Article 38

General safeguard clause

1. Where any product of one Party is being imported into the territory of the other Party in such increased quantities and under such conditions as to cause or threaten to cause:

— serious injury to the domestic industry of like or directly competitive products in the territory of the importing Party; or

— serious disturbances in any sector of the economy or difficulties which could bring about serious deterioration in the economic situation of a region of the importing Party,

the importing Party may take appropriate measures under the conditions and in accordance with the procedures laid down in this Article.

2. The Community and Croatia shall only apply safeguard measures between themselves in accordance with the provisions of this Agreement. Such measures shall not exceed what is necessary to remedy the difficulties which have arisen, and should normally consist of the suspension of the further reduction of any applicable rate of duty provided for under this

Agreement for the product concerned or the increase of the rate of duty for that product. Such measures shall contain clear elements progressively leading to their elimination at the end of the set period, at the latest. Measures shall not be taken for a period exceeding one year. In very exceptional circumstances, measures may be taken up to a total maximum period of three years. No safeguard measure shall be applied to the import of a product that has previously been subject to such a measure for a period of, at least, three years since the expiry of the measure.

3. In the cases specified in this Article, before taking the measures provided for therein or, in the cases to which paragraph 4(b) applies, as soon as possible, the Community or Croatia, as the case may be, shall supply the Stabilisation and Association Council with all relevant information, with a view to seeking a solution acceptable to the two Parties.

4. For the implementation of the above paragraphs the following provisions shall apply:

(a) The difficulties arising from the situation referred to in this Article shall be referred for examination to the Stabilisation and Association Council, which may take any decisions needed to put an end to such difficulties.

If the Stabilisation and Association Council or the exporting Party has not taken a decision putting an end to the difficulties or no other satisfactory solution has been reached within 30 days of the matter being referred to the Stabilisation and Association Council, the importing Party may adopt the appropriate measures to remedy the problem in accordance with this Article. In the selection of safeguard measures, priority must be given to those which least disturb the functioning of the arrangements established in this Agreement.

(b) Where exceptional and critical circumstances requiring immediate action make prior information or examination, as the case may be, impossible, the Party concerned may, in the situations specified in this Article, apply forth with precautionary measures necessary to deal with the situation and shall inform the other Party immediately thereof.

5. The safeguard measures shall be notified immediately to the Stabilisation and Association Council and shall be the subject of periodic consultations within that body, particularly with a view to establishing a timetable for their abolition as soon as circumstances permit.

6. In the event of the Community or Croatia subjecting imports of products liable to give rise to the difficulties referred to in this Article to an administrative procedure having at its purpose the rapid provision of information on the trend of trade flows, it shall inform the other Party.

*Article 39***Shortage clause**

1. Where compliance with the provisions of this Title leads to:

- (a) a critical shortage, or threat thereof, of foodstuffs or other products essential to the exporting Party; or
- (b) re-export to a third country of a product against which the exporting Party maintains quantitative export restrictions, export duties or measures or charges having equivalent effect, and where the situations referred to above give rise, or are likely to give rise to major difficulties for the exporting Party

that Party may take appropriate measures under the conditions and in accordance with the procedures laid down in this Article.

2. In the selection of measures, priority must be given to those which least disturb the functioning of the arrangements in this Agreement. Such measures shall not be applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination where the same conditions prevail, or a disguised restriction on trade and shall be eliminated when the conditions no longer justify their maintenance.

3. Before taking the measures provided for in paragraph 1 of this Article or, as soon as possible in cases to which paragraph 4 of this Article applies the Community or Croatia, as the case may be, shall supply the Stabilisation and Association Council with all relevant information, with a view to seeking a solution acceptable to the Parties. The Parties within the Stabilisation and Association Council may agree on any means needed to put an end to the difficulties. If no agreement is reached within 30 days of the matter being referred to the Stabilisation and Association Council, the exporting Party may apply measures under this Article on the exportation of the product concerned.

4. Where exceptional and critical circumstances requiring immediate action make prior information or examination, as the case may be, impossible, the Community or Croatia, whichever is concerned, may apply forthwith the precautionary measures necessary to deal with the situation and shall inform the other Party immediately thereof.

5. Any measures applied pursuant to this Article shall be immediately notified to the Stabilisation and Association Council and shall be the subject of periodic consultations within that body, particularly with a view to establishing a timetable their elimination as soon as circumstances permit.

*Article 40***State monopolies**

Croatia shall progressively adjust any State monopolies of a commercial character so as to ensure that, by the end of the fourth year following the entry into force of this Agreement, no discrimination regarding the conditions under which goods are procured and marketed exists between nationals of the Member States and Croatia. The Stabilisation and Association Council shall be informed about the measures adopted to attain this objective.

Article 41

Protocol 4 lays down the rules of origin for the application of tariff preferences provided for in this Agreement.

*Article 42***Restrictions authorised**

This Agreement shall not preclude prohibitions or restrictions on imports, exports or goods in transit justified on grounds of public morality, public policy or public security; the protection of health and life of humans, animals or plants; the protection of national treasures of artistic, historic or archaeological value or the protection of intellectual, industrial and commercial property, or rules relating to gold and silver. Such prohibitions or restrictions shall not, however, constitute a means of arbitrary discrimination or a disguised restriction on trade between the Parties.

Article 43

Both Parties agree to cooperate to reduce the potential for fraud in the application of the trade provisions of this Agreement.

Notwithstanding other provisions of this Agreement, and in particular Articles 31, 38 and 89 and Protocol 4, where one Party finds that there is sufficient evidence of fraud such as a significant increase in trade of products by one Party to the other Party, beyond the level reflecting economic conditions such as normal production and export capacities, or failure to provide administrative cooperation as required for the verification of evidence of origin by the other Party, both Parties shall enter into consultations immediately to find an appropriate solution. Pending such solution, the Party concerned may take the appropriate measures it deems necessary. In the selection of the measures priority must be given to those which least disturb the functioning of the arrangements established in this Agreement.

Article 44

The application of this Agreement shall be without prejudice to the application of the provisions of Community law to the Canary Islands.

- the other Member States shall examine the possibility of concluding similar agreements.

2. Article 47

Rules shall be laid down for the coordination of social security systems for workers with Croatian nationality, legally employed in the territory of a Member State, and for the members of their families legally resident there. To that effect, a decision of the Stabilisation and Association Council, which should not affect any rights or obligations arising from bilateral agreements where the latter provide for more favourable treatment, shall put the following provisions in place:

- all periods of insurance, employment or residence completed by such workers in the various Member States shall be added together for the purpose of pensions and annuities in respect of old age, invalidity and death and for the purpose of medical care for such workers and such family members;

- (a) "Community company" or a "Croatian company" respectively shall mean a company set up in accordance with the laws of a Member State or of Croatia respectively and having its registered office or central administration or principal place of business in the territory of the Community or Croatia respectively.

- However, should the company, set up in accordance with the laws of a Member State or of Croatia respectively, have only its registered office in the territory of the Community or of Croatia respectively, the company shall be considered a Community or a Croatian company respectively if its operations possess a real and continuous link with the economy of one of the Member States or of Croatia respectively;

- (c) "Branch" of a company shall mean a place of business not having legal personality which has the appearance of permanency, such as the extension of a parent body, has a management and is materially equipped to negotiate business with third Parties so that the latter, although knowing that there will if necessary be a legal link with the parent body, the head office of which is abroad, do not have to deal directly with such parent body but may transact business at the place of business constituting the extension;
- (d) "Establishment" shall mean:
- (i) as regards nationals, the right to take up economic activities as self-employed persons, and to set up undertakings, in particular companies, which they effectively control. Self-employment and business undertakings by nationals shall not extend to seeking or taking employment in the labour market or confer a right of access to the labour market of another party. The provisions of this Chapter do not apply to those who are not exclusively self-employed;
- (ii) as regards Community or Croatian companies, the right to take up economic activities by means of the setting up of subsidiaries and branches in Croatia or in the Community respectively;
- (e) "Operations" shall mean the pursuit of economic activities;

- (i) "Financial services" shall mean those activities described in Annex VI. The Stabilisation and Association Council may extend or modify the scope of that Annex.

Article 49

1. Croatia shall facilitate the setting-up of operations on its territory by Community companies and nationals. To that end, it shall grant, upon entry into force of this Agreement:

(i) as regards the establishment of Community companies treatment no less favourable than that accorded to its own companies or to any third country company, whichever is the better, and;

(ii) as regards the operation of subsidiaries and branches of Community companies in Croatia, once established, treatment no less favourable than that accorded to its own companies and branches or to any subsidiary and branch of any third country company, whichever is the better.

2. The Parties shall not adopt any new regulations or measures which introduce discrimination as regards the establishment of Community or Croatian companies on their territory or in respect of their operation, once established, by comparison with their own companies.

3. The Community and its Member States shall grant, from the entry into force of this Agreement:

(i) as regards the establishment of Croatian companies, treatment no less favourable than that accorded by Member States to their own companies or to any company of any third country, whichever is the better;

(ii) as regards the operation of subsidiaries and branches of Croatian companies, established in their territory, treatment no less favourable than that accorded by Member States to their own companies and branches, or to any subsidiary and branch of any third country company, established in their territory, whichever is the better.

4. Four years after the entry into force of this Agreement, the Stabilisation and Association Council will establish the modalities to extend the above provisions to the establishment of nationals of both Parties to the Agreement to take up economic activities as self-employed persons.

