziario), destinando altre variabili alla raccolta pluriennale anziché annuale e cancellando quelle opzionali. Inoltre, Eurostat sta sviluppando un programma di riorganizzazione delle statistiche sulle imprese, per aiutare gli Stati membri con nuovi metodi che potrebbero ridurre in modo sostanziale il lavoro per rispondere, ad es. mediante un maggiore uso dei dati amministrativi e la trasmissione elettronica dei conti delle aziende.
- **Mercato del trasporto aereo**<sup>16</sup>: la revisione del cosiddetto terzo pacchetto di liberalizzazione del trasporto aereo dovrebbe rendere più leggibile la normativa, riunendo in uno solo tre regolamenti attualmente in vigore. L'atto modernizza e semplifica il contesto normativo, garantisce un'applicazione coerente da uno Stato membro all'altro e risolve le potenziali distorsioni e limitazioni della concorrenza in alcuni segmenti del mercato, e dovrebbe contribuire ad allargare la scelta per i consumatori, ad abbassare le tariffe e ad aumentare la concorrenza.

### 1.1.2. *Lavori in corso*

Le importanti iniziative di semplificazione sotto elencate sono state confermate per il 2006/2007/2008 e riguardano la concorrenzialità:

- **Agricoltura:** fusione delle 21 organizzazioni comuni dei mercati in un solo sistema, per istituire un quadro normativo orizzontale più snello che porterà un'unica serie di norme armonizzate nei diversi settori della politica di mercato: intervento, ammasso privato, contingenti tariffari di importazione, restituzioni all'esportazione, misure di salvaguardia, prodotti agricoli, regole in materia di aiuti pubblici, comunicazioni e trasmissione dei dati.
- **Ambiente:** modifica della direttiva sulla prevenzione e la riduzione integrate dell'inquinamento e della legislazione collegata sulle emissioni industriali, al fine di migliorarne la chiarezza e coerenza (in particolare per quanto riguarda la trasmissione dei dati) e snellirne i requisiti.
- **Direttiva sui prodotti da costruzione**, per il chiarimento e la riduzione degli oneri amministrativi, in particolare per le PMI, mediante una maggiore flessibilità nella formulazione e nel ricorso alle specifiche tecniche, norme di certificazione meno gravose ed eliminazione degli ostacoli all'applicazione che hanno limitato l'avvio di un efficace mercato interno dei prodotti da costruzione.

<sup>15</sup> COM(2006) 66.

<sup>16</sup> COM(2006) 396.

- **Statistiche:** alleggerire la trasmissione dei dati statistici che compete agli operatori economici, in particolare le PMI, tenendo conto del lavoro svolto per migliorare la *governance* statistica dell’Unione e del risultato finale dei progetti pilota in corso per misurare e ridurre gli oneri amministrativi.
- **Etichettatura di alimenti e mangimi:** la modernizzazione della normativa chiarirà le norme sull’etichettatura, per consentire ai consumatori di compiere scelte informate, sicure, sane e sostenibili e contribuire a un contesto di mercato favorevole alla concorrenza, in cui gli operatori possano fare un uso efficiente delle etichette per vendere i propri prodotti.
- **Tutela dei consumatori:** Razionalizzazione e semplificazione dell’intero *acquis* in materia di tutela dei consumatori, al fine di eliminare eventuali incoerenze, sovrapposizioni, barriere al mercato interno e distorsioni della concorrenza.
- **Cosmetici:** la direttiva sui cosmetici è stata adottata 30 anni fa e modificata più di 40 volte. Occorre una rifusione che renda il testo più coerente e chiaro, contribuendo anche a ridurre il costo amministrativo dovuto all’attuazione e gestione della direttiva, pur mantenendo immutato l’attuale sistema volto al divieto progressivo dei test sugli animali.
- **Norme sulla contabilità e la trasmissione delle informazioni finanziarie:** occorre mettere a disposizione delle imprese UE una serie di norme aggiornate sulla trasmissione delle informazioni finanziarie<sup>17</sup>, fondendo i regolamenti attuali, che ammontano a più di 2 000 pagine, in un solo regolamento trasparente.
- **Quadro normativo nel settore automobilistico:** una volta approvata, la proposta di modifica della direttiva quadro sull’omologazione dei veicoli a motore consentirà:
  - la sostituzione delle direttive CE coi regolamenti UNECE. Questa semplificazione snellirà i regolamenti ed eliminerà le sovrapposizioni fra norme, oltre al fatto che aiuterà l’industria mondiale a rimuovere gli ostacoli non tariffari al commercio, mantenendo la posizione guida dell’UE come soggetto elaboratore di norme internazionali e consentendo all’industria di adeguarsi più rapidamente agli sviluppi tecnici internazionali;
  - l’introduzione delle disposizioni tecniche necessarie per l’autocontrollo e il controllo virtuale in 25 direttive CE e regolamenti UNECE. Ciò permetterà di semplificare la procedura di omologazione e di mantenere aggiornato il contesto normativo rispetto agli sviluppi tecnologici. Il controllo virtuale e l’autocontrollo renderanno più rapido lo sviluppo dei prodotti e ridurranno i costi sia per l’industria sia per i consumatori. Inoltre, la Commissione propone una disposizione generale nella direttiva per l’omologazione dei veicoli a motore che consentirà ai produttori di agire come laboratori di controllo, purché l’autorità incaricata dell’omologazione ne abbia riconosciuto le competenze necessarie.

