(Non-legislative acts)

REGULATIONS

COMMISSION REGULATION (EU) 2022/1343

of 29 July 2022

amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for acequinocyl, chlorantraniliprole and emamectin in or on certain products

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC ⁽¹⁾, and in particular Article 14(1)(a) and Article 49(2) thereof,

Whereas:

- (1) For acequinocyl, chlorantraniliprole and emamectin, maximum residue levels (MRLs) were set in Part A of Annex III to Regulation (EC) No 396/2005.
- (2) For acequinocyl, the European Food Safety Authority ('the Authority') submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽²⁾. For some products, the Authority recommended raising or keeping the existing MRLs. The MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. The Authority further concluded that concerning the MRLs for grapefruits, oranges, lemons, limes, mandarins, hazelnuts/cobnuts, apples, pears, quinces, medlars, loquats/Japanese medlars, table and wine grapes, tomatoes, aubergines/eggplants, hops, swine (muscle, fat, liver, kidney), bovine (muscle, fat, liver, kidney, milk), equine (muscle, fat, liver, kidney, milk) some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.
- (3) For chlorantraniliprole, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽³⁾. It recommended lowering the MRLs for almonds, Brazil nuts, cashew nuts, chestnuts, coconuts, hazelnuts/cobnuts, macadamias, pecans, pine nut kernels, pistachios, walnuts, apples, pears, quinces, medlars, loquats/Japanese medlars, sweet corn, cauliflowers, celeries, coffee beans and muscle (swine, bovine, sheep, goat and equine). For other products, it recommended raising or keeping the existing MRLs. The MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level

⁽¹⁾ OJ L 70, 16.3.2005, p. 1.

⁽²⁾ European Food Safety Authority; Reasoned opinion on the review of the existing maximum residue levels for acequinocyl according to Article 12 of Regulation (EC) No 396/2005. *EFSA Journal* 2020; 18(1): 5983.

⁽³⁾ European Food Safety Authority; Reasoned opinion on the review of the existing maximum residue levels for chlorantraniliprole according to Article 12 of Regulation (EC) No 396/2005. *EFSA Journal* 2020; 18(9): 6235.

or the level identified by the Authority. For kales, the Authority recommended to keep the existing MRL of 20 mg/kg. However, the Member States requested to raise the MRL for kales to 40 mg/kg, which is the codex maximum residue limit (CXL) for radish leaves, because radish leaves are currently classified in Part B of Annex II to Regulation (EC) No 396/2005 under the subgroup 'Kales'. In 2015 when the CXL for radish leaves was introduced in the Union legislation, radish leaves were not explicitly mentioned in the Union legislation. Hence, they were considered to belong to the subgroup 'Baby leaf crops (including brassica species)' and not to the subgroup 'Kales'. The Member States requested to follow the current classification. The Authority further concluded that concerning the MRLs for sweet peppers/bell peppers, melons, watermelons, grape leaves and similar species, peanuts/groundnuts, sunflower seeds and rapeseeds/canola seeds some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.

- (4) For emamectin, the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽⁴⁾. It proposed to change the residue definition to emamectin B1a and its salts, expressed as emamectin B1a (free base). It recommended lowering the MRLs for plums, potatoes, cucumbers, gherkins, courgettes, melons, watermelons, broccoli, cauliflowers, Brussels sprouts, head cabbages, lamb's lettuces/corn salads, lettuces, cresses and other sprouts and shoots, land cresses, Roman rocket/ rucola, red mustards, baby leaf crops (including brassica species), chervil, chives, celery leaves, parsley, sage, rosemary, thyme, basil and edible flowers, laurel/bay leaves, tarragon, peas (without pods) and globe artichokes. For other products, the Authority recommended raising or keeping the existing MRLs. The MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. The Authority further concluded that concerning the MRLs for oranges, lemons, mandarins, table and wine grapes, pumpkins, escarole/broad-leaved endives, cotton seeds, swine (muscle, fat, liver, kidney), bovine (muscle, fat, liver, kidney), sheep (muscle, fat, liver, kidney), goat (muscle, fat, liver, kidney), equine (muscle, fat, liver, kidney), other farmed terrestrial animals (muscle, fat, liver, kidney) and milk (cattle, sheep, goat, horse) some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation. The Authority also concluded that concerning the MRL for apricots some information was not available. An application pursuant to Article 6(1) of Regulation (EC) No 396/2005 requesting a modification of the existing MRLs was submitted among other products also for apricots. The Authority in its opinion ⁽⁵⁾ concluded that all requirements with respect to completeness of data submission were met, and that the modification to the MRL for apricots requested by the applicant was acceptable. This modification has been addressed in the Commission Regulation (EU) 2022/476 ⁽⁶⁾ and therefore the additional information for apricots is not needed.
- (5) Existing CXLs were taken into account in the reasoned opinions of the Authority. CXLs, which are safe for consumers in the Union, were considered for MRL setting.
- (6) As regards products on which the use of the plant protection product concerned is not authorised in the Union, and for which no import tolerances or CXLs exist, MRLs should be set at the specific limit of determination or the default MRL should apply, as provided for in Article 18(1)(b) of Regulation (EC) No 396/2005.
- (7) The Commission consulted the European Union reference laboratories for residues of pesticides as regards the need to adapt certain limits of determination. As regards several substances, those laboratories concluded that for certain commodities technical development requires the setting of specific limits of determination.