5. Notwithstanding the provisions of this Article:

Article 52

- (a) Subsidiaries and branches of Community companies shall have, from the entry into force of this Agreement, the right to use and rent real property in Croatia;
- (b) Subsidiaries of Community companies shall also have the right to acquire and enjoy ownership rights over real property as Croatian companies and as regards public goods/goods of common interest, the same rights as enjoyed by Croatian companies, where these rights are necessary for the conduct of the economic activities for which they are established excluding natural resources, agricultural land, forests and forestry land. Four years after the entry into force of this Agreement the Stabilisation and Association Council shall establish the modalities for extending rights under this paragraph to the excluded sectors.
- (c) Four years after the entry into force of this Agreement, the Stabilisation and Association Council shall examine the possibility of extending the rights under (b), including rights in the excluded sectors, to branches of Community companies.

1. The provisions of Articles 49 and 50 do not preclude the application by a Party of particular rules concerning the establishment and operation in its territory of branches of companies of another Party not incorporated in the territory of the first Party, which are justified by legal or technical differences between such branches as compared to branches of companies incorporated in its territory or, as regards financial services, for prudential reasons.

2. The difference in treatment shall not go beyond what is strictly necessary as a result of such legal or technical differences or, as regards financial services, for prudential reasons.

Article 50

1. Subject to the provisions of Article 49, with the exception of financial services described in Annex VI, each Party may regulate the establishment and operation of companies and nationals on its territory, in so far as these regulations do not discriminate against companies and nationals of the other Party in comparison with its own companies and nationals.

2. In respect of financial services, notwithstanding any other provisions of this Agreement, a Party shall not be prevented from taking measures for prudential reasons, including for the protection of investors, depositors, policy holders or persons to whom a fiduciary duty is owed by a financial service supplier, or to ensure the integrity and stability of the financial system. Such measures shall not be used as a means of avoiding the Party's obligations under the Agreement.

3. Nothing in the Agreement shall be construed to require a Party to disclose information relating to the affairs and accounts of individual customers or any confidential or proprietary information in the possession of public entities.

Article 51

1. The provisions of this Chapter shall not apply to air transport services, inland waterways transport services and maritime cabotage services.

2. The Stabilisation and Association Council may make recommendations for improving establishment and operations in the areas covered by paragraph 1.

Article 53

In order to make it easier for Community nationals and Croatian nationals to take up and pursue regulated professional activities in Croatia and Community respectively, the Stabilisation and Association Council shall examine which steps are necessary for the mutual recognition of qualifications. It may take all necessary measures to that end.

Article 54

1. A Community company or a Croatian company established in the territory of Croatia or the Community respectively shall be entitled to employ, or have employed by one of its subsidiaries or branches, in accordance with the legislation in force in the host country of establishment, in the territory of Croatia and the Community respectively, employees who are nationals of the Member States and of Croatia respectively, provided that such employees are key personnel as defined in paragraph 2 and that they are employed exclusively by companies, subsidiaries or branches. The residence and work permits of such employees shall only cover the period of such employment.

2. Key personnel of the above mentioned companies, herein referred to as "organisations", are "intra-corporate transferees" as defined in (c) of this paragraph in the following categories, provided that the organisation is a legal person and that the persons concerned have been employed by it or have been partners in it (other than as majority shareholders), for at least the year immediately preceding such movement:

(a) Persons working in a senior position with an organisation, who primarily direct the management of the establishment, receiving general supervision or direction principally from the board of directors or stockholders of the business or their equivalent including:

— directing the establishment of a department or sub-division of the establishment;

— supervising and controlling the work of other supervisory, professional or managerial employees;

- having the authority personally to recruit and dismiss or recommend recruiting, dismissing or other personnel actions;
- (b) Persons working within an organisation who possess uncommon knowledge essential to the establishment's service, research equipment, techniques or management. The assessment of such knowledge may reflect, apart from knowledge specific to the establishment, a high level of qualification referring to a type of work or trade requiring specific technical knowledge, including membership of an accredited profession;
- (c) An "intra-corporate transferee" is defined as a natural person working within an organisation in the territory of a Party, and being temporarily transferred in the context of pursuit of economic activities in the territory of the other Party; the organisation concerned must have its principal place of business in the territory of a Party and the transfer be to an establishment (branch, subsidiary) of that organisation, effectively pursuing like economic activities in the territory of the other Party.

3. The entry into and the temporary presence within the territory of the Community or Croatia of Croatian and Community nationals respectively shall be permitted, when these representatives of companies are persons working in a senior position, as defined in paragraph 2(a) above, within a company, and are responsible for the setting up of a Community subsidiary or branch of a Croatian company or of a Croatian subsidiary or branch of a Community company in a Member State or in Croatia respectively, when:

- those representatives are not engaged in making direct sales or supplying services, and
- the company has its principal place of business outside the Community or Croatia, respectively, and has no other representative, office, branch or subsidiary in that Member State or in Croatia respectively.

Article 55

During the first three years following the date of entry into force of this Agreement, Croatia may, on a transitional basis, introduce measures which derogate from the provisions of this Chapter as regards the establishment of Community companies and nationals of certain industries which:

- are undergoing restructuring, or are facing serious difficulties, particularly where these entail serious social problems in Croatia, or
- face the elimination or a drastic reduction of the total market share held by Croatian companies or nationals in a given sector or industry in Croatia, or
- are newly emerging industries in Croatia.

Such measures:

- (i) shall cease to apply at the latest five years after the entry into force of this Agreement.
- (ii) shall be reasonable and necessary in order to remedy the situation, and
- (iii) shall not introduce discrimination concerning the activities of Community companies or nationals already established in Croatia at the time of introduction of a given measure, by comparison with Croatian companies or nationals.

While devising and applying such measures, Croatia shall grant preferential treatment wherever possible to Community companies and nationals, and in no case treatment less favourable than that accorded to companies or nationals from any third country. Prior to the adoption of these measures, Croatia shall consult the Stabilisation and Association Council and shall not put them into effect before a one month period has elapsed following the notification to the Stabilisation and Association Council of the concrete measures to be introduced by Croatia, except where the threat of irreparable damage requires the taking of urgent measures, in which case Croatia shall consult the Stabilisation and Association Council immediately after their adoption.

Upon the expiry of the third year following the entry into force of this Agreement Croatia may introduce or maintain such measures only with the authorisation of the Stabilisation and Association Council and under conditions determined by the latter.

CHAPTER III

SUPPLY OF SERVICES

Article 56

1. The Parties undertake in accordance with the following provisions to take the necessary steps to allow progressively the supply of services by Community or Croatian companies or nationals which are established in a Party other than that of the person for whom the services are intended.

2. In step with the liberalisation process mentioned in paragraph 1, the Parties shall permit the temporary movement of natural persons providing the service or who are employed by the service provider as key personnel as defined in Article 54, including natural persons who are representatives of a Community or Croatian company or national and are seeking temporary entry for the purpose of negotiating for the sale of services or entering into agreements to sell services for that service provider, where those representatives will not be engaged in making direct sales to the general public or in supplying services themselves.

3. As from four years after the entry into force of this Agreement, the Stabilisation and Association Council shall take the measures necessary to implement progressively the provisions of paragraph 1. Account shall be taken of the progress achieved by the Parties in the approximation of their laws.

Article 57

1. The Parties shall not take any measures or actions which render the conditions for the supply of services by Community and Croatian nationals or companies which are established in a Party other than that of the person for whom the services are intended significantly more restrictive as compared to the situation existing on the day preceding the day of entry into force of the Agreement.

2. If one Party is of the view that measures introduced by the other Party since the entry into force of the Agreement result in a situation which is significantly more restrictive in respect of supply of services as compared with the situation existing at the date of entry into force of the Agreement, such first Party may request the other Party to enter into consultations.

Article 58

With regard to supply of transport services between the Community and Croatia, the following provisions shall apply:

1. With regard to inland transport, Protocol 6 lays down the rules applicable to the relationship between the Parties in order to ensure, in particular, unrestricted road transit traffic across Croatia and the Community as a whole, the effective application of the principle of non discrimination and progressive harmonisation of the Croatian transport legislation with that of the Community.
2. With regard to international maritime transport the Parties undertake to apply effectively the principle of unrestricted access to the market and traffic on a commercial basis.
 - (a) The above provision does not prejudice the rights and obligations under the United Nations Code of Conduct for Liner Conferences, as applied by one or the other Party to this Agreement. Non-conference liners will be free to operate in competition with a conference as long as they adhere to the principle of fair competition on a commercial basis;
 - (b) The Parties affirm their commitment to a freely competitive environment as being an essential feature of the dry and liquid bulk trade.

3. In applying the principles of paragraph 2, the Parties shall:
 - (a) not introduce cargo-sharing clauses in future bilateral agreements with third countries, other than in those exceptional circumstances where liner shipping companies from one or other Party to this Agreement would not otherwise have an effective opportunity to ply for trade to and from the third country concerned;
 - (b) prohibit cargo-sharing arrangements in future bilateral agreements concerning dry and liquid bulk trade;
 - (c) abolish, upon the entry into force of this Agreement, all unilateral measures and administrative, technical and other obstacles that could have restrictive or discriminatory effects on the free supply of services in international maritime transport.
 - (d) Each Party shall grant, inter alia, no less favourable treatment for the ships operated by nationals or companies of the other Party than that accorded to a Party's own ships with regard to access to ports open to international trade, the use of infrastructure and auxiliary maritime services of the ports, as well as related fees and charges, customs facilities and the assignment of berths and facilities for loading and unloading.
4. With a view to ensuring a coordinated development and progressive liberalisation of transport between the Parties adapted to their reciprocal commercial needs, the conditions of mutual market access in air transport shall be dealt with by special agreements to be negotiated between the Parties after the entry into force of this Agreement.
5. Prior to the conclusion of the agreement referred to in paragraph 4, the Parties shall not take any measures or actions which are more restrictive or discriminatory as compared with the situation existing prior to the entry into force of this Agreement.
6. Croatia shall adapt its legislation, including administrative, technical and other rules, to that of the Community existing at any time in the field of air and inland transport insofar as it serves liberalisation purposes and mutual access to markets of the Parties and facilitates the movement of passengers and of goods.
7. In step with the common progress in the achievement of the objectives of this Chapter, the Stabilisation and Association Council shall examine ways of creating the conditions necessary for improving freedom to provide air and inland transport services.