---

<sup>17</sup>

Regolamenti della Commissione sull’approvazione delle norme internazionali sulla trasmissione delle informazioni finanziarie, delle norme internazionali sulla contabilità e relative interpretazioni.

- **Accesso al mercato del trasporto su strada e alla relativa professione:** rifusione di quattro regolamenti e una direttiva per chiarire, semplificare e rendere più facili da applicare le norme che disciplinano l'accesso alla professione e al mercato, anche in materia di cabotaggio, trasporto di merci su strada e trasporto passeggeri. La rifusione dovrebbe consentire un'applicazione armonizzata e un'applicazione delle norme efficiente in termini di costi, anche in un contesto transnazionale, limitando così le distorsioni della concorrenza, tutelando il diritto di stabilimento e migliorando la qualità dei servizi e la sicurezza stradale.
- Consolidamento dei regolamenti e delle direttive del **nuovo approccio tecnico**<sup>18</sup> per la commercializzazione dei prodotti, introducendo definizioni coerenti, procedure di certificazione semplificate e una cooperazione amministrativa più snella, in modo da agevolare l'immissione sul mercato dei prodotti e al tempo stesso di tutelare i produttori dai prodotti non conformi.

#### *1.1.3. Nuove iniziative per rafforzare il programma modulato di semplificazione*

Conformemente al programma modulato varato lo scorso anno, la Commissione rafforza la propria azione di semplificazione mediante 43<sup>19</sup> nuove iniziative per il periodo 2006-2009, volte a:

- stimolare l'innovazione e ridurre gli oneri amministrativi derivanti dagli obblighi normativi;
- ridurre il volume totale dell'*acquis* comunitario e promuovere il passaggio ad approcci normativi più flessibili.

Qui di seguito sono presentate alcune delle iniziative principali:

- Semplificazione delle norme relative alle modifiche dei **farmaci** successive al rilascio dell'autorizzazione (i cosiddetti regolamenti sulle variazioni). La gestione amministrativa di tali norme al momento mobilita più del 60% delle risorse umane e dei costi finanziari dei servizi delle aziende che si occupano degli obblighi normativi. In alcuni casi, questo fardello può intralciare l'innovazione, impedendo l'introduzione di modifiche utili per i pazienti e la società. Le procedure saranno snellite, in modo che i regolamenti sulle variazioni diventino più semplici, chiari e flessibili, sempre senza compromettere la sanità pubblica o la salute degli animali.
- Garantire il **riconoscimento reciproco**<sup>20</sup> dei beni non coperti da norme armonizzate comunitarie. La Commissione sta lavorando a una proposta normativa per l'eliminazione degli ostacoli tecnici alla libera circolazione dei beni all'interno dell'UE (“proposta sul riconoscimento reciproco”). Questo strumento definirà diritti e doveri da una parte delle

<sup>18</sup> Le direttive del nuovo approccio: stabiliscono solo i requisiti essenziali di interesse pubblico cui devono essere conformi i prodotti anziché fissare requisiti specifici dettagliati. I produttori possono scegliere diverse soluzioni tecniche e beneficiare di una certa flessibilità nel dimostrare che le soluzioni adottate sono conformi ai requisiti, ad es. mediante la standardizzazione.

<sup>19</sup> La cifra di 43 nuove iniziative corrisponde a 3 nel 2006, 28 nel 2007, 11 nel 2008 e 1 nel 2009.

<sup>20</sup> Quest'iniziativa contribuisce alla strategia di semplificazione, ma non fa parte del relativo programma modulato.

autorità nazionali e dall'altra delle imprese che desiderano vendere in uno Stato membro problemi già legalmente prodotti o commercializzati in un altro Stato membro.

- Chiarimento della definizione e dell'ambito di applicazione della valutazione della sicurezza per **i nuovi prodotti e i nuovi ingredienti alimentari** e snellimento della procedura di autorizzazione.
- Semplificazione nella gestione delle procedure amministrative nel settore **agricolo** mediante l'introduzione di una serie di semplificazioni tecniche. È stato definito un piano d'azione modulato volto a modificare le disposizioni che hanno un effetto diretto sugli agricoltori, gli altri operatori economici e le amministrazioni nazionali. Le modifiche riguardano ad esempio l'obbligo per gli agricoltori di tenere a disposizione i documenti, i doveri di controllo degli Stati membri, le condizioni alle quali è concesso un sostegno, ecc.
- Semplificazione e miglioramento della **politica comune della pesca**, con l'introduzione di una semplificazione legale e amministrativa in conformità del piano d'azione per il periodo 2006-2008 adottato dalla Commissione nel 2005<sup>21</sup>. Il piano d'azione riguarda alcune disposizioni relative alla gestione e al controllo delle attività di pesca, ad esempio per promuovere la trasparenza del contesto normativo e ridurre gli oneri amministrativi per i pescatori e gli amministratori coinvolti.
- Revisione del quadro normativo per **le reti e i servizi di comunicazione elettronica**, al fine di ridurre la necessità di una normazione ex ante e di favorire la flessibilità e l'innovazione, con un vantaggio sia per l'industria sia per i cittadini.
- Sostituzione della direttiva sui **prodotti tessili** con un unico regolamento, per semplificare le procedure relative all'adozione di nuovi nomi di fibre. Inoltre, nel processo di standardizzazione saranno inseriti metodi quantitativi di misurazione del contenuto di fibre.
- Semplificazione delle norme in vigore sui **giocattoli**, con un chiarimento dei requisiti essenziali di sicurezza e l'instaurazione di condizioni per un migliore approccio comune da parte delle autorità nazionali preposte alla sorveglianza dei mercati.
- Limitazione all'essenziale degli atti normativi in materia di **metrologia e fertilizzanti** mediante il “nuovo approccio”. Appositi standard sostituiranno le descrizioni tecniche dettagliate.
- Revisione del **sistema comunitario di concessione del marchio di qualità ecologica**, al fine di:
  - (a) creare un sistema più favorevole alle imprese coinvolgendo le parti interessate nel processo decisionale e tenendo conto delle esigenze delle PMI;
  - (b) delegare l'elaborazione dei criteri di concessione a un ente apposito e collegare strettamente il marchio al settore degli appalti verdi.