⁽⁴⁾ European Food Safety Authority; Reasoned opinion on the review of the existing maximum residue levels for emamectin according to Article 12 of Regulation (EC) No 396/2005. *EFSA Journal* 2019;17(8):5803.

⁽⁵⁾ Reasoned opinion on the modification of the existing maximum residue levels for emamectin in various crops. *EFSA Journal* 2021;19(8):6824.

⁽⁶⁾ Commission Regulation (EU) 2022/476 of 24 March 2022 amending Annexes II, III and IV to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for acetic acid, azoxystrobin, benzovindiflupyr, cyantraniliprole, cyflufenamid, emamectin, flutolanil, lime sulphur, maltodextrin and proquinazid in or on certain products (OJ L 98, 25.3.2022, p. 9).

- (8) Based on the reasoned opinions of the Authority and taking into account the factors relevant to the matter under consideration, the appropriate modifications to the MRLs fulfil the requirements of Article 14(2) of Regulation (EC) No 396/2005.
- (9) Through the World Trade Organisation, the trading partners of the Union were consulted on the new MRLs and their comments have been taken into account.
- (10) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (11) In order to allow for the normal marketing, processing and consumption of products, this Regulation should provide for a transitional arrangement for products which have been produced before the modification of the MRLs and for which information shows that a high level of consumer protection is maintained.
- (12) A reasonable period should be allowed to elapse before the modified MRLs become applicable in order to permit Member States, third countries and food business operators to prepare themselves to meet the new requirements which will result from the modification of the MRLs.
- (13) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

Annexes II and III to Regulation (EC) No 396/2005 are amended in accordance with the Annex to this Regulation.

Article 2

Regulation (EC) No 396/2005 as it stood before being amended by this Regulation shall continue to apply to products which were produced in the Union or imported into the Union before 22 February 2023.

Article 3

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 22 February 2023.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 29 July 2022.

For the Commission
The President
Ursula VON DER LEYEN

ANNEX

Annexes II and III to Regulation (EC) No 396/2005 are amended as follows:

(1) in Annex II, the following columns for acequinocyl, chlorantraniliprole and emamectin are added:

'Pesticide residues and maximum residue levels (mg/kg)

Code number	Groups and examples of individual products to which the MRLs apply (*)	Acequinocyl (F)	Chlorantraniliprole (F)	Emamectin B1a and its salts, expressed as emamectin B1a (free base) (R) (F)

(*) Indicates lower limit of analytical determination

(^e) For the complete list of products of plant and animal origin to which MRL's apply, reference should be made to Annex I

Acequinocyl (F)

(F) Fat soluble

The European Food Safety Authority identified some information on analytical methods and storage stability as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

0120060 Hazelnuts/cobnuts

The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

1011010 Muscle

1011020 Fat

1011030 Liver

1011040 Kidney

1012010 Muscle

1012020 Fat

1012030 Liver

1012040 Kidney

1015010 Muscle

1015020 Fat

1015030 Liver

1015040 Kidney

1020010 Cattle

1020040 Horse

The European Food Safety Authority identified some information on hydrolysis studies simulating pasteurisation, boiling and sterilisation as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

0110000 Citrus fruits

0110010 Grapefruits

0110020 Oranges

0110030 Lemons

0110040 Limes

0110050 Mandarins

0130000 Pome fruits

0130010 Apples

0130020 Pears

0130030 Quinces

0130040 Medlars

0130050 Loquats/Japanese medlars

0151010 Table grapes

0151020 Wine grapes

0231010 Tomatoes

0231030 Aubergines/eggplants

The European Food Safety Authority identified some information on storage stability and hydrolysis studies simulating pasteurisation, boiling and sterilisation as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

0700000 HOPS**Chlorantraniliprole (F)**

(F) Fat soluble

The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

0231020 Sweet peppers/bell peppers**0233010 Melons****0233030 Watermelons****0401020 Peanuts/groundnuts****0401050 Sunflower seeds****0401060 Rapeseeds/canola seeds**

The European Food Safety Authority identified some information on storage conditions used in the residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

0253000 (c) grape leaves and similar species**Emamectin B1a and its salts, expressed as emamectin B1a (free base) (R) (F)**

(R) The residue definition differs for the following combinations pesticide-code number: Emamectin B1a and its salts, expressed as emamectin B1a (free base) - code 1000000: Emamectin B1a

(F) Fat soluble

The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

0110020 Oranges**0110030 Lemons****0110050 Mandarins****0151010 Table grapes****0151020 Wine grapes****1011010 Muscle****1011020 Fat****1011030 Liver****1011040 Kidney****1012010 Muscle****1012020 Fat****1012030 Liver****1012040 Kidney****1013010 Muscle****1013020 Fat****1013030 Liver****1013040 Kidney****1014010 Muscle****1014020 Fat****1014030 Liver****1014040 Kidney****1015010 Muscle****1015020 Fat****1015030 Liver****1015040 Kidney****1017010 Muscle****1017020 Fat****1017030 Liver****1017040 Kidney****1020010 Cattle****1020020 Sheep****1020030 Goat****1020040 Horse**

The European Food Safety Authority identified some information on residue trials as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

0233020 Pumpkins

0251030 Escaroles/broad-leaved endives

0401090 Cotton seeds

The European Food Safety Authority identified some information on storage stability as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

0120110 Walnuts'

- (2) in Part A of Annex III, the columns for acequinocyl, chlorantraniliprole and emamectin are deleted.
-