CHAPTER IV

CURRENT PAYMENTS AND MOVEMENT OF CAPITAL*Article 59*

The Parties undertake to authorise, in freely convertible currency, in accordance with the provisions of Article VIII of the Articles of the Agreement of the International Monetary Fund, any payments and transfers on the current account of balance of payments between the Community and Croatia.

Article 60

1. With regard to transactions on the capital and financial account of balance of payments, from the entry into force of the Agreement, the Parties shall ensure the free movement of capital relating to direct investments made in companies formed in accordance with the laws of the host country and investments made in accordance with the provisions of Chapter II of Title V, and the liquidation or repatriation of these investments and of any profit stemming therefrom.

2. With regard to transactions on the capital and financial account of balance of payments, from the entry into force of this Agreement, the Parties shall ensure the free movement of capital relating to credits related to commercial transactions or to the provision of services in which a resident of one of the Parties is participating, and to financial loans and credits, with maturity longer than a year.

As from the entry into force of this Agreement, Croatia shall authorise, by making full and expedient use of its existing procedures, the acquisition of real estate in Croatia by nationals of Member States of the European Union, except for areas and matters listed in Annex VII. Within four years from the entry into force of this Agreement, Croatia shall progressively adjust its legislation concerning the acquisition of real estate in Croatia by nationals of the Member States of the European Union to ensure the same treatment as compared to Croatian nationals. At the end of the fourth year after the entry into force of this Agreement, the Stabilisation and Association Council shall examine the modalities for extending these rights to the areas and matters listed in Annex VII.

The Parties shall also ensure, from the fourth year after the entry into force of this Agreement, free movement of capital relating to portfolio investment and financial loans and credits with maturity shorter than a year.

3. Without prejudice to paragraph 1, the Parties shall not introduce any new restrictions on the movement of capital and current payments between residents of the Community and Croatia and shall not make the existing arrangements more restrictive.

4. Without prejudice to the provisions of Article 59 and of this Article, where, in exceptional circumstances, movements of

capital between the Community and Croatia cause, or threaten to cause, serious difficulties for the operation of exchange rate policy or monetary policy in the Community or Croatia, the Community and Croatia, respectively, may take safeguard measures with regard to movements of capital between the Community and Croatia for a period not exceeding six months if such measures are strictly necessary.

5. Nothing in the above provisions shall be taken to limit the rights of economic operators of the Parties from benefiting from any more favourable treatment that may be provided for in any existing bilateral or multilateral agreement involving Parties to this Agreement.

6. The Parties shall consult each other with a view to facilitating the movement of capital between the Community and Croatia in order to promote the objectives of this Agreement.

Article 61

1. During the first four years following the date of entry into force of this Agreement, the Parties shall take measures permitting the creation of the necessary conditions for the further gradual application of Community rules on the free movement of capital.

2. By the end of the fourth year following the date of entry into force of this Agreement, the Stabilisation and Association Council shall determine the modalities for full application of Community rules on the movement of capital.

CHAPTER V

GENERAL PROVISIONS*Article 62*

1. The provisions of this Title shall be applied subject to limitations justified on grounds of public policy, public security or public health.

2. They shall not apply to activities that in the territory of either Party are connected, even occasionally, with the exercise of official authority.

Article 63

For the purpose of this Title, nothing in this Agreement shall prevent the Parties from applying their laws and regulations regarding entry and stay, employment, working conditions, establishment of natural persons and supply of services, provided that, in so doing, they do not apply them in such a manner as to nullify or impair the benefits accruing to any Party under the terms of a specific provision of this Agreement. This provision shall be without prejudice to the application of Article 62.

Article 64

Companies which are controlled and exclusively owned jointly by Croatian companies or nationals and Community companies or nationals shall also be covered by the provisions of this Title.

Article 65

1. The Most-Favoured-Nation treatment granted in accordance with the provisions of this Title shall not apply to the tax advantages that the Parties are providing or will provide in the future on the basis of agreements designed to avoid double taxation or other tax arrangements.

2. None of the provisions of this Title shall be construed to prevent the adoption or enforcement by the Parties of any measure aimed at preventing the avoidance or evasion of taxes pursuant to the tax provisions of agreements to avoid double taxation and other tax arrangements or domestic fiscal legislation.

3. None of the provisions of this Title shall be construed to prevent Member States or Croatia in applying the relevant provisions of their fiscal legislation, from distinguishing between taxpayers who are not in identical situations, in particular as regards their place of residence.

Article 66

1. The Parties shall endeavour wherever possible to avoid the imposition of restrictive measures, including measures relating to imports, for balance of payments purposes. A Party adopting such measures shall present as soon as possible to the other Party a timetable for their removal.

2. Where one or more Member States or Croatia is in serious balance of payments difficulties, or under imminent threat thereof, the Community or Croatia, as the case may be, may, in accordance with the conditions established under the WTO Agreement, adopt restrictive measures, including measures relating to imports, which shall be of limited duration and may not go beyond what is strictly necessary to remedy the balance of payments situation. The Community or Croatia, as the case may be, shall inform the other Party forthwith.

3. Any restrictive measures shall not apply to transfers related to investment and in particular to the repatriation of amounts invested or reinvested or any kind of revenues stemming therefrom.

Article 67

The provisions of this Title shall be progressively adjusted, notably in the light of requirements arising from Article V of the General Agreement on Trade in Services (GATS).

Article 68

The provisions of this Agreement shall not prejudice the application by either Party of any measure necessary to prevent the circumvention of its measures concerning third-country access to its market through the provisions of this Agreement.

TITLE VI

APPROXIMATION OF LAWS, LAW ENFORCEMENT AND COMPETITION RULES*Article 69*

1. The Parties recognise the importance of the approximation of Croatia's existing legislation to that of the Community. Croatia shall endeavour to ensure that its existing laws and future legislation will be gradually made compatible with the Community acquis.

2. This approximation will start on the date of signing of the Agreement, and will gradually extend to all the elements of the Community acquis referred to in this Agreement by the end of the period defined in Article 5 of this Agreement. In particular, at an early stage, it will focus on fundamental elements of the Internal Market acquis as well as on other trade-related areas, on the basis of a programme to be agreed between the Commission of the European Communities and Croatia. Croatia will also define, in agreement with the Commission of the European Communities, the modalities for the monitoring of the implementation of approximation of legislation and law enforcement actions to be taken.

*Article 70***Competition and other economic provisions**

1. The following are incompatible with the proper functioning of the Agreement, in so far as they may affect trade between the Community and Croatia:

- (i) all agreements between undertakings, decisions by associations of undertakings and concerted practices between undertakings which have as their object or effect the prevention, restriction or distortion of competition;
- (ii) abuse by one or more undertakings of a dominant position in the territories of the Community or of Croatia as a whole or in a substantial part thereof;
- (iii) any State aid which distorts or threatens to distort competition by favouring certain undertakings or certain products.

2. Any practices contrary to this Article shall be assessed on the basis of criteria arising from the application of the competition rules applicable in the Community, in particular from Articles 81, 82, 86 and 87 of the Treaty establishing the European Community and interpretative instruments adopted by the Community institutions.

3. The Parties shall ensure that an operationally independent public body is entrusted with the powers necessary for the full application of paragraph 1(i) and (ii) of this Article, regarding private and public undertakings and undertakings to which special rights have been granted.

4. Croatia shall establish an operationally independent authority which is entrusted with the powers necessary for the full application of paragraph 1(iii) of this Article within one year from the date of entry into force of this Agreement. This authority shall have, inter alia, the powers to authorise State aid schemes and individual aid grants in conformity with paragraph 2 of this Article, as well as the powers to order the recovery of State aid that has been unlawfully granted.

5. Each Party shall ensure transparency in the area of State aid, inter alia by providing to the other Party a regular annual report, or equivalent, following the methodology and the presentation of the Community survey on State aid. Upon request by one Party, the other Party shall provide information on particular individual cases of public aid.

6. Article 5

1. In view of the disciplines stipulated by Article 70 of the Agreement, the Parties recognise the need and urgency that

each Party addresses promptly any structural weaknesses of its steel sector to ensure the global competitiveness of its industry. Croatia shall therefore establish within two years the necessary restructuring and conversion programme for its steel industry to achieve viability of this sector under normal market conditions. Upon request, the Community shall provide Croatia with the appropriate technical advice to achieve this objective.

2. Further to the disciplines stipulated by Article 70 of the Agreement, any practices contrary to this Article shall be assessed on the basis of specific criteria arising from the application of the State aid disciplines of the Community, including secondary legislation, and including any specific rules on State aid control applicable to the steel sector after the expiry of the ECSC Treaty.