---

<sup>21</sup>

COM(2005) 647def.

- Rifusione di una direttiva relativa alla commercializzazione dei **materiali di moltiplicazione delle piante da frutto** e delle piante da frutto destinate alla produzione di frutti.
- Trattare le **patologie musculoscheletriche** connesse al lavoro con un unico strumento che comprenderebbe i vari requisiti minimi esistenti in materia di salute e sicurezza, come quelli relativi al trattamento manuale dei carichi o al lavoro a schermo.

Tutti i servizi della Commissione completeranno il riesame dell'*acquis* di loro competenza entro il 2009, per controllare la pertinenza dei rispettivi strumenti, la scelta della modalità normativa e l'ambito di applicazione di una delle modalità di semplificazione previste dalla strategia dell'ottobre 2005. In questo modo, ove necessario e appropriato, in futuro saranno individuate nuove iniziative di semplificazione, e sarà aggiornato il programma modulato.

## 1.2. Situazione attuale - codificazione

La codificazione è parte essenziale del processo inaugurato dalla Commissione europea per giungere a una migliore regolamentazione e può definirsi come il procedimento che riunisce le disposizioni degli atti esistenti, con tutte le modifiche successive, in un atto solo, contribuendo così a ridurre il volume dell'apparato normativo dell'UE e a renderlo più trasparente, leggibile e chiaro dal punto di vista giuridico.

Il programma modulato di codificazione (cfr. allegato 2) riguarda circa 500 atti. Sono 52 gli atti che hanno superato con successo il processo di codificazione<sup>22</sup> e sono stati adottati e pubblicati sulla Gazzetta ufficiale (38 atti della Commissione e 14 del Parlamento europeo e del Consiglio). Inoltre, 33 atti sono in attesa di esame da parte del potere legislativo e 8 sono in fase di procedura scritta. In tutto, la Commissione europea ha completato 85 atti.

Per raggiungere l'obiettivo di completare il programma di codificazione entro la metà del 2008, si sono adottate misure per accelerare la conversione dell'arretrato di produzione degli atti nelle nuove lingue dell'UE, arretrato risultante dai ritardi nella traduzione dei testi da codificare.

Sono anche state adottate misure adeguate per portare al massimo il numero dei testi codificati disponibili in bulgaro, romeno, irlandese e maltese, dando la priorità alla codificazione degli atti in cui le traduzioni sono già state completate.

Si è anche preparato un programma per l'adozione degli atti rimanenti da codificare, allo scopo di garantire la trasparenza del processo e, in particolare, di incoraggiare la moderazione nell'introduzione di modifiche agli atti sottoposti a codificazione, così da stabilizzare la legislazione e ridurre i tempi. Il programma rimane indicativo, dal momento che la conclusione del progetto di codificazione dipende dalla disponibilità in tutte le lingue degli atti da codificare, in particolar modo per il bulgaro e il romeno. Inoltre, la codificazione dev'essere posposta quando sono previste nuove modifiche degli atti. L'ordine degli atti nel programma cambierà alla luce di questi due fattori.

---

<sup>22</sup>

Allo stato del 27 ottobre 2006.

Va anche osservato che l'adozione degli atti codificati da parte del potere legislativo è soggetta alle norme indicate dall'accordo interistituzionale relativo a un metodo di lavoro accelerato ai fini della codificazione ufficiale dei testi legislativi, del 20 dicembre 1994.

## 2. FATTORI DI SUCCESSO

Il contesto normativo per le aziende e i cittadini d'Europa è costituito da diversi strati di leggi e norme spesso intrecciate generate a diversi livelli (internazionale<sup>23</sup>, comunitario, nazionale, regionale e locale). Nessuno di questi livelli può migliorare drasticamente la qualità di questa rete legislativa agendo da solo: un miglioramento concreto della qualità dell'intero contesto normativo richiede uno sforzo determinato, coerente e coordinato a tutti i livelli.

### 2.1. Lavoro di semplificazione basato su fondamenta metodologiche solide

#### 2.1.1. Consultazione di tutte le parti

Sia il programma modulato iniziale sia quello aggiornato del 2006-2009 sono stati elaborati in base ai contributi delle parti interessate e degli Stati membri. La loro esperienza è indispensabile per stabilire un programma di semplificazione significativo. La consultazione approfondita delle parti, il riesame di interi settori d'intervento, la valutazione ex post degli atti legislativi e il riesame degli esperti aiutano i responsabili politici a individuare meglio i veri problemi in campo e favoriscono il coinvolgimento in prima persona delle parti nelle misure proposte.

