TOELICHTING

1. De gemeenschappelijke rassenlijst voor landbouwgewassen wordt gepubliceerd overeenkomstig artikel 18 van de Richtlijn nr. 70/457/EEG van de Raad van 29 september 1970 betreffende de gemeenschappelijke rassenlijst voor landbouwgewassen⁽¹⁾.

In deze lijst zijn alle rassen opgenomen, waarvan het zaaizaad op grond van de artikelen 15 en 16 van voren genoemde richtlijn in de Europese Economische Gemeenschap aan geen enkele handelsbeperking ten aanzien van het ras is onderworpen, behalve de in artikel 15, lid 2, en artikel 19 van voren genoemde richtlijn bedoelde gevallen.

2. Deze lijst is een eerste editie. Daarin zijn de rassen opgenomen die met ingang van 31 december 1974 op het grondgebied van de oorspronkelijke Gemeenschap aan geen enkele handelsbeperking ten aanzien van het ras meer zijn onderworpen. Het betreft dus rassen die vóór 1 januari 1973 in ten minste één van de oorspronkelijke Lid-Staten officieel zijn toegelaten en die bovendien aan de eisen van de voren genoemde richtlijn voldoen⁽²⁾. Deze editie zal worden aangevuld met de gegevens die door de Lid-Staten worden verstrekt en telkens wanneer deze worden mededeeld. Regelmatig zullen nieuwe integrale edities verschijnen, waarin alle aanvullingen zijn opgenomen.
3. De gemeenschappelijke rassenlijst voor landbouwgewassen is ingedeeld volgens de gewassen waarop de richtlijn betrekking heeft. Voor elk gewas worden in alfabetische volgorde alle voor de rassen toegelaten benamingen vermeld. Deze benamingen zijn:
 - a) de benamingen waaronder een ras officieel in de Lid-Staten is toegelaten, alsmede
 - b) de andere benamingen waaronder zaai zaad van het ras eveneens wordt verhandeld.

Indien zaai zaad van één ras onder verschillende benamingen wordt verhandeld, voor de een-

voud, één afgesproken benaming gekozen. In het algemeen is de afgesproken benaming de officiële benaming die aan het ras werd gegeven in het eerst bekende toelatingsland. Alle gegevens betreffende het ras worden onder deze benaming vermeld. Voor de overige rasbenamingen wordt slechts verwezen naar de afgesproken benaming.

4. De lijst omvat drie kolommen:

Kolom 1:

ras;

Kolom 2:

land van toelating;

Deze kolom is onderverdeeld in negen rubrieken voor de verschillende Lid-Staten in de volgorde van afkortingen, die internationaal voor auto's worden gebruikt⁽³⁾.

Kolom 3:

opmerkingen.

Kolom 1 bevat alle rasbenamingen in alfabetische volgorde.

Voor de afgesproken benaming worden de gegevens over het ras over drie kolommen verdeeld, volgens de toelichting onder punt 5.

Voor de andere benamingen wordt, volgens onderstaand voorbeeld, in kolom 3 verwezen naar de afgesproken benaming:

BETA VULGARIS L.

| 1. | 2 | 3 |
|-------------------|---|---------------------|
| Anglo Maribo Poly | | = Maribo-Anglo-Poly |

Indien meer rassen van dezelfde soort of ondersoort dezelfde benaming hebben, wordt bij deze

⁽¹⁾ PB nr. L 225 van 12.10.1970, laatstelijk gewijzigd bij Richtlijn nr. 73/438/EEG, PB nr. L 356 van 27.12.1973 (Gecodificeerde versie gepubliceerd in PB nr. C 66 van 8.6.1974).

⁽²⁾ Indien dit ras in één of meer nieuwe Lid-Staten is toegelaten, is het in deze landen ook aan geen enkele handelsbeperking onderworpen.

benaming een tussen haakjes geplaatst Romeins cijfer gevoegd.

5. Voor de afgesproken benaming bevatten de drie kolommen de volgende gegevens over het ras:

5.1 Kolum 1

Onmiddellijk onder de afgesproken benaming worden in alfabetische volgorde en voorzien van een liggend streepje de andere benamingen vermeld, waaronder het in de Lid-Staten officieel is toegelaten, maar ten hoogste één per toelatingsland. Voor de overige rasbenamingen zie punt 5.3.

5.2 Kolum 2

- In de kolom van de Lid-Staten die het ras officieel hebben toegelaten, wordt een sterretje geplaatst.
- Indien de toelating beperkt is tot zaad bestemd om in andere staten in de handel te worden gebracht, wordt het sterretje tussen haakjes geplaatst.
- In de meeste gevallen staat bij het sterretje een nummer; dit nummer duidt degene aan die verantwoordelijk is voor de instandhouding in het land van toelating. De namen die met deze codenummers overeenstemmen zijn in de bijlage vermeld in de „lijst van namen van degene of degenen die verantwoordelijk zijn voor de instandhouding en van de instanties die beschikken over de lijst met de namen van degenen die voor de instandhouding verantwoordelijk zijn”.
- Een „x” in de plaats van dat nummer betekent dat er in het toelatingsland verschillende verantwoordelijken zijn, wier namen kunnen worden verkregen bij de instantie die voor de betreffende Lid-Staat in de lijst van de bijlage is aangegeven.
- Een onderstreept nummer of een onderstreepte „x” geeft te kennen dat de aldus aangeduide personen ook voor andere

landen van toelating, waarvoor geen nummer of geen „x” in de desbetreffende kolom voorkomt, voor het ras verantwoordelijk zijn.

- De bovenstaande gegevens staan vermeld op de regel waarop de benaming is vermeld waaronder het ras officieel in de Lid-Staat is toegelaten (zie punt 5.1).

5.3 Kolum 3

Deze kolom dient voor de volgende soorten vermeldingen:

- de ploidie wordt aangegeven met de letters „D” (diploid), „P” (polyploid) of „T” (tetraploid);
- de hybriden worden aangegeven met de letter „H”;
- de rasbenamingen die eventueel niet onder punt 5.1 vallen worden vermeld in alfabetische volgorde en met de afkorting van de Lid-Staat waar de benaming wordt gebruikt;
- indien een Lid-Staat is gemachtigd om de handel in zaaizaad van een bepaald ras te verbieden (artikel 15, lid 2, of artikel 19 van de voren genoemde richtlijn), wordt zulks aangegeven door „ex” na de afkorting van de Lid-Staat en de datum van deze machtiging. Indien deze machtiging limitatief is, wordt zulks aangegeven door „lim”;
- indien voor een Lid-Staat de termijn is verlengd, tijdens dewelke zaaizaad en pootgoed nog zijn onderworpen aan handelsbeperkingen ten aanzien van het ras (artikel 15, lid 7, van de voren genoemde richtlijn), wordt zulks aangegeven door na de afkorting van de betrokken Lid-Staat de uiterste datum van deze verlenging te vermelden. Indien deze machtiging limitatief is, wordt zulks aangegeven door „lim”.