3. For the purposes of applying the provisions of paragraph 1(iii) of Article 70 of the Agreement with regard to steel products, the Community recognises that during five years after the entry into force of the Agreement Croatia may exceptionally grant State aid for restructuring purposes provided that:

- it leads to the viability of the benefiting firms under normal market conditions at the end of the restructuring period, and
- the amount and intensity of such aid are strictly limited to what is absolutely necessary in order to restore such viability and are progressively reduced, and
- the restructuring programme is linked to a global rationalisation and reduction of capacity in Croatia.

4. Each Party shall ensure full transparency with respect to the implementation of the necessary restructuring and conversion programme by a full and continuous exchange of information to the other Party, including details on the restructuring plan as well as amount, intensity and purpose for any State aid granted on the basis of paragraphs 2 and 3 of this Article.

5. The Stabilisation and Association Council shall monitor the implementation of the requirements set out in paragraphs 1 to 4 above.

6. If one of the Parties considers that a particular practice of the other Party is incompatible with the terms of this article, and if that practice causes or threatens to cause prejudice to the interests of the first Party or material injury to its domestic industry, this Party may take appropriate measures after consultation within the contact group referred to in Article 7 or after thirty working days following referral for such consultation.

Article 6

The provisions of Articles 19, 20 and 21 of the Agreement shall apply to trade between the Parties in steel products.

Article 7

The Parties agree that for the purpose of following and reviewing the proper implementation of this Protocol, a Contact Group shall be created in accordance with Article 115 of the Agreement.

The conditions referred to above indicate, for all products covered by this Agreement, the working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials. Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in the list is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.

Article 9

Accessories, spare parts and tools

Article 10

Sets

Sets, as defined in General Rule 3 of the Harmonised System, shall be regarded as originating when all component products are originating. Nevertheless, when a set is composed of originating and non-originating products, the set as a whole shall be regarded as originating, provided that the value of the non-originating products does not exceed 15 per cent of the ex-works price of the set.

and

(b) they have not undergone any operation beyond that necessary to preserve them in good condition while in that country or while being exported.

3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin where the products have been submitted before the said final date.

Article 24

Submission of proof of origin

Proofs of origin shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of the Agreement.

Article 25

Importation by instalments

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) of the Harmonised System falling within Sections XVI and XVII or heading Nos 7308 and 9406 of the Harmonised System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

In the case of products sent by post, this declaration can be made on the customs declaration CN22/CN23 or on a sheet of paper annexed to that document.

2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.

3. Furthermore, the total value of these products shall not exceed EUR 500 in the case of small packages or EUR 1 200 in the case of products forming part of travellers' personal luggage.

Article 27

Supporting documents

The documents referred to in Articles 17(3) and 21(3) used for the purpose of proving that products covered by a movement certificate EUR.1 or an invoice declaration can be considered as products originating in the Community or in Croatia and fulfil the other requirements of this Protocol may consist *inter alia* of the following:

- (a) direct evidence of the processes carried out by the exporter or supplier to obtain the goods concerned, contained for example in his accounts or internal bookkeeping;
- (b) documents proving the originating status of materials used, issued or made out in the Community or in Croatia where these documents are used in accordance with domestic law;

4. The customs authorities of the importing country shall keep for at least three years the movement certificates EUR.1 and the invoice declarations submitted to them.

Article 29

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not *ipso facto* render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.

2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

Article 30

Amounts expressed in euro

1. For the application of the provisions of Article 21(1)(b) and Article 26(3) in cases where products are invoiced in a currency other than euro, amounts in the national currencies of the Member States or Croatia equivalent to the amounts expressed in euro shall be fixed annually by each of the countries concerned.

2. A consignment shall benefit from the provisions of Article 21(1)(b) or Article 26(3) by reference to the currency in which the invoice is drawn up, according to the amount fixed by the Community or Croatia.

3. The amounts to be used in any given national currency shall be the equivalent in that currency of the amounts expressed in euro as at the first working day of October. The amounts shall be communicated to the Commission of the European Communities by 15 October and shall apply from 1 January the following year. The Commission of the European Communities shall notify Croatia of the relevant amounts.

4. Croatia may round up or down the amount resulting from the conversion into its national currency of an amount expressed in euro. The rounded-off amount may not differ from the amount resulting from the conversion by more than 5 per cent. Croatia may retain unchanged its national currency equivalent of an amount expressed in euro if, at the time of the annual adjustment provided for in paragraph 3, the conversion of that amount, prior to any rounding-off, results in an increase of less than 15 per cent in the national currency equivalent. The

national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.

5. The amounts expressed in euro shall be reviewed by the Stabilisation and Association Committee at the request of the Community or Croatia. When carrying out this review, the Stabilisation and Association Committee shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in euro.

TITLE VI

ARRANGEMENTS FOR ADMINISTRATIVE COOPERATION

Article 31

Mutual assistance

1. The customs authorities of the Member States and of Croatia shall provide each other, through the Commission of the European Communities, with specimen impressions of stamps used in their customs offices for the issue of movement certificates EUR.1 and with the addresses of the customs authorities responsible for verifying those certificates and invoice declarations.

2. In order to ensure the proper application of this Protocol, the Community and Croatia shall assist each other, through the competent customs administrations, in checking the authenticity of the movement certificates EUR.1 or the invoice declarations and the correctness of the information given in these documents.

Article 32

Verification of proofs of origin

1. Subsequent verifications of proofs of origin shall be carried out at random or whenever the customs authorities of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Protocol.

2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the movement certificate EUR.1 and the invoice, if it has been submitted, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the enquiry. Any documents and information obtained suggesting that the information given on the proof or origin is incorrect shall be forwarded in support of the request for verification.

3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.

4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.

5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in the Community or in Croatia and fulfil the other requirements of this Protocol. Where the cumulation provisions in accordance with Article 3 and 4 of this Protocol were applied and in connection with Article 17(3), the reply shall include a copy (copies) of the movement certificate(s) or invoice declaration(s) relied upon.

6. If in cases of reasonable doubt there is no reply within ten months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

Article 33

Dispute settlement

Where disputes arise in relation to the verification procedures of Article 32 which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Stabilisation and Association Committee.

In all cases the settlement of disputes between the importer and the customs authorities of the importing country shall be under the legislation of the said country.

Article 34

Penalties

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

Article 35

Free zones

1. The Community and Croatia shall take all necessary steps to ensure that products traded under cover of a proof of origin which in the course of transport use a free zone situated in their territory, are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.

2. By means of an exemption to the provisions contained in paragraph 1, when products originating in the Community or in Croatia are imported into a free zone under cover of a proof of origin and undergo treatment or processing, the authorities concerned shall issue a new EUR.1 certificate at the exporter's request, if the treatment or processing undergone is in conformity with the provisions of this Protocol.

TITLE VII

CEUTA AND MELILLA

Article 36

Application of the Protocol

1. The term "Community" used in Article 2 does not cover Ceuta and Melilla.

2. Products originating in Croatia, when imported into Ceuta or Melilla, shall enjoy in all respects the same customs regime as that which is applied to products originating in the customs territory of the Community under Protocol 2 of the Act of Accession of the Kingdom of Spain and the Portuguese Republic to the European Communities. Croatia shall grant to imports of products covered by the Agreement and originating in Ceuta and Melilla the same customs regime as that which is granted to products imported from and originating in the Community.

3. For the purpose of the application of paragraph 2 concerning products originating in Ceuta and Melilla, this Protocol shall apply *mutatis mutandis* subject to the special conditions set out in Article 37.

Article 37

Special conditions

1. Providing they have been transported directly in accordance with the provisions of Article 13, the following shall be considered as:

- (1) products originating in Ceuta and Melilla:
- (a) products wholly obtained in Ceuta and Melilla;
 - (b) products obtained in Ceuta and Melilla in the manufacture of which products other than those referred to in (a) are used, provided that:
 - (i) the said products have undergone sufficient working or processing within the meaning of Article 6 of this Protocol; or that
 - (ii) those products are originating in Croatia or the Community within the meaning of this Protocol, provided that they have been submitted to working or processing which goes beyond the insufficient working or processing referred to in Article 7(1).
- (2) products originating in Croatia:
- (a) products wholly obtained in Croatia;
 - (b) products obtained in Croatia, in the manufacture of which products other than those referred to in (a) are used, provided that:
 - (i) the said products have undergone sufficient working or processing within the meaning of Article 6 of this Protocol; or that
 - (ii) those products are originating in Ceuta and Melilla or the Community within the meaning of this

Protocol, provided that they have been submitted to working or processing which goes beyond the insufficient working or processing referred to in Article 7(1).

- 2. Ceuta and Melilla shall be considered as a single territory.
- 3. The exporter or his authorised representative shall enter "Croatia" and "Ceuta and Melilla" in Box 2 of movement certificates EUR.1 or on invoice declarations. In addition, in the case of products originating in Ceuta and Melilla, this shall be indicated in Box 4 of movement certificates EUR.1 or on invoice declarations.
- 4. The Spanish customs authorities shall be responsible for the application of this Protocol in Ceuta and Melilla.

TITLE VIII

FINAL PROVISIONS

Article 38

Amendments to the Protocol

The Stabilisation and Association Council may decide to amend the provisions of this Protocol.

ANNEX I

INTRODUCTORY NOTES TO THE LIST IN ANNEX II

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 6.