La comunicazione sulla semplificazione<sup>24</sup> dell'ottobre 2005 ha annunciato una serie di iniziative specifiche:

- Come annunciato nella comunicazione della Commissione sulla “Semplificazione e migliore regolamentazione per la politica agricola comune”, si è redatto un piano d’azione e lo si è presentato alla conferenza intitolata “Una PAC semplice per l’Europa: una sfida per tutti” tenutasi nell’ottobre 2006. Il piano d’azione presenta 20 progetti concreti di semplificazione tecnica (riduzione degli oneri senza cambiare la politica di fondo), da realizzare entro il 2007. Il piano d’azione dà il via a un processo di semplificazione continuativo, per cui le parti interessate e gli Stati membri sono invitati a presentare nuove proposte.
- Il “piano d’azione 2006-2008 per la semplificazione e il miglioramento della politica comune della pesca” è stato adottato dalla Commissione nel 2005 e pienamente sostenuto dalle istituzioni europee e dalle parti in causa consultate.
- La prossima comunicazione sulla riduzione degli obblighi di risposta, la semplificazione e la fissazione delle priorità nel settore delle statistiche comunitarie definisce un approccio strategico per continuare a ridurre gli oneri statistici sulle imprese, combinando due elementi: semplificazione degli obblighi statistici in alcuni settori prioritari e promozione di strumenti e metodi statistici che semplificheranno il rispetto di tali obblighi. In

<sup>23</sup> Ad esempio, in settori quali contabilità, *audit*, appalti pubblici e diritti di proprietà intellettuale, alcune norme e standard sono spesso stabiliti o adottate a livello internazionale.

<sup>24</sup> Comunicazione COM(2005) 535 Attuazione del programma comunitario di Lisbona: Una strategia per la semplificazione del contesto normativo.

particolare, la Commissione proporrà un unico sistema di flusso per Intrastat, un programma di riorganizzazione delle statistiche sulle imprese, e perseguità attivamente la semplificazione del sistema europeo di statistiche agricole.

Inoltre, l'articolo 138 del trattato prevede che le parti sociali europee siano consultate sulle iniziative comunitarie nel settore delle politiche sociali<sup>25</sup>.

In alcune occasioni, il risultato delle consultazioni ha indotto i servizi della Commissione a riconsiderare le intenzioni iniziali, ad esempio nel caso dei contesti normativi per il diritto societario e i diritti d'autore, che hanno portato a iniziative nuove:

- In merito al diritto societario, la Commissione ha previsto di avviare, entro la fine dell'anno in corso, un'iniziativa articolata volta a misurare i costi amministrativi risultanti dalle direttive sul diritto societario, al fine di individuare insieme agli Stati membri e alle parti interessate il margine per una riduzione dei costi. Il risultato di tale attività sarà presentato in una comunicazione prevista per la seconda metà del 2007.
- In merito ai diritti d'autore, il riesame ha portato a diverse attività, compresa una valutazione della direttiva del 2001 che potrebbe fra l'altro individuare delle eccezioni alla sua applicazione. Il risultato di tale attività dovrebbe vedersi entro l'estate del 2007.

#### *2.1.2. Analisi per settore*

Nella sua precedente comunicazione, la Commissione ha individuato la necessità di un approccio settoriale specifico alla semplificazione, al fine di valutare meglio l'impatto del contesto normativo sulla concorrenzialità di ciascun settore.

È quanto si sta facendo ad esempio nel settore dei prodotti da costruzione, con un'analisi globale dei fattori che influenzano la concorrenzialità dei soggetti del settore edilizio, nonché un'azione specifica intesa a semplificare la direttiva sui prodotti da costruzione (89/106/CEE). La consultazione delle parti è in corso, e la Commissione sta esaminando i contributi ricevuti.

Nel settore dei veicoli a motore, il gruppo ad alto livello CARS 21 ha esaminato i principali settori con un impatto sulla concorrenzialità dell'industria europea degli autoveicoli e ha emesso una serie di raccomandazioni.

In parallelo, l'applicazione dei principi relativi a una migliore regolamentazione è attualmente all'esame dei nuovi forum creati nel prosieguo della comunicazione sulla politica industriale<sup>26</sup>. Le attività di *screening* settoriale sono cominciate in gruppi come l'unità operativa sulla concorrenzialità delle TIC e il dialogo politico sull'industria meccanica.

---

<sup>25</sup> Un esempio recente è la consultazione delle parti sociali avvenuta nel 2005 sulla semplificazione delle direttive relative a salute e sicurezza sul lavoro, in merito alle relazioni e alla loro realizzazione pratica.

<sup>26</sup> Comunicazione della Commissione - Attuare il programma comunitario di Lisbona: un quadro politico per rafforzare l'industria manifatturiera dell'UE - verso un'impostazione più integrata della politica industriale - COM(2005) 474 def. del 5.10.2005.