Note 2:

- 2.1. The first two columns in the list describe the product obtained. The first column gives the heading number or Chapter number used in the Harmonised System and the second column gives the description of goods used in that system for that heading or Chapter. For each entry in the first two columns a rule is specified in column 3 or 4. Where, in some cases, the entry in the first column is preceded by an "ex", this signifies that the rules in column 3 or 4 apply only to the part of that heading as described in column 2.
- 2.2. Where several heading numbers are grouped together in column 1 or a Chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Harmonised System, are classified in headings of the Chapter or in any of the headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.
- 2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 has to be applied.

Note 3:

- 3.1. The provisions of Article 6, concerning products having acquired originating status which are used in the manufacture of other products, shall apply, regardless of whether this status has been acquired inside the factory where these products are used or in another factory in Croatia or in the Community.

Example:

An engine of heading N° 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 % of the ex-works price, is made from "other alloy steel roughly shaped by forging" of heading N° ex 7224.

If this forging has been forged in Croatia from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading N° ex 7224 in the list. The forging can then count as originating in the value-calculation for the engine, regardless of whether it was produced in the same factory or in another factory in Croatia. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.2. The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.
- 3.3. Without prejudice to Note 3.2, where a rule states that "materials of any heading" may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression "manufacture from materials of any heading, including other materials of heading No ..." means that only materials classified in the same heading as the product and of a different description than that of the product as given in column 2 of the list may be used.
- 3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of headings Nos 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other, or both.

- 3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

Example:

The rule for prepared foods of heading N° 1904, which specifically excludes the use of cereals and their derivatives, does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth — even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn — that is, the fibre stage.

- 3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4:

- 4.1. The term “natural fibres” is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres which have been carded, combed or otherwise processed, but not spun.
- 4.2. The term “natural fibres” includes horsehair of heading N° 0503, silk of headings Nos 5002 and 5003, as well as wool-fibres and fine or coarse animal hair of headings Nos 5101 to 5105, cotton fibres of headings Nos 5201 to 5203, and other vegetable fibres of headings Nos 5301 to 5305.
- 4.3. The terms “textile pulp”, “chemical materials” and “paper-making materials” are used in the list to describe the materials, not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 4.4. The term “man-made staple fibres” is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings Nos 5501 to 5507.

Note 5:

- 5.1. Where, for a given product in the list, reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent 10 % or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below.)
- 5.2. However, the tolerance mentioned in Note 5.1 may be applied only to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,

- jute and other textile bast fibres,
- sisal and other textile fibres of the genus *Agave*,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- current-conducting filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped,
- products of heading N° 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading N° 5605.

Example:

A yarn, of heading N° 5205, made from cotton fibres of heading N° 5203 and synthetic staple fibres of heading N° 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 % of the yarn.

Example:

A woollen fabric, of heading N° 5112, made from woollen yarn of heading N° 5107 and synthetic yarn of staple fibres of heading N° 5509, is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp), or woollen yarn which does not satisfy the origin-rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning), or a combination of the two, may be used provided their total weight does not exceed 10 % of the weight of the fabric.

Example:

Tufted textile fabric, of heading N° 5802, made from cotton yarn of heading N° 5205 and cotton fabric of heading N° 5210, is a only mixed product if the cotton fabric is itself a mixed fabric made from yarns classified in two separate headings, or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading N° 5205 and synthetic fabric of heading N° 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is, accordingly, a mixed product.

- 5.3. In the case of products incorporating “yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped”, this tolerance is 20 % in respect of this yarn.
- 5.4. In the case of products incorporating “strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film”, this tolerance is 30 % in respect of this strip

Note 6:

- 6.1. Where, in the list, reference is made to this Note, textile materials (with the exception of linings and interlinings), which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.
- 6.2. Without prejudice to Note 6.3, materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

- 6.3. Where a percentage-rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

- 7.1. For the purposes of headings Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the “specific processes” are the following:
- (a) vacuum-distillation;
 - (b) redistillation by a very thorough fractionation-process; ⁽¹⁾
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation.
- 7.2. For the purposes of headings Nos 2710, 2711 and 2712, the “specific processes” are the following:
- (a) vacuum-distillation;
 - (b) redistillation by a very thorough fractionation-process T ⁽²⁾;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (ij) isomerisation;
 - (k) in respect of heavy oils of heading N° ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 % of the sulphur-content of the products processed (ASTM D 1266-59 T method);

⁽¹⁾ See Additional Explanatory Note 4(b) to Chapter 27 of the Combined Nomenclature.

⁽²⁾ See Additional Explanatory Note 4 (b) to Chapter 27 of the Combined Nomenclature.

- (l) in respect of products of heading N° 2710 only, deparaffining by a process other than filtering;
 - (m) in respect of heavy oils of heading N° ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250 °C, with the use of a catalyst, other than to effect desulphurization, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading N° ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (n) in respect of fuel oils of heading N° ex 2710 only, atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C, by the ASTM D 86 method;
 - (o) in respect of heavy oils other than gas oils and fuel oils of heading N° ex 2710 only, treatment by means of a high-frequency electrical brush-discharge.
- 7.3. For the purposes of headings Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations, such as cleaning, decanting, desalting, water-separation, filtering, colouring, marking, obtaining a sulphur-content as a result of mixing products with different sulphur-contents, or any combination of these operations or like operations, do not confer origin.

3. Where the applicant authority seeks assistance which it would itself be unable to provide if so requested, it shall draw attention to that fact in its request. It shall then be for the requested authority to decide how to respond to such a request.

To that end, contracting parties shall communicate to each other information on their applicable rules, including, where appropriate, legal provisions in force in the Member States of the Community.

3. The use, in judicial or administrative proceedings instituted in respect of operations in breach of customs legislation, of information obtained under this Protocol, is considered to be for the purposes of this Protocol. Therefore, the Contracting Parties may, in their records of evidence, reports and testimonies and in proceedings and charges brought before the courts, use as evidence information obtained and documents consulted in accordance with the provisions of this Protocol. The competent authority which supplied that information or gave access to those documents shall be notified of such use.

4. Information obtained shall be used solely for the purposes of this Protocol. Where one of the Contracting Parties wishes to use such information for other purposes, it shall obtain the prior written consent of the authority which provided the information. Such use shall then be subject to any restrictions laid down by that authority.

Article 11

3. In respect of questions relating to the applicability of this Protocol, the Contracting Parties shall consult each other to resolve the matter in the framework of the Stabilisation and Association Committee set up under Article 114 of the Stabilisation and Association Agreement.

PROTOCOL 6 on land transport

Article 1

Aim

INFRASTRUCTURE

Article 4

General Provision

The Contracting Parties hereby agree to adopt mutually coordinated measures to develop a multimodal transport infrastructure network as a vital means of solving the problems affecting the carriage of goods through Croatia in particular on the Pan-European Corridors V, VII, X and the Adriatic/Ionian Pan-European Transport Area connecting to Corridor VIII.

Article 5

Planning

The development of a multimodal regional transport network on the Croatian territory which serves the needs of Croatia and the South-Eastern European region covering the main road and rail routes, inland waterways, inland ports, ports, airports and other relevant modes of the network is of particular interest to the Community and Croatia. This network shall connect to the regional, Trans or Pan-European networks of the neighbouring countries and be interoperable with the Trans-European Transport Network of the Community. The respective projects and priorities will be assessed in accordance with methods used in the Transport Infrastructure Needs Assessment (TINA) taking into account the TINA results in neighbouring countries. The results of this assessment should identify the transport priorities for allocating Croatia's own resources and any Community co-financing to projects on this network.

*Article 6***Financial aspects**

1. The Community shall contribute financially, under Article 107 of the Agreement, to the necessary infrastructure work referred to in Article 5. This financial contribution may take the form of credit from the European Investment Bank and any other form of financing which can provide further additional resources.

2. In order to speed up the work the Commission will endeavour, as far as possible, to encourage the use of additional resources such as investment by certain Member States on a bilateral basis or from public or private funds.

RAIL AND COMBINED TRANSPORT*Article 7***General provision**

The Parties shall adopt the mutually coordinated measures necessary for the development and promotion of rail and combined transport as a mean of ensuring that in the future a major proportion of their bilateral and transit transport through Croatia is performed under more environmentally-friendly conditions.

*Article 8***Particular aspects relating to infrastructure**

As part of the modernisation of the Croatian railways, the necessary steps shall be taken to adapt the system for combined transport, with particular regard to the development or building of terminals, tunnel gauges and capacity, which require substantial investment.

*Article 9***Supporting measures**

The Parties shall take all the steps necessary to encourage the development of combined transport.

The purpose of such measures shall be:

- to encourage the use of combined transport by users and consignors,
- to make combined transport competitive with road transport, in particular through the financial support of the Community or Croatia in the context of their respective legislations,
- to encourage the use of combined transport over long distances and to promote, in particular the use of swap bodies, containers and unaccompanied transport in general,

- to improve the speed and reliability of combined transport and in particular:
 - to increase the frequency of convoys in accordance with the needs of consignors and users,
 - to reduce the waiting time at terminals and increase their productivity,
 - to remove in an appropriate manner, all obstacles from the approach routes so as to improve access to combined transport,
 - to harmonise, where necessary, the weights, dimensions and technical characteristics of specialised equipment, in particular so as to ensure the necessary compatibility of gauges, and to take coordinated action to order and to put into service such equipment as is required by the level of traffic,
- and, in general, to take any other appropriate action.

*Article 10***The role of the railways**

In connection with the respective powers of the States and the railways, the Parties shall, in respect of both passenger and goods transport, recommend that their railways:

- step up cooperation, whether bilateral, multilateral or within international railway organisations, in all fields, with particular regard to the improvement of the quality and the safety of transport services,
- try to establish in common a system of organising the railways so as to encourage consignors to send freight by rail rather than road, in particular for transit purposes, on a basis of fair competition and while leaving the user freedom of choice in this matter,
- to prepare the participation of Croatia within the Trans-European Freight Network as defined in the Community *acquis* on the development of the railways.

ROAD TRANSPORT*Article 11***General Provisions**

1. With regard to mutual access to transport markets, the Parties agree, initially and without prejudice to paragraph 2, to maintain the regime resulting from bilateral agreements or other existing international bilateral instruments concluded between each Member State of the Community and Croatia or, where there are no such agreements or instruments, arising from the de facto situation in 1991.

However, whilst awaiting the conclusion of an agreement between the Community and Croatia on access to the road transport market, as provided for in Article 12, and on road taxation, as provided for in Article 13(2), Croatia shall cooperate with the Member States of the Community to amend these bilateral agreements to adapt them to this Protocol.

2. The Parties hereby agree to grant unrestricted access to Community transit traffic through Croatia and to Croatian transit traffic through the Community with effect from the date of entry into force of this Agreement.

3. By way of derogation from paragraph 2 the following provisions will apply to Croatian transit traffic through Austria:

(a) until 31 December 2002 a regime for Croatian transit identical to that applied under the bilateral Agreement between Austria and Croatia, signed on 6 June 1995, will be maintained. No later than 30 June 2002 the Parties will examine the functioning of the regime applied between Austria and Croatia in the light of the principle of non-discrimination which must apply to heavy goods vehicles from the European Community and such vehicles from Croatia in transit through Austria. Appropriate measures will be taken in order to ensure, if necessary, effective non-discrimination;

(b) with effect from 1 January 2003 a system of ecopoints similar to that laid down by Article 11 of Protocol No 9 to the 1994 Act of Accession of Austria to the European Union will apply until 31 December 2003. The method of calculation and the detailed rules and procedures for the management and control of the ecopoints will be agreed in good time by means of an exchange of letters between the Contracting Parties and will be in line with the provisions of Articles 11 and 14 of the abovementioned Protocol No 9.

4. If, as a result of the rights granted under paragraph 2, transit traffic by Community hauliers increases to such a degree as to cause or threaten to cause serious harm to road infrastructure and/or traffic fluidity on the axes mentioned in Article 5, and under the same circumstances problems arise on Community territory close to the Croatian borders, the matter shall be submitted to the Stabilisation and Association Council in accordance with Article 113 of the Agreement. The Parties may propose exceptional temporary, non-discriminatory measures as are necessary to limit or mitigate such harm.

5. If the European Community establishes rules aiming to reduce pollution caused by heavy goods vehicles registered in the European Union equivalent rules shall apply to heavy goods vehicles registered in Croatia that wish to circulate through the Community territory. The Stabilisation and Association Council shall decide on the necessary modalities.

6. The Parties shall refrain from taking any unilateral action that might lead to discrimination between Community and Croatian carriers or vehicles. Each Contracting Party shall take all steps necessary to facilitate road transport to or through the territory of the other Contracting Party.

Article 12

Access to the market

The Parties shall, as a matter of priority, undertake to work together to seek, each of them subject to their internal rules,

- courses of action likely to favour the development of a transport system which meets the needs of the Contracting Parties, and which is compatible, on the one hand, with the completion of the internal Community market and the implementation of the common transport policy and, on the other hand, with Croatia's economic and transport policy,
- a definitive system for regulating future road transport market access between Contracting Parties on the basis of reciprocity.

Article 13

Taxation, tolls and other charges

1. The Parties accept that the taxation of road vehicles, tolls and other charges on either side must be non-discriminatory.

2. The Parties shall enter into negotiations with a view to reaching an agreement on road taxation, as soon as possible, on the basis of the rules adopted by the Community on this matter. The purpose of this Agreement shall be, in particular, to ensure the free flow of trans-frontier traffic, to progressively eliminate differences between the road taxation systems applied by the Parties and to eliminate distortions of competition arising from such differences.

3. Pending the conclusion of the negotiations mentioned in paragraph 2, the Parties will eliminate discrimination between hauliers of the Community or Croatia when levying taxes and charges on the circulation and/or possession of heavy goods vehicles as well as taxes or charges levied on transport operations in the territory of the Parties. Croatia undertakes to notify the Commission of the European Communities, if so requested, of the amount of taxes, tolls and charges which it applies, as well as the method of calculating them.

4. Until the conclusion of the agreements mentioned in paragraph 2 and in Article 12 any change proposed after the entry into force of this Agreement to fiscal charges, tolls or other charges, including the systems for their collection which may be applied to Community traffic in transit through Croatia will be subject to a prior consultation procedure.

Article 14

Weights and dimensions

1. Croatia accepts that road vehicles complying with Community standards on weights and dimensions may circulate freely and without hindrance in this respect on the routes covered by Article 5. During six months after the entry into force of this Agreement, road vehicles which do not comply with existing Croatian standards may be subject to a special non-discriminatory charge which reflects the damage caused by additional axle weight.

2. Croatia will endeavour to harmonise its existing regulations and standards for road construction with the legislation prevailing in the Community by the end of the fifth year after the entry into force of this Agreement and will make major efforts for improvement of the existing routes covered by Article 5 to those new regulations and standards within the proposed time, in accordance with its financial possibilities.

Article 15

Environment

1. In order to protect the environment, the Parties shall endeavour to introduce standards on gaseous and particulate emissions and noise levels for heavy goods vehicles, which ensure a high level of protection.

2. In order to provide the industry with clear information and to encourage coordinated research, programming and production, exceptional national standards in this field shall be avoided.

Vehicles which comply with standards laid down by international agreements also relating to environment may operate without further restrictions in the territory of the Parties.

3. For the purpose of introducing new standards, the Parties shall work together to achieve the abovementioned objectives.

Article 16

Social aspects

1. Croatia shall harmonise its legislation on the training of road haulage personnel, particularly with respect to the carriage of dangerous goods, with Community standards.

2. Croatia, as a Contracting Party to the European Agreement concerning the work of crews of vehicles engaged in international road transport (ERTA), and the Community will coordinate to the maximum extent possible their policies concerning driving time, interruptions and rest periods for drivers and crew composition, in respect of the future development of the social legislation in this area.

3. The Parties shall cooperate with regard to implementation and enforcement of the social legislation in the field of road transport.

4. The Parties shall ensure the equivalence of their respective laws on the admission to the occupation of road haulage operator, with a view to their mutual recognition.

Article 17

Provisions relating to traffic

1. The Parties shall pool their experience and endeavour to harmonise their legislation so as to improve the flow of traffic during peak periods (weekends, public holidays, the tourist season).

2. In general, the Parties shall encourage the introduction, development and coordination of a road traffic information system.

3. They shall endeavour to harmonise their legislation on the carriage of perishable goods, live animals and dangerous substances.

4. The Parties shall also endeavour to harmonise the technical assistance to be provided to drivers, the dissemination of essential information on traffic and other matters of concern to tourists, and emergency services including ambulance services.

SIMPLIFICATION OF FORMALITIES

Article 18

Simplification of formalities

1. The Parties agree to simplify the flow of goods by rail and road, whether bilateral or in transit.

2. The Parties agree to begin negotiations with a view to concluding an agreement on the facilitation of controls and formalities relating to the carriage of goods.

3. The Parties agree, to the extent necessary, to take joint action on, and to encourage, the adoption of further simplification measures.

FINAL PROVISIONS*Article 19***Widening of the scope**

If one of the Parties concludes, on the basis of experience in the application of this Protocol, that other measures which do not fall within the scope of the Protocol are in the interest of a coordinated European transport policy and, in particular, may help to solve the problem of transit traffic, it shall make suggestions in this respect to the other Party.

*Article 20***Implementation**

1. Cooperation between the Parties shall be carried out within the framework of a special subcommittee to be set up in accordance with Article 115 of the Agreement.

2. This subcommittee in particular:

- (a) shall draw up plans for cooperation on rail and combined transport, transport research and the environment;
- (b) shall analyse the application of the decisions contained in this Protocol and shall recommend to the Stabilisation and Association Committee appropriate solutions for any possible problems which might arise;
- (c) shall, two years after the entry into force of the Agreement, undertake an assessment of the situation as regards infrastructure improvement and the implications of free transit;
- (d) shall coordinate the monitoring, forecasting and other statistical work relating to international transport and in particular transit traffic.

*Article 21***Annexes**

The Annexes shall form an integral part of this Protocol.

XI PIELIKUMS

"I PIELIKUMS

Ievadpiezīmes sarakstam II pielikumā

1. piezīme:

Sarakstā ir izklāstīti nosacījumi, kas ir nepieciešami, lai visi produkti tiktu uzskatīti par pietiekoši apstrādātiem šā Protokola 6. panta nozīmē.