### *2.1.3. Lavori in corso sugli oneri amministrativi*

In risposta alle conclusioni del Consiglio europeo del giugno 2006 e nell'ambito del quadro sulla concorrenzialità dell'agenda di Lisbona rinnovata, nella prima parte del 2007 la Commissione lancerà un importante piano d'azione per misurare e ridurre gli oneri amministrativi generati dalla legislazione UE in vigore. Il piano partirà dalle esperienze accumulate da quattro Stati membri (UK, NL, DK e CZ), che hanno già fissato obiettivi di riduzione dopo aver effettuato accurate misurazioni di riferimento. Il documento di lavoro della Commissione sulla misurazione dei costi amministrativi e la riduzione degli oneri amministrativi nell'Unione europea<sup>27</sup> presenta i risultati di un progetto pilota sugli oneri amministrativi realizzato nel 2006, che esamina e riprende le esperienze di cui sopra. Nel medio periodo, questo processo dovrebbe consentire al legislatore europeo e agli Stati membri dell'UE di individuare, sulla scorta di dati quantitativi, i settori prioritari in cui vi è posto per un'ulteriore semplificazione.

Al riguardo va osservato che, nel settore agricolo, è in corso uno studio sugli oneri amministrativi che ricadono sugli agricoltori. I primi risultati dello studio, che riguarda l'attuazione della riforma della PAC del 2003 e le sue modifiche successive, saranno disponibili nel 2007.

## **2.2. Stretta cooperazione tra le istituzioni UE**

Mentre la Commissione avanza proposte legislative di elevata qualità, è al Consiglio e al Parlamento che spetta condurre in porto il lavoro di semplificazione.

Ventidue proposte di semplificazione adottate dalla Commissione sono in attesa di un esame del Consiglio e del Parlamento europeo (allegato 3). Di queste, sette iniziative risalgono ai programmi precedenti del 2003<sup>28</sup> e sono ancora in attesa di un intervento del potere legislativo. All'allegato 3 si trova un elenco delle proposte in attesa, con testi di grande importanza per le aziende, come il riesame della sesta direttiva sull'IVA, la modernizzazione del codice doganale, la revisione della legislazione sui rifiuti, la semplificazione dell'omologazione dei veicoli a motore, lo snellimento delle statistiche strutturali sulle imprese e l'abrogazione delle norme sul preconfezionamento. L'adozione della direttiva sulla contabilità<sup>29</sup> con esenzioni a favore delle PMI e la recente approvazione da parte del Consiglio della posizione comune sul preconfezionamento mostrano la comune determinazione delle istituzioni di semplificare il contesto normativo.

La Commissione ha invitato il Parlamento europeo a reagire alla sua strategia di semplificazione dell'ottobre 2005, cosa che il Parlamento ha fatto nell'aprile 2006. Le posizioni adottate dalle commissioni parlamentari sul programma pluriennale di semplificazione mostrano una significativa convergenza con le priorità della Commissione quanto agli ambiti da semplificare.

<sup>27</sup> COM(2006) 691 def.

<sup>28</sup> L'azione quadro per aggiornare e semplificare l'*acquis* comunitario [COM(2003) 71].

<sup>29</sup> Direttiva 2006/46/CE, adottata il 14 giugno 2006.

Nel maggio 2006 il Parlamento europeo ha adottato una serie di relazioni su diversi aspetti riguardanti la migliore regolamentazione, compresa la semplificazione<sup>30</sup>. Il Parlamento europeo propone fra l'altro di definire, accanto alla codificazione e alla rifusione<sup>31</sup>, un nuovo strumento per tipi specifici di proposte di semplificazione, che beneficerebbe di metodi di lavoro su misura, al fine di un'adozione più rapida.

L'accordo interistituzionale (AII) "Legiferare meglio"<sup>32</sup>, in vigore dal dicembre 2003, stabilisce una piattaforma per sviluppare la cooperazione fra le tre istituzioni. Il gruppo ad alto livello incaricato di seguire l'attuazione dell'AII ha esaminato periodicamente lo stato d'avanzamento dei lavori, ad es. per quanto riguarda il coordinamento e la programmazione del lavoro legislativo, la qualità della legislazione (in particolare la valutazione d'impatto), il recepimento e l'applicazione della legislazione comunitaria e la semplificazione. È però risultato difficile per le istituzioni coleggiate arrivare a un'azione concreta per rendere prioritaria la semplificazione e accelerare il processo legislativo.

L'accordo raggiunto fra le istituzioni nel dicembre 2005 circa un approccio interistituzionale comune per la valutazione d'impatto<sup>33</sup> prova che, in presenza della volontà politica, l'accordo interistituzionale "Legiferare meglio" può produrre miglioramenti concreti nella realizzazione interistituzionale di una migliore regolamentazione. In occasione del riesame dell'approccio comune previsto per il 2008, le istituzioni dovrebbero accordarsi affinché le iniziative degli Stati membri nel settore della cooperazione di polizia e giudiziaria in materia penale siano accompagnate da valutazioni d'impatto.

La Commissione ha annunciato l'intenzione di agevolare il processo decisionale interistituzionale migliorando la programmazione e la visibilità delle iniziative di semplificazione:

- inserendo proposte finalizzate alla semplificazione nel proprio programma legislativo e di lavoro annuale, il che è stato fatto in relazione al programma del 2007;
- sfruttando appieno la sintesi iniziale delle proposte che formula, per spiegare meglio gli obiettivi di semplificazione perseguiti. Nelle proposte di semplificazione sottoposte a una valutazione d'impatto, la Commissione cercherà anche di valutare l'impatto della semplificazione, compresi gli oneri amministrativi;
- individuando alcuni casi emblematici di proposte di semplificazione, per sondare la possibilità di istituire migliori metodi di lavoro interistituzionale in merito.