2. piezīme:

- 2.1. Pirmajās divās slejās ir aprakstīts iegūtais produkts. Pirmajā slejā ir uzrādīts Harmonizētajā preču apraksta un kodēšanas sistēmā izmantotais pozīcijas vai nodaļas numurs, bet otrajā slejā ir uzrādīts šajā sistēmā konkrētajā pozīcijā vai nodaļā izmantotās preces apraksts. Katram ierakstam pirmajās divās slejās ir 3. vai 4. slejā norādīts noteikums. Dažos gadījumos pirms ieraksta pirmajā slejā ir "ex", kas norāda, ka noteikumi 3. un 4. slejā attiecas tikai uz daļu no pozīcijā minētajiem produktiem, kā aprakstīts 2. slejā.
- 2.2. Gadījumos, kad 1. slejā kopā ir sagrupēti vairāki pozīciju numuri vai ir dots nodaļas numurs un tāpēc apraksts 2. slejā ir vispārīgs, 3. un 4. slejā esošie noteikumi attiecas uz visiem produktiem, kas saskaņā ar Harmonizēto preču apraksta un kodēšanas sistēmu ir klasificēti nodaļu pozīcijās vai pozīcijās, kas sagrupētas 1. slejā.
- 2.3. Gadījumos, kad sarakstā ir dažādi noteikumi, kas attiecas uz vienā pozīcijā esošiem dažādiem produktiem, katrā atkāpē ir pozīcijas daļas apraksts, uz kuru attiecas 3. un 4. slejā esošie noteikumi.
- 2.4. Gadījumos, kad ierakstam pirmajās divās slejās noteikums ir norādīts gan 3., gan 4. slejā, eksportētājs drīkst izvēlēties vai 3. slejā, vai 4. slejā minēto noteikumu. Ja preču izcelsmes noteikums nav minēts 4. slejā, ir jāpiemēro 3. slejā minētais noteikums.

3. piezīme:

- 3.1. Protokola 6. panta noteikumi par to, ka produkti, kuri tiek izmantoti citu produktu ražošanā, ir ieguvuši izcelsmes statusu, tiks piemēroti neatkarīgi no tā, vai šis statuss ir iegūts fabrikā, kur šie produkti tiek lietoti, vai citā fabrikā, kas atrodas Kopienas vai Horvātijas teritorijā.

Piemērs:

Dzinējs no pozīcijas 8407, par kuru noteikumā ir minēts, ka nenoteiktas izcelsmes izejvielas, kuras var tikt izmantotas, nedrīkst pārsniegt 40 % no cenas, kurā ir ieskaitīta arī samaksa par piegādi no rūpnīcas, ir ražots no "cita sakausējuma tērauda ar ne līdz galam izstrādātām formu, kas iegūta kaļot" no pozīcijas ex 7224.

Ja šī kalšana ir veikta Kopienā no nenoteiktas izcelsmes stieņa, tas jau ir ieguvis izcelsmes statusu pateicoties noteikumam, kas attiecas uz pozīciju ex 7224. Šajā gadījumā kalšanas izcelsmi var uzskatīt par iegūtu dzinēja vērtības aprēķināšanā, neatkarīgi no tā, vai tas ir izgatavots tajā pašā fabrikā, vai kādā citā fabrikā Kopienas teritorijā. Tādējādi, kad tiek aprēķināta izmantoto nenoteiktas izcelsmes izejvielu vērtība, nenoteiktas izcelsmes stieņa vērtība netiek ņemta vērā.

- 3.2. Sarakstā norādītais noteikums nosaka minimālo nepieciešamo apstrādes pakāpi, un, veicot lielāku apstrādi, arī tiek piešķirts izcelsmes statuss; bet pretējā gadījumā, veicot, mazāku apstrādi, netiek piešķirts izcelsmes statuss. Tādējādi, ja noteikumā ir paredzēts, ka kādā konkrētā ražošanas stadijā var tikt izmantotas nenoteiktas izcelsmes izejvielas, šādu izejvielu izmantošana agrāk ražošanas procesā ir atļauta, bet šādu izejvielu izmantošana vēlāk ražošanas stadijā nav atļauta.
- 3.3. Bez ierobežojuma 3. piezīmes 2. apakšpunktā, kur noteikumā ir lietota frāze "Izstrādājums no izejvielām no jebkuras pozīcijas", var tikt izmantotas izejvielas no jebkuras(-ām) pozīcijas(-ām) (pat izejvielas ar tādu pašu aprakstu un no tās pašas pozīcijas kā produkti), tomēr ar īpašiem ierobežojumiem, kas arī var būt norādīti noteikumā.

Tomēr frāze "Izstrādājums no izejvielām, kas norādītas jebkurā pozīcijā, tajā skaitā citas izejvielas no pozīcijas....." vai "Izstrādājums no izejvielām, kas norādītas jebkurā pozīcijā, tajā skaitā citas izejvielas no tās pašas pozīcijas, kurā norādīts ir arī produkts" nozīmē to, ka var tikt izmantotas izejvielas no jebkuras(-ām) pozīcijas(-ām), izņemot tās, kurām ir tāds pats apraksts kā produktam, kas norādīts saraksta 2. slejā.

- 3.4. Ja noteikums sarakstā norāda, ka produkts var būt ražots no vairāk nekā vienas izejvielas, tas nozīmē, ka var tikt lietotas vienas vai vairākas izejvielas. Tas nenozīmē, ka visas ir jāizmanto.

Piemērs:

Noteikums, kas attiecas uz audumiem no pozīcijas 5208 līdz pozīcijai 5212, ka var tikt izmantotas gan dabīgās šķiedras, gan no citām izejvielām arī ķīmiskās izejvielas. Tas nenozīmē, ka ir jāizmanto abas; vienlaicīgi ir iespējams izmantot vai nu vienu, vai otru, vai abas.

- 3.5. Ja noteikums sarakstā norāda, ka produktam ir jābūt ražotam no vienas konkrētas izejvielas, šis nosacījums neaizliedz tādu izejvielu izmantošanu, kas, savas iedzīmtās īpašības dēļ, neatbilst noteikuma prasībām. (Saistībā ar audumiem skat. zemāk 6. piezīmes 2. apakšpunktu).

Piemērs:

Noteikums, kas attiecas uz jau gataviem pārtikas produktiem no pozīcijas 1904, kur ir īpaši norādīts, ka nedrīkst tikt izmantoti labības graudi un to atvasinājumi, nenosaka, ka ir aizliegts izmantot minerālsāļus, ķīmikālijas un citas piedevas, kas nav iegūtas no labības graudiem.

Tomēr tas neattiecas uz produktiem, kuri, lai arī nevar būt ražoti no konkrētām sarakstā norādītām izejvielām, var būt ražoti no izejvielas ar to pašu īpašību agrīnā ražošanas stadijā.

Piemērs:

Gadījumā ar līguma ex 62. sadaļas pantu par šūtiem izstrādājumiem, kas ražoti no izejvielām, kas nav austas, ja ir atļauta tikai nenoteiktas izcelsmes pavediena izmantošana šīs grupas pantam, ražošanas procesu nav iespējams sākt no neausta auduma, pat ja neausti audumi parasti nevar būt izgatavoti no pavediena. Šādos gadījumos sākotnējais materiāls parasti būtu vienu stadiju pirms vilnas iegūšanas, t.i. šķiedru stadijā.

- 3.6. Ja sarakstā minētajā noteikumā divi procenti ir doti kā atļauto nenoteiktas izcelsmes izejvielu maksimālā vērtība, tad šos procentus nedrīkst saskaitīt, tas ir, visu izmantoto nenoteiktas izcelsmes materiālu maksimālā vērtība nevar pārsniegt doto procentu daudzumu. Turklāt atsevišķo procentu daudzumu nedrīkst pārsniegt attiecībā uz konkrētām izejvielām, kurām šie procenti ir jāpiemēro.

4. piezīme:

- 4.1. Termins "dabīgās šķiedras" sarakstā attiecas uz šķiedrām, kas nav mākslīgas vai sintētiskas. Šis termins attiecas uz šķiedrām pirms vēršanas, tajā skaitā rūpnieciskie atkritumi un, ja nav norādīts citādi, arī šķiedras, kas ir kārstas vai citādi apstrādātas, bet ne vērptas.
- 4.2. Termins "dabīgās šķiedras" attiecas arī uz zirgu astriem no pozīcijas 0503, zīdu no pozīcijām 5002 un 5003, kā arī vilnas šķiedrām un augstas vai zemas kvalitātes dzīvnieku vilnu no pozīcijas 5002 līdz pozīcijai 5105, kokvilnas šķiedrām no pozīcijas 5201 līdz pozīcijai 5203 un citas dārzu šķiedras no pozīcijas 5301 līdz pozīcijai 5305.
- 4.3. Termini "mākslīgo šķiedru celuloze", "ķīmiskās izejvielas" un "papīrražošanas izejmateriāli" sarakstā tiek lietoti, lai aprakstītu izejvielas, kas nav sargrupētas sākot ar 50. līdz 63. nodaļai, kas var tikt izmantotas mākslīgo, sintētisko vai papīra šķiedru vai vilnas ražošanā.
- 4.4. Termins "sintētiskās štāpeļšķiedras" sarakstā attiecas uz sintētiskām vai mākslīgām šķiedru klūgām, štāpeļšķiedrām vai atkritumiem no pozīcijas 5501 līdz pozīcijai 5507.

5. piezīme:

- 5.1. Ja pie kāda produkta sarakstā ir dota atsauce uz šo Piezīmi, 3. slejā izklāstītie noteikumi netiks piemēroti nevienai no tekstilrūpniecībā izmantojamām pamatizejvielām, kas izmantota šī produkta ražošanā, un kas, kopā ņemto ir 10 % vai mazāk no visu izmantoto tekstilrūpniecībā izmantoto pamatizejvielu kopējā svara. (Skat. arī zemākminētos 5. piezīmes 3. un 4. apakšpunktu.)
- 5.2. Tomēr pielaide, kas minēta 5. piezīmes 1. apakšpunktā, var tikt piemērota tikai jauktiem produktiem, kas ir ražoti no divām vai vairākām tekstilrūpniecībā izmantojamām pamatizejvielām.