### **2.3. Maggiore uso di coregolamentazione e autoregolamentazione**

La coregolamentazione e l'autoregolamentazione sono esempi di strumenti cui si può ricorrere in alcune circostanze per raggiungere certi obiettivi con un intervento limitato da parte del legislatore.

Ad esempio, gli enti europei per la standardizzazione e la Commissione stanno collaborando per proporre nuove iniziative sugli standard nel settore dei servizi, che dovrebbero concentrarsi specificamente sul mercato interno. Gli standard consentono agli utenti di confrontare liberamente prodotti e prezzi, il che rafforza la concorrenza e potenzia il commercio intraeuropeo di servizi. Come emerge da ampie consultazioni, la definizione di un piano d'azione sulla standardizzazione volto a promuovere la concorrenzialità delle industrie e l'approvazione di una decisione di finanziamento comunitario infonderanno vigore alle attività di standardizzazione.

Nel settore dell'autoregolamentazione, alle parti sociali europee spetta un ruolo specifico, dal momento che esse hanno la possibilità di concludere accordi<sup>34</sup> resi vincolanti da una proposta legislativa o attuati in maniera autonoma. L'autoregolamentazione è coerente con la politica della Commissione volta a promuovere la responsabilità sociale delle imprese. Le iniziative volontarie portate avanti nel quadro dell'Alleanza europea per la responsabilità sociale delle imprese dovrebbero portare a nuovi accordi nel campo dell'autoregolamentazione. Tali iniziative, adottate dalle imprese dell'UE in stretta cooperazione con le parti interessate, dovrebbero anche contribuire a un'accoglienza ben maggiore delle pratiche in materia di responsabilità sociale delle imprese, in Europa e in tutto il mondo. Per informare meglio i soggetti privati che desiderino istituire sistemi di autoregolamentazione o migliorarli e i soggetti responsabili di formulare la coregolamentazione, il Comitato economico e sociale europeo (CESE) e la Commissione europea hanno istituito una banca dati di quasi 100 sistemi in vigore nell'UE. La banca dati, che sarà inaugurata nel novembre 2006, illustra fra l'altro i tipi di problemi che hanno portato all'elaborazione di sistemi europei di auto o coregolamentazione, dei loro obiettivi e assetti organizzativi, per cui individuare le buone e le cattive prassi sarà molto più semplice.

### **2.4. Semplificazione a livello nazionale**

#### *2.4.1. La semplificazione della legislazione UE deve riflettersi al livello nazionale*

Le attività di semplificazione dell'UE dovranno essere pienamente sostenute dagli Stati membri, per far sì che i vantaggi di un contesto normativo comunitario più leggero non siano cancellati da nuove norme od ostacoli tecnici di natura nazionale. Ciò avviene già in un crescente numero di Stati membri, anche se migliorare è sempre possibile, come si vede dal mantenimento di requisiti nazionali in materia statistica nonostante la normativa comunitaria sia stata snellita.

---

<sup>34</sup>

L'accordo sulla protezione della salute dei lavoratori grazie alla manipolazione e all'uso corretti della silice cristallina e dei prodotti che la contengono, firmato nell'aprile del 2006, è un buon esempio di autoregolamentazione: si tratta di accordo autonomo elencante le buone prassi atte a ridurre al minimo l'esposizione dei lavoratori alla polvere di silice cristallina. Il documento, che dovrebbe agevolare il rispetto dei diversi valori limite nazionali di esposizione professionale, è stato negoziato dalle parti sociali delle diverse industrie interessate ed è il primo accordo autonomo multisettoriale concluso nel contesto del dialogo sociale europeo.

Pertanto, in alcune proposte recenti di abrogazione, la Commissione ha introdotto una disposizione relativa al reciproco riconoscimento, per garantire che non sorgano nuovi ostacoli al commercio in seguito all'abrogazione della normativa comunitaria. Ad esempio, la proposta sul preconfezionamento ha lo scopo di prevenire gli ostacoli al commercio che potrebbero venire da un mantenimento dei requisiti nazionali.

Analogamente, affinché la decisione di abrogare la legislazione UE sulla classificazione del legname grezzo risulti efficace, ci dovrebbe essere un riscontro uniforme in tutta l'UE. Le leggi nazionali che fanno riferimento alla direttiva devono essere modificate di conseguenza, e gli Stati membri dovrebbero garantire un'attuazione rapida e chiare delle modifiche tecniche.

Troppo spesso le imprese europee che desiderano operare in un altro Stato membro si trovano esposte a controlli e procedure di tipo amministrativo. Ove del caso, il disposto del trattato contribuisce a semplificare le operazioni nel quadro del mercato interno. La Commissione contribuisce alla riduzione degli oneri facendo valere l'articolo 28 del trattato CE sulla libera circolazione delle merci, in particolare attraverso un monitoraggio dei disegni di legge nazionali.

Nel 2007 la Commissione si occuperà dell'integrazione del mercato della difesa, con l'obiettivo di alleviare gli oneri amministrativi eccessivi che minano la concorrenzialità dell'industria europea in questo settore. Infatti, i costi annuali associati alle autorizzazioni di importazione ed esportazione all'interno della Comunità per i beni militari sono dell'ordine di 238,90 milioni di euro e pesano sulle industrie e le amministrazioni, ma in pratica le richieste di autorizzazione non sono quasi mai rifiutate<sup>35</sup>.

#### 2.4.2. *Evitare le orpellature*

L'esame delle disposizioni nazionali d'attuazione che recepiscono le direttive comunitarie fornisce esempi in abbondanza di norme tecniche, obblighi di etichettatura, scadenze, procedure di autorizzazione e altri requisiti amministrativi aggiunti alla normativa comunitaria dal legislatore nazionale (“orpellatura” o *gold plating*). Il contesto normativo in cui si muovono le aziende europee può essere migliorato solo se alle iniziative adottate a livello UE si accompagna un'azione adeguata a livello nazionale.

Ciò è confermato da altre fonti, ad esempio da un recente studio<sup>36</sup> condotto per una federazione nazionale di PMI. Lo studio suggerisce che l'estensione dell'ambito d'applicazione originario delle direttive da parte delle misure di recepimento può danneggiare gravemente la produttività delle piccole imprese, sottraendo risorse a questi soggetti chiave nella creazione di ricchezza e posti di lavoro. Inoltre, le orpellature possono mettere le imprese nazionali in una situazione svantaggiata rispetto alla concorrenza degli altri paesi.

<sup>35</sup> Relazione finale dell'UNISYS sulla circolazione intracomunitaria di prodotti nel settore della difesa, del febbraio 2005.

<sup>36</sup> Federazione delle piccole imprese del Regno Unito: *Burdened by Brussels or the UK? Improving the implementation of EU Directives* (autori: Sarah Schaefer e Edward Young). Il progetto analizza il recepimento di otto direttive nel diritto interno britannico e individua diversi esempi di attuazione eccessiva, in particolare per quanto riguarda la direttiva sul riciclaggio del denaro sporco o quella sull'intermediazione assicurativa.

Tutto ciò rafforza l'intenzione annunciata dalla Commissione nella comunicazione dell'ottobre 2005 di sfruttare meglio il potenziale di semplificazione utilizzando, se del caso, lo strumento del regolamento piuttosto che quello della direttiva. La sostituzione della direttiva 91/414/CEE con un regolamento sull'immissione in commercio dei prodotti fitosanitari è un esempio concreto di questo cambiamento nella prassi normativa.

#### 2.4.3. *Programmi nazionali di riforma*

Requisiti normativi e misure di attuazione hanno principalmente origine a livello nazionale.

I programmi nazionali di riforma (PNR) rientrano nella nuova struttura di *governance* della strategia di Lisbona per la crescita e l'occupazione e definiscono le politiche di riforma economica a livello nazionale sulla base degli orientamenti comunitari. Si tratta pertanto di elementi di importanza fondamentale nella creazione di un migliore contesto per le imprese dell'UE. Tutti gli Stati membri hanno risposto agli orientamenti su una migliore regolamentazione e hanno inserito misure per promuoverla nei rispettivi programmi nazionali di riforma.

Attualmente, nove Stati membri hanno lanciato programmi di semplificazione con livelli di ambizione differenti nell'ambito di questi PNR. È peraltro essenziale che il programma di semplificazione dell'UE sia completato da un progresso nella semplificazione in tutti gli Stati membri, a tutti i livelli normativi. La nota per il Comitato di politica economica "Promuovere una migliore regolamentazione"<sup>37</sup> preparata dalla Commissione europea e la relazione sulla concorrenzialità del 2006 stabiliscono le conclusioni principali relative all'attuazione della migliore regolamentazione a livello degli Stati membri e descrivono in dettaglio i progressi finora conseguiti al riguardo.

Fra gli esempi di iniziative nazionali troviamo:

- riduzione dei costi amministrativi: 17 Stati membri sono consapevoli della necessità di analizzare i costi amministrativi imposti alle imprese e hanno avviato attività di misurazione. Alcuni hanno fissato obiettivi quantitativi per ridurre i costi amministrativi (ad es. 20 o 25% entro il 2010). Le iniziative volte a sostenere quest'attività sono ad esempio *e-government*, sportelli unici<sup>38</sup> o uffici centrali di registrazione, riduzione della legislazione fiscale, semplificazione delle procedure amministrative connesse col lavoro dipendente e autonomo o iniziative fra governi;
- *e-government* e soluzioni TIC per ridurre le formalità all'interno della pubblica amministrazione: istituzione di portali contenenti la legislazione e vari moduli (per richieste, relazioni ecc.), maggiore disponibilità della banda larga;

---

<sup>37</sup> Direzione generale Imprese e industria, Bruxelles, 18 ottobre 2006.

<sup>38</sup> Gli sportelli unici riuniscono in una sola diverse procedure amministrative: essi aumentano l'efficienza, arrecano un beneficio alle PMI, sono trasferibili e i loro risultati possono essere misurati quantitativamente.

- revisione della legislazione: per garantire che i suoi obiettivi restino validi – semplificazione del diritto del lavoro, diffusione delle buone prassi normative nel settore pubblico, analisi costi-benefici delle norme, creazione di un forum sulle norme per le aziende in cui le parti esaminino gli oneri che pesano sulle aziende stesse, principi generali di buona regolamentazione compresi i principi di necessità, proporzionalità, sussidiarietà, trasparenza, responsabilità, accessibilità e semplicità;
- semplificazione degli obblighi fiscali, dell'amministrazione e della presentazione di relazioni: in particolare sportelli unici per le aziende, le PMI e i cittadini, riforma dell'imposta sulle società e dell'imposta sui redditi da capitale;
- semplificazione dell'IVA, ad esempio eliminazione degli ostacoli fiscali alle attività transfrontaliere, introducendo norme per consentire sgravi fiscali sui contribuiti ai regimi pensionistici negli Stati membri e aiutando i lavoratori migranti e i fornitori di servizi transfrontalieri;
- migliore attuazione delle norme sul mercato interno in modo da portarne al massimo i benefici;
- PMI: migliore accesso ai finanziamenti, riduzione degli obblighi di presentazione di relazioni, creazione di un ente in rete che faccia da sportello unico per le nuove imprese;
- date d'inizio comuni (DIC)<sup>39</sup>.