Tekstilrūpniecībā izmantojamās pamatizejvielas:

- zīds,
- vilna,
- zemas kvalitātes dzīvnieku vilna,
- augstas kvalitātes dzīvnieku vilna,
- zirgu astri,
- kokvilna,

- izejvielas papīrražošanai un papīrs,
- lini,
- īsti kaņepāji,
- dzuta un citas tekstila lūksnas šķiedras,
- sizals un citas tekstilšķiedras no īstas agaves,
- kokosrieksti, abaka, rami un citu dārzeņu tekstilšķiedras,
- sintētiskas mākslīgās šķiedras,
- mākslīgās šķiedras,
- strāvu vadošas šķiedras,
- polipropilēna sintētiskās štāpeļšķiedras,
- poliestera sintētiskās štāpeļšķiedras,
- poliamīda sintētiskās štāpeļšķiedras,
- poliakrilonitrila sintētiskās štāpeļšķiedras,
- polimīda sintētiskās štāpeļšķiedras,
- politetrafluoroetilēna sintētiskās štāpeļšķiedras,
- poli(fenilīna sulfīda) sintētiskās štāpeļšķiedras,
- poli(vinilhlorīda) sintētiskās štāpeļšķiedras,
- citas sintētiskās štāpeļšķiedras,
- viskozes mākslīgās štāpeļšķiedras,
- citas mākslīgās štāpeļšķiedras,
- pozamenta vai parasts diegs, kas ražots no poliuretāna, kura sastāvā ir elastīgs poliēteris
- pozamenta vai parasts diegs, kas ražots no poliuretāna, kura sastāvā ir elastīgs poliēteris,
- produkti no pozīcijas 5605 (diegi ar metāla šķiedrām), kam pievienota sloksne, kas sastāv no alumīnija folijas vai plastmasas plēves nukleja ar vai bez alumīnija pulvera pārklājuma, un šīs sloksnes platums nepārsniedz 5 mm, kur divas plastmasas plēves sloksnes ir sastiprinātas kopā ar caurspīdīgu vai krāsainu līmi,
- citi produkti no pozīcijas 5605.

Piemērs:

Diegs no pozīcijas 5205, kas ražots no kokvilnas šķiedrām no pozīcijas 5203 un sintētiskām štāpeļšķiedrām no pozīcijas 5506, ir jaukts diegs. Tāpēc nenoteiktas izcelsmes sintētiskās štāpeļšķiedras, kas neatbilst izcelsmes noteikumu prasībām (kurās ir prasīts ražošanas procesā izmantot ķīmiskas izejvielas vai mākslīgās šķiedras celulozi), var izmantot, ar nosacījumu, ka to kopējais svars nepārsniedz 10 % no diega svara.

Piemērs:

Vilnas audums no pozīcijas 5112, kas ražots no vilnas diega no pozīcijas 5107 un sintētisko štāpeļšķiedru diega no pozīcijas 5509, ir jaukts audums. Tāpēc var tikt izmantots sintētiskais diegs, kas neatbilst izcelsmes noteikumu prasībām (kurās ir prasīts ražošanas procesā izmantot ķīmiskas izejvielas vai mākslīgās šķiedras celulozi) vai vilnas diegs, kas neatbilst izcelsmes noteikumu prasībām (kurās ir prasīts ražošanas procesā izmantot kārstas vai citādi vērpsšanai apstrādātas dabīgās šķiedras), vai arī abus, ar nosacījumu, ka to kopējais svars nepārsniedz 10 % no auduma svara.

Piemērs:

Pušķainis tekstilaudums no pozīcijas 5802, kas ražots no kokvilnas diega no pozīcijas 5205 un kokvilnas auduma no pozīcijas 5210, ir jaukts produkts gadījumā, ja pats kokvilnas audums ir no diegiem ražots jaukts audums, kas sagrupēts divās atsevišķās pozīcijās, vai arī, ja kokvilnas diegi ir sajaukumi.

Piemērs:

Ja jau minētais pušķainais tekstilaudums ir ražots no kokvilnas diega no pozīcijas 5205 un sintētiskām izejvielām no pozīcijas 5407, tad acīmredzot izmantotie diegi ir divas atšķirīgas tekstilrūpniecībā izmantojamas pamatizejvielas, un tādējādi pušķainais tekstilaudums arī ir jaukts produkts.

- 5.3. Ja produktu aprakstā ir minēts "pozamenta vai parasti diegi, kas ražoti no poliuretāna, kura sastāvā ir elastīgs poliēteris", šī pielāide attiecībā uz šo diegu ir 20 %.
- 5.4. Ja produktu aprakstā ir minēts "sloksne, kas sastāv no alumīnija folija vai plastmasas plēves nukleja ar vai bez alumīnija pulvera pārklājumu, un šīs sloksnes platums nepārsniedz 5 mm, kur divas plastmasas plēves sloksnes ir sastiprinātas kopā ar caurspīdīgu vai krāsainu līmi", tad pielāide attiecībā uz šo sloksni ir 30 %.

6. piezīme:

- 6.1. Ja pie kāda produkta sarakstā ir dota atsauce uz šo Piezīmi, var izmantot tekstilrūpniecībā izmantojamās izejvielas (izņemot oderējumu un papildus oderējumu), kas neatbilst saraksta 3. slejā minētā noteikuma prasībām par konkrētā produkta īpašībām, ar nosacījumu, ka tās ir sagrupētas citā pozīcijā un ka to vērtība nepārsniedz 8 % no produkta cenas, kurā ir ieskaitīta samaksa par piegādi no fabrikas.
- 6.2. Bez norādes uz 6. piezīmes 3. apakšpunktu tekstilizstrādājumu ražošanā, neatkarīgi no tā vai to ražošanā ir vai nav nepieciešami audumi, bez ierobežojumiem var izmantot izejvielas, kas nav sagrupētas no 50. līdz 63. sadaļai.

Piemērs:

Ja noteikums sarakstā nosaka, ka konkrēta tekstilizstrādājuma (piemēram, bikšu) šūšanā ir jāizmanto diegs, tas neizslēdz metālisku izstrādājumu izmantošanu, piemēram, pogas, jo pogas nav sagrupētas no 50. līdz 63. sadaļai. Šī paša iemesla dēļ, rāvējslēdzēju izmantošana arī nav aizliegta, lai arī rāvējslēdzēji tiek ražoti no audumiem.

- 6.3. Gadījumos, kad tiek piemērots procentu noteikums, tādu izejmateriālu vērtība, kas nav sagrupēti no 50. līdz 63. sadaļai, ir jāņem vērā aprēķinot izmantoto nenoteiktas izcelsmes izejvielu vērtību.

7. piezīme:

- 7.1. "Specifiski procesi", kas attiecas uz pozīcijām ex 2707, no 2713 līdz 2715, ex 2901, ex 2902 un ex 3403, ir:

- a) destilācija ar vakuumu;

- c) krekings;
- d) pārveidošana;
- e) ekstrakcija ar selektīviem šķīdinātājiem;
- f) process, kas ietver visas sekojošās darbības: apstrāde ar koncentrētu sērskābi, oleuma vai sēra anhidrīdu; neitralizācija ar sārmu vielām; atkrāsošana un attīrīšana ar dabiski aktīvu zemi, aktivizētu zemi, aktivizēta kokogle vai boksīts;
- g) polimerizācija;
- h) alkilācija;
- ij) izomerizācija;
- k) attiecībā uz smagajām eļļām tikai no pozīcijas ex 2710, atsērošana ar ūdeņradi, kā rezultātā sēra daudzums apstrādātajā produktā samazinās par 85 % (ASTM D 1266-59 T metode);

- l) attiecībā uz produktiem tikai no pozīcijas ex 2710, deparafinēšana ar dažādām metodēm, izņemot filtrēšanu;

Tālāka pozīcijā ex 2710 norādīto mašīneļļu apstrāde ar ūdeņradi (piem., atūdeņošana vai atkrāsošana), ar mērķi īpaši uzlabot krāsu vai stabilitāti tomēr netiks uzskatīta par specifiskiem procesiem;
 - n) attiecībā uz degvielleļām tikai no pozīcijas ex 2710, atmosfērā destilācija ar metodi ASTM D 86, ar nosacījumu, ka no šo produktu daudzuma destilējas mazāk nekā 30 %, tajā skaitā nožuvumi pie 300 °C;
 - o) attiecībā uz smagajām eļļām, izņemot gāzeļļas un degvielleļļas tikai no pozīcijas Nr. 2710, apstrāde ar īsviļņu elektrisko izlādi;
 - p) attiecībā uz neapstrādātiem ražojumiem (izņemot vazelineļļu, ozokerītu, lignītvasku vai kūdras vasku, parafīnvasku ar mazāk nekā 0.75 % eļļas no masas) tikai no pozīcijas ex 2712, attaukošana ar frakcionālo kristalizāciju.
- 7.3. Attiecībā uz pozīcijām ex 2707, 2713 līdz 2715, ex 2901, ex 2902 un ex 3403 tādas vienkāršas darbības kā tīrīšana, dekantēšana, atsāļošana, ūdens atdalīšana, filtrēšana, krāsošana, marķēšana, sēra satura iegūšana, jaucot produktu ar dažādu sēra saturu, vai arī jebkura šo vai līdzīgu darbību kombinācija nepiešķir izcelsmi."