Gli scambi di buone prassi tra Stati membri e gli esami fra pari sono di importanza cruciale per migliorare il contesto normativo. La Commissione sta facilitando il lavoro avvalendosi del gruppo ad alto livello sulla migliore regolamentazione e del processo di Lisbona.

Gli Stati membri e le regioni dovrebbero essere incoraggiati a lavorare insieme per sviluppare le buone prassi, ad esempio tramite l'iniziativa BEST<sup>40</sup>.

---

<sup>39</sup> L'obiettivo delle DIC è aiutare le imprese a organizzarsi per le nuove norme e a migliorare la loro conoscenza dell'introduzione di norme nuove o modificate. Ad esempio, riducendo a due le date alle quali un nuovo regolamento può partire, si spera di ottenere da parte delle imprese maggiori livelli di rispetto delle norme nuove o modificate.

<sup>40</sup> L'unità operativa per la semplificazione dell'ambiente in cui operano le imprese (BEST) è stata istituita nel 1997: l'unità, che comprende rappresentanti del mondo imprenditoriale e delle autorità pubbliche degli Stati membri, ha avuto l'incarico di preparare una relazione indipendente sui modi di migliorare la legislazione e di rimuovere gli ostacoli superflui allo sviluppo delle imprese europee, in particolare delle PMI. Il gruppo di esperti di BEST ha individuato le buone prassi di diversi paesi (come la promozione di sportelli unici, le norme basate sul rischio, ecc.), affinché altri potessero imparare da quelle esperienze. Le norme basate sul rischio hanno scopo di concentrare gli sforzi della normativa (e i conseguenti costi per le imprese) sulle attività che presentano i rischi maggiori per la salute o per l'ambiente.

### **3. CONCLUSIONI**

La strategia di semplificazione, che si pone al centro dell'iniziativa per una migliore regolamentazione, sta dando i suoi primi risultati.

La Commissione europea è determinata a proseguire il cammino, per rispettare il proprio impegno di contribuire a un contesto normativo forte, grazie a un programma modulato ampliato e ambizioso.

Per raggiungere il nostro comune obiettivo, il Consiglio e il Parlamento dovranno intensificare il proprio impegno per portare avanti il lavoro di semplificazione fino alle fasi finali.

Anche gli Stati membri devono partecipare, scambiando buone prassi e applicando i programmi di semplificazione.

| 25          | Proposal for a Council Regulation on common market organisation of wine  | Revision                             | The reform of the common market organisation for wine aims mainly:<br>- To increase the competitiveness of the EU's wine producers;<br>- To create a wine regime that operates through clear, simple rules that ensure balance between supply and demand; and<br>- To create a wine regime that preserves the best traditions of EU wine production and reinforces the social and environmental fabric of rural areas.   |  |
| 26          | Cross compliance report and relevant legislative proposals for direct support schemes under the common agricultural policy | Revision                             | Report with appropriate legislative proposals on the implementation of the cross compliance mechanisms of Council Regulation (EC) NO 1782/2003 establishing common rules for direct support schemes  |  |
| 27          | Council regulation on information and promotion actions for agricultural products  | Recast                               | The objective of this initiative is to define the conditions, procedures and control methods in the co-financing of information programmes and the promotion of agricultural goods, both within the Internal Market and with regard to third countries. This initiative translates into a reduction of current regime on the promotion of agricultural products. The four Regulations (two of the Council and two of the Commission) will be halved into one Council Regulation and one Commission implementing measure. | X  |
| 28          | Amendment of the rules concerning applications for export licenses (agricultural products)                                 | Revision                             | Redrafting of Art 25 of Commission Regulation (EC) N° 1291/2000 will clarify that (for reasons of efficiency) the electronic versions of certificates referred to in Art. 19 may be submitted to the issuing body instead of to the importer / exporter.   | X  |

| 62 | Revision of existing Regulation on general food labelling and nutrition labelling   | Revision and repeal                  | <p>The key objective is to update the current rules on general food and nutrition labelling, taking into account the experience gained in applying Directives 2000/13/EC and 1990/496/CEC. There is a need to ensure that there is legislation that meets consumers' needs, is not too burdensome for the industry, and that can adapt to a continually changing market. This requires a new approach that strikes a balance between flexibility and prescription and between action at the national and EU level.</p> <p>The proposed Regulation will repeal the above mentioned Directives and will clarify and simplify the laws on general food and nutrition labelling.</p> |  |

| 66 | Modernisation of VAT provisions relating to financial services including insurance  | Revision                             | The current provisions are out of date and at the very least need to be modernised. The overall legal and regulatory environment in which the industry operates does not keep pace with the evolution of the industry and conflicts with the bias towards vertical integration. Companies are thus prevented from further refining their economic and legal structures to increase their competitiveness. Changes should be directed towards modernising the rules, ensuring their consistency with established policy objectives and reducing the need to seek clarification through litigation. |  |
